Railway Mortgage Bonds have met with a ready sale to investment buyers, in the instances of the favorite loans, both old and new, at firm prices. The offerings of the older issues have been quite limited, both at the Stock Board and through the commission-houses. Central Pacific Sixes have been scarce and wanted at 102¼@102½. The agents of the more prominent of the new loans report an improved inquiry on investment account. Chesapeake and Ohio Sixes have been in good demand at 94 per cent. This loan is now rapidly being closed out, the unmarketed balance being considerably less than two millions.

Railway and miscellaneous share property has been quite active, and values have been generally quoted stronger, though somewhat variable.

In response to the numerous inquiries for information concerning the mineral and agricultural resources of that part of Virginia and West Virginia tributary to the Chesapeake and Ohio Railroad, Messrs. Fisk & Hatch have had a third edition of Mr. Howell Fisher's report on the minerals of that region, to which is appendedfurther valuable matter on the subject from other trustworthy sources. Copies of the pamphlet can be had on application to the financial agents of the Company.

General business has been somewhat brisker in the line of domestic produce, with Cotton, Flour, Wheat, Cheese, Spirits Turpentine, and American Pig Iron again quoted firmer in price. Middling upland cotton closed on Wednesday at 23½@23¾ cts. per lb. The receipts at all the ports, since Sept. 1, have been 1,963,609 bales, against 2,432,391 bales same time in the preceding year; exports 1,016,091 bales against 1,397,601 bales in the previous year; stock at the ports at latest dates, 573,818 bales against 612,988 bales same date 1871.

At the Live Stock Markets, Beeves continued in good demand at from 8½@13½ cts.; Veals quiet at 5@12 cts.; Sheep at 6@9 cts. Swine, at 5⅜@5⅝ cts. per lb., all live weight. The week's receipts were 6,474 Beeves, 146 Veal Calves, 22,036 Sheep and Lambs; and 26,761 Swine.

In foreign goods, business has been on a comparatively moderate scale, with values quoted essentially unchanged. The week's imports of foreign goods reached $9,596,123 including $3,352,748 of dry goods.

Ocean freights have been moderately active, at about previous rates.

Steam room closed less firmly for Provisions, and other heavy goods.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—North Carolina 6s, special tax, 12⅝; do. Fund Act 1868, 21½; South Carolina 6s, new, Jan. and July, 30½; do., Apl. and Oct., 29; N. Y. State 7s, B. ST JOSEPH AND DENVER CITY RAILROAD COMPANY.

EXECUTIVE OFFICE, No. 31 NASSAU-ST., NEW YORK, Feb. 1, 1872.

The Coupons and registered interest due Feb. 15, 1872, on the First Mortgage Eight per Cent. (8 p. c.) Gold Bonds, (E. D.,) and the Eight per Cent. (8. p. c.) old First Mortgage Sinking Fund Land Grant Bonds (W. D.) of the St. Joseph and Denver City Railroad Company, will be paid at the office of the Farmers' Loan and Trust Company of the City of New York, upon presentation and demand, on and after that date, Free of Tax.

FRANCIS A. COFFIN,
Assistant Treasurer,
St. J. & D. C. R. R. Co.

☞ We recommend as a safe and sure investment the SIX PER CENT. BONDS OF THE CHESAPEAKE AND OHIO R. R. COMPANY, interest payable in gold coin May and November; denominations, $100, $500, $1,000. Present price 94 and accrued interest.

Also, the CENTRAL PACIFIC BONDS, interest six per cent., gold, January and July; denominations, $1,000. Market price to-day, 102½.

We buy and sell Government Securities, and execute orders at the Stock Exchange; allow interest (at 4 per cent. on deposits), make collections, &c., &c.

FISK & HATCH.
HARVEY FISK, A. S. HATCH, No. 5 Nassau street.
New York, February 3, 1872.

☞ To satisfy the very numerous inquiries for information concerning the mineral and agricultural resources of that part of Virginia and West Virginia tributary to the Chesapeake and Ohio Railroad, Messrs. FISK & HATCH have had printed a third edition of Mr. Howell Fisher's reports on the minerals of that region, to which is appended further valuable matter on the subject from other trustworthy sources. Copies of the pamphlet can be had on application to them.

☞ The Port Tobacco (Md.) *Times* says that the work of track laying, &c., on the Baltimore and Potomac Railroad will be commenced at Pope's Creek in a short time. Messrs. Seabrooke and Emack will arrive here in a few days with a large force, and even now, we learn, a vessel is on its way to the creek with iron, &c. Rapid progress will be made, as there are few or no bridges for a considerable distance on the line.

☞ The Atlantic and Great Western Railway Company has commenced refurnishing that road with rolling stock. The company has contracted with MCNAIRY, CLAFLEN & Co., of Cleveland, fo three hundred and thirty new cars, to be used on the Mahoning division.

☞ The work on the Louisville, New Albany and St. Louis Railroad is being pushed rapidly forward, and the cars will be running regularly over its whole length by the 1st of November, 1872. This road, connects with the St. Louis and Southeastern at Mt. Vernon, Ill.

☞ Another link has been added to the Vermont division of the Portland and Ogdensburg Railroad. Trains are now running east of St. Johnsbury to West Concord, a distance of nine miles, making forty-three miles of the road in operation.

☞ The old board of directors of the Natchez and Jackson Railroad Company have been re-elected with Gen. W. T. Martin as President. Gen. S. M. Preston was re-elected Chief Engineer, J. H. Fitzpatrick, Secretary, and Geo. W. Koontz, Treasurer.

☞ Ground was broken in the Church Hill Tunnel, Richmond, Va., on the 1st instant by the senior member of the firm of Taylor & Powers, of that city, on behalf of Brannon & Haggerty, of Baltimore, contractors of the work.

☞ The Prescott River Falls and Northern Railroad Company has secured nearly all the right of way along its line.

☞ ST. JOSEPH AND DENVER CITY RAILROAD COMPANY'S
FIRST MORTGAGE SINKING FUND
LAND GRANT BONDS,
BEARING EIGHT PER CENT. (8 P. C.) INTEREST,
PAYABLE IN GOLD.
FREE OF TAX.

AND IN DENOMINATIONS OF $1,000, $500 AND $100, can be obtained from the undersigned, or through the principal banks or bankers throughout the United States.

The attractive features of these securities are recognized in the fact that, although they have been but a short time on the market, they are nearly all absorbed, and but a small amount are now for sale.

They combine a perfect security with a liberal rate of interest. This interest account is made light for, and easily borne by, the Company, through the operations of the Sinking Fund created from sales of the Company's land, which, in many cases draw interest at the rate of ten (10) per cent. per annum. The security behind them is ample in every particular, as they constitute a first and only mortgage on a trunk line of railroad which will soon connect the City of St. Joseph, Mo., (an important railway centre,) with the Union Pacific Railroad at Fort Kearney, materially shortening the distance between the Atlantic and Pacific coasts. In addition to this, the bonds have further security in the fact that there is included in the Mortgage the Company's magnificent Lands, amounting to 1,500,000 acres, known to be among the best in the United States. The Mortgage Indenture prohibits the sale of these Lands at less than Four (4) Dollars per acre, and payable to the Trustees under the Mortgage, for the clear and express purpose of retiring these Bonds. The amount thus realized exceeds the entire amount of Bonds which can be issued, and leaves the road, property and franchises free.

The Bonds have thirty years to run, with interest at Eight per cent., free of tax, payable in February and August in each year.

Both principal and interest are payable in gold.

The principal in New York. The interest in either New York, London or Frankfort-on-the Main, at the option of the holder, without notice, and in the gold currency of the country in which they are presented. They are coupons or registered.

Trustees—Farmers' Loan and Trust Company.

The present price of these Bonds is 97½ and accrued interest in *currency*, from Aug. 15, 1871. But they are receivable at par and accrued interest in payment for lands sold by the Company. The right is reserved to advance the present selling price without notice.

Maps, circulars, documents and full information furnished on application.

Though acting as agents for the sale of this loan, our firm buy and sell in their regular business the Bonds of the St. Joseph and Denver City Railroad Company, those of the Eastern Division eight per cent. (8s.) *recently placed by us at* 97½, *being now quoted at from* 101½ *to* 102½ *and accrued interest.*

TANNER & CO.,
Bankers, No. 11 Wall st.

☞ The Quincy Mining Company has declared a dividend of $10 per share, payable Feb. 15,

☞ The Japanese government is building a railroad, which, when completed, will extend from Hiogo to Yedo, a distance of about four hundred miles.

☞ The cars on the Manitowoc and Appleton Railroad are now running to Spring Creek in Calumet county.

Journal of Railroad Law.

RAILROAD COMPANIES—WHEN COUNTY HAS POWER TO MAKE APPROPRIATIONS FOR CONSTRUCTION OF—RIGHTS OF TAX-PAYERS.

The facts in the late case of Harney *vs.* The Indianapolis, Crawfordsville and Danville Railroad Company and others, (32 Ind., 244,) are fully and clearly stated in the following opinion by—

FRAZER, C. J.—The complaint shows that the appellant is a taxpayer of Montgomery County; that the Indianapolis, Crawfordsville and Danville Railroad Company is a private corporation, organized to construct a line of railroad through the County of Montgomery; that the county, having in its treasury, in cash and demands due, the sum of one hundred and seven thousand dollars, of which sum sixty-five thousand eight hundred and ninety-five dollars and forty-nine cents was in notes and mortgages for money loaned, on the 29th of June, 1867, by the board of commissioners, entered of record an order, as follows:

"It is ordered that the sum of one hundred and twenty-five thousand dollars be, and the same is now, donated to the I., C. and D. R. R. Co., to be used in grubbing, grading, bridging, and putting on the ties for the track of the road from Crawfordsville to Indianapolis; that said money is not to be used for any other purpose than as above; that said donation shall be placed by said company in Elston Bank, under the control of Major I. C. Elston, Sen.; and that a sum not exceeding fifty thousand dollars shall be drawn out by said company until the entire line * * * is made ready for iron. And it is further ordered that the county auditor draw warrants on the county treasurer for fifty-seven thousand dollars, and deliver, with the bonds and mortgages in his hands belonging to the county, amounting to sixty-five thousand eight hundred and ninety-five dollars and fifty-nine cents, to Major I. C. Elston, for the purpose above named." It was further averred that said notes and mortgages, amounting with accrued interest to sixty-eight thousand dollars had been, together with a warrant on the county treasury for $57,000, placed in the hands of Elston, in execution of the order of the board; that the treasurer was paying money to said Elston upon the warrant, as fast as it came into the treasury; and that said Elston would dispose of the means so placed in his control as provided in the order donating the same. The relief specially sought was an injunction restraining the execution of the order of the commissioners.

The error assigned is, that the court below sustained a demurrer to the complaint.

The question before us does not involve a consideration of the wisdom or policy of the proposed municipal aid to secure the construction of an important thoroughfare, deemed, we doubt not, of great local advantage to a large part of the citizens of Montgomery County. That inquiry was not presented by the demurrer.

The position maintained by the appellant is, that the board of commissioners had no lawful power to make such an appropriation out of the county treasury, and hence that in doing so they exceeded the authority conferred upon them by law.

The counties are corporations created for the purpose of convenient local municipal government, and possess only such powers as are conferred upon them by law. They act by a board of commissioners, whose authority is defined by statute. One of the powers conferred is, to collect taxes levied upon the people and property within the county. In the disposition of the money thus collected into its general treasury, the board has not unlimited discretionary choice as to the objects upon which it shall be expended. It can only be applied to certain specified objects, and the building of railroads is not one of these objects, or necessary to carry into effect any of the purposes for which such corporations were created.

The statute defining the powers, both corporate and judicial, of boards of county commissioners, enumerated the powers given with care; so that there is little room for doubt as to the extent of those powers. If the authority attempted to be exercised in this instance had been conferred, the statute giving it would not have escaped the attention of the learned counsel representing the appellees, whose carefully prepared printed argument so well attests the skill and industry to which the important interests of his clients have been committed. But no such statute is brought to our attention. The initial point of the argument is taken from Kent, viz: that "public corporations are such as are created by the government for political purposes, as counties," &c.; "they are invested with subordinate legislative powers, to be exercised for local purposes connected with the public good," &c., 2 Com., 275. A further step in the process of reasoning is, that appropriations for the public good may be made, as incident to the object of the creation of such corporation, unless such appropriations are prohibited by statute or the constitution; and, finally, that this, being for the public good and not prohibited, was therefore authorized. But this argument assumes, at the start, what is not true, as we think. While it is undoubtedly true, that municipal corporations, in common with all other instrumentalities of government, are established for the public good, it is not true that they are ordinarily left at liberty to exercise an unlimited discretion in accomplishing that object, or that they are possessed of that discretion, unless there is an express limitation imposed. The power to collect money by the imposition of taxes is a high sovereign power, and it is not to be assumed that the legislature has delegated that power to municipalities for discretionary purposes where it has named the purposes for which the money must or may be expended. Such enumeration of objects of expenditure would, according to all authority, exclude objects not enumerated or implied. It need not be controverted that the legislature could clothe counties with power to make such donations as was here attempted. That is not the question before us. Has it been done? Unless the statute-book shows affirmatively that it has been done, expressly or by fair implication, the conclusion is irresistable that the action of the board of Montgomery County was without authority of law, and therefore void. There is no such statute.

But it is contended that a taxpayer has no such interest in the funds belonging to the County-treasury as will enable him to maintain a suit to prevent unlawful appropriations thereof. We cannot regard this question as open to further discussion in this court. It has been a common

remedy in this State, and has been sanctioned by repeated judgments here. It has been sanctioned elsewhere. It is sanctioned by established principles, acted upon and recognized everywhere. The citizen may not be able to protect himself in in any other way. If this is not his remedy, he has none. The money drawn from him by taxation may be squandered by unlawful donations to forward all manner of visionary schemes. Other contributions may be wrong from him from year to year, and wasted in the same way, in defiance of laws carefully framed for his protection, and he would nevertheless be helpless. A more proper case for injunction cannot be well conceived than that in which a taxpayer seeks to protect from lawless waste a public fund, which, when dissipated thus, the law will with strong hand compel him to replenish. See Gifford *vs.* N. J. R. R. Co., 2 Stock. 171.

Nor was it necessary to appeal from the action of the board of commissioners. If we are correct in the opinion that there was no authority of law by virtue of which the commissioners could act as they did, then their action was void, and all who attempted to carry it into execution were proceeding without authority, exactly as if no such order had been entered by the commissioners.

It is urged, however, that the order of the commissioners has been fully executed and performed; and that consequently an injunction would be wholly ineffectual to prevent the mischief sought to be arrested. We do not so understand the averments of the complaint. It is true, that the donation is in terms made to the railroad company and it is provided that it shall place the fund donated in the Bank under Elston's control; but it must not escape notice that the notes and mortgages, and the warrant on the treasury were directed to be, and accordingly have been delivered by the auditor to Elston, for the purpose mentioned in the order, that is, to be by him paid to the railroad company when the condition shall be performed upon the happening of which such payment is to be made, and that the whole remains under Elston's control. These facts appearing by the allegations of the complaint, must on demurrer, be regarded as true. The state of the case, then is, in brief, that the whole is yet the property of the county, existing in specie, but unlawfully in Elston's custody and control; and we see no difficulty in making an injunction effective to stop it where it is, and prevent the full consummation of the unlawful proceeding.

Reversed with costs; and cause remanded, with directions to overrule the demurrer.

☞ At the annual meeting of the stockholders of the Fitchburg Railroad Company in Boston on the 30th ult., the following gentlemen were elected directors for the ensuing year: William B. Stearns, Alvah Crocker, Peter B. Brigham, Cyrus Wakefield, C. U. Cotting. At a meeting of the Board subsequently held, the same officers were elected as served the past year.

☞ A projected Peruvian railway will cross the Andes at an elevation of 14,000 feet above the level of the sea, or 7000 feet higher than the highest point crossed by the Central Pacific Railroad, and within 1000 feet of perpetual snow. The American style of cars will be adopted, and United States engineers will superintend its construction.

The "Herald Almanac."

Bankers, brokers and business men in general will find a valuable work of reference in the "*Herald* Almanac and Financial and Commercial Register," just issued. In addition to a more than usually thorough compendium of the ordinary statistics entering into an almanac, it gives a complete record for 1871 of the daily fluctuations in government bonds, gold and stocks; the daily rate of foreign exchange; the daily quotations of American securities in London; the daily quotations of the cotton market; the average weekly quotations of flour; bank statistics; commercial statistics; railroad statistics, and a variety of correlative matter and information, all embraced in a handy book of 240 pages, offered at the nominal price of twenty-five cents.

Statement of the Public Debt of the United States February 1, 1872.

DEBT BEARING COIN INTEREST.

Sioux City and Pacific bonds, 1862-64	1,628,320 00	8,141 60
Totals	$64,618,832 00	$323,094 16

Interest paid by United States, $14,631,040 37; interest repaid by transportation of mails, &c., $3,440,125 24; balance of interest paid by United States, $11,190,915 13.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, Jan. 31, 1872.

GEO. S. BOUTWELL,
Secretary of the Treasury.

☞ The following gentlemen have been elected directors of the Ninth Avenue Railroad Company: George Law, William H. Hays, James Murphy, John W. Pettigrew, George Law, jr., Paul H. Spofford, Edward B. St. John, John C. Thompson, Wm. Ravesteyn, Chauncey A. Waterbury, Jacob Hays, Aug. F. Smith, Stephen H. Herriman.

☞ Hon. C. J. Faulkner has been elected President of the Martinsburg and Potomac Railroad Company. The directors are: J.Q. A. Nadenbousch, J. L. Campbell, B. Cushwa, E. S. Troxell, Jacob Ropp, W. H. Lemon, W. T. Snodgrass, J. B. A. Nadenbousch and Wm. N. Riddle.

☞ The Susquehanna and Tide Water Canal having passed (by lease) under the control of the Philadelphia and Reading Railroad Company, it is now reported that that company intend building a railroad from Harrisburg to Havre de Grace on the tow path of the Canal.

☞ Contracts for the construction of the Valley (Va.) Railroad from Harrisonburg to Staunton were to have been awarded the latter part of this week.

☞ The Governor of Maryland has signed the bill authorizing the loan of $1,000,000 by Baltimore City to the Western Maryland Railroad Co.

Steam on the Canals.

EXTRACT FROM THE REPORT OF THE AUDITOR.

The Legislature of 1871, passed an act entitled "An act to foster and develop the internal commerce of the State, by inviting and rewarding the practical and profitable introduction upon the canals, of steam, caloric, electricity or any motor other than animal power, for the propulsion of boats;" and appropriated for that object the sum of $100,000, to be paid to the owners of the successful plans, not exceeding three in number, which might be submitted for trial, and tested and approved by the commissioners appointed under the act. The act further provides that the commissioners shall demand and require:

First—The inventions or devices to be tested and tried at the proper cost and charges of the parties offering the same for trial.

Second—That the boat shall, in addition to the weight of the machinery, and fuel reasonably necessary for the propulsion of said boat, be enabled to transport, and shall actually transport on the Erie canal, on a test or trial exhibition, under the rules and regulations now governing the boats navigating the canals, at least 200 tons of cargo.

Third. That the rate of speed made by said boat, shall not be less than an average of three miles per hour, without injury to the canals or their structures.

Fourth. That the boat can be readily and easily stopped or backed by the use and power of its own machinery.

Fifth. That the simplicity, economy and durability of the invention or device, must be elements of its worth and usefulness.

Sixth. That the invention, device or improvement can be readily adapted to the present boats; and, lastly, that the commissioners shall be fully satisfied that the invention or device will lessen the cost of canal transportation, and increase the capacity of the canals. A means of propulsion or towage, other than by a direct application of power upon the boat, which does not interfere in any manner with the present method of towage on the canals, and complying in all other respects with the provisions of the act, may be entitled to the benefits thereof, but this shall not be construed to apply to the system known as the Belgian system, or to any mode of propulsion by steam engines or otherwise, upon either bank of the canals.

Previous to the passage of this act, steam had repeatedly been introduced, by way of experiment, on the Erie and Oswego canals, resulting in a speed of three miles per hour with cargoes of two hundred tons, but it was only accomplished at such cost as to preclude its profitable employment.

The reward offered by the State has induced a renewal of experiments, and it is to be hoped that it will result in some invention or device by which some motor other than animal power may be found practicable in the propulsion of boats upon the canals. As yet, the reward has not secured that object. It is believed, however, that it has caused an agitation upon the subject, which will, sooner or later, result in success.

While it would be very desirable to apply steam as a motor to the form of boats now in use, it is deemed by many to be impracticable, with the canals at their present dimensions. The paddle-wheel and the screw, since the introduction of steam as a motive power, have been the only methods successfully employed in the propulsion of vessels. It is claimed that, with a good propeler-wheel working under the most favorable circumstances, as in the open sea, the loss of power amounts to forty-five to fifty-five per cent. but employed in the canals the loss rises to seventy and even eighty per cent. If this be true, engines out of all proportion to the work to be accomplished would have to be employed, and hence unprofitable when brought into competition with animal towage.

The employment of tugs might, to a certain extent, be attended with success, but the loss of power adds correspondingly to the cost which may in a measure be compensated by an increased speed. This method of towage has at different periods been introduced, and the fact of its early abandonment leads to the conviction that it is unprofitable.

It has been suggested that a railroad might be constructed on each side of the canal, and the boats drawn by locomotives. This plan has many advocates, but it is urged against it that the great outlay required to introduce this method renders its adoption impracticable.

The Hon. W. J. McAlpine, late Engineer and Surveyor of this State, in a recent letter from Europe, where he is at present sojourning, mentions a method employed in Europe, and known as the Belgian system, which he had witnessed, and believes to be just what is needed on our canals.

This system to which Mr. McAlpine alludes was exhibited on the Erie canal between Albany and West Troy previous to the close of the navigable season of 1871. Its operation was witnessed by the State officers and distinguished citizens from different parts of the State.

The system apparatus employed may briefly be described as follows: A wire cable is laid on the bottom of the canal, passing through intervening locks, and fastened at the two extreme ends; and a steam-tug or tow-boat provided with an engine to which is attached a clip-drum or grooved driving-wheel with suitable guiding and tightening pulleys. The boats to be towed are made fast to the tug and the process of towing is performed by lifting the cable from the bottom of the canal by means of a grapple, and placing it over the clip-drum and under the tightening or press pulleys. The clip-drum is then put in motion (turned) by the machinery in the tug, causing the cable to pass over it and fall back again into the canal at the stern of the tug. Thus the tug is drawn along the cable with the same facility as a locomotive is drawn on the rails, though there is no slipping as in the case of the locomotive. All the power of the engine is directly employed in the propulsion of the tug.

It is claimed by the advocates of the system that its general introduction would be attended with complete success in diminishing the time of trips, the cost of transportation, and increasing the capacity of the canals.

This plan of towage appears to have been excluded from competing for the reward offered by the State. No good reason is seen for the exclusion of this or any other apparently practicable system from the benefits of the act. The policy of the act is the encouragement of inventors and others to perfect and test their several plans, and enable the State to select from all that which shall promise the best results. Any plan which will practically combine economy with greater speed than is now attained, and employing the boats at present in use, will not only prevent the diversion of trade, but largely increase the business and revenues of the canals.

To secure such results the State should offer every encouragement and essential aid, and should exclude no system from her bounty which promises the successful and speedy introduction of steam on her public works. The reduction of time in making a trip to and from tide-water and the lakes, is a matter of the greatest importance and should receive the most careful attention of the Legislature.

☞ The lately appointed Superintendent of the Pittsburgh, Washington and Baltimore Railroad, Mr. E. K. Hyndman, was previously Superintendent of the Lehigh and Susquehanna division of the Central Railroad of New Jersey.

☞ J. D. Perkins has been re-elected president, H. R. Colt Treasurer, and G. M. Woodruff Secretary of the Shepaug Valley Railroad company.

☞ The West Wisconsin Railroad Company will supply the rolling stock, and run the North Wisconsin Railroad for the present.

Responsibility of Railways.

A case involving the somewhat novel and heretofore unsettled point, whether or not the title to the paraphernalia of a married woman resides in her or her husband, has lately been decided by the Court of Appeals of New York. The plaintiff was Doretha Rawson, who brought suit in her own name to recover four thousand dollars for the loss of clothing and jewelry by an accident on the road of defendants, the Pennsylvania Railroad Company. The defendants claim that the bulk of the property having been received by plaintiff from her husband, belonged to him, and the suit should therefore have been brought by him, and that the terms of the contract (the tickets) limited the company's liability to $100. D. M. Porter, plaintiff's counsel, claimed that the property was hers, both as against her husband and ordinary creditors, and that the carrier cannot limit his liability except by express contract. The Court of Appeals, in affirming the judgment of the Courts below, held, first, that, though at common law the wife's paraphernalia, during the coverture, ordinarily belong to the husband, and he cannot dispose of them, except by will, the statutes have secured them to her even as against creditors. In equity, the property given would be treated as the wife's separate estate, and she would be protected in its enjoyment and possession even against the interference of her husband. This estate, if not absolutely a legal estate, is clothed with all the incidents thereof, and she is, thereof, the proper person to sue. Second, the words printed on the ticket do not embody the contract between the parties. They are a mere notice, and a carrier cannot limit his liability by notice, but only by contract. Plaintiff's attention was not called to these words when the ticket was purchased by her; and even if she read them when she entered on her journey, she was not obliged to submit to a contract never made or leave the train. Hence the carriers' common law liability remains unchanged.

☞ At the annual meeting of the stockholders of the Eastern Railroad Company, held in Boston on the 5th inst., the following resolution was passed:

Resolved, That the directors of the road be authorized to issue bonds not to exceed in amount the sum of $1,500,000 for the use of the corporation in accordance with existing statutes.

The President, Geo. M. Browne, declined a re-election to any office. A proposition to postpone the election of a Board of Directors to an adjourned meeting to be held on the 15th inst., was carried, and a Committee of seven was appointed to nominate a list of Directors to be then presented,

---

☞ The total imports of foreign dutiable merchandise at San Francisco, Cal., for the year 1871, invoice cost in gold, amounted to $17,542,993, against, in 1869, $15,582,278, in 1867, $14,949,958, and in 1865, $10,833,946. The increase of imports from China and Japan was from $2,748,090 in 1870, to $6,563,786, in 1871.

☞ The contract for building the Northwestern Extension from Menominee to Escanaba has been awarded to Messrs Wolf and Carpenter, of Chicago. Seymour and Rundel, of Chicago, have taken the contract for building the bridge across the Menominee, and are now shipping timber for immediate work.

☞ Messrs. A. DeGraff & Co., of St. Paul, Min., have taken the contract for building the Winona and St. Peter Railroad from New Ulm to the western boundary of the State—a distance of 108 miles.

Spark Arrester.

It gives us great pleasure to mention the practical working results of a spark-arrester, in use on a number of the locomotives of the Delaware, Lackawanna and Western Railroad. The inventor Mr. Luke F. Tronson, (for many years past the master-mechanic of the Company's shops,) and his associate, Mr. Francis Kearney, seem to have had in view the old maxim, that "an ounce of prevention is worth a pound of cure," and have commenced at the root of the evil to overcome a dangerous and objectionable nuisance. In the ordinary smoke-stack the screen for arresting the sparks is placed at the *top* of the stack, and is soon destroyed by the continued pelting of partly consumed coal projected against it by the exhaust. In Messrs. Tronson and Kearney's invention, a cylindrical rack or screen, with elongated perforations is placed at the *bottom* of the smoke-stack, which permits only the finer particles to pass through, and these coming in contact with the exhaust are sent sky-ward, returning to the earth harmless. By this method it is claimed, and quite obviously, that a considerable quantity of fuel is saved, in addition to a material reduction in the cost of the stack itself. The ruling of the Courts having determined that railroad companies are bound to use the best known methods for the prevention of fire from the passing of locomotives, we think it behooves such corporations, to give this improved smoke stack their early investigation. —*Newark Manufacturers' Gazette.*

Shreveport, Clear Creek and Arkansas R. R.

The Shreveport *Southwestern* publishes the charter of a newly organized company, with domicile in Shreveport, which proposes to build a railroad from that place to a point on Red river at or near White Oak shoals, crossing Cross lake at or near Rocky Point, and Ferry lake at or near Mooringsport, and thence to the line between Arkansas and Louisiana.

The proposed road will traverse a level country, by a direct route, and will secure to Shreveport the trade of the region above the raft. It will tap the International and other roads that are designed to enter Texas at its northeastern corner from Missouri and Arkansas, and will also draw trade from the fertile Indian Nation, west of Arkansas.

The name of the new road is the Shreveport, Clear Creek and Arkansas Railroad; the capital stock not less than $2,500,000 nor more than $4,000,000, in shares of 100, and amount necessary to be subscribed for organization $500,000. The corporators are Messrs. A. H. Leonard, T. P. Hotchkiss, George R. Wilson, A. M. Burnham, G. W. Dillard, Moses H. Crowell, George L. Smith, per Crowell, W. D. Wylie, J. C. Harrell.

☞ The new railroad from Columbus to Springfield, Ohio, which will soon be ready for business, is owned as follows: one-fifth by the New York Central Railway Company; one-fifth by the Cleveland, Columbus, Cincinnati and Indianapolis Railway Company; one-fifth by the Cleveland, Sandusky and Cincinnati Railway Company; one-fifth by the Baltimore and Ohio Railway Company, and one-fifth by the heirs of Jacob W. Pierce.

☞ Means have been secured to commence the construction of the New York, West Shore and Chicago Railroad. The contemplated line is on the west side of the Hudson River, in connection with the Canada Southern Railroad, now under rapid construction. This will give another great eastern thoroughfare from Chicago and Fort Wayne to New York city.

☞ The Schuylkill Navagation Company will pay a dividend of 50 cents per share on the Preferred stock, and 25 cents per share on the Common stock, on and after the 20th inst.

☞ A most remarkable activity in railroad enterprise is being exhibited by the Turkish Government. A line is now in progress between Scutari, which became so well known by the Crimean war, and Ismidt, and the Sultan has directed that a network of lines should branch thence through Asia Minor. Hitherto Turkish money has principally been spent on armies, navies, and fortifications to keep off the Russians.

☞ The Baltimore *Sun* says that the project of building a railroad to connect Bel Air and Magnolia, in Hartford Co., Md., is revived. A charter for this road was granted by the last Legislature; the Philadelphia, Wilmington and Baltimore Railroad Company are said to have offered to operate the road, and the cost is estimated at $200,000.

☞ The Survey of the Baltimore and Drum Point Railroad is rapidly nearing completion. The corps of engineers engaged in the work have now reached a point near Prince Frederick. This survey is being conducted in such a thorough manner that the actual location of the road will occupy comparatively little time.

OFFICE OF THE TOLEDO, PEORIA AND WARSAW RAILWAY COMPANY, No. 80 BROADWAY, NEW YORK, Jan. 30, 1872.

THE COUPONS FALLING DUE 1ST FEBruary on First Mortgage Bonds of this Company, (Western Division,) will be paid at the office of the Farmers' Loan and Trust Company, No. 26 Exchange-place, on and after that date, less Government tax.

Cattle and Freight Car.

Mr. S. W. Remer, Superintendent of the Taunton Car Company's Works, has lately invented and patented a cattle and freight car, which promises to be of great utility in the transportation of cattle. A car thirty feet long by about eight feet wide is divided into four compartments which have the capacity of holding four animals each. Instead of being turned in loose, the animals are to be tied, side by side, in a lateral position, those in one compartment facing those in the next, thus preventing them from injuring each other, while the oscillation of the car has no bad effect on them. Another and a greater advantage gained is the arrangement of feeding and watering the stock without removing them. On the top of the car and extending nearly its entire length is a large receptacle divided into three compartments, two for grain and one for water, which can be filled in the same manner as the boiler of a locomotive. By operating simple valves, water or grain can be conveyed to troughs. Live stock can be transported in these cars with less trouble and without the shrinkage sustained by the present mode. When no cattle are offered, these partitions, being hung on hinges, can be swung up and fastened to the top of the car, thus converting them at once into freight cars.

HIGH RATE OF INTEREST,

There is no investment accessible to the people which is more

PROFITABLE OR SAFE.

All marketable securities received in exchange at their highest cash value.

JAY COOKE & CO.

☞ The Somerset (Pa.) Branch railroad was constructed as a feeder to the Connellsville railroad, with the expectation that it would be leased by the latter. Negotiations looking to this end, which have been going on for some time, have, it is now stated, failed, and arrangements have been made by the Somerset Branch Company for the purchase of their necessary rolling stock.

The Direction of Railway Extension.

The rapidity with which railways have been constructed in all parts of the United States, during the past six or seven years, is justly regarded a matter for congratulation. Through our railway system alone can the development of the resources of our great country be successfully prosecuted. Canals are behind the age—too slow for these rapid times—our rivers are liable to freeze, or to become too shallow for successful navigation, the great lakes are closed by ice during a considerable portion of the year, and our sea coasts are exposed, in case of war, to incursions from hostile fleets. Our railways furnish, therefore, the most certain and rapid means of travel and transportation, and their construction becomes necessarily a leading feature of our public action. We cannot postpone, much less stop, this work. It would be as absurd to declare non-intercourse with the rest of the civilized world, as to cease to prosecute the means of intercourse between the different parts of our extended domain. It is one of the results of the recent rapid extension of our railway system beyond the Mississippi, that we are now enabled to feed the West of Europe, and to supply the Atlantic coast with food at low prices. Nothing is more injurious to manufactures and commerce than high cost of food; and it is by no means agreeable to contemplate the train of disasters to trade which would have followed the recent partial failure of the crops in England, France and Germany, had not the Great West, through the extension of our railway system, been enabled to make good the deficiency.

But it is not alone in the West—beyond the Mississippi—that progress in the building of railways is needed. In fact, it may be said to have become a question whether other sections of the country have not been overlooked. This question grows in importance, and at no distant day will demand a solution. Its nature was well illustrated recently by the action of a leading commission house, on the Produce Exchange of this city, towards one of its correspondents. It refused to honor a draft for twenty cents per bushel, which was

drawn against corn shipped from a town in the Southwest corner of Iowa. When this was done, corn of similar quality was worth 74 cents per bushel in New York. The freight charges on that corn were 25 cents per bushel when it reached Chicago. Does not the query suggest itself, how much farther need the farmer who raised that corn have gone to have found his property absolutely worthless as a saleable article? available only for his own consumption. Now the products of the Northwest are bulky, costing much to transport them, and yet from their nature demanding cheap transportation as a stimulant if not a necessity to their cultivation.

If from these reflections we turn to another branch of the subject, we shall find a totally different state of facts to exist. In those sections of the United States in which wool, tobacco, and cotton, are the chief staples, railway building has fallen as much behind the needs of the times as it has been carried to excess in those sections where the chief products are the different varieties of food. And what great articles of transportation can better afford to pay liberal charges for transportation than cotton, wool, and tobacco? The values of these articles in this market are from 150 to 200 per cent. higher than before the late war. The grain and live stock, which constitute the main reliance of the farmers of the Northwest, will bring scarcely more now than then. Is it not apparent, then, that the further prosecution of railway extension, as it has gone on during the past six or seven years, will be attended with danger to the projectors and inflict not a little hardship upon those engaged in the raising of cereals and live stock? The supplies of cotton, and wool, and tobacco, are not equal to the demand. They are bringing prices in the markets which the world is unaccustomed to pay, and which return great profits to the grower. In the sections most favorable to their growth, railway building has made less progress than in any other. A comparison of railway building in a few States will forcibly illustrate the point which we desire to make.

	Miles of Railway.	
	In 1861.	In 1871.
Ohio, (wool)	2,947	3,538
Michigan, (wool)	810	1,638
California, (wool)	23	925
Kentucky, (tobacco)	549	1,017
Virginia, (tobacco)	1,740	1,872
Maryland, (tobacco)	383	668
Georgia, (cotton)	1,420	1,845
Alabama, (cotton)	743	1,429
Mississippi, (cotton)	862	990
Wisconsin, (cereals)	933	1,525
Minnesota, (cereals)	none	1,073
Iowa, (cereals)	702	2,683
Illinois, (cereals)	2,917	4,823

Here we see that in four of the Northwestern States, devoted almost exclusively to the growth of cereals, there were built in the ten years ending 1871, no less than 5,551 miles of railway; while in nine cotton, wool and tobacco growing States (all but one among the largest in the Union) there were built in the same time only 4,445 miles of railway; and at the last report there were only 3,813 miles greater length of railway in the nine States first named than in the four States last named, while in actual efficiency, the nine States are behind the four.

We hope we have written enough to impress our readers with the importance of the subject—and this duty accomplished, thought once awakened and reflection prompted, practical minds will see that the prosecution of railway building will not be pushed too far in one direction.

Boston and Albany Railroad.

The receipts and expenditures of this road for the financial year terminated September 30, 1871, were as follows:

Receipts:		
From passengers		$2,776,405 46
" freight		4,747,180 21
" mails and other sources		438,756 73
		$7,962,342 40
Expenses, viz:		
Repairs of roadway	$973,964 57	
Repairs of engines	565,675 20	
Repairs of passenger and freight cars	845,656 56	
Repairs of buildings, ferry, etc	269,929 54	
Transportation exp	3,077,967 76	
General expenses	74,165 81	
		5,807,359 44
Net balance of income		$2,154,982 96
From this deduct—		
Interest on state loans and exchanges	$111,378 41	
Ten per ct. dividends, including Government ax	2,010,097 43	
Dividends on Pittsfield and North Adams R. R. six per cent.	27,000 00	
		2,148,475 84
Surplus not divided		$6,507 12
Add surplus at commencement of year		2,390,505 59
		$2,397,012 71
Less dividends of December, 1870, payment to sinking fund last year, Pittsfield and North Adams dividends January, 1871, and claim against Grand Junction Railroad		$1,055,127 62
Total Surplus		$1,341,885 09
SINKING FUNDS.		
Massachusetts Sinking Fund		$6,909 41
Albany Sinking Fund		146,404 42
		$153,313 83

The auditor reports that on the 30th day of September the amount of uncollected freight bills at the different stations of the road for the past year amounted to $83,502 33. Of this unusually large sum, $52,033 60 is upon grain now in the elevator, $13,269 50 for an overdue bill at Newtonville on which some loss is apprehended; the balance is mostly secured by freight on hand. The president in his report says:

To meet the Sterling Bonds which fell due on the first day of April last, the Commissioners of the Massachusetts Sinking Fund remitted to Messrs. Baring Bros. & Co. of London all the available funds in their hands, the corporation arranging for any deficiency that might exist upon the final closing of the account. The Albany Sinking fund is more than sufficient to pay the Albany Bonds, $129,000 of which are now outstanding. These bonds, although not yet due, will be paid principal and interest on presentation to the treasurer of the corporation. Of the Dollar Bonds $692,500, due in 1875, are yet outstanding. These, with an obligation given to the State for the purchase, upon certain conditions, of fifty acres of the South Boston Flats, constitute the entire present indebtedness of the corporation.

It will thus be seen, that we were just emerging from a condition of indebtedness, which dates from the building of the road; an indebtedness, rendered necessary in the beginning by the magnitude of the enterprise, and by a want of confidence at that time felt in the value of the stock. We have carried this burden of debt through several money panics, and in consequence of a depreciation of our currency in time of war, we have taken from the legitimate profits of the stockholders very large sums of money to make good our pledges to others in gold, the stockholders, meanwhile, having received their dividends in a depreciated currency. But the day when the entire liabilities of the corporation would be represented in stock, has been looked forward to for thirty years with entire confidence by the friends of the enterprise, and upon its realization they would have felt a justifiable pride.

By your vote passed at a special meeting of stockholders held on the 2d day of November last, the directors were authorized to create a fresh obligation, by an issue of twenty-year seven per cent. bonds. This authority was given in compliance with a recommendation of the directors which they felt compelled, though reluctantly, to make.

In answer to inquiries from many quarters, why we should retrace our steps, and go upon the market as borrowers, at the moment when the hopes of thirty years are about to be realized, it may be proper here to state briefly the position in which we now find ourselves, and the reasons which governed your directors in advising such a course. By the law of 1869, which contemplated a very large outlay of money for the development of various enterprises connected with our road, and esteemed to be of great prospective value to the public, we were authorized under certain conditions to increase our capital stock eight million dollars, by paying in the par value of our shares therefor. Under this authority we entered at once upon the work of improvement, and made two calls upon you for money, all of which was faithfully expended for the purposes contemplated. The work, however, could not be completed in a single year. Encouraged by the rapid increase of business directly traceable to these outlays, and relying upon the rights secured to us in 1869, we have continued to press the work of improvement as rapidly as was consistent with the convenient transaction of our regular business, until now by the addition of lands, grain elevators, tracks and rolling stock, we had come to a point where we might properly have asked you for another installment of money, with which to pay for these improvements.

In the meantime, however, the law which authorized us to call upon our stockholders for the means to develop their property was practically repealed, and in place thereof a new law passed without notice or hearing being granted to the railroads, by which the owners of railroad property are deprived of the right of assessing themselves for the development of their business; a right which would seem to belong to owners of all property. Under this law we are compelled to sell our stock at public auction, the only alternative for raising money being a resort to the general law authorizing us to go into the market as borrowers.

That the directors should have felt unwilling to adopt the former course is sufficiently shown by the fact that our stock was depreciated over twelve per cent. upon the anticipation merely of its possible adoption. On the first day of May, before the passage of the act referred to, and the day upon which the value of the stock is taken for the purpose of taxation, our shares were worth in the open market $157½. After the law was passed, and its full effect was understood by the stockholders, the shares sold down to $144. This fact serve to show one of the unfortunate workings of the law, affecting as it does not only the interests of the stockholder but also those of the State at large, its assessable property having been thereby reduced over two millions of dollars. As before stated, the only alternative for raising money is by borrowing, and to meet engagements already made, we have been com-

pelled now to go on to the market for a million and a half of dollars. If the money thus to be secured were sufficient to complete the development of our property, and to meet the expectations of the public in this regard, it would perhaps be of little consequence, but large as have been our outlays during the past year in extending our facilities for doing business, the depots, rolling stocks and tracks of the road were never before taxed to the extent which they are now.

Besides adding largely to the ordinary traffic of our road, we have opened, during the past year, in co-operation with the Messrs. McIver of the Cunard Steamships, a new channel of business from the port of Boston, which from present indications promises to lend a fresh impetus to the commercial prosperity to that city, and to afford satisfactory returns to the parties engaging in it. The return of this old and favorite line of steamers to Boston is a matter of general congratulation, and it is confidently hoped that such support will be extended by its old and new friends as to ensure its permanent re-establishment. By an arrangement with this Company, and the various railway lines, the products of the West are now brought on a through bill of lading, without breaking bulk to our East Boston docks and are there loaded directly into steamers for foreign shipment. The great value of our water front, and the unbroken communication with it by means of our Grand Junction Road, can not in this connection be overestimated. While six months ago, when this undertaking was first entered upon in earnest, one boat a fortnight was more than ample to load all the freight offering; now a regular weekly steamer and an occasional extra boat are so far unable to take what we can bring to them, that we have at times been compelled to suspend making through bills of lading.

To foster and stimulate this important undertaking and to satisfy the expectations of the public for better depot accommodations and other improvements at many points, still further outlays should be from time to time made.

In view of the demands thus pressing upon us, it has been seriously questioned by many of our Stockholders, how far we should be justified in making engagements which are to be met only by going upon the market as borrowers, thus creating a lien upon the property prior to your own. If you were not ready to furnish the money necessary for the development of your property and the business of the line by assessing yourselves therefor, a resort to borrowing might be justified, in fact it would be a duty; but in view of the fact, that you have cheerfully and without hesitation, advanced all the moneys required for the improvement, and the development of the business, and that too, with a full knowledge of the reserved rights of the State, we submit that it is but just and proper that such legislation be sought as will enable us to improve and develop our own property with our own money as was provided by the law of 1869.

This question is one of more than ordinary importance, affecting as it does the entire railroad interest of the State. This road is perhaps more sensibly affected than other at the present time, because of the unusual pressure upon us for improvements and from the fact that our position imposes the necessity of furnishing facilities to a considerable extent for roads with which we connect. But as on railroad property in our State has yet reached anything like completion, the restriction imposed by the new law must sooner or later be felt wherever questions of improvement are contemplated.

In view of these facts it may well be questioned whether the law will not operate to repress and discourage rather than stimulate enterprise, in the development of our railways. Such a result besides working injustice to those who have embarked their money in this species of property, would also affect injuriously the interests and welfare of the community at large.

In calling your attention to these general considerations at this time, we have done so with the belief that when the law in question was passed, its full result could not have been known, and with the full assurance also that future legislation will relieve us from the embarrassment under which we labor.

The company have 53 passenger and 127 freight locomotives; 133 passenger, 86 baggage and postal, 3,290 merchandise, and 272 other cars. Also, 98-234ths of 50 passenger, 4 express, 5 post office, and 12 baggage cars of the New York and Boston Express Line, and 2-5ths of 2 passenger and 2 baggage cars on Steamboat Train.

The number of miles run by locomotives with passenger trains, was 1,119,037; with freight trains, 2,875,865; with gravel trains, etc., 100,411—total, 4,095,313.

The number of through passengers carried, was 67,586; way do. 4,677,318—total, 4,744,904. Number of passengers carried one mile, 98,664,038.

The total number of tons moved was 2,209,332, of which 614,670 went west, and 1,494,662 east. The through tonnage westward amounted to 62,983; do., eastward, 410,899. All other tonnage westward, 621,687; do., eastward, 1,083,763. Equivalent number of tons carried one mile, 227,151,084—equal to 1,135,755 tons carried over the whole road.

An aggregate of 325,815,122 passengers or tons of freight carried one mile in 1871, against 227,680,420 passengers or tons of freight carried one mile in 1870.

The cost of transportation for each passenger and each ton of freight one mile this year has been 1.778 cents, against 1.737 cents in 1870.

Ferris and Miles' Steam Hammer Works.

This firm have made the manufacture of steam hammers a specialty, and are now devoting themselves almost exclusively to that branch of their business. They have been extending their works and increasing their capacity for doing work, and will soon employ 100 men. They have ordered a 75 horse-power Corliss engine, have added new tools and machinery and will soon occupy a foundry; are about extending their machine shop, and will thus double their producing capacity. Some of their principal orders are: One 2½-ton hammer, one of 2,500 lbs. and one of 650 lbs., and one punching machine for the Baldwin Locomotive Works; two 2,500 lbs. single-frame hammers—the largest hammers with single frames and guides built in this country—one 1,000 lbs. and two 250 lbs.; one 650 lbs. steel hammer for the Fairmount Steel Works of Philadelphia; another large establishment in Philadelphia is about putting in a 3,000 lb. hammer. The Cleveland (Ohio) Iron Co. is getting a 3,000 lb. hammer; McPherson, Willard & Co., of Bordentown, New Jersey, have ordered a 2,500 lb. hammer with very long stroke (4 feet). The Hinkley & Williams Locomotive Works, of Boston, are getting one of 1,700 lbs., with double frame; the Manchester (N. H.) Locomotive Works will get one of 2,500 one of 1,000 and one of 650 lbs. The Rhode Island Locomotive Works have ordered a small 350 lb. hammer, the Boston and Albany Railroad one of 650 lbs.; the Wm. Butcher & Co. new steel works, Lewiston, Pa., one of 1,000 lbs. and one of 350. Benjamin Athon & Co., Newark Steel Works, have running one 2,000 and one 1,000-lb. double frame steel hammer, and one 125 lb. and one 1,700 lb. ordinary hammer. Hillis & Jones, of Wilmington, Del., have ordered a 1,000-lb. hammer and Jackson & Sharp, of the same place, a smaller one. The Cleveland, Columbus, Cincinnati & Indianapolis Railroad Company will get one of 1,000 lbs. They have orders from parties along the New York Central Railroad, Western Pennsylvania, Ohio, California, Canada and Cuba.

This firm also has orders for a lot of axle machinery for new axle works in Allentown Pa. Messrs. Ferris & Miles contemplate confining themselves exclusively to the manufacture of steam hammers.

Production of Iron in 1871.

The production of pig iron in the United States during the past year is estimated at 1,850,000 tons. This quantity is distributed as follows: anthracite pig iron, from Lehigh, Schuylkill, Upper and Lower Susquehanna, and eastern and northern Pennsylvania regions, 863 000 tons; raw coal and coke pig iron, 600,000 tons; charcoal pig iron from New England States, New York, New Jersey, Pennsylvania, Maryland and Southern and Western States, 387,000 tons. The total number of persons engaged in the production of raw and manufactured iron is given at 940,000, of whom 140,000 are employed in the direct production of iron, and 800,000 in the manufacture of articles of iron. The value of this labor, it is asserted, if only paid for at the rate of $2 per day, and allowing 300 working days to the year, would amount to $564,000 000. The value of the product is estimated at $900,000,000, divided as follows: pig iron, $75,000,000; product of rolling mills and forges, $138,000,000: and value of articles manufactured from iron, $687,000,000.

☞ Gen. Wistar, heretofore in charge of the Pennsylvania Canal, a work in the virtual ownership of the Pennsylvania Railroad Company, has been transferred to the control of the Delaware and Raritan Canal in New Jersey, one of the leased works of the Pennsylvania Railroad Company in that State.

☞ Hon. John A. Griswold, of Troy, N. Y., has been elected President of the New Orleans, Mobile and Texas Railroad.

Philadelphia and Reading Railroad.

We gave in our issue of 20th ult., an abstract of the "Transportation and Income Account" of this company for the fiscal year ending November 30, 1871, together with the Report of the Managers. Below will be found several important tables referring to the years 1870 and 1871, including the "General Account." We also append a statement of the Cost, Earnings, Dividends, etc., etc., since the completion of the road in 1842–'43:

	1870.	1871.	1870.	1871.	1870.	1871.

American Railroad Journal.

Saturday February, 17, 1872.

Stock Exchange and Money Market.

Money has been in quite liberal supply, during most of the week, and rates have been comparatively easy for the principal borrowers, with call loans quoted down to from 5@7, generally 6@7 per cent., and mercantile discounts at from 7@9 per cent. per annum. The offerings through private channels were on an enlarged scale, while the banks showed some reserve in their advances, due, in part, to the more conservative movement, since the publication of the last weekly exhibit, which was deemed less favorable. The large reduction in the specie average was the chief feature in the adverse statement. The political reports of the week made but little impression on the market. The city banks added nearly 2⅞ millions to their loan and discount average, during the week, while again contracting their out standing circulation slightly. The U. S. Sub-Treasury added to its currency balance nearly 1¼ millions. It made a gain of about half a million in its coin reserves. Its currency balance at the close of business on Tuesday was $7,189,948 and its coin reserve, $71,011,814.

The total coin reserve of the Treasury Department on Monday was $106,001,620 including $85,610,000 represented by outstanding coin certificates; and the currency balance was $12,204,665.

The city banks, in their latest return, show an increase of $50,300 of legal tender notes, with a reduction of $2,713,800 of specie, and an increase of $112 800 of deposits; also an increase of $2,811,800 in their loan and discount averages, and a reduction of $57,000 in their item of circulation. The city bank exchanges, last week, averaged $104,767,071, and thus far, this week, 112½ millions daily. The banks now hold $5,593,100 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $21,272,300, against $25,660,714 same time last year. The city bank deposits are now $221,019,500, against $214,060,874 week ending Feb. 11, 1871. The legal tender reserve amounts to $46,616,100, against $55,773 292 same time last year. The circulation now stands at $28,161,700 against $31,790,164 same time last year. The loans are now $285,422,200 against $271,271,345 at this date last year.

The U. S. Sub-Treasury increased its currency balance $1,187,601 and its coin reserve $479,616 as the result of the week's business. The receipts of the office were $5,327,615 in coin, and $3,866,697 in currency; payments, $4,847,999 in coin, and $2,679,696 in currency. The office received $2,861,000 in coin or its equivalent, from customs; and disbursed $1,628,995 of coin interest.

Government revenues were up to a fair average last week. The excises yielded about 2¾ millions, and thus far since July 1, 1871, about 81 millions. The customs at the port of New York, last week were $2,796,055; at the outports, equal to about $900,000 more, all in coin, or coin certificates.

Under the Treasury financial programme for the month of February, Government will market Gold, during the remainder of the month, as follows: Wednesday, 21, $1,000,000. And buy in Five-Twenty bonds as follows: Thursday Feb. 29th $1,000,000.

The cable reports and rumors relative to the *Alabama* claims negotiations and the consequent public discussions served to stimulate the speculative movement in Gold, and to strengthen the the price, which advanced rather sharply early in the week, on quite extensive dealings. The later transactions showed less firmness and buoyancy in the movement, reflecting the calmer and more peaceful tenor of the political advices toward the close. The customs call for coin was fairly active, while the export drain was insignificant. The range of the price during the week has been from 110⅛@110⅞ and the closing quotation on Wednesday was @110¼ against 110⅛@110¼ the preceding Wednesday. The specie outflow, last week, was only $80,012. The Gold Exchange Bank clearances have averaged about 61 millions day during the week.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to Feb. 10, 1872 $57,927,373, against $61,528,855 same time in 1870-'71.

The customs demand for Gold last week, averaged $476,833 a day; thus far, this week, it

has averaged $716,000 a day or equal to a weekly aggregate of $4,296,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $113,489, and since Jan. 1, 1872, $275,649 against $2,271,626 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, have been $95,891,657 against $87,921,222 same time in the preceding fiscal year 1870-'71.

The export drain of specie was $80,120 last week, against $995,152, same week preceding year. The shipments since July 1, 1871, have been $23,930,812 against $45,523,106 same time in 1870-71.

Foreign Exchange has been quoted stronger in price, on a very moderate offering of prime bills and a fair inquiry from the importing interest. Bankers' sixty day bills on London closed on Wednesday at 109@109¼; sight bills on London, 109¾@110.

The produce exports from this port, week ending with Feb. 13, were to the currency value of $4,039,357.

Government securities, closed quite briskly, with a full investment demand noted, at much firmer prices than were current early in the week.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115⅛@115⅜; U. S. Five-Twenties of 1862, (other than the bonds called in) 110⅞@111⅛; U. S. Five-Twenties of 1864 at 110⅞@111⅛; U. S. Five-Twenties of 1865, 111⅜@111⅝; U. S. Five-Twenties of 1865 consolidated. 110½@110⅝; U. S. Five-Twenties of 1867, 111¾@111⅞; U. S. Five-Twenties of 1868, 112¼@112½; U. S. Ten-forties at 110@111; U. S. Fives of 1881 (Funding Loan) 108¾@108⅞. Six per cent. currency bonds, Feb. 14, 114¾@115.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Jan. 31.	Feb. 7.	Feb. 7.
Consols	92½	92½	92⅜
U.S. 5-20's of 1862..	92⅛	92⅛	91¾
U. S. 5-20s, 1865	92¾	92¼	92
" 1867	92¾	92¼	92
" 10-40s	91	90¾	91

State bonds have been more active but at varible prices. South Carolina bonds advanced materially.

For the better class of Railway Mortgage Bonds an improved demand has been reported, mainly from buyers for home investment purposes, and prices have been generally quoted strong and buoyant. Central Pacific Sixes have been in good request at @102¼@102½. Chesapeake and Ohio Sixes have been selling more freely at 94 per cent.

The earnings of the Central Pacific Railroad in January were $634,480, showing a gain of $97,882 on the earnings of January 1871, which were $536,498. The fact of increase is due in the main to the rapid growth of the local traffic and local extensions and connections of the road, which, however, seems to have been less affected by the snow blockade on the Union Pacific connecting line East than might have been supposed.

Railway and miscellaneous share property has been again quite active, but values have been unusually irregular, and more or less severely depressed, under extensive sales on speculative account. The later dealings showed more firmness.

In the line of domestic produce, the dealings have have been somewhat brisker with Flour, Wheat, Corn, Rye, Oats, Bacon, Cheese and Naval Stores quoted firmer. Cotton, Petroleum, Clover-Seed, Pork, and Lard weaker in price. Middling upland cotton closed on Wednesday at 22⅞ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,053,945 bales, against 2,588,-665 bales same time in the preceding year; exports 1,069,915 bales against 1,488,154 bales in the previous year; stock at the ports at latest dates, 590,-587 bales against 674,284 bales same date 1871.

At the Live Stock Markets, Beeves have been in fair request at 8½@13 cts.; Veals quiet at 5@12 cts.; Sheep at 6@9 cts. Swine, at 5¼@5½ cts. per lb., all live weight. The week's receipts were 6,795 Beeves, 900 Veal Calves, 22,991 Sheep and Lambs; and 29,624 Swine.

Foreign goods, have been more sought after at generally firm prices. The week's imports of foreign goods reached $7,560,475 including $4,283,-566 of dry goods.

Ocean freights have shown more firmness, on a rather better inquiry for accommodation.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Cedar Falls and Minnesota 1st mort., 83; Milwaukee and St. Paul 1st mort. Iowa Div., 89; Long Dock bonds, 92½; Great Western 1st mort. 1888, 95; Galena and Chicago 1st mort., 104½; Pacific R. R., 7s, guar. by Mo., 100¼; St. Louis and Iron Mt. R. R., 74; do. 1st mort., 94; Central of New Jersey 1st mort., new, 104; Ohio and Miss. 2d mort., 86½; do. consol., 93½; Toledo, Peoria and Warsaw 1st mort., W. D., 91½ do. E. D., 93; do. 2d mort., 84½; N. and D. 7s, guar., by L. and N. R. R., 90; Chicago and Milwaukee 1st mort., 94; Buffalo, N. ST JOSEPH AND DENVER CITY RAILROAD COMPANY.

EXECUTIVE OFFICE, No. 31 NASSAU-ST.,
NEW YORK, Feb. 1, 1872.

The Coupons and registered interest due Feb. 15, 1872, on the First Mortgage Eight per Cent. (8 p. c.) Gold Bonds, (E. D.,) and the Eight per Cent. (8. p. c.) old First Mortgage Sinking Fund Land Grant Bonds (W. D.) of the St. Joseph and Denver City Railroad Company, will be paid at the office of the Farmers' Loan and Trust Company of the City of New York, upon presentation and demand, on and after that date, Free of Tax.

FRANCIS A. COFFIN,
Assistant Treasurer,
St. J. & D. C. R. R. Co.

The Tripartite Bridge.

The letting of the contract for the erection of the Tripartite bridge, which was to have taken place to-day, has been postponed until the 19th inst., on the request of several of the largest bridge builders in the country, who could not get ready in time with their calculations. This new and novel bridge enterprise has attracted the attention of a large number of engineers and bridge builders. It is expected that from fifteen to twenty bids will be handed in. We have looked ourselves over the plans and specifications worked out by Mr. Charles Davis, the accomplished engineer of Allegheny City, and we can heartily join in the praises that have been awarded him by all who have thus far become acquainted with the laborious work, so important and far-reaching in the new enterprise. The general plan, subject of course to each builder's own modification, has been thoroughly thought out. It comprises a structure over four thousand feet long, in three arms, something like the letter Y, connecting the Point at Pittsburg with Allegheny avenue, Allegheny City, and the mouth of Saw Mill Run. The last arm, across the Ohio river, will be a high level, ninety feet above low water, necessitating a viaduct along the South Sid. Over thirty thousand perches of masonry will be required, and the total cost of the bridge will be nearly a million dollars.

Pittsburgh is the most notable city in the Union as far as bridge structures are concerned. We can show the visitor some noble examples in this line, amongst the eight bridges that span our rivers. It is a well known fact that all the bridges built for common travel pay well, whilst the enhancement in the value of real estate abutting on streets connected by bridges is truly astonishing. The stock for the Tripartite was subscribed to principally by real estate owners with most remarkable alacrity, and, as the company has rested its efforts in the way of getting further stock taken until the project had taken a more definite shape, we feel no hesitation in urging the attention of the property holders likely to be benefitted, to this grand public improvement.—*Pittsburg Commercial, Feb. 8.*

☞ We recommend as a safe investment the SIX PER CENT. BONDS OF THE CHESAPEAKE AND OHIO R. R. COMPANY, interest payable in gold coin May and November; denominations, $100, $500, $1,000. Present price 94 and accrued interest.

Also, the CENTRAL PACIFIC BONDS, interest six per cent., gold, January and July; denominations, $1,000; at the current market price.

We buy and sell Government Securities, and execute orders at the Stock Exchange; allow interest (at 4 per cent.) on deposits, make collections, &c., &c.

FISK & HATCH,
HARVEY FISK, No. 5 Nassau street.
A. S. HATCH. New York, February 3, 1872.

Illinois Central Railroad.

The statement of this Company for the month of January, 1872, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	2,904.76	for	$24,685 06
Acres Inter't Fund Lands Sold	.....	for	.....
Acres Free Lands Sold	362.00	for	5,984 80
Total sales during the m'th of January, 1872	3,266.76	for	$30,669 86
To which add Town Lot Sales	.....	for	.....
Total of all	3,266.76	for	$30,669 86
Cash collected in January, 1872			$101,158 15

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$394,172 00	$43,267 00	$437,439 00
Passengers	100,551 55	24,075 50	124,627 05

☞ At the annual meeting of the Massillon and Cleveland Railroad Company, held at Massillon, Ohio, on the 2d inst., the following gentlemen were elected directors for the ensuing year: G. W. Cass, J. N. McCullough, Thomas D. Messler and W. M. Stewart, Pittsburgh; Kent Jarvis and John G. Warwick, Massillon, and D. P. Rhodes, of Cleveland. The Board subsequently organized by the election of Thomas D. Messler as President, and F. M. Hutchinson as Secretary and Treasurer.

☞ ST. JOSEPH AND DENVER CITY RAILROAD COMPANY'S
FIRST MORTGAGE SINKING FUND
LAND GRANT BONDS,
BEARING EIGHT PER CENT. (8 P. C.) INTEREST, PAYABLE IN GOLD.
FREE OF TAX.

AND IN DENOMINATIONS OF $1,000, $500 AND $100, can be obtained from the undersigned, or through the principal banks or bankers throughout the United States.

The attractive features of these securities are recognized in the fact that, although they have been but a short time on the market, they are nearly all absorbed, and but a small amount are now for sale.

They combine a perfect security with a liberal rate of interest. This interest account is made light for, and easily borne by, the Company, through the operations of the Sinking Fund created from sales of the Company's land, which, in many cases draw interest at the rate of ten (10) per cent. per annum. The security behind them is ample in every particular, as they constitute a first and only mortgage on a trunk line of railroad which will soon connect the City of St. Joseph, Mo., (an important railway centre,) with the Union Pacific Railroad at Fort Kearney, materially shortening the distance between the Atlantic and Pacific coasts. In addition to this, the bonds have further security in the fact that there is included in the Mortgage the Company's magnificent Lands, amounting to 1,500,000 acres, known to be among the best in the United States. The Mortgage Indenture prohibits the sale of these Lands at less than Four (4) Dollars per acre, and payable to the Trustees under the Mortgage, for the clear and express purpose of retiring these Bonds. The amount thus realized exceeds the entire amount of Bonds which can be issued, and leaves the road, property and franchises free.

The Bonds have thirty years to run, with interest at Eight per cent., free of tax, payable in February and August in each year.

Both principal and interest are payable in gold. The principal in New York. The interest in either New York, London or Frankfort on the Main, at the option of the holder, without notice, and in the gold currency of the country in which they are presented. They are coupons or registered.

Trustees—Farmers' Loan and Trust Company.

The present price of these Bonds is 97½ and accrued interest in *currency*, from Aug. 15, 1871. But they are receivable at par and accrued interest in payment for lands sold by the Company. The right is reserved to advance the present selling price without notice.

Maps, circulars, documents and full information furnished on application.

Though acting as agents for the sale of this loan, our firm buy and sell in their regular business the Bonds of the St. Joseph and Denver City Railroad Company, those of the Eastern Division eight per cent. (8s.) recently placed by us at 97½, being now quoted at from 101½ to 102½ and accrued interest.

TANNER & CO.,
Bankers, No. 11 Wall-st.

The Constitutionality of Railroad Aid Donations and Subscriptions Affirmed.

Opinion of the Supreme Court for the Northern Grand Division of the State of Illinois, in a cause submitted at a term thereof, begun and held at Ottawa, on Tuesday, the twelfth day of September, in the year of our Lord one thousand eight hundred and seventy-one. Present, Charles B. Lawrence, Chief Justice; Pinkney H. Walker, Justice; Sidney Breese, Justice; John M. Scott, Justice; William K. McAllister, Justice; Anthony Thornton, Justice; Benjamin R. Sheldon, Justice. Opinion filed Jan. 22, 1872. The Chicago, Danville and Vincennes Railroad Company vs. Frederick Smith. Error to Will.

Opinion by Thornton, J.—Defendant in error filed his bill in the Circuit Court to enjoin the collection of taxes levied under an act of the Legislature, and in pursuance of a vote of the people, to aid in the construction of a railroad. The act authorized all towns, acting under the township organization law, to appropriate such sums of money as they should deem proper to aid in the construction of the road, to be paid as soon as the track should have been located and constructed through the towns.

The road was completed before the appropriation was made; and it was a donation to the company, and not a subscription to its capital stock.

Upon the hearing, the Circuit Court made the injunction perpetual, and pronounced the act unconstitutional.

The officers of the town, who made the appropriation, and levied the tax, were the "corporate authorities" of a municipal corporation; and they acted in the premises after a majority of the legal voters of the municipality had authorized the appropriation upon the condition of the construction of the road.

The only question is as to the power of the Legislature to authorize municipalities to subscribe to the capital stock of railroad companies, and to appropriate money as a donation, to aid in the construction of the roads.

The only difference between this case and numerous cases decided by this court, is that the money appropriated by virtue of the statute in question is a donation instead of a subscription.

But for this difference we might stand securely upon the maxim. *Stere decisis et non quieta movere.* Frequent fluctuations in the opinions of courts of last resort involve the court in absurdities; render the law uncertain; destroy that feeling of reliance so essential to the strength and stability of all authority; and produce mischiefs innumerable. The decision of courts had better be involved in some error, than subject to change upon every change of the judiciary.

In the discussion of legislative power, we have nothing to do with questions of policy or expediency. The Constitution has created the Legislative and Judicial Departments; the one to make the law, the other to construe and administer it. It may be mischievous in its effects; burden some upon the people; conflict with our conceptions of natural right, abstract justice, or pure morality, and of doubtful propriety in numerous respects; and yet we would not be justified to hold that it was not within the scope of legislative authority for such reason.

The question, as to the repugnancy of a law to the Constitution, is always one of much delicacy; and courts will never indulge the supposition unless the repugnancy is manifest to the understanding.

In Lane vs. Donovan, 3 Scam. p. 238, this court said: "The determining of a question, involving the inquiry whether an exercise of power, by the Legislative Department of the State, is Constitutional, is readily conceded to be not only a matter of delicacy, but of grave import, and demands the most deliberate and mature consideration. It should not, moreover, be decided but in cases of clear necessity, and where the character of the act done is in plain and obvious conflict with the Constitution."

The law should not be pronounced void, in a doubtful case or upon slight implication. "The opposition between it and the Constitution must be clear and strong." People vs. Marshall, 1 Gil. 672.

The infringement of the Constitution must be evident before the courts will interfere and hold the act nugatory. People vs. Hatch, 33 Ill., 130. In *exparte* McCollum, 1 Conn. 504, Savage, Ch. J., said that a court ought not to declare a law unconstitutional, without a case is presented in which there can be no rational doubt.

In delivering the opinion in the case of Fletcher vs. Peck, 6 Cranch 87, Ch. J. Marshall said: "The question whether a law be void for its repugnancy to the Constitution is at all times a question of much delicacy, which ought seldom or ever be decided in the affirmative in a doubtful case. The court, when impelled by duty to render such a judgment, would be unworthy of its station could it be unmindful of the solemn obligation which that station imposes. But it is not on slight implication and vague conjecture that the Legislature is to be pronounced to have transcended its powers, and its acts to be considered as void. The opposition between the Constitution and the law should be such that the judge feels a clear and strong conviction of their incompatibility with each other."

In the same court, whose decision is chiefly relied on to induce a reversal of the former opinions of this court, equally explicit language, in regard to the duty of courts, has been used.

In Twitchell vs, Blodgett, 12 Mich., 152, Cooley, Ch. J., said: "It is conceded to be the settled doctrine of this State, that every enactment of the State Legislature is presumed to be Constitutional and valid; that before we can pronounce it otherwise, we must be able to point out the precise clause in the Constitution which it violates, and that the conflict between the two must be clear, or free from reasonable doubt, since it is only from Constitutional provisions, limiting the Legislative power and controlling the Legislative will, that we derive authority to declare void any Legislative enactment."

We might multiply extracts from the opinions of the ablest courts to the same effect. Enough has been cited to show the firm position of the judiciary, that the courts ought not, and in justice to the rights of a co-ordinate department of the State Government cannot, declare a law to be void, without a strong and earnest conviction, divested of all reasonable doubt, of its invalidity.

An objection to this law is urged, which has been made since the origin of the character of legislation now under consideration.

It is assumed that the taxes levied are to be appropriated to a private, and not a public, purpose; that the benefits resulting to the public,—the people at large—from the construction of railroads, are merely incidental: that the profits, arising from their operation, enrich the individuals who form the private corporation; and, therefore, all laws imposing taxes to aid in the building of railroads, to be owned and operated by private corporations, are unconstitutional.

If the premises are correct, that the corporations are strictly private, and the benefits, to the public, purely incidental, the conclusion might logically follow.

The argument assumes, as unquestionable, the point to be determined; as true, the fact to be ascertained.

In the enactment of laws the Legislature must exercise its judgment and discretion. As to questions of pure policy and expediency—no express or necessarily implied Constitutional provisions intervening—it is the sole judge. It has also the undoubted right to take a comprehensive view, in determining the necessity of a law, and the character of the purpose to be accomplished by it. A court, with any propriety, cannot arrogate to itself all power and wisdom in such matters; and if there be grave doubt as to the nature of the purpose, the doubt must always be solved in favor of the action of the Legislature.

Concede that taxation for a mere private enterprise is wrong and invalid, is the construction of the road, to which the aid is proposed to be given, of that character?

It is a road from Lake Michigan to a point opposite Vincennes, in the State of Indiana, traversing nearly the entire length of the State. The road was completed before the payment of any money was asked, though it was built on the faith of it.

Are the advantages which accrue to the public from the construction and operation of railroads merely incidental, in the sense of the term as commonly used?

We are inclined to think that they rather resemble the incident in law; and appertain to, and follow, the principal thing. The benefits resulting to the people of the State from our system of railroads are untold and incalculable. The mind can scarcely grasp them. Railroads have almost superseded all other modes of intercommunication between the several parts of our extensive and growing States. They have become an absolute necessity—indispensable to our increased growth, and to the removal of our immense surplus. They have added millions to our taxable property; given augmented facilities to every department of trade; enriched the mass of the people; largely enhanced the value of our lands; built up manufactories; and brought us into close proximity with the best markets of the country. All share in the blessings flowing from them.

Railroads are, in truth, the people's highways for pleasure, and business, and commerce. Without them our internal trade would languish and die, and our corn and wheat rot in our granaries.

For more than a quarter of a century the courts have recognized and referred to them as public improvements, made for the public good, and to subserve the public interests. Johnson vs. The County of Stark, 24 Ills. 75, Cin., Wil. and Zanesville R. R. Co. vs. The Commissioners, 21 Ohio (1 McCook), 77. Sharpless vs. The Mayor, &c., 21 Penn. (9 Harris), 149. Nichol vs. Mayor and Aldermen, 9 Humph, 252. Gaddin vs. Crump, 8, Leigh, 120. Enfield Toll Bridge Co. vs. Hart. and N. H. R. R. Co., 17 Conn., 40. Beekman vs. Saratoga and Schenectady R. R. Co., 3 Paige, 45. Bloodgood vs. Mohawk and H. R. R. Co., 10 Wend., 9. Newbury Turnpike Co. vs. Eastern R. R. Co., 23 Peck, 826.

The courts while ready and willing to protect these corporations in all their rights, have uniformly asserted, and seemed determined to maintain their obligations to the public. The principles of common law, and their charters, accepted by them, and which cloth them with a portion of the sovereignty of the State, impose duties on them to the public, which they must discharge. They can be compelled, by the mandates of the courts, to a full performance of them, and parties seeking redress need not resort to the imperfect action at common law, but may apply for the more effectual remedy by *mandamus*.

Railways are improved public highways; and the courts have uniformly held that they are of such public use as to justify the exercise of the right of eminent domain, in taking all real estate that may be necessary for the construction and maintenance of the road, its depots, side tracks, stations, machine shops, and other necessary appendages; disfiguring and rendering unfit for cultivation, farms, and even in destroying dwellings.

The necessity and expediency for the exercise of this right, in making public improvements, either for the benefit of all the people of the State, or of a particular municipality, must be determined by the Legislature.

Mere convenience is not sufficient to justify the exercise of the right. The public use must be necessary and pressing. In referring to the urgency of the public use. Woodbury J., in the case of West River Bridge Company vs. Dix, 6 How, 546, said, "So, as to a road, if really demanded in particular forms and places, to accommodate a growing and changing community, and to keep up

with the wants and improvements of the age—such as its pressing demands for easier and social intercourse, quicker political communication, or better internal trade, and advancing with the public necessities from blazed trees to bridle paths, and thence to wheel roads, turnpikes, and railroads."

Though the distinction between the right of eminent domain and the power of taxation may be manifest, yet when the public use, necessary for the exercise of the former, has been settled by both the legislative and judicial departments, and a particular enterprise has thus been fixed as of public importance; the position is very much strengthened, that taxation for such an enterprise is for a public purpose.

This court has decided that such corporations are created for the public good; to increase the facilities and conveniences, and promote the great ends of commerce; and that they cannot organize monopolies, and make contracts injurious to the public interests. Vincent vs. C. & A. R. R. Co., 49 Ill. 33. Chi. & N. W. R. R. Co. vs. The people ex rel Hempstead.

In view of the past history of railroads; the impossibility of dispensing with them; the necessity of an increase of the number, to open more outlets for the products of our fertile and inexhaustible soil—all of which were well known to the Legislature—and sustained by numerous authorities—we must hold, that, even if the appropriation in this case was not for a public purpose, in the broadest sense, the character of the purpose is involved in such doubt, that we cannot declare void the action of the Legislature.

Is the law, under consideration, in violation of the 5th Section of the 9th Article of the Constitution of 1848? That section provides that "the corporate authorities of counties, townships, school districts, cities, towns and villages, may be vested with power to assess and collect taxes for corporate purposes; such taxes to be uniform in respect to person and property within the jurisdiction of the body imposing the same."

It is contended that the appropriation was not for a "corporate purpose." If it was for a public purpose—for the benefit of the inhabitants of the municipality—then it would be for a corporate purpose. The latter cannot be distinguished from the former; and all that we have said in relation to the public purpose of the tax will apply with equal force to a corporate purpose. We refer to the following cases in which the questions discussed have been settled by this court: Prettyman vs. The Supervisors of Tazewell County, 19 Ill., 406; Johnson vs. The County of Stark, supra; Perkins vs. Lewis, 24 Ill., 208; Butler vs. Dunham, 27 Ill., 474; The President and Trustees vs. Frick, 34 Ill., 405.

In the case of Nichol vs. The Mayor and Aldermen supra, a subscription by the city of Nashville to a railroad was held to be for a corporate purpose. The Constitution of Tennessee provides that "The General Assembly shall have power to authorize the several counties and incorporated towns in this state, to impose taxes for county and corporation purposes respectively." The language is substantially the same as in our own Constitution. The City of Nashville having subscribed, a bill was filed to restrain the issue of bonds; and the court decided, that the Legislature had power to authorize the subscription; that the construction of the road was a corporate purpose, and that the city might either levy the tax, or issue bonds to obtain the money.

In Taylor vs. Thompson, 42 Ill. 9, this court defined a corporate purpose to mean—"a tax to be expended in a manner which shall promote the general prosperity and welfare of the municipality which levies it."

We adopt this definition; and are of the opinion that no person can doubt but that taxes expended to aid in the construction of a railroad, must promote the general prosperity.

The remaining question is whether a distinction exists between a donation in aid of the road and a subscription to the capital stock of the corporation. The distinction is more apparent than real; indeed, to our view, is entirely shadowy. No principle would justify the authority to a municipal corporation to become a stockholder in a railroad company, merely to acquire equitable rights and to prevent the misapplication of the funds.

The power is granted in consideration of the public benefits: and these are as great in the one case as in the other.

The decree of the court below is reversed and the cause remanded.

Decree reversed.

Journal of Railroad Law.

RAILROAD COMPANIES—DEATH FROM WRONGFUL ACT OR OMISSION—STATUTE OF LIMITATIONS.

The facts of the late case of Hanna, Administrator, *vs.* The Jeffersonville Railroad Company, (32 Ind., 113.) are fully and clearly stated in the following opinion by—

FRAZER, C. J.—This was a suit by the appellant against the appellee. The only question is, whether the court below erred in sustaining a demurrer to the complaint.

The suit was by an administrator, to recover, under the statute (2 G. & H. 330 sec. 784), for the injuries resulting to the intestate, in 1864, whereby his life was lost. He was a resident of Maryland, and a passenger on the defendant's railroad, and injured by the carelessness of its servants. He died in April, 1864; administration of his estate was granted in Maryland, in August, 1867; and the suit was not commenced until February, 1868.

It will be seen that the statute already referred to, which gives the right of action, provides, that "the action must be commenced within two years." To this limitation upon the right to bring the suit there are no exceptions made by the statute, and it is not competent for the courts to make any. The law must be administered as the legislature has enacted it.

It is important, then, to inquire when the two years began to run. The language of the statute does not furnish an express answer to this inquiry. But it does not appear possible to suppose that the legislature meant that it should be from the appointment of the administrator. The damages accrue to the widow and children or next of kin. They can procure administration as, and when they wish. They can move promptly, and in many cases they can delay at their pleasure. The statute was intended mainly to be operative against carriers of passengers, and in a very large measure against corporations whose business is exclusively performed by hired servants, who are being constantly changed, and within whose knowledge the facts of such cases would generally rest, or who must be depended on for such information as would lead to a discovery of the facts and the witnesses to establish them. The reasons for requiring the suit to be brought within some short period after the occurrence were, therefore, very forcible, and must have been perceived. While a proper regard for the security of human life required that a right of action should be given, which did not exist by previous law, the considerations already noted required that the remedy should be promptly sought; else a door would be opened wide for injustice and wrong. If, by delay to procure the appointment of an administrator, the suit might be brought four years after the event which made the cause of action completely mature, it might, by the same method, be delayed for any length of time. We do not feel at liberty to adopt such a construction of this statute. We think that it was intended that the suit should be brought within two years from the death of the person, that the right of action is given, not generally, as a right of action exists at common law, but upon the express condition that the suit shall be instituted within the period named, and not afterwards; in brief, that the limitation is descriptive of the right created.

It only remains to ascertain whether the point can be raised in this case by demurrer to the complaint. Ordinarily, statutes of limitations must be pleaded, though the facts appear by the averments of the complaint. The reason for this is, that usually there are exceptions to statutes of limitations, and the plaintiff should, therefore, have the opportunity of replying to the plea, so that he may show that the case is within any of the exceptions. To compel him to make these averments in the complaint, would tend to inconvenient and needless prolixity. But in the case before us there are no exceptions, and, consequently, there is no reason why the defendant should plead the fact. There could be no reply avoiding the plea. The complaint brings upon the record all the facts concerning the matter that could be of service to either party, and the answer would be but a repetition of them accomplishing no useful end. We think therefore, that the question was properly raised by the demurrer, and that it was correctly sustained.

Affirmed.

Debt of Canada.

The debt of the Dominion as it stood on the 30th June, 1868, is payable as follows:—

Payable in	1872	$255,951 87

☞ It is reported that the management of the Rensselaer and Saratoga Railroad will in a short time lay a track across Green Island to connect with their track from Albany with the depot in Troy. In order to make this connection they have leased the right of way across the Central Railroad bridge spanning the Mohawk. As soon as completed, local trains will run between Albany and Troy.

☞ The Bridgeton and Port Norris Railroad Co. have commenced to run regular passenger trains from Cedarville to Philadelphia, by way of the West Jersey and Vineland Railroads. Two trains each way are run daily.

Value of Land Grants.

The Boston *Daily Advertiser* has a long article on the value of land grants to railroads, which concludes as follows:

"With respect to the grant of the Northern Pacific Railroad and its prospective value, Congress granted to this company 12,800 acres of land to each mile of road, commencing on Lake Superior and extending to the eastern boundary line of Dakota, and 25,600 acres per mile from that line to the Pacific coast. This grant was to aid in the construction of a railroad from Lake Superior to Puget Sound and the vicinity of Portland, Oregon, and calls for about 58,000,000 acres, or 90,000 square miles of land, an extent equal to New York and Indiana together, or eleven and a half times Massachusetts. The route of this road, commencing in Minnesota, on the shores of Lake Superior, passes through the timbered lands west of that lake, and over the region of prairies, lakes and groves in western Minnesota; thence it crosses the wonderful valley of the Red River of the North, and strikes out over the gently undulating and fertile prairies of Dakota, and crossing the Missouri river at the mouth of the Heart, it extends to the beautiful valley of the Yellowstone in nearly a straight line; ascending this valley and passing through belts of timber and rich rolling lands, it goes through the Boseman Pass of the Belt Mountains into the central basin of Montana, and crosses the fertile valleys of the Gallatin, Madison and Jefferson forks of the Upper Missouri; going up the valleys of the latter and Divide Creek, it runs through Deer Lodge Pass at an altitude under five thousand feet above sea-level, and descends the western slope by the valleys of Deer Lodge Creek, Hell Gate River, and Clark's Fork to Lake Pend Oreille, where it crosses the great grass plain of the Columbia to Wallula; thence it follows the Columbia River through the Cascade Mountains to the Pacific coast. The climate of this great land-grant belt across the continent is bracing, and unusually healthful, being free from all peculiar diseases. The soil, as a whole is of excellent quality, producing large crops of wheat, rye, oats, and barley; vegetables yield without a parallel in the history of horticulture in America, and all kinds of small fruits, wild and cultivated, yield the same as in the New England states. The nutritious grasses growing wild on the eastern and western slopes of the Rock Mountains and in the valleys afford sustenance for cattle the year round, the climate being so mild as not to necessitate shelter for stock in the winter. A large portion of this grant is covered with forests of an immense growth, the like of which cannot be found on this continent. Fine building stone is found in almost every variety, and inexhaustible in quantity. The mineral wealth of this region seems as yet to be hardly explored; at the present time no portion of our country promises a greater amount of the precious metals than that through which this road will run. Immense coal deposits are found underlying a great portion of the grant. The Committee on the Pacific Railroad, in the United States Senate, in their report, February 19, 1869, say: 'Every element of wealth, every condition of social growth and prosperity, exist in superabundance and beyond exhaustion in the region lying between Lake Superior and Puget Sound. For this immense country railroads can do more than they have done for Illinois.'"

"Now if we compute the ultimate value of this grant of the Northern Pacific Railroad at $7 per acre, the average of the land grant sales in the foregoing table, it will amount to $406,000,000; if at only $5 per acre, it amounts to $290,000,000; if at $3 07 per acre, the lowest of all the grants, it will amount to $178,060,000. This latter sum it more than twice the estimated cost of the road as set forth by the most competent engineers. These prospective results seem astounding, yet it strikes us as not unreasonable to believe that the financial results of this grant shall even exceed the highest of these estimates, inasmuch as its resources are so immense, and will be developed with so great facility by the railroad, which will be the shorter and more easily operated of our Pacific roads."

Hannibal and St. Joseph Railroad.

To the Editor of the Railroad Journal:

In reference to the action of the directors of the Hannibal and St. Joseph Railroad Company in increasing the capital stock, the following facts are presented: When the new direction came into possession they supposed the property of far more value, and in better condition than subsequent examination has proved.

A careful survey and estimate was consequently made, and it was decided that at least $3,000,000 would be required, in order to put the road in good working order, as well as to provide for the maturing obligations of the company, a large portion of which sum would be necessarily disbursed during the present year. It would seem that the old Board of directors had already contemplated the exigencies as early as February 2, 1871, when they provided by a new issue of stock the means by which the company could reduced the grades, make other improvements, and also cancel the obligations becoming due to the State of Missouri, under the following legislative enactment:

An act to authorize the Hannibal and St. Joseph Railroad Company to increase its Capital Stock.

Be it enacted, by the General Assembly of the State of Missouri, as follows:

Sec. 1. For the purpose of providing a fund to reimburse the stockholders of said company for such amounts as may have been or may hereafter be expended in improving the track and road-bed, and in equipping the road of said company, over and above the amount of their stock, and also of enabling the said company to retire its obligations to the State of Missouri, and redeem and deliver to the State the bonds of the State issued on account of said company, and also to discharge such of the other liabilities as it may be enabled to pay, it shall be competent and lawful for the board of directors of said company, from time to time, as may be found expedient, to increase the capital stock of said company to such an amount as in the aggregate shall be equal to the cost of said road and equipment and improvements: Provided, That such increase, together with the existing stock, shall in no event exceed the cost of said property.

Sec. 2. The Board of Directors of said company shall have the right to dispose of such increased stock by distributing it *pro rata*, in proportion to their stock in said company, among the stockholders of said company, to be paid for in money at such time and in such manner as the board may direct, or may sell the same in the market in such a manner and at such times and upon such terms as shall by the said board of directors be deemed for the best interests of said company.

Sec. 3. This act shall take effect and be in force from and after its passage.

Approved March 4, 1869.

In accordance with the above the following resolution, moved by Mr. Neilson and seconded by Mr. Hunnewell, was unanimously adopted:

"Resolved, That in the opinion of this board it is expedient that the capital stock of the company be increased to an amount equal to the cost of the road, its equipments and improvements, after deducting its outstanding indebtedness for such purposes reduced by the application of the land grant sales, whenever, in the judgment of the directors, the condition of the company's affairs will warrant such increase."

The recent issue of stock was made by the executive committee December 28, 1871, in conformity with the action of the old board of officers.

New York, Feb. 16th. A. DIRECTOR.

Finances of Wisconsin.

EXTRACT FROM THE MESSAGE OF THE GOVERNOR.

From the reports of the Secretary of State and State Treasurer, it appears that the balance in the Treasury belonging to the various funds, at the close of the last fiscal year, was $329,845 82.

The receipts and disbursements of the general fund for the fiscal year were as follows:

RECEIPTS.

State tax and tax on suits	$702,064 28
Railroad companies—taxes	241,130 58
Insurance companies—taxes and license fees	53,250 93
Telegraph companies	1,094 70
Plankroads—taxes	317 72
Banks—due on State Bonds	2,123 96
Miscellaneous sources	29,594 64
Total	$1,029,576 81

DISBURSEMENTS.

Salaries and permanent appropriations	$83,274 84
Legislative expenses—session of 1871	101,666 12
State prison and charitable institutions	386,591 15
Interest on State debt	156,889 58
Special appropriations	76,248 55
Miscellaneous	160,707 18
Total	$965,377 42

This fund having been overdrawn September 30th, 1870, to the amount of $19,063 71, the balance at the close of the last fiscal year was $45,135 68.

The above disbursements are thus re-capitulated in the Secretary's report:

For State institutions	$386,591 15
Interest of State debt	156,889 58
Special appropriations and other extraordinary expenses	125,815 24
Making the total extraordinary expenses	$669,295 97
Which deducted from the total disbursements, leaves as ordinary expenses	$296,081 45
The expenses of the same class in 1870 were	$316,380 31

The State debt not having been changed during the fiscal year, was on the 30th of September, 1871, $2,252,057, owing as follows:

On State bonds outstanding	$68,200 00
To the school fund—on certificates of indebtedness	1,558,700 00
Normal school fund—on certificates of indebtedness	479,500 00
University fund—on certificates of indebtedness	111,000 00
Agricultural college fund—on certificates of indebtedness	33,600 00
Currency certificates—on certificates of indebtedness	57 00

The expenses of the fiscal year ending September 30th, 1872, have already been estimated and provided for, it devolves upon you to make provisions of the same for the year commencing October 1st, 1872.

The expenses of that year are estimated by the Secretary of State thus:

For salaries and permanent appropriations	$86,900 00
Legislative expenses	95,500 00
Interest on State debt	172,032 12
Penal and Charitable institutions	277,400 00
Clerks and employes	46,200 00
Printing—special appropriations and contingent expenses	97,000 00
Total	$775,032 12

The resources of the State for that year, are estimated as follows:

Railroad companies—license	$270,000 00
Insurance companies—tax and license	60,000 00
Telegraph and Plankroad companies	1,500 00
Hawkers' and peddlers' license	4,000 00
Miscellaneous sources	10,000 00
Amounting to	$347,000 00

Authorized by existing laws:

For interest on State debt	$172,032 10
Leaving to be provided for by you at this session	256,000 00

This estimate is deemed adequate for ordinary State expenditures for the year. Should large appropriations be made for purposes not anticipated in this estimate, additional revenues must be provided to pay them.

There was expended from the Governor's contingent fund during the year 1871 the sum of $1,924 02.

There was transferred to the fund during the year, to reimburse it for expenses heretofore incurred in protecting the St. Croix and Lake Superior Railroad lands, from collections made pursuant to chapter 46, general laws of 1869, the sum of $383 50.

The balance remaining in the fund January 1st, 1872, is $952 13, to which a small appropriation should be added.

There was received at the executive office during the year as fees for commissions to commissioners of deeds for this State to reside in other States, and paid into the State Treasury, the sum of $170.

The State tax levied for 1871 was $629,143 10, being $91,180 14 less than the year before. This includes $156,000 for building the Northern Hospital for the insane.

There is due to the State from counties on account of taxes for previous years, the sum of $35,229 95.

The following statement shows the assessed valuation, the amount of State tax, and rate per centum of that tax for the last five years.

For	Valuation.	State tax.	Rate per cent.
1867..	$196,851,161	$649,958 86	3⅓ mills.
1868..	244,140,774	544,889 12	1 21-100 mills.
1869..	242,641,124	515,961 13	2⅛ mills
1870..	455 900 800	720,323 24	1 58-100 mills.
1871..	455,900,800	629,143 10	1 38-100 mills.

The aggregate valuation of all taxable property, as returned by the assessors, for 1871, is $329,503,603, excluding Ashland county. This is something over two millions less than the assessment of 1870.

The experience of the past shows the tendency to undervalue nearly every class of property. This is done by assessors in the belief that thereby they lessen to their towns the burden of State and county taxes. Such is not the case, as the evil is remedied in a great measure by the county and State boards of equalization. To fully remedy the ill effects that grow out of this pernicious system of assessment, more stringent laws should be framed, regulating the duties of assessors, and a more thorough enumeration and classification of property in assessment should be required, so that boards of equalization can more fully correct the erroneous assessment of the towns officers.

The productive trust funds of the State are as follows:

School	$2,389,488 28
University	207,139 38
Agricultural College	182,970 20
Normal school	734,111 24
Total	$3,513,709 10

The State has now for sale of

	Acres.
School lands	336,812 48
University lands	9,378 53
Normal School lands	811,482 33
Agricultural College lands	86,673 45

☞ The Great Northern Railroad of Texas has been completed to a point fifty miles above Houston. The Hon. Galusha A. Grow is President of the organization.

☞ Ignatius Sargent has been appointed Treasurer *pro tem.* of the Boston and Albany Railroad.

Boston, Barre and Gardner Railroad.

The third annual report of the Directors of this corporation has just been issued, giving an exhibit of the financial condition of the road up to Jan. 1, 1872. The contractors did not finish the road from Barber's crossing to Gardner within the time specified in the contract, but continued to work until stopped by frost, and will be able to complete it in the spring without interfering with the running of trains. The corporation began running one train daily each way over the road Sept. 4, but the road was not formally opened until Nov. 27, since which time four trains have been run each way daily. Everything pertaining to the construction and equipment of the road is of good quality and in excellent condition. The capital stock is $718,790. The cost of construction and equipment thus far has been $759,187 55. The total earnings of the road amount to $27,441 94; the total expenses $8869 87. The liabilities of the road are, bills payable $67,071 36; assets $70,055 88. Assets in excess of liabilities $2984 52. The assessments made upon the stock have been promptly paid, and every demand against the corporation has been met when due. The business of the road will probably require a large increase of rolling stock in the coming spring.

Philadelphia Car Works.

J. G. BRILL & SON,
MANUFACTURERS OF
Street and Narrow Gauge CARS
OF EVERY DESCRIPTION.
Castings, Wrought Irons, and all Material Necessary for Car Building.

CAMP'S IMPROVED DUMPING CAR.

RIGHTS FOR SALE BY

A. W. RHOADS & CO.,

Wilkes-Barre, Pa.

A. W. RHOADS, N. H. CAMP.

Fig. No. 1, Car Loaded & at Rest. **TO DUMP THE CAR.** Fig. No. 2, Car Dumped.

The Brakeman seizes the lever H, and raises it about a foot, thus releasing the hopper from the catch, C, and the tilting-frame, F, from the catch, C, when the hopper, K, yields to the force of gravity and rolls over to the position shown in Fig. 2.

To Replace the Hopper in Readiness for another Load.

The brakeman bears his weight on the up-end of the tilting-frame, F, forcing it down to its place, when the hopper rolls back to *its* place, where it is held by the catches, C and C.

Address, A. W. RHOADS & CO., Wilkes-Barre, Pa. Lock Box 131.

Pennsylvania Railroad.

The annual meeting of this company was held in Philadelphia on the 20th inst. The report of the directors for 1871 shows the revenues of the lines operated by the company and the amount paid for their working expenses, &c., as follows:—

From the Pennsylvania Railroad and branches, $18,719,836 85; Philadelphia and Erie Railroad, $3,542,268 73. Total, $22,262,100 58. Expenses of both railroads, $15,865,697 07; profits, $6,896,403 51. Deducting dividends, interest, &c., amounting to $5,426,112 73, there is left a balance to the credit of profit and loss on account of the Pennsylvania Railroad Company of $1,470,290 78; from which deduct the excess of advances made by the company over the amount received from the United Companies of New Jersey and the Philadelphia and Trenton Railroads towards the payments of interest, dividends and operating expenses, &c., prior to January 1, 1872, $936,238 23, loss the profits of the lease of the Pittsburg, Fort Wayne and Chicago and Pittsburg and Erie Railroads until transferred to the Pennsylvania Railroad Company on April 1, 1871, $184,824 02, leaving a net balance to the credit of the business of 1871 of $724,876 57.

NORTHERN PACIFIC

Seven-Thirties,

We recommend to our friends and the public generally as among the Safest and Most Profitable Securities in the market.

One thousand dollars in currency, invested in Northern Pacifics, will yield in ten years, in Gold, $1,730, while it is also practically certain that at the end of ten years a 7 30 Northern Pacific Gold Bond will stand at least 10 per cent. higher in the market than a 6 per cent. Gold Bond equally secured.

Northern Pacifics have Thirty Years to run, are exempt from United States tax, are issued in denominations from $100 to $10,000, and are secured not only by the Road and its earnings, but by 50,000,000 acres of land (equal to **90,000** SQUARE MILES), and worth not less than $300,000,000, or treble the cost of the Road.

No bond could be more secure.

JAY COOKE & CO.,

New York, Philadelphia & Washington.

Wilmington and Reading Railroad.

The annual Report of the directors of this company for the year 1871 shows receipts from transportation of $167,791 97, operating expenses $107,436 09. The president mentions the construction of the Christiana branch and wharf, and says "the indications are that a large shipping trade will be built up at this point." The receipts of the year show an increase of 92 per cent., and a further increase of 60 per cent. in the present year is indicated. The shipment of peaches to interior Pennsylvania last summer "proved entirely satisfactory as an experiment," and 894 tons were transported A number of new iron ore mines and stone quarries have been opened on the line of the road, from which a handsome increase of tonnage is expected. The branch road from Birdsboro' to Reading has been surveyed and prepared for letting. The president refers to the probable construction of the Berks County railroad (connecting with the Lehigh Valley) and of the Conestoga Valley railroad, from Springfield to Ephrata. The building of these important feeders will be of great value to the Wilmington and Reading line.

Schuylkill Navigation Company.

At the annual meeting of the stockholders of this company, held in Philadelphia on the 13th inst., the managers reported that they had been engaged during the year in settling up the affairs of the company, and in making the exchanges of the certificate of loans as provided for in the lease and agreement with the Philadelphia and Reading Railroad Company of July 12th, 1870. The income of the company was during the year, $651,419 79; charges, $599,836 77; balance of income for the year, $51,583 02. Of the sum of $13,550 26, charged for current expenses, $2,145 89 were for debts of the year 1870, that had not been presented in that year, thus leaving the proper charges for 1871, $11,404 37. On the 3d of January 1872 a dividend of 50 cents per share on the preferred stock, and 25 cents per share on the common stock was declared payable to the stockholders, clear of all taxes, on the 20th inst. On the 1st of January 1871, the floating debt of the company, arrears of interest and dividend, and amounts due for taxes and other liabilities, amounted to $1 081,968 63. On January 1st, 1872, the same items amounted to $296,371 18, the difference having been extinguished by the sale of part of the coupon bonds of 1895, and the application of $55,612 for the income of 1871. In the payment of this balance of indebtedness of $296,371 18, the means of the company were cash on hand, $132,880 97; rent due by Philadelphia and Reading Railroad Company, $57,161 04; and loans of 1895 and 1880 held by president in trust, $48,000, estimated at $38 400, making a total of $228,442 01, leaving an apparent deficiency of $67,929 17, exclusive of any dividend to the stockholders. This deficiency arose from the insufficiency of the means provided for the settlement of the pending debts, and other liabilities of the company, as they stood on June 1, 1870, a part of the assets which are relied upon for the payment of such debts, being claimed by

the Philadelphia and Reading Railroad Company as their property, under the agreement of June 12, 1870. In order to settle this difference of opinion, and to provide a fund for the complete extinguishment of the indebtedness of the company, and the payment of the stockholders of the above named dividend, it had been agreed to modify the lease and agreement with the Philadelphia and Reading Railroad Company, subject to the approval of the stockholders. The dividend of July 31st had been ordered, but if the stockholders should not ratify it, then the future income from rent of last year, as well as the means now on hand, would be required for the payment of the debts and dividends. The proposed arrangement was:

1st. That the Philadelphia and Reading Railroad Company should guarantee the payment of principal and interest of $150,000 debenture coupon bonds of the Navigation Company, payable in 30 years with 6 per cent. per annum clear of taxes, the proceeds of said bonds with the present means of the company to be applied to the payment of the debts.

2d. The Philadelphia and Reading Railroad should pay the full rent for 1872, to be applied for interest, dividend and current expenses, on the basis of the agreement of July 12th, 1870.

3d. That on January 1st, 1873, and thereafter during the continuance of the lease, the Philadelphia and Reading Railroad Company should provide office room and furnish all supplies for conducting the business of the Navigation Company, and also make an allowance of $1000 per annum for the compensation of a president of the Navigation Company, whose duty it shall be to verify the transfers and the issues of all certificates of loans, &c.

4th. That out of any surplus that might remain upon the settlement of the Navigation Company's affairs, a compensation might continue to be allowed to its officers for 1873, while they were seeking other offices.

On the motion of Mr. W. D. Whitney it was resolved that a committee of three stockholders be appointed to examine the plan of a supplement for any agreement with the Philadelphia and Reading Railroad Company therein suggested, and report to an adjourned meeting of the stockholders.

Messrs. W. D. Whitney, W. J. Paxson and Charles Wise were appointed the committee with instructions to report at an adjourned meeting. The following officers was then elected:

President—Frederick Fraley.

Managers—Joseph B. Townsend, John N. Hutchinson, George Brooke, Charles W. Wharton, Thomas T. Lea, Charles Baber, of Pottsville.

Treasurer—Charles W. Bacon.

Secretary—William M. Tilghman.

The $100,000 Canal Prize.

The report of the committee appointed by the Legislature of this State to award a prize of $100,000 for improvements in the motive power of canal boats has been sent in to the Assembly. No decision has been reached, nor any project apparently yet developed of practical value. Inventors in nearly all the States of the Union, the Canadas, England, Scotland, Wales, Holland, South America and Southern Africa have written letters of inquiry to various members of the committee. About seven hundred communications in all have been received and replied to. Numerous models and drawings have been sent to the committee. The report of D. M. Greene, engineer, which is attached to the report of the commissioners shows that a properly constructed steam canal boat could be navigated at one-half the cost of the horse power now in use, making trips in one-half the time now required. In other words, twice the amount of freight could be transported at an aggregate cost less than that now necessitated; but to this it is an indispensable condition that a depth of seven feet of water be maintained throughout the canal.

Providence and Worcester Railroad.

The income of this company for the ten months ending September 30, 1870, and for the twelve months ending September 30, 1871, was as follows:

	1870.	1871.
From passengers	$280,174 41	$345,120 53
" freight	365,290 83	464,830 31
" mails	4,140 74	3,880 00
" rents	2,692 01	3,422 86
" express	9,418 68	11,965 09
	$661,716 67	$829,218 79
Expenses, viz:		
Maintenance of way	$113,364 38	$170,077 16

Back dividends paid	297 00
Materials on September 30, 1871	138,702 71
Cash	$121,213 35
Less due to other roads	82,081 00
	39,132 35
Note	280 00
Total, as above	$633,535 47

The length of road in Massachusetts is 25.51 miles; do., in Rhode Island, 17.90 miles—total, 43.41 miles. Length of double track, 17.90 miles. Length of branch, 1 mile. Length of sidings 15 miles. Length of roads belonging to other companies operated by this company, 3.877 miles. Total miles of road operated by this company, 47.287 miles. The report says:

It again becomes the duty of the directors to make report of the doings of the road for another year, from which you will observe that while the gross earnings are larger than for any preceding year, so much has been expended in improvements that the net earnings are only about the same as the year previous. It has in fact been the aim of the directors to use all the surplus earnings, keeping in view its usual dividends, in improving the road and increasing its equipment. It is believed that no road is in better condition or more fully equipped for its business.

Among the additions and improvements finished and in progress, are the building of the double track, the building in connection with the Boston and Providence Railroad Company, of an elegant and commodious brick passenger station at Pawtucket, 94 by 40 feet, two stories with French roof; at Woonsocket a new freight station of granite 204 by 42 feet with expensive bank walls and turnouts; a new brick passenger station at Ashton; a new car house at Valley Falls; a new engine house and a new car house at Worcester; an enlargement of the locomotive house at Providence; an addition to the passenger station at Central Falls; and what has been long needed the paving of the grounds surrounding the freight station at Providence, together with many other expenditures as detailed in the Treasurer's accounts.

The workshops of the company are running to their full capacity in building additional freight and coal cars, of which it is expected to turn out 100 during the coming spring. Additional locomotives and passenger cars are also required and are about to be contracted for.

An examination, by competent builders, of the bridges between Blackstone and Worcester, which it is necessary to widen to receive the double track, results in a decision that it will be better economy to build them anew, rather than to widen and repair the old ones, which have stood for twenty five years, and much of the time without being covered. The force of the company not being sufficient to build these in time, a contract has been made with Messrs. Chamberlain, Gibbs & Co., whose large experience in building bridges will enable them to build these with economy and despatch. The materials will be furnished by the company and are already being contracted for.

The new bridge at Orms street in this city, which was delayed some time by the non receipt of the lumber ordered for it, and after it was received by a new order from the city government to build it 87 feet wide instead of 52 feet as it now is, necessitating a further order for lumber, is now about to be built, the builders only awaiting the finishing of another bridge before commencing this. To pay for all these and other projected improvements, the directors have recently negotiated a sale at par of $200,000 of their 6 per cent. currency bonds, being the remainder of the half million authorized to be issued. The proceeds of these bonds will be received in January.

Notwithstanding the large coal equipments of the road and that the work of unloading is continued through the night, when practicable, as well as through the day, unavoidable delays have occurred for the last few weeks, from the fact that at least two-thirds of the business of the year has been crowded into the last three or four months. These delays are liable to occur until more of the consumers will equalize, in a greater degree through the year, their purchases of coal, and get in a larger portion of their annual consumption during the dull months of the year. No road can afford to have equipment enough to do the whole business of the year in a few months at increased expense, leaving it comparatively idle and to decay for the remainder of the year.

Complaints are made that the passenger and freight tariffs of this road are higher than those of the Boston and Providence Railroad of the same length, and running from the same depot which is true to some extent, but a strict comparison will show that the difference is no greater than the difference in expense of operating the two roads.

It should be borne in mind that this road rises over 500 feet in its 44 miles of length and is quite crooked; consequently must do its traffic a greater expense than straighter and more level

roads—another feature of that well managed road is, that its passenger receipts far exceed its freight receipts, while on this the freight receipts are far in advance of its passenger; and it is well understood that the passenger receipts of a railroad, with well arranged tariffs, are much more profitable than its freight receipts.

From the present good condition of this road, however, and its full equipment, and with anticipated increased business, it is hoped the ratio of expenses to receipts will be reduced; and with that view a revision of the tariffs, both passenger and freight, is now being made, and will soon be presented to the Board for ratification, to take effect by the first of March next. If adopted, they will compare favorably with other New England railroads. No modification could have been made before without a reduction in dividends which, perhaps, are not too large, when we recollect that for several years no dividends were made and for many more they were small.

A majority of the directors of the road being owners of large manufactories along its line and among its heaviest customers, would seem to favor the adoption of as low rates as a proper management of the road will warrant.

Two semi-annual dividends of five per cent. each have been declared during the year; one was paid July 1st and the other will be paid January 1st.

In their recent circular the Railroad Commissioners of Massachusetts recommend a reduction in the passenger and freight tariffs of the roads of that State. But when a road managed with judgment and economy, uses up all its earnings in its expenses and moderate dividends, which is the case with most New England railroads, it must be apparent that no large reduction can be made, unless the public will be satisfied to use dilapidated roads and less comfortable and commodious equipment, which would be poor economy. Whatever reduction is made must come from the net earnings, the expenses being the same.

The directors congratulate the stockholders that their road and its affairs are in a sound and prosperous condition, and under the care of its indefatigable superintendent, their property can never be less valuable than at the present time.

The company have 23 locomotives, 24 passenger cars, 6 mail and baggage cars, 229 eight-wheel, and 76 four-wheel merchandise cars, 118 eight-wheel platform cars, and 461 four-wheel coal cars.

Miles run by passenger trains, 208,420; by freight trains, 223,492. by other trains, 22,760—total, 454,672. Number of passengers carried, 1,898,891; do., carried one mile, 12,858,188. Tons of merchandise carried, 452,266; do., carried one mile, 13,855,268.

Treasurer and Clerk.—JOHN R. BALCH.

Superintendent.—WILLIAM D. HILTON.

Boston and Albany Railroad.

At the annual meeting of the stockholders of this company, held in Boston on the 14th inst., the following gentlemen were elected directors for the ensuing year: Chester W. Chapin, Springfield; D. Waldo Lincoln, Worcester; Ignatius Sargent, Brookline; James M. Beebe, Boston; George O. Crocker, New Bedford; Ginery Twichell, Brookline; Henry Colt, Pittsfield; Edward B. Gillette, Westfield. In response to a question by a stockholder, the President explained that a million and a half of the bonds issued in December had been taken, and a temporary loan of $900,000 has been paid from the proceeds. In the course of the colloquy the President stated that during the past ten years the company had paid over two and one half millions for premium on gold to use abroad.

The corporation had been compelled to stop giving through bills of lading to Western shippers to Liverpool. Nearly one-half of the freight brought from the West for shipment has been put on other than Cunard steamers. There was now freight enough coming over the road to load a steamer every second day if there was one ready.

The President also stated that since October, when rates of passenger and freight were reduced about ten per cent., there had been a loss of $11,772 in passenger receipts over 1870, and a gain of $332,203 in freight. The total gain in receipts by the reduction is now probably about $400,000. The expenses have, of course, increased by the increased freight carried. The number of passengers was not largely increased.

Pennsylvania Canal.

The annual meeting of this company was held in Philadelphia on the 13th inst. The annual report, which was presented by the secretary, shows the net revenue for the year 1871, clear of drawbacks, to have been $636,354 32 against $585,084 87 in 1870—an increase for 1871 of $51,269 45. The Treasurer's statement shows the balance on hand January 1, 1871, to have been $59,472, and the receipts from all sources during the year $1,006,648 26, making the total receipts $1,066,120 26. The expenditures were $1,041,340 91, leaving a balance on hand of $24,779 35. The following gentlemen were elected directors for 1872: President, Isaac J. Wistar. Directors, J. Edgar Thomson, Thos. A. Scott, H. J. Lombært, G. B. Roberts, Samuel T. Bodine, Wistar Morris, Washington Butcher, Joseph B. Myers, Josiah Bacon, William Anspach, Joseph H. Dulles, Chas. Parrish.

☞ The supplement to the Philadelphia and Newtown Railroad bill, recently passed by the Legislature, confers upon the present owners of the charter the privilege of building a road, to be operated by steam power from any point on or north of Berks street, in Philadelphia, between Front and Sixth streets, to the borough of Newtown, in Bucks county. The engineers employed have already had two lines surveyed, and have a profile of the grading nearly completed. Officers have been elected, and the organization perfected so far that everything is ready to put the work under contract at an early day.

☞ T. B. Sargeant has been appointed Superintendent of the new Boston, Barre and Gardner Railroad, and will soon enter on the duties of that position.

Northern (Canada) Railway.

At the annual meeting of the stockholders of this company, held in Toronto on the 14th inst., the following report was presented:

The Canadian Directors have the honor to submit the report for the year ending 30th Dec. 1871, with the usual appendices in detailed explanation thereof.

The gross traffic receipts for the year have been $777,498 94, as against $733,567 25 in 1870, showing an increase of 5.99 per cent.

The ordinary working expenses of the year have been $461,316 44, as against $426,118 61 in 1870, giving for the year 1871, a rate on the gross traffic receipts of 59.93 per cent., being an increase of 4.25 per cent. on the rate of 1870, which has arisen entirely from the reconstruction of a considerable proportion of the box freight car stock.

The expenditure upon necessary extensions and additions to works, building, rolling stock and general equipment has amounted to $188,478 76.

The new elevator at Collingwood has been completed and was opened for service on the 16th of October.

The Muskoka Railway was opened to Orillia (22 miles) on the 30th of Nov., and has since been in regular traffic operation to that point. It is expected that the next division of the line to Washago (11 miles) will be opened for traffic about the first of July.

The works of the North Grey Railway are being pushed forward by that company with energy, and there is every probability that the line will be in operation early in July next.

These two companies have entered into an agreement for amalgamation with a view to more economical administration, and to a consolidation of their securities, and a bill is now before the Legislature to give legal effect to that agreement.

In the event of that bill passing, of which there seems to be no doubt, it is proposed to simplify the relations of the amalgamated corporation with this company by consolidating the two leases of those lines into one, a measure obviously desirable and for which, if necessary, it may be well to seek legislative sanction.

Whitehall and Plattsburg Railroad.

At the annual meeting of the stockholders of this company held at Crown Point on the 14th inst., the following resolution was unanimously passed:

Resolved, That Messrs. A. B. Waldo, Wm. W. Hartwell and J. G. Witherbee be and they are hereby a committee to confer with the Delaware and Hudson Canal Company, or other parties, for the construction of the road from Whitehall to Ticonderoga and from Port Henry to the Clinton County division, or either portion thereof, with full power or authority to transfer State aid and all of the resources of the company and to execute a contract; and further resolved, that it is the unanimous desire of this board to take immediate measures for the completion of the unfinished portions of the Whitehall and Plattsburg Railroad.

☞ The directors of the Framingham and Lowell R. R. Co. have organized by the choice of Hon. E. P. Carpenter of Foxboro,' as President; H. Bliss of Worcester, Vice President; George E. Towne of Fitchburg, Treasurer; and Hosea Hyde of Newton, Clerk. The road is doing a very successful business, and promises to become an important tributary to the general communication between southeastern Massachusetts and the eastern, northern and western sections of the country.

☞ The completion and opening of the Middletown and Crawford (Orange County) Railroad was celebrated on the 23d inst.

Narrow Gauge Railways.

The South Branch Railway bill before the West Virginia Legislature proposes 160 miles of road between the Baltimore and Ohio and Chesapeake and Ohio railroads, by way of South Branch and Greenbier rivers. It is to be a narrow gauge. The projectors have advertised for an engineer to superintend the construction of the work.

A meeting was held at the LaGrange Iron Works on the 15th instant, for the purpose of taking into consideration the building of a narrow gauge railroad from Delta to Baltimore, by way of Towsontown, or to some point on the Northern Central railroad. This meeting was organized by appointing Archibald Wilson chairman and E. S. Rogers secretary. A committee was appointed to accompany an engineer on a preliminary reconnoisance as to the most practicable route to Baltimore by either of the above routes. Another meeting will be called at La Grange as soon as the engineer can make a preliminary report of the best route. On motion the meeting adjourned subject to the call of the chairman.

Minnesota Railroad Land Grants.

EXTRACT FROM THE REPORT OF THE RAILROAD COMMISSIONER.

In no State have such munificent land grants been made to railroad corporations as in Minnesota.

After deducting all deficiencies, they have either received or will receive on the completion of their roads, 12,222,780 acres of land in this State, an area larger than the whole of Massachusetts, Rhode Island, Connecticut and one half of New Hampshire, embracing much of the finest wheat lands in America.

The Saint Paul and Sioux City Railroad is 122 miles in length and this company has already received 698,405.77 acres of land which is valued at $6 per acre. The State also granted to this road 37½ miles of graded road bed which was worth $2,500 per mile. The city of Mankato has donated to it $15,000 in city bonds. This company then has received from the public the following amounts:

698,405.77 acres of land at $6 per acre	$4,190,434 62
37½ miles road bed at $2,500 per mile	93,750 00
Local aid from Mankato	15,000 00
	$4,299,184 62

The amount this company has received from the public is therefore more than $35,000 per mile. The road cost, according to a statement furnished to the Governor, two years ago, less than $28,000 per mile. In addition to the above grant of lands which the company has actually received there is an unadjusted balance of one hundred and thirty-four thousand acres of land which the company will receive; this at $6 per acre will make in addition to the above $804,000, or in all $5,103,184 62 or over $41,800 per mile for the length of the road.

THE SIOUX CITY AND ST. PAUL RAILROAD.

This road will be, when completed, 66 miles in length, in this State. The company has already received 189,459.10 acres of land and will receive when completed the balance of 230,000 acres. This road then receives the following accounts:

230,000 acres of land at $6 per acre...$1,380,000
Amounting to over $20,000 per mile for the length of the road.

1ST DIVISION OF ST. PAUL AND PACIFIC RAILROAD COMPANY.

This company has received, or is entitled to, 448,000 acres of land for branch line to Watab, 405,310.81 of which have been adjusted. This is valued by the company at $5 50 per acre. This company also received for the main line 1,382,400 acres, 450,982.88 of which have been adjusted. This land is valued by the company at $7 per acre.

This railroad company also received from the State 62½ miles of graded road bed ready for the superstructure, which was worth $2,500 per mile. The grants from the public to this road amounting to the following sums:

448,000 acres, branch line, at $5 50 per acre	$2,464,000
1,382,400 acres, to main line, at $7 per acre	9,676,800
62½ miles of grading at $2,500 per mile	156,250
	$12,297,050

This road, main line and branch, is 283 miles long. It appears then that the public have granted for its construction $43,452 per mile for the length of the road. The estimated value of the road and equipments as made by the company, is $13,903,593 86, or some over $49,000 per mile.

LAKE SUPERIOR AND MISSISSIPPI RAILROAD.

This company has already received from the Congressional grant 484,084.97 acres of land and will receive 476,000 acres more, making the amount of lands received and to accrue from this grant 960,000 acres. This company also receive from the State 694,400 acres of land of what are commonly denominated swamp lands, 567,247.84 acres of which have already been deeded to the company. 11,248.68 acres of the above lands have been sold by the company for $4 73 per acre; 7,171.49 acres have been sold for $5 57 per acre Perhaps a fair estimate of the remaining portion of the grant would be $2 50 per acre. This company has also received the following municipal aid:

From St. Paul	$200,000 00
From St. Louis county	150,000 00
	$350,000 00
Amount received by this company:	
11,248.68 acres at $4 72 per acre	$52,093 77
7,171.47 " " $5 57 " "	39,945 09
1,635,939.85 valued at $2 50 per acre	4,089,949 62
Municipal aid	350,000 00
Amount received	$4,531,988 48

This road being 156 miles in length has received over $29,000 per mile from the public.

MINNESOTA CENTRAL RAILWAY.

This road has already received under the Congressional grant 167,665.34 acres of land and is entitled to 8,000 acres more. This land is worth $6 25 per acre. This company also received from the State 69½ miles of grading which at the estimate of $2,500 per mile makes $173,125. This company has then received from the public the following sums:

170,500 acres land valued at $6 25 per acre	$1,065,625
69½ miles of grading at $2,500 per mile	173,125
Amount	$1,238,750

This road is 122 miles long, from Minneapolis to Lyle, and the amount received from the public is over $11,000 per mile, or if we reckon the Milwaukee and St. Paul Railroad as the successor of this company, and compute the cost from St. Paul to the Junction near Mendota we should also add to the grants from the public the amount the city of St. Paul gave to this road.

STILLWATER AND ST. PAUL RAILROAD.

This company obtained 76,800 acres of land.

In the report of the road the company does not fix any valuation upon the grant, but estimating the same at the rate of $5 per acre we have the following amount received:

76,800 acres of land valued at $5 per acre.$384,000

This road is 13 miles in length and the amount received from the public is over $29,000 per mile.

The cost of the road as given in the report of the company is $361,701 74.

SOUTHERN MINNESOTA RAILROAD.

This company has already received under the Congressional grant 193,833 acres of land and is now entitled to and will receive 134,490 acres more for the road thus far completed. The company has sold 170,478.68 acres of this grant at from $4 50 to $4 71 per acre. The value placed on the balance of the grant now owned by the company is $6 per acre. This company also received a grant from the State of 640,000 acres, but there will probably be a large deficiency in this grant. The company has already received 32,342.44 acres from the State which is valued at $4 71 per acre, also 20 1-5 miles of grading valued at 2,500 per mile, also municipal bonds to the amount of $148,000, likewise $47,500 of municipal bonds have been voted to the company but not yet delivered.

Amount of aid received:

193,833 acres land valued at $4 71 per acre	$912,953 43
134,490 acres land valued at 5 00 per acre	672,450 00
32,342.44 acres land valued at $4 71 per acre	152,332 89
20 1-5 miles grading at 2,500 per mile	50,500 00
Municipal aid received	148,000 00
" " voted	47,500 00
	$1,983,736 14

This road being 170 miles long has received public aid to the amount of over $8,400 per mile.

WINONA AND ST. PETER RAILROAD.

This company has already received 865,155.85 acres of land valued at $7 per acre and has also received from the State 50 miles of graded road bed valued at $2,500 per mile.

Amount received:

865,155.85 acres of land at $7 per acre	$2,656,090 95
50 miles of grading at $2,500 per mile	125,000 00
	$2,781,090 95

This road is completed 148 miles and has received thus far $19,300 per mile.

NORTHERN PACIFIC RAILROAD.

Congress granted in aid of the construction of this road ten sections of land per mile, through this State, and if the length of the road be 240 miles, it then receives 1,536,000 acres of land in this State.

I understand that this is valued by the company at $5 per acre, if so, this company then receives from the Government $7,680,000, or $32,000 per mile for its length of road in this State.

ST. PAUL, STILLWATER AND TAYLOR'S FALLS RAILROAD.

This company receives 44,800 acres of land, but no estimate as to its valuation has been furnished.

Memphis and Little Rock Railroad.

The Memphis *Appeal* thus refers to the new rolling stock on the Memphis and Little Rock Railroad;

There has been placed upon the Little Rock road, since its change of gauge, the most uniform and handsome rolling stock used upon any railway in the south. Engines, passenger cars and freight cars are of the perfection of the art of carbuilding. The road is now moving, promptly, all freight offered, and Arkansians who would purchase goods in Memphis or Louisville may rely on having them sent through by "all rail," with promptness, without insurance, which, in many cases of river transportation exceeds the amount of freight charged by the railway company. It only remains for the city councils to execute a contract with the Little Rock railroad company by which its trains may be transferred bodily to the navy yard, that all freights may be received and delivered at one single point. If the city au-

thorities consulted as unselfishly the interests of Memphis as those who have executed this herculean task of bridging the lowlands of Mississippi, municipal legislation in behalf of this road would be infinitely more liberal and certainly more prompt than we have hitherto found it.

Cumberland Valley Railroad.

The revenue of this company for the year ending September 30, 1871, was as follows:

From freight		$347,571 67
" passengers		190,110 83
" mails		6,300 00
" express		4,445 54
" other sources		9,211 39
		$557,639 43
Expenses, v'z:		
Conducting transportation	$77,885 84	
Motive power	66,775 90	
Maintenance of cars	12,912 69	
Maintenance of way	63,189 39	
General expenses	13,280 00	
Extraordinary expenses	82,355 63	
		316,399 44
Net earnings		$241 239 99
Dividends and interest		133,608 34
Balance		$107,631 65

The company has 18 locomotives. Miles run with passenger trains, 186,022; with freight trains, 105,458; with other trains, 16,972—total miles run, 258,452. Number of passengers carried, 302,864. Tons of freight transported, 297,336. The president in his report says:

There is, perhaps, no system, which, in the world's progress, marches so steadily on as that of railways, and the public demand for their extension must be responded to; and whilst there may be some considerations which might induce us to hesitate in any extension of our road, we are not at liberty to stand still, regardless of the public necessities and demands upon us to supply their wants. At various points along our valley is found the greatest abundance of iron ores of the best qualities. It was demanded of us that we should afford facilities for transporting them to the furnaces, and it has been the policy of your board of directors to answer these demands. About seven miles south from Mechanicsburg, large mines of magnetic and hematite ores have been opened, and a company has been organized to construct a road from Dillsburg to Mechanicsburg, and it is now in course of construction, and will be completed early in the Summer. Your company has agreed to loan to it a sum sufficient to put the superstructure upon the road so soon as it shall have been graded and bridged by the Dillsburg and Mechanicsburg Railroad Company, to be secured by a mortgage of the road for the payment of bonds with seven per cent interest in gold, payable semi-annually, and a lease of the road to the Cumberland Valley Railroad Company for one hundred years. The valuable ores of the South Mountain and Pine Grove region are now brought to your road by the South Mountain Railroad.

A company has been organized, and is now actively engaged building a road from Mont Alto to a point near Scotland, in Franklin County, a distance of ten miles, which reaches a deposit of ore, the mines of which have been opened and used for many years, producing a quality of ore which is said to be very superior, and in quantity, according to the report of Prof. Lesley, entirely inexhaustible. We have also agreed to loan to this company, which has been chartered by the name of Scotland and Mont Alto Railroad Company, a sum sufficient to put the superstructure upon the road. It is expected that this road will be finished early in the coming Spring.

The Southern Pennsylvania Railroad, leading from Marion, a point on this road, to Mount Pleasant in Franklin County, a distance of twenty-five miles, has been completed and accepted by the Cumberland Valley Railroad Company under the terms of the lease, the conditions of which are stated in our last year's report. This road after passing through the richest and most beautiful part of Franklin County, reaches the ore mines of the Mount Pleasant Iron Company, which, upon the authority of a personal examination of them by Prof. Lesley, are pronounced to be excellent in quality, most abundant in quantity and mined with unequalled facility. We have thus by these roads, all of which will be in operation early in the Summer, reached every desirable point for trade and travel on either side of our valley. It is contemplated to extend the Scotland and Mont Alto Road to Waynesboro', which, if completed, will secure a most desirable accommodation to the enterprising manufacturers, as well as farmers in the vicinity of that place.

The extension of our road from Hagerstown to the Canal, at Powell's Bend, on the Potomac, has been completed, except the siding which reaches down to the Canal, which will be finished in a very short time, giving us a connection with the Chesapeake and Ohio Canal. The abutments and a large part of the foundations and piers of the bridge have been built, and the bridge itself is nearly completed by the Keystone Bridge Company, and it will require little time to put it up whenever the piers shall be finished. The road of the Martinsburg and Potomac Railroad Company is in a state of forwardness and will be completed by the time the bridge over the river may be passed, whereby we will be connected with the Baltimore and Ohio Railroad at Martinsburg, giving the people of our valley a direct communication with the west by Pittsburg, Wheeling or Parkersburg.

The second track, between Mechanicsburg and Bridgeport has now been completed at an expenditure during the last year and the year before of $57,885 70. An additional siding of 2,091 feet has been put in at Bridgeport, 250 feet at Mechanicsburg and 542 feet at Chambersburg, making 2,883 feet of siding during the year at a cost of $6,158 57. The passenger station at Hagerstown has been finished, and new engine house at Harrisburg. Two new passenger cars have been built, and one new freight engine purchased, making the extraordinary expenses as follows:

Williamsport Extension and Potomac Bridge	$123,345 98
Passenger station and engine house	2,861 26
Second track to Mechanicsburg	52,092 86
New sidings	6,158 57
New tools	1,164 82
New freight engine	12,112 43
New Passenger cars	8,835 99
Total	$206,571 41

The motive power and rolling stock of the company is in excellent condition, and would, perhaps, be adequate to the business of the coming winter, but for the necessity of making provision for the trade from the Southern Pennsylvania Railroad, which has just been opened for it. That company has expended nearly two millions of dollars in the purchase of their lands and construction of their road, and to pay upon this expenditure of capital will require a large amount of work, the principal part of which will be the sale of iron ore, all of which must pass over our road. Their estimate of mining operations is 200,000 tons a year; this would require of us a very large addition to our motive power—at least eight new freight engines. But much allowance of time is to be made to enable them to bring into operation so large an amount of work; and the difficulty of immediately disposing of so great a quantity of ore, is to be considered. But ore from the Dillsburg road and from the Mont Alto road, both of which will be completed early in the coming year will certainly be brought to us, and we must be prepared to transport it over our road. This will involve the necessity of the purchase of at least three new freight locomotives, as soon as they can be obtained. All these new branches will, doubtless, supply their own cars and control them at points of loading and unloading. If no untoward circumstances should occur to mar the operation of trade and manufactures in the coming year, we may look with great certainty for a very large increase of business upon our road. The connections with the Chesapeake and Ohio Canal will largely add to our coal and lumber trade westward, and the great facility of mining ore upon our road and its branches must give employment to a greatly increased motive power eastward, and this increase will assuredly enable us to carry at rates which will be satisfactory to all who do business on our road.

Statement October 1, 1871.

Cost of road and equipment	$1,583,444 79
Materials on hand	53,221 84
Trustees of sinking fund	464 196 48
Cash and cash balances	94,798 11

President.—Frederick Watts.

Directors.—Frederick Watts, Thomas A Biddle, Thomas A. Scott, Washington Butcher, Wistar Morris, H. J. Lombaert, Daniel O. Gehr, Thomas B. Kennedy, Edmund Smith, J. Edgar Thomson, Josiah Bacon.

Secretary and Treasurer.—Edward M. Biddle.

Superintendent.—O. N. Lull.

Pittsburg, Cincinnati & St. Louis Railroad.

At the annual meeting of the stockholders of this company, held at Steubenville, Ohio, on the 5th inst., the following gentlemen were elected directors for the ensuing year: Thomas A. Scott, George B. Roberts, Josiah Bacon, Samuel T. Canby, Henry H. Houston, William Thaw, Thomas L. Jewett, Joseph Means, Thomas Mears, George W. Adams, David S. Gray, J. N. McCullough, Robt. Sherrard, Jr. The report of the Board of Directors indicated that the leased lines will be self-supporting during 1872. An issue of three and a half millions of preferred stock was authorized to pay off the floating debt. The leases of the Chartiers Railroad, and of the Jeffersonville, Madison and Indianapolis Railroad were ratified.

☞ At the annual meeting of the West Jersey Railroad company held on the 19th inst., the following gentlemen were elected to serve as Directors for the ensuing year, viz: Thomas Jones Yorke, Samuel A. Whitney, Horatio J. Mulford, Charles E. Elmer, Coleman F. Laming, Lewis Mulford, John M. Moore, Josiah Bacon, Washington Butcher, George B. Roberts, Edmund Smith, Edward C. Knight, Samuel T. Bodine. Hon. T. Jones Yorke was re-elected President, and George J. Robbins, Secretary and Treasurer.

☞ Work on the wharves of the Chesapeake and Ohio railroad just below Rocketts is being pressed with great energy, piles already having been driven over a space the length of two city squares. The wharves will be constructed in the most substantial manner, and will be of a capacity fully equal to the immense business they are designed to accommodate.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday February, 24, 1872.

Stock Exchange and Money Market.

Money has been in more urgent request, for both speculative and mercantile purposes, and with rather less liberal offerings, on bank and private account, rates have been quoted somewhat firmer, the current figures having been 6@7 per cent., and mercantile discounts at from 7@9 per cent. per annum. The last weekly exhibit of the city banks was deemed less favorable, indicating a further material falling off in the coin and currency resources, as well as in the deposit line. The coin reserve of the city banks is now down to about 19½ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve has decreased to $45,620,300, from $46,616,000 on the statement of February 10th. The Treasury office reports a reduced currency and an enlarged specie balance. The city banks reduced their loan and disconnt average over half a million during the week, while again contracting their outstanding circulation slightly. The U. S. Sub-Treasury reduced its currency balance nearly 1¼ millions. It made a gain of about 2¼ millions in its coin reserves. Its currency balance at the close of business on Tuesday was $5,989,621 and its coin reserve, $78,955,211.

The total coin reserve of the Treasury Department on Monday was $106,741,260 including $34,673,500 represented by outstanding coin certificates; and the currency balance was $12,856,479.

The city banks, in their latest return, show a reduction of $995,800 of legal tender notes, $1,682,900 of specie, and $3,222,300 of deposits; also of $510,900 in their loan and discount averages, and of $12,500 in their item of circulation. The city bank exchanges, last week, averaged $98,602,458, and thus far, this week, about 99½ millions daily. The banks now hold $3,748,100 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $19,589,400, against $21,707,337 same time last year. The city bank deposits are now $217,697,200, against $216,290,333 week ending Feb. 18, 1871. The legal tender reserve amounts to $45,620,300, against $56,366,639 same time last year. The circulation now stands at $28,149,200 against $31,737,841 same time last year. The loans are now $284,911,300 against $274,912,520 at this date last year.

The U. S. Sub-Treasury reduced its currency balance $1,224,782 and increased its coin reserve $2,213,134 as the result of the week's business. The receipts of the office were $4,554,237 in coin, and $2,038,339 in currency; payments, $2,341,105 in coin, and $3,263,120 in currency. The office received $3,408,000 in coin or its equivalent, from customs; and disbursed $576,021 of coin interest.

Government revenues were light in the excise form, but quite liberal in the way of customs, last week. The excises yielded about 1¾ millions, and thus far since July 1, 1871, about 82¾ millions. The customs at the port of New York, last week were $3,361,007; at the outports, equal to about $1,100,000 more, all in coin, or coin certificates.

Under the Treasury financial programme for the month of February, Government will buy in Five-Twenty bonds as follows: Thursday Feb. 29th $1,000,000.

The Gold movement has shown less spirit in the speculative call since our last, and less buoyancy as to price. There has been a more active inquiry for coin, for Custom House purposes; while the export drain has been limited. The range of the price during the week has been 110⅛@110⅝ and the closing quotation on Wednesday was 110⅛@110⅝ against 110¼ the preceding Wednesday. The specie outflow, last week, was only $154,730. The Gold Exchange Bank clearances have averaged about 39⅞ millions per day during the week.

The members of the Gold Exchange on Wednesday voted down the proposition to remove to the old Open Board room in Broad street, and resolved to lease their present quarters for two years, from May 1 next, at $16,000 a year—the same rent they have been paying.

On Wednesday, Government marketed a million of Gold @110 51¼. The bids amounted to $8,261 000.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to Feb. 17, 1872,

$58,503,594, against $62,082,024 same time in 1870-'71.

The customs demand for Gold last week, averaged $568,000 a day; thus far, this week, it has averaged $1,067,000 a day or equal to a weekly aggregate of $5,335,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $139,067, and since Jan. 1, 1872, $252,526 against $391,408 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, have been $99,299,530 against $91,096,698 same time in the preceding fiscal year 1870-'71.

The export drain of specie was $154,730 last week, against $1,170,550, same week preceding year. The shipments since July 1, 1871, have been $24,085,542 against $46,693,660 same time in 1870-'71.

Foreign Exchange has been in reduced supply and quoted firmer, but has been comparatively quiet. Bankers' sixty day bills on London closed on Wednesday at 109⅜@109⅝; sight bills on London, 110⅛@110⅜.

The produce exports from this port, week ending with Feb. 20, were to the currency value of $4,089,230.

Government securities have been moderately sought after, and prices have been generally supported. The offerings of bonds have been reserved, at the ruling figures.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115¼@115½; U. S. Five-Twenties of 1862, (other than the bonds called in) 111⅛@111¼; U. S. Five-Twenties of 1864 at 111⅛@111¼; U. S. Five-Twenties of 1865, 111⅛@111¾; U. S. Five-Twenties of 1865 consolidated, 110½@110¾; U. S. Five Twenties of 1867, 111¾@111⅞; U. S. Five-Twenties of 1868, 112¼@112½; U. S. Ten-forties at 110¾@110⅞; U. S. Fives of 1881 (Funding Loan) 108⅝@108⅞. Six per cent. currency bonds, 114@114⅛.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 7.	Feb. 14.	Feb. 21.
Consols	92⅛	92⅜	92⅛

" 10-40s	90¾	91	*88¼

* Ex March coupon.

State bonds have been in moderate request at irregular prices.

Railway Bonds of the better class have been in good demand, on investment account, and quoted strong as to price. There has been a fair inquiry noted for the Central Pacific Sixes at 102¼@102½. Chesapeake and Ohio Sixes have been purchased quite freely at 94 per cent. and accrued interes.

Railway and miscellaneous share property has been decidedly active, with values quoted stronger, though irregular. Union Pacific Stock has been the feature of the speculative movement, having been dealt in with universal freedom, closing at buoyant prices.

General business has shown rather more activity in the line of domestic produce, with Cotton, Flour, Wheat, Lard, Bacon, Wool, Naval Stores, Iron, and Tin Plates quoted firmer. Middling upland cotton closed on Wednesday at 23⅛ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,132,785 bales, against 2,726,906 bales same time in the preceding year; exports 1,152,948 bales against 1,566,268 bales in the previous year; stock at the ports at latest dates, 587,138 bales against 713,879 bales same date 1871.

At the Live Stock Markets, Beeves have been in less request at 8⅛@13 cts.; Veals in moderate demand at 5@11cts.; Sheep at 6½@9¼ cts. Swine, at 4¾@5⅛ cts. per lb., all live weight. The week's receipt were 7,189 Beeves, 908 Veal Calves, 30,502 Sheep and Lambs; and 35,367 Swine.

Foreign goods, have been held with firmness, on a more satisfactory demand for seasonable stocks. The week's imports of foreign goods reached $7,319,339 including $2,864,556 of dry goods.

Ocean freights have been quoted firmer, on a livelier inquiry for accommodation, chiefly for Grain, Provisions, Cotton, Clover Seed, Petroleum, and Tobacco.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The Lake Erie and Louisville Railway Company have closed a contract for iron and equipments for its line from Sandusky, Ohio, through Lima to Cambridge, Ind., to be delivered as fast as the company can prepare the road bed, fifteen hundred tons of iron to be delivered May 1st, or as soon as navigation opens, an equal amount June 1st, and two thousand tons July 1st, which will complete the road to St. Mary's, Ohio, fifty-two miles, and the remainder for the whole line as fast as it can be used. When completed this will form part of the shortest line between the following points, with a maximum grade of only thirty feet to the mile; First, from Cleveland and Sandusky to Louisville; second, from Toledo via Lima to Louisville; third, from Cleveland and Sandusky to Indianapolis; fourth, from Toledo to Indianapolis. It will also be the favorite route from Cincinnati, Hamilton and Dayton to the islands of Lake Erie, the great watering place of the West, and for all that populous and wealthy county between Sandusky and Lima to Cincinnati. The work of completing the road has been put in charge of the executive committee, consisting of the President, Hon. Charles Foster; General R. P. Buckland, and Calvin S. Brice. They have commenced raising local aid to prepare the road for iron, and will push the road through this year.

☞ It is stated that the Williamstown (N. J.) railroad will be completed and in running order some time during the coming Spring. The work on it has progressed as rapidly as the weather would permit; about three-fourths of the distance is graded and the two bridges are finished. The ties and rails are to be delivered along the road the present month. Two locomotives have been ordered, which will soon be delivered.

☞ The question of a railroad from Seymour (Conn.) to Woodbury is being agitated. The Naugatuck Railroad have offered to build the road provided $50,000 can be raised from the towns through which it passes. The cost of building the road is estimated at $200,000.

☞ The work on the Mansfield, Coldwater and Lake Michigan Railroad has made rapid progress notwithstanding the severity of the winter. The entire portion in Ohio except about thirty miles is graded, and thirty days of good weather will suffice to complete the work. The bridging is in an advanced state, and the work of laying iron will be commenced as soon as the weather will permit. There are ties already on the line sufficient to tie sixty miles, and one hundred thousand more will be delivered March first, and for the entire road by the end of April. Thomas A. Scott and the Pennsylvania Company Board of Directors have promised to be ready with the iron and equipments. On the Michigan end sixty miles are in operation, eighty graded and tied, and only eight to grade, and early in the season the entire line will be in operation, giving unbroken rail communication with Muskegon, opposite Milwaukee. The connecting line between Toledo and Tiffin will also be furnished and in operation in the early summer months.

☞ At the annual meeting of the Mansfield and Framingham Railroad company, held at South Framingham on the 7th inst., the directors submitted their annual report, from which it appears that the business of the road during the past year has increased over fifty per cent. over that of 1870. The prospects of the road are flattering, and the increase of freight and passenger traffic is far in excess of the most sanguine anticipations of its friends. The road is now in excellent condition, with facilities for a much larger business than it is doing, and the expenditures cannot be large for construction. They counsel patience to the stockholders, as the day of dividends cannot be much longer postponed.

The Board of Directors of last year was re-elected, and it was voted to authorize the sale of that portion of their road lying north of the Boston and Albany Railroad in Framingham to the Boston, Clinton and Fitchburg Railroad Company, subject to terms to be fixed by a committee appointed to make the transfer.

☞ Gen. Winston, of the St. Louis and Southeastern railroad, has been negotiating for the purchase of the Clarksville and Princeton railroad. The directors of the latter road, it is said, have consented to accept Gen. Winston's proposition, which is to surrender the charter to him, and raise $500,000 to build the road from Princeton to Nashville, provided he will raise $2,500,000 in addition to the first named sum, $3,000,000 being the estimated amount necessary to build a road from Shawneetown to Nashville.

☞ At the annual meeting of the stockholders of the Boston, Clinton and Fitchburg Railroad, held in Fitchburg on the 13th inst., the following Board of Directors was chosen: Lyman Nichols, Nathaniel Thayer, Cyrus Gale, Edward A. Harris, Wm. D. Peck, John H. Lockey, Harrison Bliss, George A. Torrey, Hale W. Page, Francis B. Fay, George E. Towne, H. A. Blood. It was also voted to ratify the lease of the Framingham and Lowell road.

☞ The citizens of Baltimore have voted, 3,214 to 1,144, in favor of the Western Maryland Railroad ordinance, guaranteeing the bonds of that road to the extent of $1,000,000.

☞ ST. JOSEPH AND DENVER CITY RAILROAD COMPANY'S
FIRST MORTGAGE SINKING FUND
LAND GRANT BONDS,

BEARING EIGHT PER CENT. (8 P. C.) INTEREST,
PAYABLE IN GOLD.

FREE OF TAX.

AND IN DENOMINATIONS OF $1,000, $500 AND $100, can be obtained from the undersigned, or through the principal banks or bankers throughout the United States.

The attractive features of these securities are recognized in the fact that, although they have been but a short time on the market, they are nearly all absorbed, and but a small amount are now for sale.

They combine a perfect security with a liberal rate of interest. This interest account is made light for, and easily borne by, the Company, through the operations of the Sinking Fund created from sales of the Company's land, which, in many cases draw interest at the rate of ten (10) per cent. per annum. The security behind them is ample in every particular, as they constitute a first and only mortgage on a trunk line of railroad which will soon connect the City of St. Joseph, Mo., (an important railway centre,) with the Union Pacific Railroad at Fort Kearney, materially shortening the distance between the Atlantic and Pacific coasts. In addition to this, the bonds have further security in the fact that there is included in the Mortgage the Company's magnificent Lands, amounting to 1,500,000 acres, known to be among the best in the United States. The Mortgage Indenture prohibits the sale of these Lands at less than Four (4) Dollars per acre, and payable to the Trustees under the Mortgage, for the clear and express purpose of retiring these Bonds. The amount thus realized exceeds the entire amount of Bonds which can be issued, and leaves the road, property and franchises free.

The Bonds have thirty years to run, with interest at Eight per cent., free of tax, payable in February and August in each year.

Both principal and interest are payable in gold. The principal in New York. The interest in either New York, London or Frankfort-on-the Main, at the option of the holder, without notice, and in the gold currency of the country in which they are presented. They are coupons or registered.

Trustees—Farmers' Loan and Trust Company.

The present price of these Bonds is 97½ and accrued interest in *currency*, from Aug. 15, 1871. But they are receivable at par and accrued interest in payment for lands sold by the Company. The right is reserved to advance the present selling price without notice.

Maps, circulars, documents and full information furnished on application.

Though acting as agents for the sale of this loan, our firm buy and sell in their regular business the Bonds of the St. Joseph and Denver City Railroad Company, those of the Eastern Division eight per cent. (8s.) *recently placed by us at* 97½, *being now quoted at from* 101½ *to* 102½ *and accrued interest.*

TANNER & CO.,
Bankers, No. 11 Wall-st.

☞ The last span of the great Missouri River Bridge at Council Bluffs, Iowa, was completed on the 20th inst.

New York, West Shore and Chicago Railroad.

The Rondout *Freeman* is informed that the engineers who are locating the West Shore railroad say the heaviest rock on the line from Butler Hill to Albany will be at East Kingston, where a very long tunnel will be bored through the rock for the entire length of the village. The *Freeman* also has the following:

A large party is here engaged in surveying the West Shore railroad route. They are working rapidly and evidently mean business. Another party, consisting of J. M. Van Valkenburg and others, of Albany, are also here endeavoring to purchase the right of way along the West Shore. We understand that this company is different from the one surveying. Well, it certainly begins to look brighter and while we are thankful we are not bonded, we hope soon to hear the whistle of the West Shore locomotive.

The survey of the New York, West Shore and Chicago Railroad along the Hudson, is progressing rapidly, and will soon be completed. The above Company is aware that there are other parties buying or contracting for the right of way in the interest of another road, but the Courtenay Company do not fear it at all. They hope to unite, if both companies are determined to build a road, for, of course, two roads would be out of the question. The Courtenay Company desire to go west from Catskill or Athens, and if the Catskill and Schoharie road will unite with them, they offer to put ten thousand men on the road at once. The road will be built along the river, even at the highlands. They survey about six feet above high water mark, which would seem too low.

Journal of Railroad Law.

RAILROAD COMPANIES—LIABILITY FOR INJURIES AT STREET CROSSINGS—EFFECT OF CITY ORDINANCE.

The facts in the recent case of Delzell *vs.* The Indianapolis and Cincinnati Railroad Company, (32 Ind., 45,) are fully and clearly stated in the following opinion by—

ELLIOTT, J.—It is insisted on behalf of the appellant that the court erred in overruling the demurrer to the second paragraph of the answer. The question is, do the facts alleged in the answer constitute a defence to the action? In support of the answer it is argued, that, as the Common Council had exclusive power over the streets of the city, and as the right of the railroad company to lay its track across the street was subject to the police power of the city corporation, the Common Council had the right to determine the manner in which the track of the railroad should be laid across the street, so as to render passage over it secure, and the Common Council having by the ordinance, exhibited as a part of the answer, prescribed the character of the improvement to be made at such crossings and required that it should be so made and kept in repair to the satisfaction of the civil engineer, that the railroad company was bound by the ordinance and the direction of the engineer, and had no discretion in the matter; that the company, having complied with the ordinance to the satisfaction of the engineer, the work became the work of the city, and not of the railroad company, and therefore if it was improperly done, whereby the appellant sustained the injury complained of, the city, and not the railroad company, is responsible.

The facts assumed in the argument differ, somewhat, from those presented by the pleadings. The Common Council having exclusive control of the streets of the city, it may be conceded that they might, not only specify the general character of the work to be done by a railroad company in crossing the street with the track of its road, to render it safe to the public in passing over it, but also furnish detailed specifications as to the particular manner in which the work should be executed; and in such case, if the work should be done in strict accordance with the specifications and requirements of the Common Council, the responsibility for its safety would devolve upon the city. Or the Common Council might require that the crossing should be constructed under the supervision, control, and direction of the engineer, or other authorized agent of the city; in which event, the responsibility that it was properly constructed and rendered secure would rest upon the city, and not upon the railroad company. But no such state of facts is shown by the answer in this case.

The second section of the ordinance makes it the duty of a railroad company, in crossing a street of the city, to make the grade of the railroad track conform to the established grade of the street, and to pave with boulder stones, or lay down securely strong and substantial planks, between the rails and two feet in width outside thereof, and extend the same the entire width of the street, or as far as the track may extend; which is to be done and maintained to the satisfaction of the civil engineer. The object of the requirement, as declared in the fifth section of the ordinance, is, that the railway track may be crossed with more safety and convenience by the public. The ordinance defines the character of the work—that is, the track-way is to be either bouldered or planked, and the extent thereof; and, construing the second and fifth sections together, the inference is plain that it is to be done in a skilful and proper manner, so as to render the crossing safe and convenient to the public.

It requires the work to be done to the satisfaction of the civil engineer; but it does not assume to place its execution under his supervision and control, and thereby relieve the railroad company from the obligation of performing it in a skilful and proper manner, so as to render the crossing safe to the public.

The answer avers that the defendant, prior to the injury complained of, had complied with the requirement of the ordinance, by laying down securely, at said crossing strong and substantial planks, between and on either side, for two feet of the track, and in such a manner that the planks extended the entire width of said crossing; doing said planking to the satisfaction of the civil engineer of the city, and subsequently maintained the same to the satisfaction of said engineer.

This does not meet the requirements of the ordinance or the allegations of the complaint. The answer does not allege that the work was done in such a manner as to render the crossing safe to the public.

The second paragraph of the complaint admits that the defendant laid down thick heavy planks between and on the outside of the rails of said crossing, and fastened them securely, and that it was necessary to leave a small open space of, say two and a half inches, between the rails and the planking on the inside of the track; but it alleges that the planking was done in an unskilful and unworkmanlike manner, in this: that the space between the planks and the rails, on the inside of the track, was made and suffered to become wider than was necessary for the use of said railroad, and so wide, as to be dangerous to horses and teams in passing over and across the track of the railroad, on said street; and that by reason thereof the plaintiff's horse, when being carefully driven on the street over said crossing got his fore-foot between the rail and the plank, where it was held fast, and the horse was thereby thrown upon the track and so injured that he died, &c.

The gravamen of the complaint is, that the injury was caused by the planking being done by the defendant in an unskilful and improper manner, thereby rendering the crossing of the track unsafe and dangerous. These facts are not denied by the answer, and hence they are admitted to be true; but it is sought by the answer to avoid them, under the ordinance, by the averment that the planking was done and maintained to the satisfaction of the civil engineer. In other words, the defendant admits by the answer that the injury complained of was caused by the planking being done in an unskilful and improper manner, whereby the crossing was rendered unsafe and dangerous, but insists that it is not liable therefor, because the civil engineer of the city was satisfied with the manner in which the work was done.

The error of this position seems too apparent to require argument to illustrate it.

As it was the duty of the corporate authorities to see that that the streets were kept in a safe condition for travel, the city might, perhaps, be liable for the injury complained of; but if so, still the railroad company cannot escape from liability for its own carelessness and improper acts, resulting in injury to others, by simply showing that they were satisfactory to an agent of the city authorities.

We are referred by the apellee's counsel to the case of Young *vs.* Inhabitants of Yarmouth 9 Gray 386, as being very much in point. We do not so regard it. It was a suit by the plaintiff against the town of Yarmouth, for damages occasioned by being thrown from his carriage against a telegraph pole standing in the highway. The pole had been erected by the Cape Cod Telegraph Company, under the general law authorizing the organization of such companies and authorizing them to erect such poles.

The law provides, that the location of the poles shall be determined by the selectmen of the towns, who shall specify in writing where the poles shall be located; that the writing shall be recorded in the town, and that the company in building its line shall follow the regulations of the writing.

The court held, that the selectmen, in fixing the location of the poles, were not acting as the agents of the town, but of the public generally, and that their action was conclusive upon all parties, that as the town had no power to control the subject or interfere with or remove the poles, their existence upon the highway, if in exact accordance with the negotiations of the selectmen, did not constitute a defect or want of repair in the highway for which the town was responsible.

In the case before us, it was the duty of the railroad company to plank the crossing in such manner as to render the use of the street safe to the public, and the complaint is, that the planking was done in such an unskilful and improper manner, as to render it unsafe, in consequence of which the injury occurred.

Judgment reversed, with costs, and the cause remanded, with directions to the court below to sustain the demurrer to the second paragraph of the answer, and for further proceedings.

Railroads of Minnesota.

We have been favored with a copy of the Report of the Railroad Commissioner of Minnesota for the year ending August 31, 1871, from which we have prepared the following statements:

The number of railroads in the State of Minnesota at the close of the official year 1870 '71 was fifteen, and the length of the same as shown in the following tabulation:

	Miles.
St. Paul and Pacific (Branch Line)	76
Winona and St. Peter	165
Milwaukee and St. Paul (Minn. Central)	152
St. Paul and Sioux City (Minn. Valley)	122
Southern Minnesota	167½
St. Paul and Pacific (Main Line)	207
Lake Superior and Mississippi	155
Hastings and Dakota	48
St. Paul and Chicago	101½
Stillwater and St. Paul	13
North Pacific	228
Sioux City and St. Paul	56
Minneapolis and St. Paul	13
Minneapolis and St. Louis	28
St. Paul, Stillwater and Taylor's Falls	18
Total	1,550

These roads are arranged in the order of progression the last four having been built in 1870 -'71. In the following table we show the mileage in use at the close of all previous railroad years and the mileage constructed in each:

Official Years.	Miles at close of year.	Built in year.
1861-'62	10	10
1862 '63	56½	46½
1863-'64	100	43½
1864-'65	210	110
1865-'66	315	105
1866-'67	429	114
1867-'68	560	131
1868-'69	770	210
1869-'70	1,092½	322½
1870-'71	1,550	457½

To aid in the construction of this splendid system of railroads, the United States have contributed liberally in lands. The State has also given largely of the swamp lands received by it under Congressional grants. The following is a summary of these subsidies:

CONGRESSIONAL LAND GRANTS.

Companies.	Conceded acreage.	Acres deeded.
Stillwater and St. Paul	76,800	63,852
Stillwater and Taylor's Falls	44,800	.....
St. P. & Pacific 1st Div.(Br.L.)	448,000	407,593
" " (M.L.)	1,178,400	450,985
St. P. & Pacific (Brainard Br.)	252,000	.....
" (St.Vinc'nt Br.)	2,000,000	.....
St. Paul and Sioux City	830,600	698,406
Sioux City and St. Paul	280,000	189,459
Milwaukee and St. Paul	170,500	167,665
Winona and St. Peter	1,500,000	365,156
Southern Minnesota	775,000	193,833
Lake Superior and Mississippi	960,000	484,935
Northern Pacific	1,500,000	.....

These amounts sum up as follows—estimated acreage of concessions 9,965,500; acreage deeded to companies up to November 30, 1871, 3,021,865, and acreage to be deeded to companies on completion of works 6,944,825. The Northern Pacific gets its concessions directly from the General Land Office. All others receive their lands through the State authorities.

SWAMP RAILROAD LAND GRANTS.

Companies.	Estimated acreage.	Acreage deeded
Lake Superior and Mississippi	694,400	567,248
St. Paul and Chicago	922,880	39 888
Southern Minnesota	640,000	32,342
Total	2,257,280	639,478

—leaving still undeeded the vast amount of 1,617,802 acres.

Altogether the lands granted to railroad companies in Minnesota contain 12,220,000 acres, or about one-fourth of all the lands in the State—about a third in extent to the whole of New England.

The railroad companies have also received material aid from municipalities—to the amount, from partial and fragmentary reports, of $1,781,600.

Without considering the value of the lands owned by the several companies, but referring only to the cost of the works constructed, a low estimate would make up the amount invested to $40,000 per mile, or for the existing railroads somewhat more than $62,000,000. This would include all appurtenances and equipments. The report of the Commissioner is not clear on the point of cost—several companies having failed to make satisfactory statements. In next year's reports it is probable that we shall have full details:

The business operations on these roads indicates the financial results of the industry of the State, and so far as the results for the official year 1870-'71 are concerned they are highly satisfactory. In the following statements the real facts appear in figure shape:

Miles run by passenger trains	811,147
" freight trains	1,076,400
" service trains	365,477
Passengers transported	641,711
" " one mile	10,851,802
Average amount paid per mile	4.4 cents.
Freight transported (tons)	774,289
" " (") one mile	62,448,106
Average paid per ton per mile	3.4 cents.

The average charges by the different companies run from 1.85 cent to 5.33 cents per ton per mile.

Of the tonnage stated, 667,696 tons were shipped from stations within the limits of the State, and of such amount 257,982 tons were wheat and flour.

The total gross earnings for the year 1870 '71 amounted to $3,430,414 33. The aggregate expenses are stated at $2,564,435 10. The net earnings over deficits amounted to $847,523 04. The following table shows some of the principal items of these accounts:

Passengers	$1.067,096 95
Freights	2,112,028 49
Mails and expresses	123,382 51
Rents and other	127,906 88
Total earnings	$3,430,414 33

☞ The earnings of the European and North America Railroad in January, 1872, were $20,387 43; in January, 1871, they were $15,711 88; and in January, 1870, $11,188 83.

Trade of Chicago.

In the Annual Report of the Trade and Commerce of Chicago, compiled by the Secretary of the Board of Trade of that city, it is stated that during the past year the receipts were as follows: Flour, 1,412,177 barrels; wheat, 14,439,656 bushels; corn, 41,853,138 bushels; oats, 2,011,788 bushels; barley, 4,069,410 bushels; wool, 27,026,621 pounds; hides, 25,026,034 pounds; lumber 1,039,328 feet; cattle, 543,050, and live hogs, 2,380,083. During the same time the shipments were as follows: Flour, 1,287,574 barrels; wheat, 12,905,449 bushels; corn, 36 716,030 bushels; oats, 12,151 247 bushels; rye, 1,325,867 bushels; barley, 2,908,113 bushels; wool, 24,351,524 pounds; hides, 22,462,864 pounds; lumber, 541,223, feet; cattle, 401,927, and live hogs, 1,162,286. With the exception of wheat, the report shows that the various receipts were considerably larger than during the previous year. The quantity of wheat received during 1870 was 17,394,409 bushels, an excess of 2,054,783 bushels over the quantity received during 1871.

Southern Pacific Railroad.

The construction of one hundred and sixty miles more of the Southern Pacific Railroad is about to be undertaken. Instructions from Marshall O. Roberts have suspended, for the time being, work upon the Marshall and Jefferson Road, for which sealed proposals of contracts had but recently been issued. The survey of the proposed one hundred and sixty miles, passing through the town of Dallas, and crossing the clear fork of the Trinity some three miles south of its intersection with the west fork of the river, the distance being about forty miles west of Dallas, and at a point which it is presumed will be the intersection of the Southern Pacific with the Trans-Continental Railroad.

This great artery of travel—the Southern Pacific Railroad—as it continues to press still further westward, will be crossed by four other important road at different points, each of which will lend its aid in building up the business of the great trunk stem. Running parallel nearly and across this line will be the Texas Central, the Houston and Great Northern, the International and the Trans-Continental Railroads.—*Shreveport Southwestern.*

☞ Mr. E. F. Drake, President of the Sioux City and St. Paul Railroad Co., states that if the calls for assessments on the stock of this road are in the future as punctually responded to as in the past (and there is no doubt they will be) "a loaded car may pass from Lake Superior to San Francisco before the first day of August, 1872." The road is being pushed with commendable energy. The entire line is graded from St. James to Le Mars, a distance of 123 miles, and the road is in running order from St. James to a point south of Washington, a distance of 58 miles. The rails required for the remainder of the road have been purchased at the Milwaukee Rail Mills, and will be laid early in the spring.

☞ A scheme has been set on foot by Midhat Pasha, the governor-general of Turkish Arabia, for the construction of a railway between Bagdad and Kerbella. The distance between Bagdad and Kerbella via Moseyeb, over a dead level, is 56 miles. It is estimated that the cost of construction will be £200,000, or about £3,570 per mile.

☞ Thomas A. Scott has been elected President of the Texas Pacific Railroad, in place of Marshall O. Roberts, resigned.

Finances of Ohio.

EXTRACT FROM THE MESSAGE OF THE GOVERNOR.

The finances of the State Government are in a satisfactory condition. The balance in the State Treasury on the 15th of November, 1870, was $766,038 10; the receipts during the last fiscal year were $5,241,184 91—making the total amount of available funds in the Treasury during the year ending November 15, 1871, $6,007,223 01. The disbursements during the year have been $5,259,046 74—leaving a balance in the Treasury, November 15, 1871, of $748,176 27.

The estimates of the Auditor of State of receipts and expenditures for the current year are as follows:

Estimated receipts from all sources, including balances, $5,206,366 27; estimated disbursements for all purposes, $4,776,035 73—leaving an estimated balance in the Treasury, November 15,1872, of $430,330 54.

The public funded debt of the State November 15, 1870, after deducting the amount invested in Ohio stocks, was $6,730,144 36.

During the past year the debt has been reduced $729 415, leaving the total debt yet to be provided for, $9.000,729 36. Of this amount, the sum of $44,518 31 has ceased to bear interest, the holders thereof having been notified of the readiness of the State to pay the same. This leaves the total interest-bearing debt of the State, $8,756,211 05.

The taxes levied in 1870, collectable in 1871, were as follows:

State taxes	$4,666,242 23
County and local levies	18,797,389 59
Delinquencies and forfeitures in former years	667,188 69
Total taxes, including delinquincies collectable in 1871	$24,130,820 51

The taxes levied in 1871, collectable in 1872, were as follows:

State taxes	$4,350,728 28
County and local levies	18,604,660 12
Delinquencies and forfeitures	632,275 84
Total taxes and delinquencies collectable in 1872	$23,587,664 24

It will be noticed with gratification that the annual increase of taxation, to which the people have long been accustomed, has been checked, and that the taxes, both State and local, have been somewhat reduced.

The increase of local indebtedness still continues. The returns made to the Auditor of State are imperfect, but enough is shown to warrant the iopinon that during the past year the indebtedness of the towns and cities of the State has increased not less than one million of dollars, and that their aggregate indebtedness now equals the indebtedness of the State. I respectfully repeat, as the remedy for this evil, the recommendation heretofore made, that all public debts be prohibited, except in cases of emergency analagous to those specified in Sections 1 and 2, Article 8, of the Constitution.

The report of the Adjutant General shows that there has been collected by him from the United States during the year, on account of the State war claims, the sum of $145,304 60, making the total amount of war claims collected $2 826,247 94. It is probable that about $100,000 more can be collected on these claims. without additional legislation by Congress. This will leave about $400,000 of claims unpaid, it is believed, when presented to Congress with proper vouchers and explanations, will be provided for by special act. As long, however, as the Board of Military Claims exist, these claims will continue to increase, and it would not be advisable to seek Congressional action until the State, by closing its accounts with individuals, shall be able to ask for a final settlement.

☞ The Pittsburg and Boston Mining Company has declared its special dividend of five dollars per share, payable on demand.

The Fox and Wisconsin River Improvements.

EXTRACT FROM THE MESSAGE OF THE GOVERNOR OF WISCONSIN.

The subject of water communication between the Mississippi River and the seaboard, is attracting much attention throughout the country. The necessity of cheaper transportation is everywhere felt throughout the Mississippi Valley.

The late National Commercial Convention which assembled at Baltimore, fully recognized this necessity, and passed resolutions favoring a liberal policy on the part of the government in improving our great national highways.

The line which of all others, nature has pointed out as the best line of communication between the Mississippi and the lakes, is by the Fox and Wisconsin rivers.

The work of improving the Wisconsin river has progressed favorably under the supervision of the United States engineers. I am informed that the results of the experiments made the past year have been such as to give the greatest satisfaction, and have fully convinced all interested of the entire practicability of rendering that stream navigable for boats of light draft at a comparatively small outlay of money.

The arbitration authorized by Congress at its last session to determine the sum which, in justice, ought to be paid to the Green Bay and Mississippi Canal Company for their rights and franchises in the Fox River, has been had during the past year. The sum which, as I am informed, has been awarded by the arbitrators to the company, is as follows:

Value of docks, dams, franchises, &c.	$868,070 00
Value of water power	140,000 00
Value of personal property	40,000 00
Total	$1,048,070 00
From which deduct product from lands	723,070 00
Balance	$325,000 00

This being the deliberate opinion of three highly honorable and competent gentlemen, who fully examined the whole question, there is every reason to believe that the award is just, and it is hoped that Congress will accept the same. The company is in honor and in law bound to abide the award.

The importance of this improvement is fully understood by the people east and west. Its national importance is acknowledged on all hands.

I therefore recommend that you take such steps as will lay the question in all its bearings before Congress. There ought to be no hesitation on the part of the general government to promptly accept the award and continue the work until this line of water communication between the great lakes and the Mississippi is so improved as to answer all the demands of commerce.

Imports at Montreal.

The importations of leading articles at Montreal for the past two years compare as follows:

	1870.	1871.
Woollens	3,719,400	4,672,401
Cotton	3,346,351	3,442,215
Silks and Velvets	.....	961,006
Brandy	259,181	488,730
Gin	181,718	109,037
Rum	80,339	20,812
Coffee	66,906	64,980
Green and Japan Tea	1,660,184	1,443,519
Black Tea	185,417	221,458
Tobacco, manufactured	5,840	13,084

Free Goods	5,144,227	[illegible]
Hardware	1,056,387	1,000,[illegible]
Leather, manufactured	89,700	142,[illegible]

Frederick and Pennsylvania Line Railroad.

At the annual meeting of the directors of this company held at Frederick, Md., on the 13th inst., John Loats, Esq., was unanimously re-elected President. The annual report, dated 12th inst., says that the road bed throughout the three divisions is practically completed; some little culvert work remains to be done. Track-laying has been carried from the State line to Big Pipe Creek, 10 miles, and from the junction with the Western Maryland Railroad to Little Pipe Creek one mile; besides five turnouts, there are 3 miles of iron and 27,000 crossties on hand; the work has proceeded slowing for want of labor. Contracts have been made with Wendell Bollman, of Baltimore, for the Tuscarora and Monocacy River bridges, and for the viaducts over Little and Big Pipe creeks; the first is erected and the others soon will be. The financial exhibit shows subscriptions paid in, $309,000; bonded debt, $153,000; floating debt, $41,815. The total disbursements on account of construction and other expenses have been $479,993 09; and the company has available assets applicable to completion of the work, $131,367 93, in addition to uncollected subscription, $9,350. The president adds:

It will be the policy and purpose of your directors to connect your road on the north with the Rocky Ridge and Emmittsburg road, looking to the shortest connection northward and westward from Harrisburg, and to the South toward Washington, and also toward that chain of roads through Virginia which now constitute the rich prize for which are contending the two great railway powers of this country, the Pennsylvania Central and the Baltimore and Ohio, extending to the far South, and of which chain your line occupies the natural route and the shortest.

Railways in War.

A committee of officers, recently in session in Berlin, to inquire into the results of the employment of railways during the Franco-German war, has reported that, when the distance to be traversed is short and a considerable force has to be conveyed, an army corps will proceed more rapidly on foot than by railway. Thus, a force of thirty-six thousand men will, it is stated, go a distance of fifty-one miles in less time than if it were conveyed by a double line of railway, and a distance of ninety-two miles in less time than if it were transported over a single line. A saving of time in forwarding large bodies of troops by railway, it has been calculated, is only to be obtained when the proportion of men to miles is six hundred to one on a double line, and four hundred to one on a single line. The French, it is said, frequently suffered great losses from not observing the above rule in the conveyance of troops, but surpassed the Germans in the employment of railways for the transportation of provisions. For this purpose, movable magazines, each containing ten days, provisions for an army corps, were always kept ready to be dispatched wherever wanted.

☞ The Hartford county (Md.) papers continue to agitate the project of a branch railroad from Belair to Edgewood or Magnolia. They publish the letter of President Hinckley, of the Philadelphia, Wilmington and Baltimore railroad, to Hon. Edwin H. Webster, of Belair, offering on behalf of that company, to operate the new branch. Mr. Hinckley says his company will furnish the engineering skill for the construction of the branch, and also station-house, side track, ticket agent, etc., all without charge, for ten years. A drawback on the branch traffic, both on freight and passenger rates, over the Philadelphia, Wil-

mington and Baltimore railroad to the junction, will be allowed at the rate of 25 per cent. for the first five years, and 20 per cent. for the second five years.

Philadelphia and Erie Railroad.

At the annual meeting of the stockholders of this company, held in Philadelphia on the 12th inst., the President of the Company, Mr. E F. Gay, read the report of the Directors, from which it appears that the earnings for the year, from passengers, freight, &c., amounted to $3,542,263 73, and the expenditures to $2,782,972 80, leaving $759,290 93 as the net proceeds. After deducting dividends, interest, &c., there is due to the Pennsylvania Railroad Company, $12,851 18. The following gentlemen were elected Directors for the ensuing year: Edward F. Gay, J. Edgar Thomson, Wistar Morris, Joseph W. Gaskill, Jacob P. Jones, Josiah Bacon, Saml. T. Bodine, John M. Kennedy, Washington Butcher, Samuel G. Thompson.

☞ At the annual meeting of the stockholders of the Portland and Kennebec Railroad company, held in Portland on the 12th inst., the following gentlemen were elected directors for the ensuing year: Richard D. Rice, Wm. D. Sewall, Geo. F. Shepley, John B. Brown, Darius Alden, Philander Coburn, Nathan M. Whittemore, H. N. Jose and Geo. M. Patten. The reports of the Directors and Treasurer were not presented, but will be incorporated into the reports of the Maine Central directors.

☞ At the recent annual meeting of the stockholders of the Eastern Railroad corporation, the following gentlemen were elected directors for the ensuing year: Samuel Hooper, of Boston; Franklin Haven, of Boston; John Wooldredge, of Lynn; Thornton K. Lothrop, of Boston; Henry L. Williams, of Salem; Ichabod Goodwin, of Portsmouth; Benjamin F. Stevens, of Boston. The meeting voted that the Directors, if they deem it expedient, may lease or otherwise aid, as authorized by statutes, in the construction and operation of any branch or connecting railroads.

☞ The town of Lee has voted, 287 to 2, to subscribe 5 per cent. of her valuation (about $83,000), to the capital stock of the Lee and Hudson railroad, and will pay her proportion of the expense of a survey for the extension of the road to Westfield. The total cost of the road is estimated at $320,000 and the building will commence when $200,000 are raised, of which about $50,000 are pledged from Lee, and $10,000 from Hudson, by private subscription; and a town meeting will soon be called at Stockbridge, where it is expected about $40,000 can be raised.

☞ The earnings of the Boston, Clinton and Fitchburg Railroad for the year ending September 30, 1871, were $447,802 26, and the expenditures $367,350 08, leaving a balance for net earnings of $80,452 18. There has been paid for 6 per cent. dividend on guarantied stock $3,600; interest on coupon bonds $52,494 66; on floating debt $12,201 67; making a total of $68,296 63, which, deducted from the net earnings, leaves a surplus of $12,155 55; this sum added to the surplus reported last year, $30,893 50, makes a total surplus of $43,049 05.

Missisquoi and Black River Valley R. R.

The *Monetary Times* says that the Quebec government have promised a subsidy to this line. When constructed it will connect the hitherto almost disevered East and West portions of the Eastern Townships, and will give a continuous narrow gauge from Richmond *via* Waterloo and S. Johns to Montreal; and as the charter of the Company gives power to construct a road from the present terminus of the Stanstead, Shefford and Chambly road to Magog, which is but a few miles from Ayer's flat on the Massiwippi Railroad, it will form another narrow gauge road from Montreal to Boston; and by connecting Magog and Sherbrooke a narrow gauge road—when the St. Francis and Megantic and International is completed—will be formed from Halifax to Montreal. The promoters of the Missisquoi and Black River Valley think that it has strong claims on the City of Montreal for assistance.

☞ The North Missouri railroad has formally passed into the hands of the St. Louis, Kansas City and Northern Railroad Company, and the road will hereafter be known by that name.

☞ The National Copper Mining Company has declared a dividend of $1 per share.

Philadelphia Car Works.

J. G. BRILL & SON,
MANUFACTURERS OF
Street and Narrow Gauge CARS
OF EVERY DESCRIPTION.
Castings, Wrought Irons, and all Material Necessary for Car Building.

CAMP'S IMPROVED DUMPING CAR.

RIGHTS FOR SALE BY

A. W. RHOADS & CO.,

Wilkes-Barre, Pa.

A. W. RHOADS, N. H. CAMP.

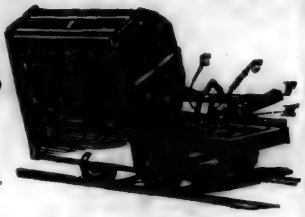

Fig. No. 1, Car Loaded & at Rest.

TO DUMP THE CAR.

Fig. No. 2, Car Dumped.

The Brakeman seizes the lever H, and raises it about a foot, thus releasing the hopper from the catch, C, and the tilting-frame, F, from the catch, C, when the hopper, K, yields to the force of gravity and rolls over to the position shown in Fig. 2.

To Replace the Hopper in Readiness for another Load.

The brakeman bears his weight on the up-end of the tilting-frame, F, forcing it down to its place, when the hopper rolls back to *its* place, where it is held by the catches, C and C.

Address, A. W. RHOADS & CO., Wilkes-Barre, Pa. Lock Box 131.

ENGLISH AND SCOTCH FIRE BRICK

Pennsylvania Railroad Stock.

The Pennsylvania Railroad Company announced to the Philadelphia Stock Board on the 26th ult., its allotment of 30 per cent. of new stock at par on all stock in the name of parties on the 20th Feb., as directed by a resolution of the stockholders at their late annual meeting. The time and amount of each payment is announced as follows: The first instalment of 25 per cent. is made payable between the 1st and 28th days of May, 1872. The second instalment of 25 per cent. is payable between the 1st and 28th days of November, 1872. The third instalment of 25 per cent. is payable between the 1st and 28th days of May, 1873. The fourth and last instalment of 25 per cent. is payable between the 1st and 28th days of November, 1873. Should the stockholders entitled to allotment prefer paying in full between the 1st and 28th days of May next, they may do so, and the new stock will be entitled to a full dividend at and after the next November dividend period. Payments not made in full will carry *pro rata* dividend. Any remaining excess of 30 per cent. allotment, less than three shares, we understand, will be entitled to subscribe to one additional share.

A FIRST CLASS INVESTMENT.

THE NORTHERN PACIFIC Gold Bonds

Are a combination of a first-class Railroad Security with a Real Estate Mortgage upon property worth treble the issue of the Bonds. THEIR LARGE AND RAPID SALE, BOTH AT HOME AND ABROAD, and their absorption by Savings Banks and other conservative moneyed institutions, show at once their popularity with the people and their HIGH CREDIT AMONG FINANCIAL MEN.

The present selling price is PAR and accrued interest in currency. They are EXEMPT FROM UNITED STATES TAX, BEAR 7 3-10 PER CENT. INTEREST, PRINCIPAL AND INTEREST PAYABLE IN GOLD.

All marketable securities received in exchange, without expense to the investor, at their highest current price.

JAY COOKE & CO.,

New York, Philadelphia & Washington.

☞ DECISION OF THE SUPREME COURT OF THE UNITED STATES, TOUCHING THE DELAWARE AND HUDSON CANAL COMPANY.—The following decision was rendered in the Supreme Court of the United States, on the 26th ult.: No. 95. Delaware and Hudson Canal Company vs. Clark. Appeal from the Circuit Court of the Southern District of New York. "In this case the Delaware and Hudson Canal Company sought to enjoin the defendant, a coal dealer in Providence, R. I., from selling Lackawanna coal on the ground that they had adopted that name as a trade mark many years ago and were therefore entitled to its exclusive use within the trade. The Court below dismissed the bill and this Court affirms the decree holding that, as a sound doctrine, no one can apply the name of any district of the country to well known articles of commerce and obtain thereby any exclusive right to its use. Geographical and general names cannot be so adopted and appropriated." Justice Strong delivered the opinion.

Railway Fares, and Railway Extension, in New York.

One need but make a brief survey of a railway map of the State of New York, to discover that within the past few years, the building of railways has made comparatively but little progress within her borders. The development of her railway system has latterly been quite slow, when we take into account her rapidly growing cities, the development of her manufactures, the rapid increase in the wealth of her people, and the necessity for increased means of transportation between the East and West, between the Great Lakes and the seaboard, for which her territory seems to present the shortest and most natural route. There are districts, a hundred miles or more in extent, populous, rich in agricultural wealth and favoring the growth of manufactures, which are almost entirely without railway facilities.

We see the natural result. A great proportion of the value of the products of the soil is absorbed in the cost of transportation; farm property is depreciated, manufactures absolutely shut out, immigration diverted to more inviting regions, population falling off, and a general appearance of decay pervading the community. For it is a fact, that railways are now as necessary to the prosperity of any section of the country as were turnpikes fifty years ago. We may recall with a sigh the romance with which the imagination of youth surrounded the stage-coach of our boyhood, but all this sentiment must give way before the superior utility of the railway.

Connecticut, with only about one-tenth of the territory of New York, has more than one-sixth as many miles of railway. She has, in proportion to her dimensions, nearly twice as many miles of railway as New York; and this, too, without the necessity for grand trunk lines which exists in New York, and to which she is indebted for the greater proportion of her railway development.

The inquiry naturally arises, what is the cause of this unsatisfactory state of affairs? Why should not the building of lateral railways in New York

keep pace with similar work in adjoining States? Certainly, the inducements thereto are apparently quite as good. There is already a large population, and abundant employment for railways, both susceptible of a large and rapid increase. In looking about, therefore, for an answer to the questions we have asked, we cannot find it anywhere, except in the restriction of railway passenger fares upon a great trunk to two cents per mile. This was well enough when it was established, but the adherence to it under existing circumstances, is mischievous altogether, by maintaining a ruinous competition with weaker roads. When it was imposed, the cost of carrying a passenger a mile at a given speed was not more than half as much as now, and in the mean time the speed of passenger trains has been increased fifty per cent. An increase of fifty per cent. in the speed doubles the cost of a train; so that in point of fact it costs now to transport a passenger in a train moving thirty miles an hour four times as much as to transport him twenty miles an hour, twenty years ago; and yet the rate of fare remains unchanged, except so far as the restriction is avoided by means of sleeping and palace cars. Here, we think, may be found the chief obstacle to lateral railway extension in the State of New York. The restriction in question repels the investment of capital in the shares of new and competing railways, impedes the sale of their bonds, and compels a penurious and apparently illiberal management of many that are in operation.

Besides impeding the building of needed railways, throughout the State, the people suffer otherwise from this restriction. There is an universal feeling in favor of the more rapid development of the railway system of the State. It is so strong as to often induce appropriations by the State Legislature in aid of projected railways. In such cases, the restriction upon passenger fares amounts to the declaration that those who need and would pay for a railway, shall not do so, but that the whole community shall be taxed in order that those who may use a railway shall enjoy its benefits at less than a fair charge. Then again, there is constant complaint, that rates of freight from the towns of this State to tide-water, are onerously high, and legislative interference against them is constantly sought. But a moment's reflection will show that if railways are restricted in passenger fares to non-remunerative rates, they must make good the deficiency—in part, at least—by means of their charges upon freight; and it is probable that the business of the city as well as the State of New York has suffered from this cause. High rates of freight effect those who do not as well as those who do travel by rail. Remunerative passenger fares would effect comparatively few, and like all measures of exact justice, redound to the advantage of the whole community.

☞ The officers of the Hannibal and St. Joseph Railroad Company have notified the officers of the Stock Exchange that the stock of that company will be registered, in accordance with the rules of the New York Stock Exchange, at the Farmers' Loan and Trust Company. The officers of the Exchange accepted the usual thirty days' notice, as of February 14, of the new issue of $5,000,000 of common stock.

Naugatuck Railroad.

The receipts from operation of this road for the years ending December 31, 1870 and 1871, were as follows:

	1870.	1871.

Pennsylvania Railroad Company.

Twenty-fifth Annual Report.

Office of the Pennsylvania Railroad Co., Philadelphia, February 19, 1872.

To the Stockholders of the Pennsylvania Railroad Company:

Your Directors feel much gratification in submitting to you the following very satisfactory statements of the business of your Railway, during 1871.

The earnings of the Main Line of your Railway, 358 miles in length and 258 miles of Branches, were:

From passengers	$3,719,264 86
" emigrant passengers	156,392 12
" mails	147,893 12
" express matter	362,849 90
" general freight	14,052,304 51
" miscellaneous sources	281,632 84
	$18,719,836 85

Expenses:

For conducting transportation	$4,039,751 60	
For motive power	3,049,027 28	
For maintenance of cars	1,202,521 74	
For maintenance of road	3,302,286 95	
For general expenses	229,845 77	
		11,823,433 34
Leaving net earnings in 1871		$6,896,403 51

The total amount of revenues compared with last year, is:

1871	$18,719,836 85
1870	17,531,706 82
Increase	$1,188,130 03

The changes in the sources of revenue are shown below:

Increase in first-class passengers	$123,893 16
" freights	1,259,144 04
" mails	1,149 67
" express matter	51,564 12
Total	$1,435,750 90

The only items of income that show a decrease are emigrants ($6,279 80), and miscellaneous ($241,341 16). The first is accounted for from circumstances connected with the war between France and Germany, and the latter from the large collections made in 1870 from other railways for rents, &c., due to previous years.

The whole number of passengers carried in 1870 was 4,352,769, and in 1871, 4,699,985—an increase of 347,216, or nearly 8 per cent.

The average distance traveled by each passenger was 32 53-100 miles, being 2 12-100 of a mile less than in 1870.

The number of tons of freight moved (including

524,451 tons of fuel and other materials transported for the company) was 7,100,294, embracing 3,161,441 tons of coal. It was last year 5,804,051 tons, showing an increase of over 22¼ per cent. in 1871.

The average charge per net ton per mile upon freights during the year was 1 3887-10,000 cents, against 1 549-1000 cents last year, 1 718-1000 cents the year previous, and 1 906-1000 cents in 1868, and per passenger 2 53-100 cents per mile against 2 49-100 cents last year, or an average decrease in rate of freight charges in 1871 below those of 1870 of 10 35 100 per cent. and in passenger charges an increase of 1 61-100 per cent. per mile.

The actual cost of operating your railroad, including Branch lines, in 1871, was 60 37-100 per cent. of its receipts.

The earnings of the Philadelphia and Erie Railroad in 1871, were:

From passengers	$607,878 94
" freights	2,800,358 31
" express matter	38,030 10
" mails	24,974 16
" miscellaneous sources	71,022 22
Total (nearly ($12,300 per mile of road)	$3,542,263 73

The operating expenses during the same period were:

For conducting transportation	$751,360 36	
For motive power	741,272 21	
For maintenance of cars	295,148 07	
For maintenance of way	995,192 16	
		2,782,972 80
Showing a balance to credit of Philadelphia and Erie Railroad		$759,290 93

The number of tons of freight moved upon this line during the year was 1,828,491, against 1,614,287 in 1870, and 1,302,041 in 1868, showing a steady annual increase of traffic.

The average charge made per mile on freights was 1 195-1000 cents per ton, and the actual cost of its movement 9 05-100 mills per ton per mile, leaving a margin of profits of only 2 145-1000 mills per ton per mile.

The increased tonnage in 1871 over 1870 was 214,204 tons, and the increase in revenue from freights, $341,203 79, and from passengers, $1,440 93. The total increase of revenues for the year being $398,219 02.

The competition between this railway and its neighboring lines has reduced the rates of freight charged to the low average of one cent and two mills per ton per mile, which, notwithstanding the low cost that it has been worked at, does not afford an adequate margin of profit upon the large amount of capital invested in the line. The sparsely populated and unproductive character of the region traversed yields very little local freight for transportation that will bear liberal charges as a compensation for the reduced rates obtainable upon distant traffic.

The passenger traffic has shown a profit this year of $38,221 46 against a loss in 1870 of $5,932 09.

A small increase upon the rates of freight charged in 1871, with the annual increase of tonnage arising from the development of the resources of the region tributary to the line, will bring this road among the dividend paying railways. If its line had been in the first instance judiciously located, it would, ere this, have proven a profitable enterprise.

The "Low Grade Railway" across the Allegheny Mountains, now in rapid progress of construction by the Allegheny Valley Railroad Company, will intersect and use the Philadelphia and Erie Railroad for about 120 miles of its Eastern end, where the gradients are equally favorable, and when completed it must add materially to the revenues of this line. This "Low Grade Railway" overcomes the Allegheny Mountains—the great barrier to direct and easy transit between the West and East—by gradients against the heavy traffic, not exceeding 16 feet per mile on straight lines, which are rateably reduced upon the curved portions of the road.

The revenue of the lines operated by this company, and the amounts paid for their working expenses, interest and dividends are as follows:

From the Pennsylvania Railroad and branches		$18,719,836 85
From the Philadelphia and Erie Railroad		3,542,363 73
		$22,262,100 58
And the expenses of operating them were:		
Pennsylvania R. R.	$11,823,433 34	
Philadelphia & Erie Railroad (including $759,290 93 net earnings paid to that company)	3,542,263 73	
		15,365,697 07
The net profits of the year 1871 upon all the operations of the company being		$6,896,403 51
From which deduct dividends declared in May and November (each five per cent.) with the taxes paid thereon	$3,625,062 50	
Interest paid by the company after deducting interest and dividends received.	1,208,010 29	
Paid for the lease of the Harrisburg and Lancaster Railroad.	133,039 94	
Annual payment to the State of Pennsylvania on account of interest and principal due upon the purchase of the works between Pittsburgh and Philadelphia	460 00	
		5,426,112 73
Leaving a balance to credit of profit and loss on account of the Pennsylvania Railroad of		$1,470,298 78
But from which is to be deducted the excess of advances made by this company over the amount received from the United Railroad and Canal Companies of New Jersey and the Philadelphia & Trenton Railroad Company towards the payment of interest, dividends and operating expenses, &c., prior to January 1, 1872	$930,238 23	
Less profits of lease of Pittsburg, Fort Wayne and Chicago Railway, and Pittsburg and Erie Railroad, until transferred to the Pennsylvania Company on April 1, 1871	184,824 02	
		745,414 21
Leaving a net balance to the credit of the business of 1871 of		$724,876 57

The balance is obtained from the business of your railway for the past year, after charging the amount ($321,011 40), expended in straightening the old Philadelphia and Columbia Railroad, purchased of the State, and ($440,512 45) the cost of substituting iron for wooden bridges, steel rails for iron rails, &c., upon the whole railroad, to maintenance of way, and placing the loss on the lease of the New Jersey Railroads in 1871 to expense account.

The acceptance of the onerous terms of the lease of the property of the United Railroad Companies of New Jersey, is only to be justified by the very great importance of securing to this company a line terminating upon the Hudson river, where accommodations could be erected for the receipt and storage of the traffic of the extended system of railways that you control connecting Philadelphia and New York with all of the important commercial centres of the West—accommodations essential to the development of this traffic, and which it could not otherwise secure without violating existing arrangements with those companies.

The amount to be paid under the lease is $1,948,500 per annum for division among the shareholders of companies; this company receiving all of their assets and assuming all of their obligations.

For several years past the dividends of the United Companies have been at the rate of ten per cent. per annum, while their net revenues have not justified a rate exceeding seven per cent.; the deficiency having been made up from a surplus fund that had accrued during the war, which had become exhausted.

The terms of this lease required the delivery of these works on the first of July last, but, in consequence of an injunction obtained by dissatisfied shareholders from the Chancellor of New Jersey, this was not effected until the first of December—too late to introduce, before the close of the year, any reforms in their administration with a view to lessen the cost of operating them. This circumstance has materially increased the amount that we have had to advance under the lease, on account of the business of 1871. It is believed, however, that by vigorous reforms in their future administration, and the constantly increasing tonnage that we shall throw upon these works, they will in a few years meet the high rental agreed to be paid for them. Their revenues cannot be increased, by an increase of the rates of transportation, as these have generally been kept too high to produce the best net results.

In its last annual report the board referred to the disposition it proposed to make of the large interest that this company has acquired in railways beyond Pittsburg, for the purpose of connecting your main line with the trade centres of the West; the object being to secure, by a single management of these works, harmonious action throughout the entire system of railways that we control, and at the same time to obtain the best results from the large amount of rolling stock upon them, by transferring, as occasions may require, portions of that of one line to another, where the demand for its use was more urgent and important to the interest of the company and the public. With this object in view, a charter was obtained for the "Pennsylvania Company," and all the interest held by this company in these lines (except in the Cleveland, Mount Vernon and Delaware Railroad) essential to their control, transferred to it for a sum which fully covers their cost to us with interest, and preferred six per cent. shares, amounting to $8,000,000 received in payment therefor.

The capital of the Pennsylvania Company is fixed at $12,000,000, four millions of which is to be common stock that may be disposed of to individuals at not less than par. Of this stock, only $200,000 has been subscribed for, all of which has been taken by its managers to perfect the organization of the Company.

The operations of the "Pennsylvania Company," since it entered into possession of these works, on the first of April last, have been very satisfactory, demonstrating fully its ability, after 1871, to make regular dividends to its shareholders of not less than six per cent. per annum, while the original object that this Company had in making these investments has been secured.

In organizing the Pennsylvania Company it was understood that the whole of the net revenues accruing to it during 1871, from the lines committed to its charge, were to be expended in their maintenance and improvement, and in additions to its rolling stock, which has been done, and the property in consequence is very greatly improved.

Since your last annual meeting this Company has acquired a lease of the Pittsburg and Cleveland Railroad for nine hundred and ninety-nine years, upon favorable terms, and have transferred it to the Pennsylvania Company.

A lease has also been made of the railroads of the Jeffersonville, Madison and Indianapolis Railroad Company, carrying with it a control of the bridge over the Ohio at Louisville—through the Pittsburgh, Cincinnati and St. Louis Railway Company, which is operated by the managers of the Pennsylvania Company.

The Chartiers Valley Railroad, a branch line, completed during the summer of 1871 by the Pennsylvania Railroad Company, aided by citizens along its route, from Mansfield on the Pittsburgh, Cincinnati and St. Louis Railway, to Washington, Pa., a distance of twenty-two miles, has also been leased to the Pittsburgh, Cincinnati and St. Louis Railway Company, to be worked at cost for the benefit of its bond and shareholders; the Pennsylvania Railroad Company owning a majority of its shares. The operations of this line, since it was opened for business, have shown that its profits are already ample to meet the interest upon its mortgage bonds of half a million of dollars.

The Cincinnati and Muskingum Valley Railroad, which passes through the most fertile portions of Ohio, intersecting the Little Miami line at Morrow, was connected during the past year with the Pittsburgh, Cincinnati and St. Louis Railway, by a line from near Dresden to Zanesville, 16 miles. It forms an additional through route to Cincinnati, and is controlled by the Pennsylvania Company through the ownership of a large majority of its shares. The mortgage upon this line is but a little over $10,000 per mile, to meet the interest upon which it has already ample profits from its local business.

The Mansfield, Cold Water and Lake Michigan Railway has also been commenced under a favorable traffic contract with the Pennsylvania Company, from Mansfield in Ohio to Allegan, Michigan, with a branch from Tiffin to the important city of Toledo at the head of Lake Erie. The whole route traverses a fertile region, the resources of which will be appreciated by the fact that the citizens along the line have agreed to grade, bridge and furnish the cross ties for the whole railroad to be paid for in the stock of the Company at par.

A contract has also been made with the Plymouth, Kankakee and Pacific Railroad to operate its line as soon as it is in readiness for business.

In addition to these leases the Pennsylvania Company has entered into a satisfactory arrangement to operate the Vincennes and Cairo Railroad as soon as it is completed, thus extending their lines to the latter point, from whence the International Railway is being built southwestwardly into Texas. These and minor arrangements for increasing the business of the Pennsylvania Company must add largely to its revenues, while at the same time they will materially augment those of the parent Company.

All such contracts and arrangements made by the Pennsylvania Company are to be submitted to and approved by the Directors of the Pennsylvania Railroad Company, but none of which are to extend beyond the Mississippi on the west, or Chicago on the northwest.

The Pennsylvania Company was organized by the election of Thomas A. Scott, Esq. as President, Wm. Thaw, Esq, Vice President, George B. Roberts, and Hugh J. Jewett, General Solicitor, who, together with J. N. McCullough, H. H. Houston, and Hon. T. L. Jewett, constitute the Board of Managers. All of these gentleman have had a long experience in the management of transportation and of railways, and are eminently qualified to secure the success of such an enterprise.

The general management of this extended property, now amounting in the aggregate to 3200 miles of railway, has been entrusted to J. N. McCullough, Esq., who had gained an enviable reputation by his energetic and judicious administration of the business of the Pittsburg, Fort Wayne and Chicago, and Pittsburg and Cleveland Railways. All the railways committed to his management have, during the year, been able to meet, from their own revenues, their obligations to their creditors and lessors, except the Little Miami and the Indianapolis and Vincennes, while in the aggregate they have yielded reasonable profits to the lessee. The lines that have fallen short of their obligations, it is believed, from the development of the local resources of the country traversed by the last named, and the completion of the bridge across the Ohio river, at Cincinnati, at the southwestern end of the first, now nearly ready for use, will also in a few years become profitable to the lessees.

The adjustment of the rates of freight and the management of the finances of this Company have been committed to Mr. Thaw, Vice President, whose long experience in transportation eminently qualifies him for the performance of the duties that have been assigned to him.

The Board, in its last report, stated the circumstances that induced it to aid in the construction of the Baltimore and Potomac Railroad, a line extending from the Northern Central Railroad, under Baltimore and through Washington, to the south bank of the Potomac, whence it is continued by the Alexandria and Fredericksburg Railroad Company to the Fredericksburg and Richmond line, which, connects it at Richmond with the whole system of Southern railways south of that point now largely controlled by the Southern Security Company, in which this Company became a shareholder to protect its investment in the Baltimore and Potomac Railroad. The Southern Security Company is composed of gentlemen friendly to our interests and objects, and of which Gen. G. W. Cass is President.

The Baltimore and Potomac Railroad is nearly ready for use, between the south bank of the Potomac and Baltimore, and the tunnel under the latter city will be finished during the ensuing winter. When this is effected, there will be an unbroken railroad from our terminus opposite New York, from Philadelphia, and from Baltimore, to all points of importance in the South Atlantic and Gulf States, operated continuously by locomotive power and with the single object in view, to promote the internal commerce between the North and South by the adoption of rates of freight, that while they yield a reasonable profit upon their transportation, will, at the same time, be placed at figures which cannot fail to secure the movement by it of a vast amount of tonnage that is now forced into other channels, or lies dormant upon southern soil.

At the instance of citizens of the growing and prosperous city of York, the Pennsylvania Railroad Company purchased the stock of the Wrightsville, York and Gettysburg Railroad Company, upon which line the bridges had been destroyed by the Confederates, during their raid into Pennsylvania, immediately before the battle of Gettysburg, and since only temporarily repaired. They have also purchased the stock of the bridge recently erected across the Susquehanna at a cost of about $500,000, in place of the one burned by the citizens of Columbia, to protect them from the rebel invaders; and have consolidated the stock of both with that of this Company; thus extending your railroad to York, where it connects with the Northern Central Railroad, and by it and its branches with Gettysburg.

This line, in addition to the traffic of the rich and populous region it traverses, opens up a profitable business in the transportation of iron ores, for which there is now a large demand at Columbia, Marietta, Reading and vicinity.

The Holidaysburg branch has been extended during the year sixteen miles, through a fertile country, to the rich hematite iron ore deposits of Morrison's Cove, the transportation of which product, it is believed, will fully repay the Company for this outlay. It is also proposed to aid in the construction of a branch line to the valuable ore deposits of Blair and Centre Counties, commencing at Tyrone.

These improvements, with those already in operation to the extensive coal fields of the Alleghany Mountains, will bring the chief elements used in the manufacture of iron together as cheaply and of as good a quality as can be found in any other part of the State, which will doubtless induce large additional capital to seek these points for its production, and thus materially increase the local tonnage and profits of your railway.

A branch line is being constructed from near Greensburg, in Westmoreland county, to Connelsville; the extensive coal fields surrounding which place are celebrated for the valuable properties of the coke that they produce, the consumption of which in Pittsburg, Chicago, and other Western cities, affords a growing and important traffic, with which the cars that would otherwise return empty to the West may be loaded.

A lease of a line recently constructed between the Pennsylvania Railroad, at Lewistown, and the Northern Central Railway below Sunbury, was entered into late in the past year by this Company, to be worked at cost. This line will furnish the best outlet for the anthracite traffic at and beyond Pittsburg, seeking a market in that region, while it will supply the furnaces at Lewistown with this fuel, and those of Danville with iron ore from the deposits along its route.

The large increase of tonnage centering at Pittsburgh, fron the extended system of railways controlled by this company west of that point, already demands greatly increased facilities for its accommodation and prompt movement, which, in consequence of the broken topography of the lands adjacent to our line in that city, it is difficult and very expensive to procure. To overcome as far as practicable these difficulties, the president met a committee of the city councils of Pittsburgh during the past Summer, and a plan was adopted as the basis of an agreement between the city and this company, which, if ratified, will go far to remedy the troubles and detentions that exist at that point, and increase the safety and convenience of the citizens of Pittsburgh, while they will at the same time add materially to the expedition of our trains in passing through the city limits.

This plan involves the necessity of the erection of numerous bridges over and under the railway at the street-crossings, and the sinking and change of our tracks at points upon the line, entailing an outlay by this company but little short of one million of dollars, which expenditure, however, may be distributed over several years. But, looking to the rapid growth of Pittsburg adjacent to our line, and the increasing detention to our trains this must cause, if level crossings are maintained, it is believed that this large disbursement will be fully justified.

The difficulty in passing freight trains from the south branch of the Monongahela through the tunnel under Grant's Hill and our yards adjacent to it, has been found so serious that it has been deemed advisable to continue a line at once through Birmingham (under the charter of the Pittsburg, Virginia and Charleston Railroad Company) to a point above Turtle Creek, from whence a branch line will cross the Monongahela to the Pennsylvania Railroad upon a route of better gradients and a shorter distance than that now used. The Pittsburgh, Virginia and Charleston line is to be continued up the Valley of the Monongahela through a fertile and populous region, containing exhaustless fields of the best varieties of bituminous coal, and must in itself prove a profitable enterprise.

The increase of the tonnage of your main line during the past over the previous year was 22⅓ per cent., to transport and accommodate which very large outlays for increased rolling stock, real estate, additional sidings, warehouse room, extension of the third track, and the construction of new and branch lines have been required. These, together with the payment of $1,109,224 of debentures, have been met by the distribution of increased capital stock at par rateably among you, and a sale of securities obtained in aiding the construction of other works.

The demand for additional facilities to meet

the continued pressure of a continually increasing business, promises to be quite as great during the present year as the last. Such extensions of your works are unavoidable and incident to railway property, and must be met to prevent unnecessary competition, and satisfy the public obligations that you have assumed, which, in this, as in most similar cases, are in harmony with your best interests. To provide the means required for these objects, it is deemed by your board advisable to offer to each shareholder whose name may be standing upon the books of the company on the 20th of February, inst., the opportunity to subscribe at par to thirty per cent of their present holdings, to be paid as called for in instalments of twenty-five per cent. each.

The company now own stocks and bonds, including those in the sinking fund—nearly all acquired in perfecting its present system of railways and canals—amounting at par to $55,000,000, which, at a low estimate of their value, are worth $43,000,000. Many of these securities yield no present income, but in the aggregate they can be gradually disposed of, for at least the sum estimated as their value.

If the state of the market during the year will justify the sale of any of these securities, the instalments upon the stock it is proposed to distribute may not be so rapidly called in.

The surplus net revenues of your works during the past year, without considering any increase of their profits from the increase of traffic it is proposed to provide facilities for, were ample, in 1871, to meet the usual dividends (ten per cent.) upon the addition to the capital stock of the company it is proposed to issue. And in these profits we have not included any income from our stock ($8,000,000) in the Pennsylvania Company, which can hereafter pay regular dividends to its shareholders, or from the $3,500,000 of stock held in the Pensylvania Canal Company which, after this year, will be in a condition to divide its net earnings, nor any income from our large interest in coal properties that this company has found it necessary to purchase to prevent the diversion of this traffic from the canals that we control—built by the State expressly for the development of these interests—to those of rival improvements.

The commercial interests of Philadelphia, which have for so many years been apparently stationary, have shown, during the past season, gratifying evidences of a revival. It has been the settled policy of this company to encourage the development of this interest by anticipating its demands for increased accommodation and facilities for the distribution of products to the consumer and shipper at the lowest practicable amount of charges.

The facilities heretofore afforded to the grain traffic, which is that which has shown the most activity, have, until last year, been greatly in advance of its requirements, and, in consequence of the limited demand for their use, their adaptability to the business that they were intended for could not be fully tested. The large grain elevator upon the Delaware was built after the plans found so successful in Chicago and other points in the West, but it does not seem to be adapted to the business of this port, where it has been the custom to keep different lots of grain separate for shipment, instead of throwing them together according to their classification as practised in the West, and its arrangements will have to be modified.

For the purpose of meeting the demands of the local grain trade of this city and surrounding country, an extensive granary has been erected on the Schuylkill, where each car load of grain may be kept in separate bins. The building has been entirely successful, and its capacity may be doubled without a heavy expenditure.

But the large volume of agricultural products that this company can, through its numerous connecting railways, bring to this city from the West, requires still larger facilities than exist for its accommodation to induce this traffic to remain with us, We see no place so well located and adapted to the objects desired—that can be had at so small an outlay—as will be provided by the opening of Delaware avenue by the city, southwardly to Christian street of a width of not less than eighty feet. A double track railway may then be laid on this avenue, from which turnouts can be run into the existing warehouses upon it at the most convenient point for shipment, and on to the adjacent wharves. By this plan a large amount of capital may be savid in the erection of warehouses, which can be better employed by this company in the increase of its equipment. Such an arrangement can only be carried into effect through the co-operation of the corporate authorities, who will doubtless appreciate its importance to the revival and increase of the commerce of the city.

Under the authority given by you at your last annual meeting, the American Steamship Company of Philadelphia has been fully organized by the election of H. J. Lombaert, Esq., as President, and Edmund Smith, Esq., as Secretary and Treasurer, with a capital of $704,700, of which this company owns $400,000. The first mortgage six per cent. currency bonds of the company, amounting to $1,500,000, have also been issued under the guarantee of this company, and all of them taken at par, giving a realized stock and funded debt capital of $2,204,700, all of which has been secured without discount.

The four steamers that will constitute this line between Philadelphia and Liverpool, have all been contracted for to be built in this city, of American iron, by the enterprising firm of William Cramp & Sons. The first vessel it is expected will be launched in June next, and the remainder as rapidly as practicable thereafter. The total cost of these vessels under the contract will be $2,080,000. All of the steamers are to be alike in their model and machinery, ; the length of each to be 355 feet, and the breath of beam 43 feet. They will be arranged to carry 75 first class and 854 steerage passengers, and have an estimated tonnage capacity of 3016 tons, old measurement.

The Steamship Company has appropriately named the four vessels that are now being constructed after the States traversed by the railways of the company, viz: Pennsylvania, Ohio, Indiana and Illinois.

In selecting the models and machinery of these steamers the company has relied upon the experience and ability of the eminent mechanical engineer, B. H. Bartol, Esq., a member of the board of directors, to whom whatever credit may attend their qualities as sea-going vessels, or their adaptation to the business of this port, will be due.

Of the full success of this enterprise, with the co operation of this company and the system of railways it controls in the West, the board does not entertain a doubt.

As some fears have been expressed that the profits of the broad gauge railroads would suffer by a competition with those of the narrow system, it is not out of place here to state that in our opinion this cannot be their effect upon any leading line of railway. The only material advantage that the narrow gauge (say three feet) has over the broader railway, is in the economy of its construction over a rough and difficult country. To secure this economy, shorter curves, and consequently, a longer line, must be resorted to. The saving in dead weight carried in one system over the other is not important, as the heavy engines and cars used upon the usual gauge (four feet nine inches) is not due to the width of the track, but the necessity of maintaining higher speeds, and the movement of heavier loads, than is obtainable, with economy and safety, on the narrow gauge. The equipment now used on the narrow gauge is heavier than that formerly used upon the four feet nine inch lines.

The adoption of the proper gauge to be used in each case must be determined by the circumstances that surround the proposed improvement, as neither can be judiciously adopted until all these are known and considered. The narrow gauge is certainly not applicable to a line between Philadelphia and Pittsburg. Experience has shown that the gauge of your railway, which had its origin in the law of England, regulating the gauge that had been found best for common road carriages, is of ample width, to give the best results, on all first-class lines where speed of transit is necessary, and the amount of transportation large.

The general office of the company in this city having become inadequate for its business, it has been sold to the Lehigh Valley Railroad Company. The new building will be ready for use by the first of April next, and will, it is believed, be sufficient for the accommodation of the business of the company for many years.

Your directors desire to express their acknowledgments to the officers and employees generally for their strict attention to and successful management of the business of the company. The acquisition of the lines in New Jersey has added to their duties and responsibilities. These lines have been brought under the general management of A. J. Cassatt, Esq., who has, during the past year, so successfully conducted the business of the Pennsylvania Railroad as General Superintendent.

The General Superintendent of the Philadelphia and Erie Railroad, W. A. Baldwin, Esq., also deserves the thanks of the stockholders for his close administration of the affairs of that railroad, which, notwithstanding the low charges made for its use, has shown a profit upon its operations.

By order of the Board,
J. Edgar Thomson, President.

St. Louis Air-Line Railroad.

The Louisville *Courier-Journal* says that the work on the Louisville, New Albany and St. Louis Air-Line Railway is being pushed rapidly forward, and that by the first of November, 1872, the cars will be running regularly over its whole length. The cars now run from St Louis eastward over the Illinois section of the Air-line road, which is known as the St. Louis and Southeastern railway, and which is seventy-six miles in length. The cars also run regularly on that part of the Indiana section which is between Princeton and Mount Carmel, a distance of ten miles. By May 1st, at the very latest, thirty-three miles at this end of the Indiana section will have the grading, bridging, and other work done, and be ready for the putting down of the iron, the only unfinished part of this portion of the road being the great tunnel through the Knobs. This tunnel will be three-quarters of a mile long, and, at its present rate of progress, will be completed by July 1, 1872. When this work is done, the iron will be put down at the rate of a mile per day, and the cars will run over the road as fast as it is finished. The cars from Louisville will run to the Wabash River by November 1, 1872. The work on the bridge over the Wabash is advancing in a very satisfactory manner. The eight piers are all set, and the abutment on the Indiana shore is in. Four of the piers are up ten feet above the water. West of the Wabash River the road is made, and the iron down, for a distance of ten miles. It will be completed seventeen and a half miles farther to Albion, the county seat of Edwards County, by January 12th, and then the break of forty-six miles between Mount Carmel and Mount Vernon will be all that will have to be completed to give a continuous line from St. Louis to Louisville. Of course the work on this portion of the Illinois section will be pushed rapidly forward under the direction of the energetic President Bell, who is determined that this portion of the Air-line shall be completed as soon as that of which the public-spirited President, Bradley, has the immediate direction. This great road is in excellent hands, and when completed will furnish an outlet for a most productive district of country, whose undeveloped mineral wealth is of immense value,

RAILROAD EARNINGS—MONTHLY.

American Railroad Journal.

Saturday March, 2, 1872.

Stock Exchange and Money Market.

Money has been quite active, through the week, and rates have been firm, the current figures having been 6@7, generally 7 per cent., on call to even the best class of borrowers, in a temporary form, and mercantile discounts at from 7@9 per cent. per annum. The most urgent inquiry has been from the Stock houses, who, in some instances have had to pay at the rate of 7 per cent. gold for the necessary aid. The supply of Money has been on a reduced scale, influenced, to some extent, by speculative manipulations, designed to operate against values at the Stock Exchange. Private lenders have been the most liberal of accommodation. The city banks have been reserved in their offerings, in view of the further falling off in their weekly averages. The latest negotiations on call showed a rather more stringent market, with 7 per cent. as the minimum rate. The city banks reduced their loan and discount average nearly 2¼ millions during the week while contracting their outstanding circulation a trifle. The U. S. Sub-Treasury increased its currency balance nearly a million. It made a gain of nearly 2⅛ millions in its coin reserve. Its currency balance at the close of business on Tuesday was $6,439,733 and its coin reserve, $75,076,684.

The total coin reserve of the Treasury Department on Monday was $110,187,700 including $33,526,000 represented by outstanding coin certificates; and the currency balance was $10,425,572.

The city banks, in their latest return, show a further reduction of $577,400 of legal tender notes, $1,698,800 of specie, and $4,379,000 of deposits; also of $2,424,800 in their loan and discount averages, and of $5,500 in their item of circulation. The city bank exchanges, last week, averaged $106,561,258, and thus far, this week, about 102 millions daily. The banks now hold $2,590,525 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $17,890,600, against $23,562,018 same time last year. The city bank deposits are now $218,318,200, against $217,629,116 week ending Feb. 25, 1871. The legal tender reserve amounts to $45,042,900, against $57,178,408 same time last year. The circulation now stands at $28,143,700 against $31,720,445 same time last year. The loans are now $282,486,500 against $278,005,999 at this date last year.

The coin reserve of the city banks is now down to about 17⅞ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve has decreased to $45,042,900, from $46,616,000 on the statement of February 10th.

The U. S. Sub Treasury enlarged its currency balance $966,747 and its coin reserve $2,101,430 as the result of the week's business. The receipts of the office were $5,497,319 in coin, and $2,482,808 in currency; payments, $3,395,888 in coin, and $1,516,061 in currency. The office received $4,913,000 in coin or its equivalent, from customs; and disbursed $471,312 of coin interest

Government revenues have been unusually liberal in the customs form, and moderate from excises. The excises yielded about 1⅞ millions, and thus far since July 1, 1871, about 84⅛ millions. The customs at the port of New York, last week were $4,869,140; at the outports, equal to about $1,600,000 more, all in coin, or coin certificates.

Gold has been fairly active, through the week, and more than ordinarily sensitive to outside influence. The customs demand has been unusually brisk, and the speculative dealings have been rather spirited. The export drain has been limited. The supply in the open market has been moderate. The range of the price during the week has been from 110¼@111 and the closing quotation on Wednesday was 110⅜@110½ against 110½@110⅝ the preceding Wednesday. The specie outflow, last week, was $356,936. The Gold Exchange Bank clearances have averages about 36 millions per day during the week.

The prepayments of the 10-40 Gold Interest by the Treasury during the first two days of the current week, amounted to $1,800,000, and the receipts from customs to $1,125,000.

The customs demand for Gold last week, averaged $982 600 a day; thus far, this week, it has averaged $559,771 a day or equal to a weekly aggregate of $3,358,626. The arrivals of

specie from Europe, Havana and other foreign ports last week were $1,372, and since Jan. 1, 1872, $253,861 against $419,784 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $104,224,409 against $94,721,608 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to Feb. 24, 1872 $58,974,706, against $63,717,024 same time in 1870-'71.

The export drain of specie was $356,979 last week, against $690,483, same week preceding year. The shipments since July 1, 1871, have been $24,442,478 against $47,383,708 same time in 1870-'71.

Foreign Exchange has been in moderate demand, closing rather less firmly. Bankers' sixty day bills on London closed on Wednesday at 109¼@109⅛; sight bills on London, 110@110¼.

The produce exports from this port, week ending with Feb. 27, were to the currency value of $5,075,113.

Government securities have been in comparatively fair request for investment purposes, and with restricted offerings of most issues, prices have been quoted steady.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115¼@115⅛; U. S. Five-Twenties of 1862, (other than the bonds called in) 111⅛@111¼; U. S. Five-Twenties of 1864 at 111⅛@111¼; U. S. Five-Twenties of 1865, 111¾@112; U. S. Five-Twenties of 1865 consolidated. 110¼@110⅜; U. S. Five Twenties of 1867, 111⅜@111½; U. S. Five-Twenties of 1868, 112 112¼; U. S. Ten-forties at 110½@110¾; U. S. Fives of 1881 (Funding Loan) 108¼@108¾. Six per cent. currency bonds, 114@114¼.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 14.	Feb. 21.	Feb. 28.

* Ex March coupon.

State bonds have been in less general request, and irregular as to price.

A fair business has been reported in railway bonds, chiefly in the more popular loans through the commission-houses, with prices quoted strong in most instances. Central Pacific Sixes have been in demand at 102¼@102½. Chesapeake and Ohio Sixes have been selling readily at 94 per cent. and accrued interest.

Railway and miscellaneous share property has been quite active, and generally buoyant, though variable, in price.

The funeral services of Mr. Legrand Lockwood, a well known, and widely lamented member of the New York Stock Exchange, took place on Tuesday. There was no regular call of stocks or government bonds at the boards on that day, and the transactions were restricted to the dealings on the floor of the Exchange.

All legitimate business in stocks now closes daily by order of the Stock Exchange at 5 o'clock, P. M.

General business has been moderately active for the season. Domestic produce, has been in fair request, as a rule. Breadstuffs, Pork, Lard, and Naval Stores, closed in favor of purchasers. Petroleum was firmer. Middling upland cotton closed on Wednesday at 22¾@22⅞ cts. per lb. The receipts at all the ports, since Sept. 1, have been 22,021,478 bales, against 2,850,964 bales same time in the preceding year; exports 1,236,803 bales against 1,696,189 bales in the previous year; stock at the ports at latest dates, 549,641 bales against 693,218 bales same date 1871.

At the Live Stock Markets, Beeves have been in moderate request at 6⅛@8½ cts.; Veals in moderate demand at 5@11cts.; Sheep at 6½@9¼ cts. Swine, at 4¾@5⅛ cts. per lb., all live weight. The week's receipts were 7,554 Beeves, 337 Veal Calves, 27,952 Sheep and Lambs; and 27,651 Swine.

Foreign goods, have been rather more sought after and prices have been generally well supported. The week's imports of foreign goods reached $8,028,264 including $3,133,005 of dry goods.

Ocean freights have been more active, and quoted stronger as to rates. The main call has been for room for Cotton, Provisions, Grain, Petroleum, and Clover Seed.

At the auction sale of Scranton Coal on Wednesday, 100,000 tons were disposed of at a shade better prices, ranging from 3.40@4.25 per ton of 2240 lbs.

Narrow Gauge Railroad in New Jersey.

The narrow-gauge railroad for which a charter is asked meets with great favor, and has a fair prospect of passing. It is considered by the people of South Jersey one of the most important improvements for that section that has ever been conceived. Starting from Camden, it will run midway between the Camden and Atlantic and West Jersey Railroads, passing through a fine agricultural region, accommodating a large population now deprived of railroad facilities. It will pass through the towns of Mt. Ephraim Chew's Landing, Turnersville, Cross Keys, Williamstown, Buena Vista, East Vineland, and direct to the ocean at or near Beesly's Point. It is intended, and the charter will confer the power, to build branches to Vineland, May's Landing and Millville—thus making a trunk railroad for the accommodation of South Jersey, and securing its rapid development by means of cheap rates.

☞ The receipts of the Housatonic Railroad for 1871 were $780,280, against $752,097 in 1870, and $502,604 in 1869. The expenses were $601,-120, and dividends amounting to $142,810 were paid, leaving, with a former surplus, $65,597 in the treasury.

Memphis, Little Rock and Pacific R. R.

The Memphis and Little Rock and Little Rock and Fort Smith Railroads have been consolidated under the name of the Memphis, Little Rock and Pacific Railroad Company, with the following board of directors: Sam Tate, G. C. Scott, A. McDonald, H. L. Binnkley, W. N. Farrington, Henry Page, A. T. Lacy, B. D. Williams and John Stoddard. The lease of the two roads to the Southern Security Company, from January 1, 1873, was signed. The consolidated railway lines give three hundred and fifty miles of road, forming a direct route to Texas and the Indian country. Sam Tate was elected president of the new company.

Maine Central Railroad.

The annual meeting of this company was held in Waterville, Me., on the 28th ult. The report shows an increase of nearly twenty per cent. in the earnings. The Board of Directors were unanimously re-elected, and authorized to issue consolidated mortgage bonds sufficient to retire all existing indebtedness. The leases of the Belfast and Moosehead Lake Railroad, Androscoggin Railroad, and Leeds and Farmington Railroad, were ratified. The directors chose Richard D. Rice as president, Anson P. Morrill, vice-president, and Joseph H. Drummond, clerk.

Railroads in New Hampshire.

Two important railroads have been chartered by the New Hampshire Legislature within two years, and preliminary surveys have been made—both of which have been pronounced as very feasible routes, and the public are strongly agitating the building of the same immediately. They are known as the Franklin and Rochester, that runs from the Northern Railroad at Franklin, N. H., east through the towns of Tilton, Belmont, Gilmonton, Barnstead, Alton, and intersects with the Dover and Winnipiseogee at New Durham Crossing. The entire length is about 24 miles. The other is the extension of the Suncook Valley from Pittsfield, N. H., north through the towns of Barnstead, Gilmanton Iron Works, and terminates at Lake Winnipiseogee at Alton Bay. The length of this road is about 15 miles.

St. Paul and Chicago Railroad.

The purchase of the St. Paul and Chicago Railroad by the Milwaukee and St. Paul Railway Company is reported in the *Commercial Advertiser*. By this purchase, the Milwaukee and St. Paul acquires 130 miles of road, of which 27 have yet to be built, and the consideration for the property is sterling bonds, to the amount £800,000. The securities of the St. Paul and Chicago Railroad are still, we believe, in first hands; and the transaction will be complete when they are surrendered, and the sterling bonds as above, delivered. The bargain was made two months ago, and, since then, the Legislature of Minnesota has confirmed the transfer of the railroad.

☞ At a meeting held a few days ago at Fort Valley, Georgia, five hundred thousand dollars were subscribed to the capital stock of the Memphis and Atlantic Railroad Company. This company is chartered by the Legislature of Georgia, and designed to give Central Georgia a direct route through Memphis to Kansas City and the Union Pacific road, and to Shreveport, La., the wealth of Texas and California.

BANKING HOUSE OF FISK & HATCH,
No. 5 Nassau Street,
New York, February, 28, 1872.

We are selling the CHESAPEAKE AND OHIO RAILROAD FIRST MORTGAGE SIX PER CENT. GOLD BONDS at the rate of 94 and accrued interest. They are in denominations of $1,000, $500, and $100, registered, or with coupons attached; interest payable May and November in United States gold coin; principal payable in 1899, also in gold coin. Bonds delivered by Express, charges paid.

These bonds, besides being the formal obligations of a well-established, substantial and thoroughly responsible corporation, comprising among its officers and directors some of the most experienced and trusted capitalists and business men of the country, are also secured by a mortgage lien upon the whole great railroad line, equipment, property, and franchises, whose cost and value will not be less than thirty millions, and which is destined, at an early day, to have a productive value of nearly double this sum.

This line furnishes a short and remarkably easy route for travel and transportation between the Great West and the Atlantic coast, and as such will share, on advantageous terms, to a large extent, in the vast volume of through business from the West which now taxes all existing means of transit. By means of connecting lines, now under construction in Ohio and Kentucky, it will afford the shortest and cheapest route between Cincinnati, Louisville, St. Louis, Chicago, Nashville, Memphis, and the far West and the North Atlantic shipping, and it must at once take rank, therefore, as one of the Great Trunk Roads of the country for through transportation.

Besides these advantages it traverses the RICHEST AND MOST EXTENSIVE COAL DEPOSITS in the country, in its route through the KANAWHA VALLEY, and crosses, in its course, some of the most important and valuable deposits of iron ore known on this Continent. The coal, of which there are three varieties, will furnish an enormous and profitable traffic; and there is no doubt that a large manufacturing activity will soon be developed along the line.

Descriptive pamphlets, with full information, furnished on application.

FISK & HATCH.

HARVEY FISK,
A. S. HATCH.

☞ THE FIRM OF LOCKWOOD & CO., bankers, having been dissolved on the 24th inst., by the death of LE GRAND LOCKWOOD, the surviving partners will continue the business under the same firm name.

LE GRAND LOCKWOOD, JR.,
WILLISTON B. LOCKWOOD,
THOMAS R. CAPEN,
JAMES S. WELLS.

NEW YORK, Feb. 27, 1872.

☞ A railroad is projected from Westover to Jerico, in Potato Neck, Somerset Co., Md., eight miles long. Also one from Princess Annie to Devil's Island, to be called the Tangier railroad.

☞ The gross earnings of the Toledo, Peoria, and Warsaw Railway for 1871, were $1,097,947 90.

Quicksilver.

The following shows the quicksilver produced in 1869, 1870 and 1871:

	1869. Flasks.	1870. Flasks.	1871. Flasks.
New Almaden mine	17,000	14,000	18,763
New Idria mine	10,450	10,000	9,227
Redington mine	5,000	4,546	2,128
And sundry other mines	1,150	1,000	1,763
Totals	33,600	26,546	31,881

The exports to the different countries for the three years were as follows:

To	1869.	1870.	1871.
New York	1,500	1,000	800
Great Britain	.....	.....	.....
China	11,600	4,050	7,900
Mexico	8,060	8,088	3,081
South America	2,900	1,300	2,200
Australia	300	300	1,100
British Columbia	4	9	6
Other countries	51	41	118
Total flasks	24,415	12,788	15,205

The exports previously were:

	Flasks.
In 1868	41,566

Journal of Railroad Law.

RAILROAD COMPANIES—WHEN THEY MAY BE ENJOINED FROM LAYING SIDE TRACKS OR SWITCHES.

The case of Rayle and ano. *vs.* The Indianapolis, Peru and Chicago Railway Company, (32 Ind., 259,) was a suit to enjoin the appellee from constructing a railroad switch, or side track, upon and along Buckeye street, in the city of Kokomo in front of certain lots, belonging to the appellants.

At the commencement of the action, the complaint consisted of a single paragraph in which the plaintiffs allege, that they are the owners in fee simple, as tenants in common of a block of lots numbered 64, 65, 66, 67, 68, 69, 70 and 71 in Mills and Richmonds additions to the town, now city of Kokomo: that said lots are of the aggregate value of three thousand dollars; that the lots numbered from 64 to 67 inclusive, front west upon Buckeye street, a public street and highway of said city, ranging from 60 to 40 feet in width, that said lest described lots are greatly enhanced in value by said street, and without the same would be of little or no value, that the defendant is engaged in building a railroad switch along the entire front of the last described lots, and within said Buckeye street, occupying about 30 feet of the width of the same, and rendering it almost useless as a street, to the injury and damage of the plaintiffs in the sum of two thousand dollars.

The following is the opinion of the court delivered by

RAY, J.—It will be observed that every material averment of the complaint is denied by the answer. Affidavits are also filed by which it appears that long before the purchase by the appellants, the owner of the property, not yet subdivided into lots, donated to the appellee, the right of way immediately in front of and along the line of what are now numbered, Lots No. 64 to 67 inclusive, and conveyed the same by a proper release, and for a valuable consideration; and that 40 feet in width was added on the east side of the railway track for such right of way, the space now claimed as a street. It is also denied in the answer under oath, that any agent of the company was ever authorized to make any representations, that the railroad would not occupy said forty feet for the purpose contemplated. It also appears that such extension of the railway track along the 40 feet so released to the appellee is necessary for the purpose of the company and the enjoyment of its property. Under such a state of pleadings and proof we do not see how the court could have granted a continuance of the restraining order.

The right to extend the railway track was acquired for a valuable consideration from Richmond in the year 1850, who was then the owner of the property, purchased in the year 1856 by the appellants. If Richmond had retained the property, the facts that it became of special value for residences, and that the extension of the railway would impair such value, would have furnished no sufficient ground to restrain the company from the exercise of a right granted by him and necessary to the enjoyment of its own property. The subsequent purchase by the appellants without proof of fraud on the part of the appellee, could give them no higher equity than existed in their grantor.

There was a motion to reject the certified copies of entries from the records of the corporation, by which it was attempted to support the averment, that a release of the right of way had actually been executed to the appellee.

If the overruling of this motion was error, still it could not reverse the case. It involved but a question of costs. If not proper evidence, it will be disregarded here, and as the motion to dissolve was determined upon affidavits, we look through the proof, considering only proper evidence, and finding the judgment of the court below sustained we must affirm the same.

Judgment affirmed with costs.

Gigantic Oil Pool.

The Buffalo *Commercial Advertiser* prints as "a rumor from the oil regions" a report that a movement is on foot, and with a good prospect of success, to consolidate all the oil refineries and oil transportation lines, under the corporation name of the "South Improvement Company." It is the intention of this company to handle all the crude and refined oil in the United States. The plan upon which this consolidation is to be effected, as given by the Titusville papers, is that all the refiners shall take stock to the value of their repective refineries, the profits to be distributed *pro rata* according to the amount of stock held. The amount of the capital stock of the company is given at $10,000,000, and it will be supported by interests representing $250,000,000. The transportation companies which are to take stock in the "South Improvement Company" are the New York Central, the Erie, Baltimore and Ohio, and the Pennsylvania railways. The percentage to be awarded to the transportation lines will be 55 per cent. for the Erie and New York Central (27½ per cent. each), and 45 per cent. for the Pennsylvania interests, including the Baltimore and Ohio railway. The freight from the oil regions to New York on refined oil will range from $2 55 to $2 66; to Philadelphia it will be fifteen cents less and fifteen cents more to Boston. The Refiners' Association will be allowed a drawback of from 75 cents to $1 per barrel. Assuming the annual production at 5,000,000 barrels, the profit to the refiners on this single item of drawbacks will reach the enormous sum of $5,000,000. The person named for the presidency of the association is P. H. Watson, and it is reported that operations under this consolidation will commence on the first of March next.

Northern Central Railway.

At the annual meeting of the stockholders of this company, held in Baltimore on the 21st ult., the president, J. D. Cameron, Esq., submitted the following report of the directors for the year ending December 31, 1871:

To the Stockholders of the Northern Central Railway Company.

GENTLEMEN—The directors herewith submit the following report of the operations of your road for the year 1871, together with the treasurer's report of the financial condition of the company.

The earnings from transportation of freight were		$3,041,376 18
The earnings from transportation of passengers were		839,762 94
The earnings from transportation of express were		103,211 28
The earnings from transportation of mails were		89,682 50
The earnings from miscellaneous sources were		242,915 95
Total earnings for the year		$4,266,898 85
The operating expenses were:		
For conducting transportation	$881,153 64	
For motive power	973,026 20	
For maintenance of cars	364,490 14	
For maintenance of way	708,065 20	
For general expenses	63,002 67	
		2,989,737 85
Net revenue		$1,277,161 00

The earnings as compared with previous year were as follows:

Increase from freight business	$164,590 83
Increase from express business	18,489 06
Increase from miscellaneous business	34,129 80
Total increase	$217,209 69
Decrease in pass. business	$38,585 42
Decrease in mail business	350 00
Total decrease	88,935 42
Increase of earnings over previous year	$178,274 27

There were carried during the year 1,091,306 passengers.

There were carried during the year 1870 1,087,-895 passengers.

Increase of passengers 3,461.

There has been a decrease in the number of passengers coming from and going to other lines, but an increase in the number of local passengers. The increase in the local is attributable to an average reduction of 28 per cent. in the price of commutation tickets, which was made on the first of April last. The local passenger rates are now extremely low, and must certainly tend to build up a very large travel to points near Baltimore.

The amount of freight moved in 1871 was 4,161,400 tons.

The amount of freight moved in 1870 was 3,680,765 tons.

An increase of 480,685 tons.

The per centage of increase was 13 per cent.

being a gain of 6 per cent. on the increase of the preceding year.

The price received for moving one ton one mile in 1871 was 1.73 cent., being 0.17 of a cent. less than in 1870.

The operating expenses were 70.06 per cent. of the receipts, being 1.26 per cent. more than the previous year.

The percentage of working expenses might be materially reduced by charging to capital or construction account various items of expenditure which under the system adopted by the company are now charged in the regular working expenses, such as new or extended sidings, iron or stone bridges erected in place of wood, steel rails in place of iron, and other items, all of which in reality add to the permanent valueand improvement of your property.

We purchased during the year 1,300 tons of steel rails, a portion of which has been placed on the single track between York and Harrisburg.

The test made upon this road in the use of steel rails has been entirely satisfactory, and we are fully convinced that with the increased tonnage it is conducive to the safe and economical working of the road, and that the policy of the company should be to replace the iron with steel as rapidly as practicable.

The operations of the leased lines have been satisfactory. All of them show an increase in trade, whilst the Shamokin Division has increased largely in trade and profit.

The coal transportation on the main line shows a total of 788,472 tons. In 1870 it was 691,498 tons, an increase of 96,974 tons. The coal transported over the Shamokin Division was 647,943 tons, an increase of 156,429 tons over 1870. The coal transported over the Elmira Division was 207,417 tons, an increase of 60,285 tons, of which 54,344 tons was bituminous and 5,949 was anthracite coal. The bituminous coal trade of this division is an entirely new trade, and this year will increase very rapidly. The mines at Ralston are producing 500 tons daily, and we have been notified by the coal company that they have orders for and will be prepared to ship 1,000 tons per day after the first of May next.

The shipments of freight from Baltimore to points on the line of the road and to connecting lines North and West have increased.

With the completion of the Baltimore and Potomac Railroad and the Union Railroad we shall have a very large increase in trade both North and South, and as the trade of the past year has taxed the equipment to its fullest capacity, we shall be compelled to acquire additional equipment during the coming year to meet this trade and the regular increased traffic on our lines and from connecting roads.

There has been expended during the year $708,065 20 by the maintenance of way department. The track has been maintained in excellent condition, and we have again the pleasure to report another year having passed without any accident having occurred to a passenger.

The equipments, both passenger and freight, have been improved, and the passenger trains have been provided with the Westinghouse brakes, which we believe adds greatly to the safety of railroad travel.

The new line with the city of Baltimore has been completed, and is now in use.

New sidings have been made and large coal trestle erected, and a number of other improvements made which have added greatly to the conveniences and economy of handling the trade.

Owing to the character of our leases and trackage contract for the use of the line beyond Elmira, we have been somewhat embarrassed in the operations of the Chemung and Canandaigua Roads. To get a more perfect control of those roadswe have been endeavoring to secure them, either by purchase or perpetual lease, and hope now to consummate some permanent arrangement.

There has been added during the year $141,897 91 to the sinking fund, making the total amount now in that fund $863,897 91.

It having become desirable to get possession of the majority of the stock of the Shamokin Valley and Pottsville Railroad Company, for the purpose of arranging for the bonded debt of that company, amounting to $700,000, which matures on the first of August next, and for the payment of which we are responsible under this lease as authorized by you at your last annual meeting, we sold 12,034 shares of the stock of this company, and purchased a like number of shares of that company. To meet the bonds referred to, and to purchase additional coal lands the Shamokin Valley and Pottsville Railroad Company issued a mortgage loan for $2,000,000, which bonds have been endorsed by this company and the Philadelphia and Erie Railroad Company.

The S. V. and P. R. R. Co. now own 6,000 acres of coal land, sufficient to provide a large amount of tonnage for this line, independent of all other sources.

The officers in charge of the different departments have performed their respective duties during the year to the entire satisfaction of the board.

By order of the Board,

J. D. CAMERON, President.

R. S. HOLLINS, Secretary.

On motion of Mr. Clark it was

Resolved, That the report of the president and directors be received and adopted, and that the same, with the accompanying reports, be printed for the use of the stockholders.

On motion of Mr. Hatch it was

Resolved, That the directors be requested to maintain and continue the policy of restricting the application of the current net revenues to the purpose of providing for necessary increased equipment and dividends to stockholders.

On motion of Mr. Cameron it was

Resolved, That the directors be requested to consider the policy of allowing private capital to provide additional car equipment necessary for the growing coal business of the company, according a reasonable car service in compensation therefor, and if this policy be approved of and adopted by them, that the stockholders for a definite time be privileged to unite *pro rata* in providing the same.

The judges of election proceeded to open the polls and to receive the ballots, and on closing the same and counting the ballots reported to the meeting the election of the following directors: J. D. Cameron, W. Morris, J. M. Kennedy, E. C. Biddle, Ed. Smith, J. P. Jones, J. E. Kapp, Wm. Colder, Henry Welsh, George Small, B. F. Newcomer, S. M. Shoemaker.

Subsequently a meeting of the directors was held, and Mr. Cameron was re elected president of the road, and Thomas A. Scott was elected a director to fill the vacancy in the board.

☞ The directors of the North Shore Railway Company have resolved to accept the contract of Smith & Keith, of New York, to construct the road between Quebec and Montreal, including piles and railway, for $7,000,000. Some soreness is felt in certain circles on account of the contract not being placed in Canadian hands.

☞ Mr. Shanley has the contract for the extension of the Midland (Ca.) Railway from Orillia to Mundy's Bay, the terminus of the line, on the Georgian Bay. The section between Beaverton and Orillia, will be pushed forward to completion by the middle of the incoming summer.

☞ The contract for the construction of the Wellington, Grey and Bruce Railway from Listowel to Lucknow, the section of the southern branch has been awarded to Mr. Wm. Hendrie.

☞ The force on the Lynchburg and Danville Railroad has been largely increased, and the work is being rapidly pushed to completion.

Railroad Legislation in Maine.

A correspondent of the Boston *Journal*, writing from Augusta, Maine, under date of February 23, says:

In reviewing the railroad legislation of the Legislature up to the present time we find that ten distinct and independent railroad companies have been chartered this winter, with a few more in prospect. This number embraces the Union River Road, Sandy River Valley Road, Cumberland County Central Road, Lewiston and Auburn Road, Penobscot Central Road, Calais and Eastport Road, Castine and Ellsworth Road, York County Central Road, Bangor and Calais Shore Line Road and the Piscataquis Central Road, all enlarging the railroad facilities of this State, and ramifying their tracks in new sections as well as a region now traversed by the iron horse. In addition, we find permission given for branch roads to existing companies, connections with other roads, together with authority for loans and aid from towns and cities. As a result of legislation in this last respect over five million dollars worth of railroad bonds will be thrown upon the money market this Spring. The passage of the General Railroad law will, it is believed, relieve future Legislatures, but it will only transfer the contests which have marked the legislation of this Winter to the board of three Railroad Commissioners provided for in the act, and create a greater demand than ever for the services of the most skillful and adroit of legal gladiators, who will find a more remunerative field than ever for the exercise of their talent.

☞ The Yarmouth *Register* says the terms upon which it is proposed to consolidate the stock of the Old Colony and Newport and Cape Cod Railroads are substantially these: The stock of the Old Colony is placed at a valuation of $108 per share, and the Cape Cod at $80 per share—17 shares of the former being considered equal to 23 of the latter. Equitable arrangements will be made for the transfer of rights of holders of single shares or fractional parts of shares.

☞ A test case came before the Circuit Court in Washington last week, based upon the refusal of a street car conductor to take a transfer ticket at a place other than the junction, and ejected the passenger. The transfers specify, "Good only at the junction," and are given without charge. The jury rendered a verdict for plaintiff for five cents, the value of the ticket.

☞ The President of the Northern Central Railway Company says that the test made upon his road in the use of steel rails has been entirely satisfactory, and he is fully convinced that with the increased tonnage it is conducive to the safe and economical working of the road, and that the policy of the company should be to replace the iron with steel as rapidly as practicable.

☞ John King, Jr., has been elected president, Wylie A. Oldham, treasurer, Jas. F. Lowe, secretary and treasurer, and W. E. Jones, cashier and register of the Marietta and Cincinnati Railroad Company.

☞ The Washington and Ohio Railroad Extension has been commenced, and workmen are now busy on most of the sections beyond Hamilton. It is expected that trains will run to Snickersville, in the Blue Ridge, within a few months.

☞ The contract for the construction of the Toronto, Gray and Bruce Railway between Gorrie and Wroxeter station has been awarded to Messrs. McKenzie & Co., their tender being the lowest.

Pennsylvania Railroad.

The annual meeting of the stockholders of this company was held in Philladelphia on the 20th ult. In accordance with the custom at these annual meetings, the Mayor of the city, Hon. Wm. S. Stokley, was elected Chairman. Mr. John P. Green was chosen Secretary.

The annual report, showing the earnings and expenditures of the main line and branches, was read by Mr. Edward Smith, one of the Vice Presidents.

Mr. Roberts moved that the report be accepted and adopted, and published in pamphlet form.

Mr. John Hulme hoped that before the report was accepted the stockholders would pay serious attention to an important subject which was not mentioned in it. He alluded to the system of farming out the privileges of the road to fast freight lines, sleeping and palace car companies, &c. He had learned that a project was now being discussed for the organization of a fast coal car company, and if this were to succeed it would be fraught with serious results to coal miners, who would have to give their coal to this line or suffer the greatest inconvenience in getting their coal to market. He alluded to the lease recently consummated between the Allegheny Valley Railroad Company and certain New York companies, making an additional through line between New York and the West, claiming that the only salvation for the shareholders was to own their own cars and do their own business. He offered the following resolution, and strongly urged its adoption:

Resolved, That the Board of Directors of the Pennsylvania Railroad Company be and are hereby instructed to appropriate such an amount as may be necessary to purchase the cars now owned and being used on the Pennsylvania Railroad and its connections by fast freight lines and other outside companies and by individuals, in the end that said cars become the property of the Pennsylvania Railroad and its controlled connections for the interest of the stockholders and customers of the road.

Mr. Abraham Hart offered as an amendment to Mr. Roberts' resolution, a resolution returning a vote of thanks to J. Edgar Thomson, President, the several Vice Presidents, the General Managers, the Heads of Departments and their subordinates, for the zeal, fidelity and ability with which they have discharged their duties during the year past.

The amendment was adopted and the report accepted.

Mr. George H. Earle asked for information regarding the Pennsylvania Company, which is operating the Western roads owned or controlled by the Pennsylvania Railroad Co. He thought that the roads could be more economically managed under the Pennsylvania Railroad organization and its Board of Directors.

Mr. Cuyler replied that last year, in the annual report, the policy of the Board of Directors concerning this company was set forth, and was adopted and approved by the stockholders. The Pennsylvania Company, he said, is practically a bureau of the Pennsylvania Railroad Company. The Board of Directors of the Railroad Company elect the Directors of the Pennsylvania Company, and a controlling interest of the stock is owned by the Pennsylvania Railroad Company, and its dividends paid into their treasury, and comes to the stockholders in the shape of dividends. In regard to the resolution of Mr. Hulme on the subject of fast freight lines, Mr. Cuyler moved that it be referred to the incoming Board of Directors, with a request that they publish a reply to it. He explained that the charter requires the Company to draw any car that may be offered to it and fixes the amount that may be charged for such service; this is also one of the provisions of the general railroad law of the State, which regards the railroads as common highways, so that it would be seen that it is not in the power of the Company to do as the resolution contemplates. The best profit of the railroad company comes from this branch of its business, and the policy heretofore followed has proved to be the true one.

Mr. Hulme replied, that Mr. Cuyler knew very well that this railroad law of 1864 was enacted to help the Harrisburg and Lancaster railroad which was too poor to buy its own cars, and it could easily be modified if desired. He could not be convinced that it was to the interest of the Pennsylvania Railroad Company to carry on this business, at the expense of a double set of officers, clerks, agents, &c. The cream of the freight business of the road is given to these outside corporations, and the cream of their profit of course goes to their own stockholders.

Mr. Cuyler said that he thought Mr. Hulme opposed this policy all the more strongly because be (Mr. Hulme) himself was the author of it. The whole policy, he said, rests on a report of a committee of which Mr. Hulme was chairman, when he was one of the directors of the road. The speaker reiterated his statements as to the requirements of the law, and declared that the company are receiving more from these fast freight companies under their contracts than they could demand under the law. He begged the stockholders to consider what would be required of them if this resolution was adopted. They would have to own cars enough to stock all the roads reaching to the Pacific on the West, and the Gulf of Mexico on the South; the cars would be loaded here or in New York, pass over the road and go upon some connecting road out of the control of their owners, and it would be impossible for the company to keep the control and oversight of them.

Mr. Hulme said he regretted that the old accusation had been again made—that he was the author of the "fast freight line" policy of the Pennsylvania Railroad. When the contracts were made with the Union and Empire fast freight lines he was a director of the company, and used all his influence to prevent their consummation. The President, Mr. Thomson, also acknowledged that the whole policy was wrong, but that, as it was followed on the other roads, the only way to kill it was by competition, and thus drive the knife to the very heart of the evil. With this understanding, and under this pledge, he had been induced to vote for these contracts, knowing them to be wrong, and only doing so in hopes of breaking up the system. The speaker declared that it was all gammon about having to haul these cars or being obliged to put them on the road.

Mr. John M. Kennedy defended the policy of the Board of Directors, claiming that it was productive of great profit to the company.

Mr. Earle thought that before any of the Board of Directors rose to oppose Mr. Hulme's motion, they ought to declare that their hands are entirely clear of any of the profits derived from these transportation companies.

Mr. Cuyler declared that when the gentleman charged that the Directors of the Pennsylvania Railroad Company were interested in supporting these transportation companies, for their own profit, he made a statement which was entirely untrue.

The question was then taken on Mr. Cuyler's motion, to refer Mr. Hulme's resolution to the Board of Directors, and it was carried.

Mr. Roberts offered a resolutiou which was adopted, authorizing the Board of Directors to carry out the suggestions in the report as to an increase of the capital stock of the company, and to do all other acts and things suggested by the annual report just read.

A resolution was adopted of thanks to the Mayor, for the able and impartial manner in which he had presided, after which the meeting adjourned.

The Valley (Va.) Railroad.

The Lexington (Va.) *Gazette* continues to be exercised about the delays which it imagines are taking place in regard to the prosecution of the Valley Railroad, especially through its county of Rockbridge, within the borders of which there is not yet a single mile of railroad. With regard to its previous impatience that the contracts for the line between Harrisonburg, the present terminus, and Staunton had not been given out, it may be stated in addition to the assurances heretofore afforded, that they will be awarded to the very best advantage, and there will be no such undue haste as will preclude their being given only to responsible parties on the lowest terms. The line beyond Staunton for some eighteen miles —or about half way to Lexington—will also be ready for bidders very shortly. Nearly all the individual cases involving right of way from Staunton south to the point of divergence of two mooted lines, for the eighteen miles indicated, it is learned have just been satisfactorily arranged. A meeting of the president and directors of the company is to be held in Baltimore on the 5th March, when it is hoped that a decision may be arrived at in regard to the line south of this point of divergence. As indicating the spirit and purpose of prosecuting the whole work, it may be added that the surveys have been completed between Buchanan (the point at which the divergence lines now under consideration again meet) and Salem, on the Tennessee road, where the Valley road thus reaches the great connecting lines southward.—*Balt. Sun.*

Marietta and Cincinnati Railroad.

The stockholders of the Marietta and Cincinnati Railroad have for some time had under consideration an important project for shortneing the line of their road and lessening the distance to Eastern cities some eleven miles. The matter was thoroughly discussed by the stockholders at their annual meeting last week, and, it being stated by the President that the construction of the proposed line would cost little more than making very necessary changes and improvements in the old line, it was decided to have it built at once. The new road is to be built from Athens to Belpre, in Washington county, an almost perfectly straight track, whereas the present line winds around hills, with an increase in distance of a few feet less than eleven miles. The Directors were instructed to take steps for securing the right of way at once, so that no delay will be had in running the cars upon the new track. It is believed that by the new arrangement the company will be more than compensated for the additional expenditure in less than six months, and that after that time the saving in the way of wear and tear, &c., will be almost inestimable. It is to be hoped no difficulty will be encountered in securing the right of way along

the proposed cut off, and that before the close of the present year travellers will find the time between Cincinnati and Eastern cities lessened almost one hour. Such an arrangement, equally desirable to the company and traveler is not likely to long delay.

Western Extension of the Baltimore and Ohio Railroad.

It was stated in a recent issue of the Baltimore *Sun* that there had been delegations from important towns in Ohio in that city in consultation with the Baltimore and Ohio railroad authorities with reference to arranging for and pushing forward the important extension of that road to Chicago, and that such understandings had been reached as looked to its completion in two years. The Tiffin (Ohio) *Tribune*, of the 22d ult., has the following on the subject:

The people of Tiffin, Ohio, are now active in measures to promote the location of the proposed western line of the Baltimore and Ohio road through that city. On invitation of that company a committee of three citizens, General W. H. Gibson, L. A. Hall and S. B. Sneath, visited Baltimore a few days since, when a conference was had and the ideas of the parties exchanged. Hon. C. Foster was subsequently present, as also were gentlemen from Defiance and Hicksville, Indiana. The Baltimore and Ohio road proposes and agrees to build, iron and run the road from Havana to New Haven, on the Lake Erie division in Huron county, through Tiffin, Fostoria and Defiance, to Chicago, if the people along the line will furnish and donate to it the right of way, depot grounds, station grounds and space for side tracks.

The committee here has in charge the getting of this right of way, &c., from the Lake Erie division to eight miles west of Van Buren. From there Defiance takes charge of the same business a certain distance, then Hicksville, &c., &c. Mr. Randolph, constructing engineer, will be here Saturday to fix the lines and grounds. After making this statement the General spoke briefly of the cheapness of the route, its advantages, and urged that we take hold of the matter promptly. On motion of Mr. Pennington, the chairman was authorized to appoint a committee of three to have the matter of working up the right of way, &c., in charge, with authority to appoint sub-committees whenever necessary. The chairman appointed General Gibson, L. A. Hall and S. B. Sneath that committee. S. B. Sneath was appointed treasurer.

Arkansas State-aid Bonds.

The Helena (Ark.) *Clarion*, alluding to the State-aid bonds of Arkansas, says:

Among the numerous misstatements which have been made by the Little Rock *Gazette*, for the purpose of misleading the public in reference to the finances of Arkansas, is one which recently appeared in that paper implying that the State had not received an equivalent for bonds issued in aid of the construction of railroads. This statement has been repeatedly denied, but we are now prepared to furnish evidence to convince any fair-minded person that the State has received vastly more than an equivalent for the bonds loaned to the respective roads now in course of construction.

The Memphis and Little Rock road received from the State $1,200,000 in bonds, from the negotiation of which they realized the sum of about $700,000 and expended $1,250,000.

The Little Rock and Fort Smith road received $900,000 in bonds, from the sale of which they realized $500,000, and expended about $1,500,000.

The Little Rock, Pine Bluff and New Orleans, and the Mississippi, Ouachita and Red River Railroads have received $1,200,000 in bonds, the proceeds of the negotiation of which amounted to about $600,000, and these companies have expended on their works about $1,500,000.

The Arkansas Central has received $300,000 in bonds, which have realized to the company less than $200,000, and there has been expended in construction of road and purchase of iron and rolling stock a sum exceeding $350,000. It will, therefore, be seen that, while the State has issued to the several companies only $3,600,000 in bonds, from which they have realized less than $2,000,000 in cash, these companies have expended over $4,500,000.

The total number of miles of railroad which have been completed since the award of State aid will exceed 290, and, at a valuation of $25,000 per mile, they would be worth $5,000,000. To be more explicit in our statements of these facts, the State of Arkansas has issued $3,600,000 in bonds to the above-named companies, and the companies themselves have expended about $5,000,000 in the construction of roads, and, with the exception of the Little Rock and Fort Smith Railroad they have promptly paid to the State the interest on these bonds, as required by the State Aid law. There should not be any question as to the security of the lien which the State holds on these roads, when their property is worth, at a low estimate, over $1,500,000 more than the amount of the lien.

Philadelphia Car Works.

J. G. BRILL & SON,

CAMP'S IMPROVED DUMPING CAR.

RIGHTS FOR SALE BY

A. W. RHOADS & CO.,

Wilkes-Barre, Pa.

A. W. RHOADS, N. H. CAMP.

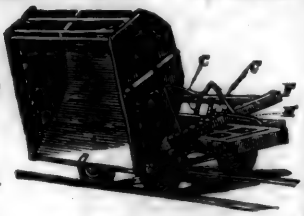

Fig. No. 1, Car Loaded & at Rest. Fig. No. 2, Car Dumped.

TO DUMP THE CAR.

The Brakeman seizes the lever H, and raises it about a foot, thus releasing the hopper from the catch, C, and the tilting-frame, F, from the catch, C, when the hopper, K, yields to the force of gravity and rolls over to the position shown in Fig. 2.

To Replace the Hopper in Readiness for another Load.

The brakeman bears his weight on the up-end of the tilting-frame, F, forcing it down to its place, when the hopper rolls back to *its* place, where it is held by the catches, C and C.

Address, A. W. RHOADS & CO., Wilkes-Barre, Pa. Lock Box 131.

American Railroad Journal.

New York Saturday, March 9, 1872.

New York, West Shore and Chicago Railroad.

At a meeting of the Newburgh Common Council on the 28th ult., a resolution granting the New York, West Shore and Chicago Railroad the right of way for the laying of tracks through that city was unanimously adopted, with the proviso that the road shall be constructed within four years from date. Mr. Courtney, the President of the Company, in his remarks before the Board, said that his Company purposed to put the entire river line under contract between now and the first of May. They would probably commence work in Newburgh in May. They only asked two years for the completion of the river line. The entire line of road from New York to Buffalo would be put under contract the coming summer. They would set at work as soon as the season opened from three thousand to seven thousand men. The men would be put at work on the sections just as fast as they were located and the right of way obtained.

NORTHERN PACIFIC GOLD BONDS.

Sales December, January and February over $3,500,000.

Banking House

JAY COOKE & CO.

The policy of the Government looks to a steady redemption of its Bonds at Par.

In view of this fact we would suggest that holders avail themselves of the present favorable opportunity of exchanging their securities for a

Bond of Equal Safety.

Many holders are exchanging them for NORTHERN PACIFIC GOLD SEVEN-THIRTIES, at a large profit.

These Bonds furnish to the public an Investment Security which combines the ready Negotiability, the Convenience, and the high Credit of a first-class Railroad Bond, with the Solidity and Safety of a Real Estate Mortgage on Land worth at least twice the amount loaned.

They are offered at Par in currency, FREE OF UNITED STATES TAX, and both principal and interest are payable in GOLD COIN.

All marketable stocks and bonds received (by express or otherwise) at current prices in exchange for Northern Pacific Seven-thirties without expense to the investor. Pamphlets and full information furnished on application.

JAY COOKE & CO.,

New York, Philadelphia & Washington.

Money Market and Specie Payments.

The history of the course of monetary affairs for the past month has been a very instructive one. It has exhibited not only our dangers, but our strength. It has demonstrated that however wisely statesmen may have contrived to prevent us from falling into "entangling alliances" with the nations of Europe, we feel keenly and immediately, not only the course of the higher order of trans-Atlantic affairs, but the petty phases of European politics, and even the jealousies and ambitions of the great families. For the exigencies of commerce pay little heed to political boundaries, or to varieties of religion and language. And in the influence which commerce and finances exert, we have a better guarantee for the maintenance of peace than in the labors of diplomats.

If it be true that we cannot escape a direct interest in the political intelligence from Europe, it is also true that we are in a position to meet even extraordinary emergencies. The fact that Europe holds large amounts of our Government and railway bonds, which may be sent back upon our money market at an hour's notice, has been so frequently stated, and reiterated, that it is constantly in the minds of our financiers and bankers, and induces reserve and prudence in their action, which otherwise might not be maintained.

But the most obvious inference to be drawn from the course of gold, and the state of our money market, during the financial flurry in London, growing out of the Alabama claims, is, that we are nearly ready to resume specie payments. It is certainly time this were done. No interest suffers more directly and palpably from a depreciated currency, than the railway interest. With most of the charges of railways limited, by law or custom, their expenses are swollen indefinitely by means of a currency of a fluctuating and uncertain value. It is now nearly seven years since the termination of the late civil war. Since that time our currency has been contracted about two hundred millions of dollars, and such has been the increased use thereof, that at least a hundred million dollars more are needed now than then. The absurd and unbusiness like theory on which the contraction of the currency was stopped five

years ago, viz., that the country would grow to the volume of the currency, seems about to be realized. Our financial history is full of surprises, and this is not the least of them. The growth of our country seems at length to be about to accomplish what should have been the first object of our public men. All schemes to elevate public and private integrity, to economize public and private expenditures, relieve the burdens of taxation, and revive manufactures and commerce, can have but partial success so long as our currency is a thing of uncertain value, and our wealth rests upon an uncertain basis.

The indications of a probably early resumption of specie payments are found in the fact that, with other circumstances, such as an extraordinary demand to pay duties, and an active speculation, gold advanced less than one per cent. in this market in response to the panic in London growing out of the Alabama claims. On the breaking out of the Franco-German war gold advanced about eleven per cent. The recent small rise may, we think, be taken as an indication that the present premium on gold is the result of artificial influences. The stringency in the money market cannot be attributed to anything else than our depreciated currency. With speculation dormant, and business everywhere kept within narrow limits, the great staples of the country passing into the hands of shippers and consumers, and an increase in the number of people who are disposed to live upon the proceeds of money loaned, there is still a scarcity of money. In Wall street, borrowers "on call" are compelled to pay seven per cent. and upwards, and first class commercial paper cannot be sold better than 8 to 9 per cent. discount. If this be the case in March, when the action of the markets for produce tends to the relief of banks and money lenders, what will be the state of the money market next August, when is commenced the annual call for money to "move the crops."

The large and increasing amounts of European capital which are invested in our securities and public works seem to afford little relief. Where is it to be found, except in the restoration of a sounder basis of values, and a consequent better security to lenders? The money market is in a state of stringency, because there is so little inducement to put money in circulation. Money always seeks the market when it is most secure, and not when it is the dearest; and what appears like another anomally, money is always cheapest when it is most actively employed. The return to specie payments, besides affording a sound basis of values, would increase our circulating medium by at least a hundred million dollars of hoarded gold and silver, and thus contribute in a two-fold degree to promote ease in the money market. By this means the marketing of railway securities would be encouraged, the cost of building and operating them diminished, and their net resources increased.

It is to be hoped that so desirable a consummation may not be long delayed. It need not be, beyond the commencement of the next crop year. We are not in the secrets of the Treasury Department, and do not know how far Mr. Boutwell may be inclined or able to facilitate the resumption of specie payments. We hope and believe the prospect will excite his friendly interest. Certainly, nothing would redound more to his honor than the re-establishment of the currency of the United States upon the basis of gold and silver.

Metropolitan Branch Railroad.

In June next the Baltimore and Ohio Railroad will open the direct line from Washington to the Point of Rocks, there connecting with the main stem and reducing the time to Pittsburg and Cincinnati two or three hours, and avoiding all changes and transfers. This piece of road, though only forty two miles long, was estimated to cost $2,600,000, and one single mile upon it, near the mouth of the Monocacy river, has already cost nearly $300,000. The country between Washington and Harper's Ferry consists of a series of bold, almost mountainous hills, which are crossed transversely by streams emptying into the Potomac, and this road is to leap every stream on a high and costly bridge, and then plunge immediately into a heavy rock tunnel. In one place 100,000 cubic yards of rock and earth had to be moved. Some of the cuts are 50 feet deep, and many of the embankments 60 feet high. The cuts are only 18 feet wide at the bottom and only ten men can work in each end of the cut—in some cases progressing no more than 25 feet in one month.

Rutland Railroad.

REPORT OF THE PRESIDENT.

It becomes necessary, in this report, to enter into the history of the corporation that the stockholders may understand clearly its position, and be able to make an estimate of the value of the property, at the same time to correct as far as possible, the erroneous statements that have been put forth in regard to the executive officer of the company in the management of its affairs. When honor and integrity are called in question, may I not ask of you a candid hearing? My purpose will be to present to you facts, and leave you, in a great measure, to draw your own inferences. I shall not enter upon anything personal, in a business document. I had prepared a report for the annual meeting, and had I arrived in season, or the meeting been adjourned as I requested, so there could have been a fair understanding of the position of the corporation, it would have been very much for the interest of the stockholders. Now, my main purpose will be to try and regain the lost ground, and restore confidence.

The present position of affairs requires quite an enlargement of the original report I had prepared, the substance of which was briefly stated to the few stockholders who remained after the business of the meeting had been substantially completed, as appears from the official report of their proceedings.

For your information you will find in the appendix a copy of the charter and an amendment thereto, also the by-laws, to which your attention is directed. Endeavor to fix in your mind the duties of the officers, and carefully consider the following, from the records of the company:

The company was organized at Rutland, on the 9th of July, 1867, by the choice of Edwin A. Birchard, John Howe, Jas. H. Williams, John B. Page, Peter Butler, Geo. B. Chase and Geo. M. Barnard as Directors, by a unanimous vote of the stockholders. And the Board organized by the election of John B. Page, President; J. M. Haven, Treasurer; J. H. Williams, Clerk *pro tempore*.

The directors proceeded to take steps to procure the conversion of the first and second mortgage bonds into preferred and common stock, as authorized by the charter; with what success, is shown by the President's report to the Board of Directors and stockholders, presented at the first annual meeting after the organization held at Rutland, 23d December, 1868. This report was as follows:

Preferred stock issued	$1,804,400
Common "	2,357,200
Total amount of stock	$4,261,600
The principal of the first mortgage is	$1,800,000
Of these bonds there has been converted into preferred stock	997,800
Overdue interest on the same bonds	806,600
Total	$1,804,400
The principal of the second mortgage is	$1,200,000

This mortgage has been foreclosed, and under the authority granted by the Legislature, this corporation has been formed.

Second mortgage bonds converted into common stock	$1,071,500
Interest and coupons on same	1,010,700
In settlement of claims on road-bed and real estate	275,000
Total amount common stock	$2,357,200
Dividends paid in February and Aug., 1868, of 3½ per cent. each on preferred stock	$118,835 50
In settlement of claims on road-bed and real estate, including common stock at par	$317,500 50

After the reading of this report, the old Board was unanimously re-elected, with the exception of John Howe, who having declined, Lawrence Barnes was elected in his place.

The funds ($118,835 50) for the payment of the dividends in February and August, 1868, were raised upon the notes of the company, indorsed by the directors, and by authority given by the Board, 31st January and 18th July, 1868, all the Board being present at each of said meetings, except John Howe. The vote unanmiously adopted was as follow:

"That the President and Treasurer of this company be authorized to raise the necessary money to pay a dividend upon the guaranteed preferred stock, on February 1, 1868, (and 1st August, 1868,) and should any person or persons endorse the drafts or notes of this company for that purpose, such persons shall be entitled to all the rights of subrogation, benefits and securities growing out of such payment, as security for such endorsement."

At a meeting of the Board, held January 16, 1869—present, all the directors—the same form of vote was unanimously passed in regard to the dividend payable February 1, 1869. And the money was raised for payment of that dividend on the Treasurer's acceptances, endorsed by the directors. The amount of this dividend was $63,451 50. The dividends due on preferred stock in August, 1869, and February, 1870, were, by vote, of the Board, passed, and remained unpaid until the subscription to the preferred stock in 1870, when they were adjusted and paid in that stock; and for this reason these dividends are now charged to coupons on first bonds. The next annual meeting was held at the office of the company on the 30th day of December, 1869. The official record of that meeting is as follows:

"The President presented the annual report, and on motion of Mr. Chase, seconded by Mr. Spencer, the report was unanimously accepted, and five hundred copies of the same ordered printed, and a copy thereof sent to each stockholder." This vote was complied with. The following is the balance sheet presented on that occasion and printed:

RUTLAND RAILROAD COMPANY.

BALANCE SHEET, September 30, 1869.

Stock	$3,000,000 00
do. preferred	1,831,400 00
Bills payable	265,488 04
Balance of sundry accounts	76,340 21
	$5,173,228 25

CONSTRUCTION ACCOUNT.

First mortgage bonds	$1,012,000 00
Coupons and interest	819,400 00
Second mortgage bonds retired	1,083,000 00
Coupons and interest	1,022,800 00
Real estate, docks and cars	441,541 25
	$4,381,741 25
Dividend account	182,287 00
Common stock to retire outstanding second mort. bonds..$223,500 00	
Common stock on hand for other purposes... 385,700 00	
	609,200 00
	$5,173,228 25

J. M. HAVEN, Treasurer.

September 30, 1869.

August dividend 1869, due holders of preferred stock and tax	$67,000 00

OUTSTANDING UPON THE ROAD.

Rutland & Burlington, second bonds	$117,000 00
Rutland & Burlington, first bonds	788,000 00

The stockholders proceeding to the election of directors, the old board received the unanimous vote, and were declared duly elected. The board was organized as before.

The annual meeting for 1870 was called to be held on 29th December. Owing to the pending negotiations in reference to a lease of the property, the meeting was adjourned without transacting any business until the 26th day of January, 1871.

The record of this adjourned meeting is as follows:

"The meeting was called to order by the president; the proceedings of the meeting of which this is an adjournment was read. The president presented his annual report; on motion, the same was accepted, and ordered to be printed."

The following is the balance sheet then presented:

RUTLAND RAILROAD COMPANY.

BALANCE SHEET, December 31, 1870.

Common stock	$2,700,000 00
do. preferred	3,685,700 00
Bills payable	716,562 69
Equipment bonds, 7 per cent	500,000 00
Balance of sundry accounts	104,621 19
	$7,706,883 88
1st mortgage bonds, principal	$1,072,500 00
Paid on decree to W. T. Hart, Trustee, and Jno. S. Farlow, for committee	989,000 00
Coupons first bonds	1,148,018 97
Interest paid first bond account	423,647 00
Second bond principal	1,104,200 00
Coupons second bond	1,042,100 00
For construction account	815,000 00
For rolling stock	325,200 08
Interest and miscellaneous expenses	117,283 44
Common stock on hand	268,700 00
Real estate	100,177 25
Cash	301,027 14
	$7,706,883 88

J. M. HAVEN, Treasurer.

OUTSTANDING.

First mortgage bonds	$727,500
Second mortgage bonds	95,800

After ratifying the proceedings of the directors, which will fully appear hereafter, the stockholders proceeded to the election of directors, and the old board were again re-elected, with the exception of George M. Barnard, whose resignation having been accepted by the board on December 8, 1870, D. N. Skillings was elected to fill the vacancy.

The last report was not printed in pamphlet form, but was given to the press and appeared in the proceedings of the meeting, as published in the "Rutland *Daily Herald*" on the morning of January 27, 1871.

At all the annual meetings after the organization, the president, in addition to presenting the reports of the condition of the corporation, gave to the stockholders full statements of the earnings and expenses of the road as operated by the trustees. It is not necessary to encumber this report with a repetition of these statements, as they are fully set forth in the settlements of the trust accounts. To give the stockholders the latest information, the accounts were closed October 1, in each year, while in the settlement confirmed by the court the year closed August 31. The books of the corporation are open to any stockholder that may desire to verify the foregoing reports.

Now I confidently submit this point to your judgment; has the president discharged his duty fully as required in the seventh by-law under the clause "he shall annually submit to the directors and corporation a report of the business and prospects of the corporation?"

We will now consider the action taken by the Board to relieve the corporation from the effect of the "Mandate for Decree," sent down by the Supreme Court of Vermont to the court of chancery in February, 1870.

At a meeting of the directors held March 10, 1870, present: all the board. On motion it was voted "That the president of the corporation be authorized in his discretion to negotiate with the trustees and committee of the first mortgage bondholders for a settlement of the decree made at the last the term of the Supreme Court in Rutland County, Vermont, and upon such terms as he may deem desirable."

Under the authority thus conferred, a negotiation was opened and resulted in the following:

"STIPULATION."

NEW YORK, MARCH 23, 1870.

Cheever and Hart, Trustees, et al. *vs.* The Rutland and Burlington R. R. Co. et al. } In Chancery Rutland Co. Vermont.

It is mutually stipulated by and between the said Cheever and Hart and J. S. Farlow, of the committee of first bondholders of the first part, and John B. Page on behalf of himself and the other defendants in said cause and the Rutland Railroad Company of the second part, as follows:

1. That the party of the first part now hold and control of the said first mortgage bonds, six hundred and forty-five thousand nine hundred dollars* in amount of principal thereof, including thirty thousand in possession of ——— Mixter; fifteen thousand five hundred in possession of Southworth Shaw and nineteen thousand five hundred in possession of Peters and Gooch.

2. That, according to the late decision of the Supreme Court of Vermont in said case, there will be due on said bonds on April 1, 1870, $1,549,680, subject to such increase, if any, as payment in coin would produce, if payment in coin be demandable.

3. That the costs and proper expenses of the orators in said suit and the matters connected therewith are settled at the sum of eighty-seven thousand six hundred dollars; and for the difference between coin and currency payment, for the purpose of this adjustment, there is fixed the sum of one hundred and two thousand dollars.

4. That the party of the second part shall pay to the party of the first part for such costs, expenses and difference the sum of one hundred and ninety thousand dollars on the 15th day of April, 1870.

5. That toward the satisfaction of said bonds and interest due thereon, the party of the second part shall pay to the party of the first part, four hundred thousand dollars, with interest at the rate of seven per cent. from said April 1, 1870, on the 15th of May, 1870; and four hundred thousand dollars, with like interest at the like rate from said first day of April, on the 1st day of October, 1870, and four hundred thousand dollars, with like interest at the like rate, from said first day of April, on the first day of January, 1871, the balance of three hundred and forty-nine thousand six hundred and eighty dollars, with like interest at the like rate from said first day of April, 1871, and to be paid at the office of Cheever & Hart, trustees, in Boston, Mass., (No. 20 State street, at present.)

6. That if any of the constituents of the said party of the first part shall on or before June 1, 2870, be dissatisfied with the stipulation and withdraw their respective bonds from the said amount before stated, the said party of the second part shall be allowed a rebate for said difference in coin and currency payment at the rate of six and six-tenths per cent. on the amount so withdrawn, and shall not be required to pay said bonds under this stipulation.

7. That on the 1st day of June, 1870, the party of the first part will make a correct schedule of the number and amount of bonds not withdrawn as aforesaid, which list shall be furnished to the party of the second part and be the basis of such payment thereon as aforesaid.

8. That upon each of said payments on said bonds the sum shall be either indorsed or stamped thereon, or a receipt shall be given therefor on the back of said list.

9. When the last payment shall be so made upon said bonds the same shall be delivered up to the said party of the second part.

10. The various suits (except the one above entitled) existing against said Cheever & Hart and their associates, or any of them being, so far as recollected, Spencer et al. v. Cheever & Hart et al. and Birchard & Page v. Cheever & Hart, shall be discontinued without costs to either party, and all orders and decrees for costs now existing in any of the litigations or the subject or connected therewith, except as heretofore provided, shall be waived.

11. The party of the second part shall relieve and save harmless the party of the first part, and also said Farlow and his associates, from all liability upon and in respect to the Smalley contract, (so called) and from any claim by E. J. Phelps upon them or any of them, for fees, &c., in any of these matters, if any such claim exists.

12. The said Cheever & Hart shall release in legal form to the trustees of the second mortgage R. & B. R. R., the property in Burlington, Vt., now standing in the name of said Cheever, and known as the hotel and wharf property, on the payment of said last installment on said bonds.

13. So long as the foregoing stipulation shall be faithfully kept and performed by the party of the second part, severally, as before stated, the said party of the first part and the said Cheever & Hart, trustees, shall not take any steps under the late mandate of the Supreme Court of Vermont to obtain possession of the property therein referred to, but the said matter so far as they are concerned shall remain as it now stands in court from term to term, and with the court between terms; and when as soon as all such payments shall be made as aforesaid, the said Cheever & Hart will apply to said court for leave to resign their said trust and for the appointment of proper trustees in their stead, so as to be relieved from all further duties and responsibilities in the matter.

14. This stipulation being made for the mutual accommodation of some matters in said cause not yet settled, and for the convenience and advantage of the defendants in said cause and of the first mortgage bondholders, so far as they are known to and actually represented by the party of the first part, is not to have the effect to disturb the rights of other first mortgage bondholders than those represented as before stated, nor the rights of said defendants or the party of the second part as to them, but all such matters and rights are left to be prosecuted and defended as to the persons interested may be lawfully advised.

15. But if the party of the second part shall fail or omit to make payments aforesaid at the

* There was withdrawn from the trustees and committee after the stipulation was entered into $15,500 of bonds, leaving to be settled for with them $630,200 only of first bonds, without including interest.

times respectively stated therefor and to perform the others things by him to be performed, then, and on every such failure or omission, the said Cheever & Hart, trustees, shall be at liberty to take all the steps, and shall have all rights and remedies provided in said mandate, or which otherwise might or would appertain to the trustees of said first mortgage, if this stipulation had never been made, and the same shall in such case be in no wise resorted to, to hinder, delay, alter or affect the rights of said first mortgage trustees injuriously.

16. That the party of the second part may, if he choose so to do, perform any of said matters for him to be performed at any earlier time than before stated, and when all shall be so performed, the parties of the first part shall proceed as is before provided in that case.

[Signed] W. T. HART, for himself.
JAMES CHEEVER, Trustee 1st Mort.
J. S. FARLOW, for himself
And associates of the Committee.

It will be observed that at the time the "stipulation" was entered into Cheever and Hart represented only $645,700 of bonds. A large proportion of the balance of the $1,800,000 of first bonds had been converted into preferred stock. The question that presented itself was: Shall the directors permit the road to go under the decree on the 1st of June, 1871?

If the question was decided in the affimative the position of the preferred stockholders was questionable, and the common stock of the company would have been of no value, neither would the first bondholders, represented by Cheever and Hart, have been paid until the money could be realized from the earnings of the road.

The board, at the meeting of March 10, 1870, also considered the question of raising the means to pay the outstanding first bonds, and adopted the following resolution:

Voted, That this company issue one million dollars preferred stock at par, for the purpose of raising means to pay first mortgage claims upon the property of this corporation; and that the subscribers for said preferred stock be entitled to receive thirty per cent. of this subscription in the bonds of the company, having ten years to run, bearing interest at 7 per cent. per annum, payable semi-annually, and free of United States tax, for such amount of said preferred stock as they may take or subscribe for.

The following form of subscription for raising means under the foregoing resolution was presented to the board by the president and unanimously adopted. It was as follows:

Whereas, The Rutland Railroad Company, at a meeting duly called and held by the directors of said company on the 10th day of March, 1870, unanimously adopted the following resolution, viz:

Resolved, That this company issue one million dollars preferred capital stock at par, for the purpose of raising means to pay first mortgage claims upon the property of this corporation; and that the subscribers for said preferred stock be entitled to thirty per cent. of their subscriptions in the bonds of the company, having ten years to run, bearing interest at ten per cent. per annum, payable semi annually, free from United States tax, for such amount of said preferred stock as they may take or subscribe for.

Now in consideration of the premises, we, the undersigned, do hereby severally agree, and with the said Rutland Railroad Company, to take, and we hereby severally subscribe for the number of shares of said preferred stock set opposite our respective names upon the terms expressed in said resolution, and we agree and promise the said company, each for himself, to pay the amount thereof to the treasurer of said company, as follows: one-half on or before the tenth day of April, and one-half on or before the tenth day of May, A. D. 1870, the interest to be made up as of February 1, 1870.

March 11, 1870. The directors assembled pursuant to adjournment, when, on motion, it was also

Voted, To issue preferred stock to the present holders of said stock sufficient to make the whole amount of preferred stock, at par, equal to the principal and interest as determined by the late decision of the Supreme Court of Vermont: provided each holder of preferred stock subscribe and pay for one share of new stock for every four shares that he now holds.

The necessary votes were also passed authorizing the issue of $500,000 of seven per cent. bonds.

A subscription list was opened under the authority thus given, and the stockholders apprised of the condition of affairs, as appears by the following circular, sent by mail to each stockholder:

"*To the Preferred Stockholders of the Rutland Railroad Company.*

As the Supreme Court of Vermont has allowed a higher rate of interest upon the first mortgage bonds of the Rutland and Burlington Railroad Company than was anticipated at the time of the conversion of bonds into preferred stock of the Rutland Railroad Company, and the directors of said company desire to do justice to all parties, and to provide for the removal of all incumbrances on the property of the company, and to settle all litigation; they therefore propose that each holder of preferred stock who shall pay to the company before the tenth of May next an amount equal to one-fourth of the par value thereof, with interest from the first day of February last, shall receive.

1st. The amount of the principal so paid in preferred stock at par.

2d. Thirty per cent. of said principal in seven per cent. bonds of the Rutland Railroad Company.

3d. An amount of preferred stock sufficient to make the whole amount of his preferred stock at par equal to the principal and interest of the first mortgage bonds as determined by the late decision of the Supreme Court of Vermont.

Under this arrangement the whole amount of preferred stock, when all the outstanding first mortgage bonds shall have been converted will exceed ($4,300,000) four million and three hundred thousand dollars This represents one hundred and twenty miles of road, with its equipment, machine shops, wharves and station houes, all in good repair and condition. The equipment, fuel and supplies could be sold for at least ($1,200,000) † twelve hundred thousand dollars, leaving about $25,000 per mile for a road which is indispensable to the business on its line, and could not now be built for $50,000 per mile.

The gross earnings of the past year, ending January 1, 1870, were $856,426 34, and but for the great freshet of October last would have been nearly $100,000 more. It is believed that with additional equipment and under corporate management the earnings can be increased to at least $1,200,000 per annum, and that in a very few years they will reach $1,500,000.

The option of the stockholders to take stock under this arrangement will expire on the first of May next. Blanks will be forwarded in a few days, with statement of your stock, and payments to be made under this circular, and your early reply is requested.

JOHN B. PAGE,
GEO. M. BARNARD,
GEO. B. CHASE,
PETER BUTER,
E. A. BIRCHARD,
LAWRENCE BARNES,
JAS. H. WILLIAMS.
} Directors.

Office of the Rutland Railroad Company, Rutland Vt., April 13, 1870."

There was realized upon this subscription, up to December, 1870, $1,374,900; there had been paid Cheever and Hart, under the "stipulation," $989,000; and the payment due 1st of January, 1871, with the interest, was $421,000.

By the terms of the "stipulation" the final payment was to be made on the 1st day of April, 1871. Owing to the arrangements for the lease to the Vermont Central Managers, which was pending, it was found necessary to pay Cheever and Hart in full.‡ Arrangements to this end were made by Mr. Chase, in connection with the President, and on the 21st of January, 1871, there was paid $327,586 88, which substantially fulfilled the stipulation on the part of the corporation; and thereupon Cheever and Hart, on application to the court, were permitted to resign their trust.

When the lease was under consideration the question arose about the ability to give possession should the same be consummated, and it was frankly conceded that the trustees in possession had the power to retain their position and lien upon the property, but they cordially united in carrying into effect the lease. The board were informed that it was impossible, except upon a careful inventory, to determine the condition of the trust accounts.

The opinion was expressed that upon realizing upon their assets their accounts would nearly balance. It was proper if the trustees gave up possession that they should be indemnified, and it is quite evident that if the trustees had had in their hands ample funds they would not have required any idemnity; therefore,

At a meeting of the Directors held in the office of the company, No. 13 Kilby street, Boston, Dec. 31, 1870—present, John B. Page, Peter Butler, George B. Chase, E. A. Birchard, Lawrence Barnes and J. H. Williams—on motion, it was unanimously voted.

"That this company issue one thousand shares of preferred, and one thousand shares of common capital stock, which shall be appropriated with the dividends thereon, as well as this company's share in the rent and proceeds of the notes and orders given for lease of Rutland Railroad and the personal property appertaining thereto in trust, and as a security, to be applied in payment of the outstanding liabilities of the second trustees operating and running the road, and for the purposes set forth in the decree of the Court of Chancery in the case of Cheever & Hart and others v. Rutland and Burlington Railroad Company and others, and in substitution for said road and property should said lease be perfected to the Managers of Vermont Central and Vermont and Canada Railroads, and that the treasurer be directed to transfer the claim thereto to said second trustees, but subject to the approval of the Court of Chancery, in which said cause is pending."

The stock provided for in this resolution has never been issued to the trustees.

This subject was brought before the Stockholders at the annual meeting held on the 20th of January, 1871, for their ratification, there being represented in said meeting 50,748 shares.

The following resolution was unanimously adopted at this meeting:

"Whereas at a meeting of the Directors of the Rutland Railroad, held December 31, 1870, a vote was passed having in view indemnity of the 'second Trustees' against all outstanding liabilities incurred in the operating and running the Rutland and Burlington Railroad, and for the purposes set forth in the decree of the court of chancery in the case of Cheever and Hart and others v. the Rutland and Burlington Railroad Company, now, in furtherance of this vote, *Resolved*, That the stockholders of the Rutland Railroad hereby instruct and direct the Directors to give to the trustees of the Second Mortgage Bonds of the Rutland and Burlington Railroad such security and bond of indemnity as shall hold said trustees harmless and free from all personal liability for any and every act pertaining to said trust."

The contracts and leases referred to in the fore-

†The appraisal at the cash value of these items under the lease to the Vermont Central and Vermont and Canada Managers will amount to nearly $1,800,000.

‡In order to procure a modification of the pending injunction to permit a change of possession,

going votes, are given in full in the appendix, with all the papers relating thereto, and the attention of stockholders is directed to them. In this connection I give the principal votes authorizing their execution, etc.

At a meeting of the Directors of the Rutland Railroad Company, held at their office, No. 13 Kilby street, Boston, December 31st, 1870.

It was unanimously voted, "That the President of this company be directed, and he is hereby authorized to execute in his name and behalf, a contract or lease of their Railroad and property, in connection with the other roads and lines, as well as to sell and transfer the supplies, fuel, lumber contracts and interests in said contracts named, to the Managers of the Vermont Central and Vermont and Canada Railroads, for the purpose expressed in said contract, and upon the terms therein stipulated, which contract is dated this 30th day of December, 1870; Provided, 1st That this corporation at their adjourned annual meeting assent thereto, and the court of chancery of Vermont by their order allow such transfer and sale of the Rutland Railroad and its property appertaining thereto. 2d. That the said party of the second part shall assume and perform the stipulations contained in said lease or leases referred to in said contract, except the rent reserved in each, which they the said party of the second part to said contract shall agree to pay to this company. 3d. That this company, or the said lessees in said leases to be assigned as provided in said contract, may have the right to determine said contract and re-enter upon said road and property if there be any neglect or default to make payment or payments within sixty days after the same becomes due and payable by virtue of said contract and orders, or shall fail to perform any of the stipulations therein contained. 4th, That said Managers of Vermont Central and Vermont and Canada Railroads shall be authorized by the court of chancery to make and enter into said contracts as aforesaid, and shall also be duly assented to and approved by the advisory committee of bondholders interested in said trust or trusts, and who were appointed by said court of chancery."

At a meeting of the Board, held at Rutland on the 26th of January, 1871, after the annual meeting, present, all the Board, on motion of Mr. Skillings it was voted, "That the President be authorized, and he is hereby authorized on the part of this company, to execute an assignment of the leases of certain railroads taken and now held by this company, to the Trustees and Managers of the Vermont Central and Vermont and Canada Railroads, the form of the assignments having been adopted by the stockholders in their meeting this day."

The stockholders took action upon this subject at the annual meeting, held Jan. 26th, as follows:

D. N. Skillings, Esq., of Boston, Mass., offered the following resolution which was unanimously adopted;

"*Resolved*, That this corporation hereby approves and in all respects ratifies, confirms and adopts the assignment of the lease of the Vermont Valley Railroad, dated January 23, 1871, and authorized, by a vote of the Directors of this company, dated December 3, 1870; the lease of that portion of the Vermont and Massachusetts Railroad lying between "Grout's Corner," in Massachusetts and Brattleboro, Vt., dated December 1, 1870, and authorized by a vote of the Directors of this corporation, dated December 3, 1870; the lease of the Montreal and Plattsburgh Railroad, dated the 23d of January, 1871, and authorized, by a vote of the Directors of this corporation, dated December 3, 1870; the purchase of the stock of the Burlington Steamboat Company, authorized, by a vote of the Directors of this corporation, dated December 3, 1870; the lease of that portion of the Whitehall and Plattsburgh Railroad lying between Ticonderoga, New York, and Port Henry, New York, dated the 26th of September, 1870, and authorized, by a vote of the Directors of this corporation, dated September 10, 1870."

The contracts with and assignments to the Trustees and Managers of the Vermont Central and Vermont and Canada Railroads were read by the President, and thereupon Peter Butler, Esq., of Boston, Mass., offered the following resolutions, which were unanimously adopted by a stock vote, 50,748 shares of the stock voting in favor of the resolutions:

Resolved, That this corporation hereby approves and in all respects ratifies, confirms and adopts the contract executed by John B. Page, President, in the name and behalf of this corporation, to John G. Smith, Joseph Clark, Worthington C. Smith and Benjamin P. Cheney, Trustees and Managers of the Vermont Central and Vermont and Canada Railroads, bearing date December 30, 1870, and authorized by a vote of the Directors of this corporation, dated December 31, 1870, and being the same now presented and read to this meeting, and also,

Resolved, That this corporation, in like manner, ratifies, approves and adopts the assignments and contracts made and entered into by the President, in behalf of this company, with the said Trustees and Managers of the Vermont Central and Vermont and Canada Railroads, relating to the Montreal and Plattsburgh Railroad, the Vermont Valley Railroad, the steamer Oakes Ames, the Addison Railroad, both divisions of the Whitehall and Plattsburgh Railroad, and a part of the Vermont and Massachusetts Railroad, and all the property thereto belonging; and this corporation confirms the same in all particulars and respects."

Under the contract the lessees took possession on the 8th of February, 1871, all accounts in the running department being settled as of the 1st of January previous. The delay occurred first from the illness of the President, who was confined to his house the first two weeks of January, upon whom the perfecting of the papers and the making of arrangements for the full payment of Cheever and Hart devolved.

Owing to some disagreement in the details, it became necessary to hold a director' meeting, which was called on the 2d of February, 1871, in Boston, when differences were adjusted with the lessees. That was the only business transacted at that meeting. From the time I was able to leave my house until the 8th of February matters connected with the lease not only of the Rutland road but of all the other roads embraced in the contract, engrossed my whole time. When possession was changed, then followed the taking of inventories of all the property sold and transferred under the lease. The detail of these inventories was very large, and your interest required constant watchfulness; *First*, to see that all the property was upon the inventories; and it was scattered on the line of the roads from Grout's Corner in Massachusetts to Canada line; *Second*, that the prices were fair and reasonable. The aggregate amount of all the inventories of the property sold was $273,334 93. All the rolling stock, tools, and all the property of which the use was taken under the contract, including the superstructure of the road, was also to be inventoried and appraised. For this purpose there was appointed, on the part of the Vermont Central Managers, John B. Winslow, Superintendent of Boston and Lowell Railroad; and to represent the Rutland Road, John Mulligan, Superintendent of the Connecticut River Railroad. Both these gentlemen were practical mechanics. They entered upon their duties at once, but have not yet made their report. I am informed that the same will be concluded very soon, there remaining some eight or ten cars that they have not seen. It was necessary to be with this committee, to give them information of the property to be inventoried and appraised.

The schedule of rolling stock delivered under the lease, as appraised by the committee as stated above, is annexed to this report.

The full report of the committee will cover two hundred and fifteen pages, and will be open to the inspection of stockholders when concluded.

From the votes of the Directors and the Corporation, it will be apparent that the Rutland Railroad Company was about to assume and operate all the roads together with the steamer "Oakes Ames," mentioned in the contract on twelfth page of the Appendix. The effect of the policy of the managers had been to put the Rutland road in a position to command the respect of its connections, and we were receiving a fair proportion of the increasing business of the country. The first step to secure this result was the control of the Vermont Valley Railroad in 1865. The control of the Valley line added strength to the Rutland, and largely increased its business. In the management of the Valley road (and the other roads afterward controlled to the same end), the accounts were kept distinct. The "Valley" was allowed only the same rates in divisions of joint business, as were the basis of settlements before the lease was executed. The next step was to secure, under friendly control, a direct connection with the Ogdensburg and Grand Trunk Railroads. The Montreal and Plattsburg Railroad was bought by a party made up of large stockholders in the Rutland road.

The steamer "Oakes Ames" was built by the Burlington Steamboat Company, to make the connection with the road. This connection was perfected early in 1868, and by it we had a through line to Ogdensburg and Montreal, and were enabled to establish joint tariffs. We received all the freight that the boat could carry over the Lake. Cars were run upon the boat and thus transported to your road. Some months, as many as eleven hundred cars crossed the Lake on the "Ames." About this time the lease of the northern division of the Whitehall and Plattsburg Railroad was taken. Negotiations were opened in connection with the Ogdensburg road to secure a connection by rail south from Plattsburg, crossing Lake Champlain at Ticonderoga, N. Y. An accurate survey was made of the line from Port Henry to Ausable (34 miles). The charter of the Addison road was procured and active measures taken to secure its construction. These arrangements were about perfected, when the present lessees of your property proposed terms to the Ogdensburg managers, so manifestly for their interest that they were accepted, and that road changed hands. As a consequence there was a sensible change in our business relations with that road. After a few months, taking a new point of departure, arrangements were entered into to perfect the Montreal line and connections with the "Grand Trunk" road. We found friendly aid in Canada and procured a charter for a few miles of road to enable our business to cross Victoria bridge. Parties in interest in Canada undertook the construction of that part in season for the opening of a through line. Again we set to work in the construction of the Addison road and secured the lease of the southern division of the Whitehall and Plattsburg road—entered into negotiations to put under contract the road from Port Henry to Ausable, and had nearly perfected the arrangements for that purpose, as also for the lease of the branch of the Vermont and Massachusetts railroad, when the negotiations opened that ended in the contract with the Vermont Central and Vermont and Canada Managers. It is plain to all who understand these facts that, but for the efforts in the directions here briefly alluded to, it is more than doubtful whether the possession and management of the Rutland road would have been any object to the present Lessees. It was evident, pending the negotiations, that they sought the control of all the property.

To a suggestion that the roads terminating at Plattsburg might be left out of the contract, it was replied that the control of those roads was one of the inducements to pay the rent required for the Rutland road. It is believed that a larger rent could have been had from other parties for those roads. In all these arrangements the President had the efficient co-operation of the Directors. This policy of the Managers had also the full approval of the Stockholders, as expressed in their votes at the annual held on 26th January, 1871.

(To be continued.)

American Railroad Journal.

Saturday March, 9, 1872.

Stock Exchange and Money Market.

The money market was quite close during the earlier part of the week, and the extreme rates quoted in our last issue were the ruling figures, in most of the new negotiations, the offering of Money having been on a restricted scale, while the call for aid, particularly from speculative sources, was decidedly more urgent. The later dealings both in a temporary form, and in the discount line, showed a more comfortable movement for the borrowing interest with call loans quoted to the Government houses and the leading Stock Exchange firms at 6@7 per cent. and strictly prime to good mercantile credits being 7@9 per cent. per annum. Private lenders were more liberal of aid. The Import trade of the week past was remarkable for the largest entries of Dry Goods and the heaviest grand total known in the history of the port for any single week. The total is $14,600,713, and almost equally divided between Foreign Dry Goods and Foreign General Merchandise. The city banks reduced their loan and discount average nearly a quarter of a million during the week while enlarging their outstanding circulation a trifle. The U. S. Sub-Treasury reduced its currency balance 3¾ millions. It made a reduction of 1⅛ millions in its coin reserve. Its currency balance at the close of business on Tuesday was $2,917,506 and its coin reserve, $73,373,709.

The city banks, in their latest return, show a further reduction of $1,272,500 of legal tender notes, with an increase of $443,000 of specie, and a decrease of $2,845,400 of deposits; also a decrease of $206,400 in their loan and discount averages, and an increase of $21,700 in their item of circulation. The city bank exchanges, last week, averaged $109,428,784 and thus far, this week, about 114 millions daily. The banks now hold $2,454,450 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $18,333,600, against $24,332,207 same time last year. The city bank deposits are now $210,172,800, against $225,059,574 week ending March 4, 1871. The legal tender reserve amounts to $43,770,400, against $58,019,768 same time last year. The circulation now stands at $28,165,400 against $31,660,282 same time last year. The loans are now $282,280,100 against $282,631,886 at this date last year.

The coin reserve of the city banks is now to about 18⅜ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve has decreased to $43¾ millions from $46,616,000 on the statement of February 10th.

The U. S. Sub-Treasury reduced its currency balance $3,757,664 and its coin reserve $1,151,036 as the result of the week's business. The receipts of the office were $3,886,692 in coin, and $2,150,744 in currency; payments, $5,037,728 in coin, and $5,908,408 in currency. The office received $3,062,000 in coin or its equivalent from customs; and disbursed $1,815,197 of coin interest.

Government revenues yielded liberally, during the week. The excises yielded about three millions, and thus far since July 1, 1871, about $87,628,351. The customs at the port of New York, last week were $2,996,845; at the outports, equal to about $975,000 more, all in coin, or coin certificates.

Gold has been in fairly active demand, chiefly on speculative account and for Custom House purposes, but under rather freer offerings, the price has shown less buoyancy. The Treasury Department will omit the gold sales for March and buy $2,000,000 bonds, as follows: $1,000,000 on the 14th and $1,000,000 on the 28th. The range of the price during the week has been from 109⅞@110⅜ and the closing quotation on Wednesday was 110⅛@110¼ against 110⅜@110½ the preceding Wednesday. The specie outflow, last week, was $678,388 The Gold Exchange Bank clearances have averages about 40¼ millions per day during the week.

Gold clearance are now made, in part, through the City Bank Clearing House.

The customs demand for Gold last week, averaged $510,334 a day; thus far, this week, it has averaged $552,500 a day or equal to a weekly aggregate of $3,315,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $21,115, and since Jan. 1, 1872, $274,604 against $2,707,515 same time in 1871.

The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $107,288,052 against $98,130,028 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to March 2, 1872, $60,789,903, against $65,115,218 same time in 1870-'71.

The export drain of specie was $678,388 last week, against $2,738,062, same week preceding year. The shipments since July 1, 1871, have been $25,166,661 against $50,527,601 same time in 1870-'71.

Foreign Exchange has shown less activity and firmness. Bankers' sixty day bills on London closed on Wednesday at 109¼@109⅜; sight bills on London, 109⅞@110⅛.

The produce exports from this port, week ending with March, 5th were to the currency value of $4,383,985.

Government securities closed more firmly, on a good investment demand. The last public debt statement showed a further liquidation in February of $12,391,452.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115½@115⅝; U. S. Five-Twenties of 1862, (other than the bonds called in) 111⅜@111⅝; U. S. Five-Twenties of 1864 at 111½@111⅝; U. S. Five-Twenties of 1865, 112¾@113; U. S. Five-Twenties of 1865 consolidated, 110¾@111; U. S. Five Twenties of 1867, 112@112⅛; U. S. Five-Twenties of 1868, 112½ 112⅝; U. S. Ten-forties at (ex March coupon) 107⅞@108; U. S. Fives of 1881 (Funding Loan) 108⅞@109. Six per cent. currency bonds, 114¼@114½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 21.	Feb. 28.	March 6.
Consols	92½	92⅛	93
U. S. 5-20's of 1862..	91½	91¾	92¼
U. S. 5-20s, 1865....	92¼	92	93⅝
" 1867	92¼	92	92¾
" 10-40s	*88¼	*88¼	*88¾

* Ex March coupon.

The outstanding circulation of United States currency March 1, was $399,937,774.

State bonds have been in quite moderate request, and very irregular as to price.

The better class of railway bonds have been in fair investment demand, and quoted strong in price. The few lots of Central Pacific Sixes offering find ready buyers at 102⅛@102¼. Chesapeake and Ohio Sixes are being rapidly closed out at 94 per cent. and accrued interest.

The Chesapeake and Ohio Railroad is rapidly approaching completion; nearly three-quarters of its entire proposed length is already in successful operation, and the remaining portion will undoubtedly be completed during the ensuing summer, under flattering promises of a large and prosperous business in the future.

The Stock Exchange has a adopted resolution prohibiting any transactions in stocks on the part of its members in the lobby, or on the street in the immediate vicinity of the building, before 10 o'clock A. M. (the usual time for the commencement of the regular business of the Board), under a penalty of $50 for each offense; which rule took effect on the 4th inst.

Railway and miscellaneous share property has been decidedly brisker, and much stronger as to price, in the leading instances.

General business has been on a moderate scale, with domestic produce, closing weaker as to price, as a rule. Middling up'and cotton closed on Wednesday at 22⅞ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,862,569 bales, against 2,990,543 bales same time in the preceding year; exports 1,312,576 bales against 1,836,735 bales in the previous year; stock at the ports at latest dates, 525,772 bales against 695,724 bales same date 1871.

At the Live Stock Markets, Beeves have been in better demand at 8½@13½ cts.; Veals at 5@11cts.; Sheep at 6½@9¾ cts. Swine, at 4⅞@5¼ cts. per lb., all live weight. The week's receipt were 5,746 Beeves, 430 Veal Calves, 17,523 Sheep and Lambs; and 22,800 Swine.

Foreign goods, have been in pretty fair request and prices have been generally quoted steady. Coffee and Sugars, cheaper. The week's imports of foreign goods reached the unprecedentedly large amount of $14,600,173 including $7,278,401 of dry goods.

Ocean freights have been less active, and generally less firm.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Chesapeake and Ohio Railroad.

Over 300 miles of the Chesapeake and Ohio Road are now in operation, and the rails are being laid at the rate of half a mile daily on the Kanawha division. Steel rails are used on this portion of the road 110 miles, in anticipation of a very heavy mineral traffic between the iron deposits on the central portion of the line and the remarkable coal deposits near the western terminus, which will follow the opening of the entire line before the close of this year. The Company is well organized, and its management is in the hands of some of the best known and strongest business men and capitalists in the country as officers and directors, giving their securities the most substantial guarantee for safety and regularity of income.

☞ We invite the attention of investors to the new advertisement of Messrs. Tanner & Co., the financial agents of the St. Joseph and Denver City Railroad Company, whose first mortgage 8 per cent. gold land grant sinking fund bonds they are now offering at 97½ and accrued interest. The bonds are secured by a first and only mortgage on the road, its franchises, &c., and upon the lands granted the company by Congress, said to amount to 1,700,000 acres, officially certified to the company by the Commissioner of the General Land Office in his official report to Congress, transmitted through the Secretary of the Interior on January 10, 1872. Messrs. Tanner & Co. rank among the most respectable bankers in the city, and their recommendations are accordingly entitled to consideration.

☞ The contract for the construction of the St. Joseph and Denver railroad to the 170th milepost, west of the Missouri, has been let.

BANKING-HOUSE OF FISK & HATCH,
No. 5 NASSAU-STREET,
NEW YORK, March 1, 1872.

☞ WE ARE SELLING THE **CHESAPEAKE AND OHIO RAILROAD FIRST MORTGAGE SIX PER CENT. GOLD BONDS** at the rate of 94 and accrued interest. They are in denominations of $1,000, $500, and $100 registered, or with coupons attached; interest payable May and November in United States gold coin; principal payable in 1899, also in gold coin. Bonds delivered by express, charges paid.

These bonds, besides being the formal obligations of a well-established, substantial and thoroughly responsible corporation, comprising among its officers and directors some of the most experienced and trusted capitalists and business men of the country, are also secured by a mortgage lien upon the whole great railroad line, equipment, property, and franchises, whose cost and value will not be less than thirty millions, and which is destined, at an early day, to have a productive value of nearly double this sum.

We buy and sell GOVERNMENT AND CENTRAL PACIFIC BONDS, and receive them in exchange for CHESAPEAKE AND OHIO BONDS at their current prices. Descriptive pamphlets, with full information, furnished on application.

We receive deposits and allow interest at the rate of four per cent. on balances; make collections in all parts of the country; issue certificates of deposit, and do a general banking business.

FISK & HATCH.

HARVEY FISK,
A. S. HATCH.

☞ At a recent meeting of the friends of the Detroit, Fort Wayne and St. Louis railroad, at Ft. Wayne, Ind., an organization was effected on a basis of a capital of one million dollars and fully fifty thousand dollars was at once subscribed. A Board of Directors was elected, and also for the first year the following officers: A. P. Egerton, President: John Roche, Vice President: Charles McCulloch, Treasurer; William Fleming, Secretary.

☞ A number of enterprising gentlemen at Hammonton and Tuckerton, N. J., are moving in the matter of building a railroad from the former to the latter place, a distance of twenty-four and a half miles. Preliminary meetings have been held and the necessary committees appointed. It is designed to have this road in running order by the 1st of October next.

☞ The directors of the Frederick and Pennsylvania Line railroad have authorized the president, John Loats, Esq., to purchase iron sufficient to complete the road from Little Pipe creek to Woodsboro.'

☞ The contract for the grading, bridging, masonry and tracklaying of the River Railroad from Winona, Minn., to La Crescent, has been let to Messrs. Langdon & Co. It is to be completed about the middle of August.

☞ The directors of the New York, West Shore and Chicago Railway, have appointed Robert G. Rankin, of Newburgh, Land Commissioner for the Eastern division of the road extending from New York to Athens.

☞ THE 8 PER CENT. FIRST MORTGAGE SINKING FUND
LAND GRANT BONDS OF THE
ST. JOSEPH AND DENVER CITY RAILROAD COMPANY,

in denominations of $1,000, $500 and $100, Coupon or Registered, can now be obtained to a limited amount only from the undersigned, or through the principal Banks and Bankers throughout the United States.

The safety and reliability of these Bonds is evidenced in the continued and increasing demand for them by prudent and careful investors, who have invested in them after a most thorough and rigid examination of the security pledged for their payment, both interest and principal.

THEY ARE SECURED by a *first* and *only mortgage* on the Company's *railroad* (*which will soon connect the Union Pacific Road at Fort Kearney with the City of St. Joseph, Mo., already an important railroad centre*)—upon the *Franchises* of the same—upon the *Equipment* and *personal property* of every description—upon the *Land Grant* of the Company granted by Special Act of Congress, approved July 23d, 1866, *amounting to* 1,700,000 *acres, which has been officially Certified to the Company by the Commissioner of the General Land Office in his official report to Congress, transmitted through the Secretary of the Interior on January* 10*th*, 1872.

The Bonds are issued only as they represent a completed and equipped Road; all proceeds of Bonds beyond this are held by the Trustees in trust until the necessary completion entitle the Company to these proceeds.

The Road is built first-class in every particular, and has been so received and accepted by the Department of the Interior.

The Mortgage Deed of Trust prohibits the sale of any of the Company's Lands at less than four ($4) dollars per acre, payable to the Trustees and applied to the payment of the Bonds, through the operation of the Sinking Fund. The payment of the Bonds before maturity is not compulsory upon the holders.

The Bonds are therefore secured by two classes of property *combined in one mortgage*, the value of either largely exceeding the amount of bonds which can be issued under the mortgage.

Trustees—Farmers' Loan and Trust Company of New York.

The Bonds have thirty years to run, with both principal and interest payable in Gold. The principal payable in New York, the interest at eight (8 p.c.) per cent., payable in February and August either in New York, London or Frankfort on-the-Main, free of tax.

Price 97½ and accrued interest in Currency. The Bonds are receivable at par and accrued interest in payment for the Company's Land Sales. Maps, circulars, documents and full information furnished on application.

The Bonds of this Company have always been received with favor by investors and capitalists, have always commanded a ready market, and we unhesitatingly recommend them—believing this loan will rank equally with that of the Eastern Division issues, which are now selling at a premium above par.

TANNER & CO.,
Bankers, No. 11 Wall Street.

Commerce of New York.

The foreign imports at New York for the month of January, 1871 and 1872, are officially stated as follows:

	1871.	1872.
Entered for consumpt'n.	$14,169,556	$17,940,512
Do. for warehousing....	11,058,118	14,904,602
Free goods.....	3,355,702	2,729,060
Specie and bullion.....	208,686	105,332
Total entered at port...	$28,792,062	$35,679,496
Withdrawn fr. wareh'use	13,006,264	12,399,012

The foreign imports at New York for the seven months ending January 31, were:

	1871.	1872.
Entered for consumpt'n.	$105,024,392	$121,583,698
Do. for warehousing...	64,566,051	79,627,649
Free goods.....	10,630,456	15,784,547
Specie and bullion.....	4,910,371	1,711,878
Total entered at port...	$185,131,270	$218,707,772
Withdrawn fr. wareh'se	64,231,875	74,862,053

The revenue from customs at New York for seven months from July 1, has been as follows:

	1871.	1872.
6 mos. ending Jan. 1.	$67,729,184 75	$74,078,181 75
In January.....	12,010,020 67	13,317,086 82
Seven months	$79,739,205 42	$87,395,268 57

The exports from New York to foreign ports in the month of January, were:

	1871.	1872.
Domestic produce.....	$18,370,758	$18,179,488
Foreign free goods.....	43,412	86,642
Do. dutiable.....	423,706	684,874
Specie and bullion.....	2,149,211	1,540,362
Total exports	$20,987,087	$20,491,366
Do. exclusive of specie.	18,837,876	18,951,004

The exports from New York to foreign ports for seven months ending January 31, were:

	1871.	1872.
Domestic produce.....	$121,411,196	$133,467,152
Foreign free goods....	121,640	686,805
Do. dutiable	4,959,959	4,401,337
Specie and bullion....	43,500,086	28,851,286
Total exports.....	$169,992,881	$162,406,580
Do. exclusive of specie.	126,492,795	138,555,294

Journal of Railroad Law.

RAILROAD COMPANIES—COMMON CARRIERS—CONTRACTS AGAINST NEGLIGENCE—LIVE STOCK.

The facts in the late case of Harkins *vs.* Great Western R. R. Co., (17 Mich., 57,) are fully and clearly stated in the following opinion by—

CAMPBELL, J.—Plaintiff shipped certain horses over the railway of the defendants, under a contract which provided that the owners took all risks of loss, injury, damage, and other contingencies "in loading, unloading, conveyance, and otherwise, whether arising from the negligence, default, or misconduct, gross or culpable, or otherwise, on the part of the railway company's servants, agents, or officers." The contract contained a further provision that, when free passes were given to persons in charge of animals, or to their owners or consignees, the company should not be responsible for any negligence, default, or misconduct, gross, culpable, or otherwise, on the part of the company or their servants, or of any other person or persons, causing or tending to cause the injury or detention of the animals. The injury in this case occurred by reason of the bottom of the carriage giving way. Whether this was caused by a defect in the carriage, or by reason of some other neglect or fault in the course of the transit, does not distinctly appear, as the court below found that the company was not liable at all under this agreement. But, from the course of the argument, we infer that defective cars caused the damage. In Shaw v. The York and North Midland Railway Co. 13 Q. B. 347, under a contract which exempted the carrier from liability "for any injury or damage (however caused") the court intimated a doubt whether the plaintiff might not have alleged a duty to furnish proper and sufficient carriages, and that the loss happened from a breach of that duty, notwithstanding the terms of the contract, which were fully as broad as those in the present case. Unless some showing was made that the plaintiff, with proper opportunities of observation and with notice of their actual condition, assented to the use of the cars on which their horses were shipped, we think they were entitled to expect that reasonably proper cars would be furnished. While there is in one clause of the contract an exception of every default, the fair inference is, that this language was used as referring to defaults in the particulars specified in the previous articles, viz: "loading, unloading, conveyance, and otherwise," and in matters of a like kind. The rule is usually applicable, that where no intention to the contrary appears, general words used after specific terms are to be confined to things *ejusdem generis* with the things previously specified.—American Transportation Co. v. Moore, 5 Mich. 368. We think it would not occur to any one executing such a contract, that it had reference to any risks except such as were likely to arise from the nature of the freight; and from casualties and defaults occurring during the loading, transportation and unloading and delivery. It would not lead him to contemplate risks not incident to the ordinary transaction of business, and arising from negligence in no way likely to be incurred by a company using ordinary care in the management of its affairs. He would fairly be led to assume that the company possessing the usual facilities for the carrying trade, of which cars are the first and indispensable means, merely sought exemption from risks incurred in the employment of those means. If the cars in question were unfit for the purpose to which they were applied, and if that unfitness was of such a character as to imply fault in the company or their agents for allowing them to be used, we think they are responsible for the damages which occurred from their use. As the case shows, there was evidence tending to show negligence, and as the negligence may have consisted, and is assumed to have been, in the use of unfit cars, the case should have gone to the jury upon this point. The judgment should be reversed, and a new trial granted.

Judgment reversed.

Lake Superior Iron Trade.

The following is a statement of the production of ore and pig iron in this district from 1856 to 1871, inclusive, in gross tons, together with the aggregate value:

Year.	Iron Ore.	Pig Iron.	Ore and Pig.	Value.
1856.....	7,000	....	7,000	$28,000
1857.....	21,000	....	21,000	60,000
1858.....	31,035	1,629	32,661	249,202
1859.....	65,679	7,258	72,937	575,529
1860.....	116,908	5 660	122,658	736,496
1861.....	45,430	7,970	53,400	419,501
1862.....	115,721	8,580	124,311	984,977
1863.....	185,257	9,813	195,070	1,416,985
1864.....	235,123	13,832	248,955	1,867,215
1865.....	196,256	12,283	207,539	1,590,430
1866.....	296,972	18,437	315,309	2,405,960
1867.....	466,076	30,911	496,987	3,475,820
1868.....	507,813	38,246	546,059	3,992,413
1869.....	633,238	39,003	672,241	4 968,435
1870.....	856,471	49,298	904,319	6,300,170
1871.....	813,379	51,225	864,604	6,115,895
Total...	4 585,318	294,685	4,888,553	35,185,778

It is proper to remark that the values in the above table are computed from the average value of ore and pig iron on the dock at Marquette. The iron exports of the district for 1871 would represent the value of about eleven million dollars in the Cleveland market, where ore is now quoted at $10 50 per ton, and pig iron at $45@$47.—*Marquette Mining Journal.*

The Most Favorable Route to the Pacific.

The wise selection of the route traversed by the Northern Pacific Railroad, ensuring the easy regularity of the movement of its trains over the whole length of the road during the Winter season, with a greater freedom from the natural obstacles that have delayed travel over the other Pacific roads, is fully confirmed by the concise and able report of Mr. W. M. Roberts, the Engineer-in-Chief of the Northern Pacific Company.

The eminent position held by Mr. Roberts, and his thorough knowledge of the advantages enjoyed by this road, in its passage through that rich and fertile section of our country, gives great weight to the statements embodied in his report. In view of the great importance to the East of uninterrupted railroad facilities to the Pacific, it is satisfactory to learn from the report of Mr. Roberts, that even throughout such a remarkable Winter on the Pacific as the past one, the Northern Pacific Railroad could easily be kept open for regular traffic its entire length across the continent.

The report further states that the road for 200 miles West, from Duluth to Oak Lake, has been free most of the way this Winter, without snow-fences, and other roads in Minnesota have been but little troubled from snow, while a few miles of snow-fences would keep the N. P. Road free from obstruction from Lake Superior to the Missouri River. The thermometer, during the greater part of January, ranged from 15 deg. to 48 deg. above zero, even in Montana, among the Rocky Mountains, while in February the average was 42.5 degrees, and that degree of cold is attributed to the unusually early snows and cold weather. The cattle range through the valleys most Winters, and are usually fatter in Spring than when turned out near Winter. The report contains additional valuable information from other portions of the road, showing less risk of deep snow or drifts along the line; the cattle had plenty of grass the entire Winter in the Muscle Shell Valley, which is one of the most elevated portions of the

line. The report refers to the snow fall on the Union Pacific Road, for 180 miles, every part of which is 1,000 feet higher than the highest summit on the Northern route, and most of which is 2,500 to 3,000 feet higher than the mountain section of equal length on the Northern Pacific line, and predicts as complete exemptisn from Winter blockade for the N. P. R. R. as is enjoyed by railroads in New York or New England, owing to the valley route and sheltered position through Montana, which greatly prevents the drifting of what snow there is on the line of the Northern Pacific Road, and which will greatly facilitate the easy and successful working the year round of this important and most necessary railroad enterprise.

Statement of the Public Debt of the United States March 1, 1872.

DEBT BEARING COIN INTEREST.

Interest paid by United States, $14,631,870 18; interest repaid by transportation of mails, &c., $3,477,125 18; balance of interest paid by United States, $11,154,745.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, Feb. 29, 1872.

GEO. S. BOUTWELL,
Secretary of the Treasury.

A National Narrow Gauge Enterprise.

Mr. Ph. Lee Anthony, of Little Rock, Arkansas, in a letter addressed to the San Antonio *Herald*, gives the outlines of a scheme with which he is connected as president of the company, viz:

The project is that of an air-line narrow gauge railway from St. Louis to Alexandria and Algiers in Louisiana, via Little Rock and Pine Bluff, with a branch from Little Rock, eastward, to Osceola, and an air-line to Washington City, New York and Boston; and westward, by Hot Springs and Ultima Thule to the Thirty-second Parallel or Texas Pacific railway to San Diego—a distance of 2,300 miles from Washington to the Pacific. This is claimed as the shortest line that can be built on the territory of the United States from ocean to ocean.

A nearer line can, however, be had through Mexico to Mazatlan, the best harbor on the Pacific coast. The line proposed is a continuance of the route from near Fort Towson to Clarksville, in Red River county, Texas, thence by Canton, in Van Zandt; Marlin, in Falls; Austin, in Travis; San Antonio, in Bexar; and Lerado, in Webb; thence to Monclova, in Coahuila, and through the States of Durango and Sinaloa to Mazatlan. The distance through Texas will be about 550 miles, over a splendid country for railways, and about the same distance in Mexico.

Texas has made a liberal donation to the Thirty-second Parallel or Texas Pacific Railway, and Mr. Anthony is of the opinion that if this road were properly presented, Texas would be equally disposed to be liberal to a railway running through her capital and the heart of the country. Mexico has been liberal to railway enterprises through her territory, and no doubt is entertained that the States of Coahuila, Durango and Sinaola would also give liberal encouragement to a road that would compete for the Asiatic trade and carry the rich productions of Japan, China and the East Indies over her soil.

Railroads in New Brunswick.

The St. John *Telegraph* asserts that the Province of New Brunswick has now in operation and in course of construction a larger number of miles of railroad in proportion to its population than any other country in the world. It supports this assertion by giving in round numbers the figures relating to the length and cost of the New Brunswick railroads. From the data thus furnished we learn that there are now in course of construction that part of the Intercolonial Railway from Moncton to the boundary of the Province of Quebec by the Government of the Dominion, some 220 miles; and the Fredericton and River du Loup Railroad, 160 miles (recently contracted for.) The Albert County Railroad, a very important line, is also likely to be built, but is not included in the enumeration. The *Telegraph* sums up as follows:

"Railways now in working order in New Brunswick, 388 miles. In course of construction and to be completed within 18 months, 220 miles. Under contract, and now being located, 160 miles; in all 768 miles!

These railroads cost in round figures $23,785,000, in aid of which the Governments of New Brunswick and of the Dominion contribute over $16,000,000 in cash and 1,720,000 acres of land. A pretty good exhibit for little New Brunswick!"

☞ We wish to draw the attention of our readers to a comparatively new lubricator which is now in the market. The manufacturers, Messrs. Isaac U. Coles & Co., have had it thoroughly tested on several of our most prominent railroads, and the result proved their compounds the cheapest and most satisfactory lubricators ever produced. Their Tallow Packing for Car Journals, besides being about Twenty Five per Cent cheaper than any other Lubricator, completely prevents hot Journals, protects the inside of the boxes against dust, and consequently preserves the brasses. The last though not the least feature is that it needs less attention than oil and waste.

In regard to the Tallow Lubricator we will only observe that it can be run on any Engine, in place of Tallow with the same profit as the above named, as it will not waste or melt away any quicker than it can be consumed. The oil will not gum, and it will do the same work as sperm oil.

☞ The following are the names of the parties to whom the contracts on the Shenandoah Valley Railroad to Front Royal have been awarded: J. M. Barry & Co., Lancaster, Pa., 6 miles; H. Ettle, Middletown, Pa., 5 miles; H. H. Crumlish, Wilmington, Del., 10 miles; Donohue & Bros., Emmitsburg, Md., 3 miles; Purcell & Co, White Post, Va., 2 miles; Meehan & Borland, Richmond, 5 miles; Malone & Gillese, Lancaster, Pa., 5 miles.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of February, were:

ENTERED FOR CONSUMPTION.

	1871.	1872.
Manufactures of wool	$3,385,022	$3,729,846

Total entered at the port.	$22,990,907	$30,527,450

☞ A. J. Hodder, Vice President of the Kentucky and Great Eastern Railroad, informs the *Railroad Record* that one hundred and forty six miles of this important road, being that part of the line from Newport to Catlettsburgh, has been placed under contract to Messrs. Alton and Beach, of New York City, men well known in railroad circles as energetic, experienced and pecuniarily strong. The work is to be opened in a few weeks and vigorously prosecuted to completion.

Connecticut River Railroad.

The earnings of this road for the ten months ending September 30, 1870, and the twelve months ending September 30, 1871, were as follows:

	1870.	1871.
From passengers	$253,503 36	$319,462 33
" freight	296,181 29	376,701 51
" mails	5,093 24	6,076 50
" express	11,056 63	13,080 47
" rents, etc.	6,191 80	10,071 02
	$571,972 32	$725,391 83
Expenses, viz:

Surplus September 30.	216.110 08	217,102 22
Total, as above	$461.206 84	$464,012 04

The business of the road has been good. Comparing it with that of the ten months covered by the last annual report and making due allowance for difference in time, the gross income appears to have been about six and one-half per cent. above that of the preceding year. The expenses show a still larger increase, but this results from some extraordinary charges which might properly have been carried to construction account. The net income has provided for the usual dividends.

The road and equipment have been kept up to a high standard. The track repairs and new sidings have absorbed 31,359 cross-ties, 232 kegs of spikes, 778 tons of new and rerolled rails, besides the mending and replacement of 257 partly worn bars.

In addition to the ordinary repairs, a new thirty ton locomotive, to replace a lighter machine sold, a new smoking and baggage car and 16 platform freight cars have been built at our shops, and three additional passenger cars have been purchased, two of them being charged to the account of operating expenses.

The cost of the road and equipment to this time is $2,146,999 52, or say $41,012 41 per mile in length of the Main Line and Chicopee Branch. The capital stock paid in is $1,700 000. The bonded debt, amounting to $250,000, is provided for by a sinking fund which now amounts to $117,755 37 and will probably equal the entire debt when it shall have matured.

During the year some two miles of sidings and branch tracks have been added to our station accommodations. A recent measurement shows that we now have 15¼ miles of side tracks, exclusive of two miles of branch tracks for freight distribution at Holyoke. The increasing number of trains on the lower part of the road makes it necessary to extend the second track from its present terminus at Chicopee, and it is contemplation to prosecute this work to Willimansett or Holyoke next season.

In May last the legislature chartered a company to build a railroad from Mt. Tom station to Easthampton. The company was duly organized and the road is nearly completed. In pursuance of votes passed by the two companies a lease of the road was made to this company bearing date June 6, 1871.

The company have 17 locomotives, 20 passenger, 2 sleeping, 5 smoking and baggage, 5 smoking and Post-office, 2 baggage and express, 132 house freight, 121 platform freight and 32 stone (platform) cars, and 1 steam car. Miles run with passenger trains, 150,226; with freight, etc., trains, 147,124—total 297,350. Number of passengers carried, 876,481; do. carried one mile, 10,444,382. Tons of freight carried, 332,542; do. carried one mile, 8,275,900. Earnings per mile of road $13,950. Earnings per mile run, $2 49.3; operating expenses per mile run, $1 60.6; net earnings per mile run, $0 90.1. Per centage of expenses to earnings, 65.6.

President—Daniel L. Harris.

Directors.—Daniel L. Harris, Ignatius Sargent, I. M. Spelman, Edward A. Dana, Chester W. Chapin, Oscar Edwards, W. B. Washburn, Roland Mather, S. M. Waite.

Clerk and *Treasurer.*—Seth Hunt.

Auditor.—Eliphalet Williams.

Superintendent.—John Mulligan.

☞ The Denver and Rio Grande (narrow gauge,) Railroad Company, has finished grading and bridging the second division of forty-two miles, from Colorado Springs to Pueblo, Col. The track laying will be commenced immediately, and by the middle of April regular trains will be running from Denver to Pueblo, 118 miles.

☞ The Wisconsin Valley Company are now ready to commence the grading of their road from Tomah to Grand Rapids. The contract calls for the completion of the road between the two points on or before the first of September next.

☞ The work of surveying and locating the connecting link of road between the Chicago and Northwestern Company's "Baraboo Extension" and the West Wisconsin Railroad, has been commenced at Tomah.

☞ The directors of the Kent County (Md.) Railroad have formally accepted that portion of the road between Chestertown and Worton station, and the cars are now running to Chestertown, Md.

☞ Track laying has been commenced on the Western, Elizabethtown and Paducah Railroad. It is expected that the road will be completed by June.

☞ The stock in the proposed Lowell and Andover Railroad is being rapidly taken up. About $70,000 have been subscribed since the passage of the General Railroad bill.

☞ The Mobile and Montgomery railroad is to be extended from Tensas into the city of Mobile.

☞ Passenger trains on the Western Maryland Railroad are now running daily between Smithburg and Baltimore.

RAILROAD IRON.

1,000 Tons TREDEGAR RAILS.
1,000 Tons CROSHEY RAILS.
1,000 Tons STOCKTON RAILS.
Now in Yard and for sale by

WM. H. PETIT,
72 Wall-st., New York.

ISAAC U. COLES & CO.,

19 NEW CHURCH STREET, NEW YORK.

TALLOW LUBRICATOR.

MACHINE OIL.

TALLOW PACKING FOR CAR JOURNALS.

We can furnish the best evidence of the success of this Packing.
The Packing dispenses with the use of Oil and Waste, and prevents all heating of Journals, requires less time and attention than any other now manufactured, and causes a saving of, at least, Twenty-Five per Cent.
The Tallow Lubricator can be used on machinery wherever Tallow is used. One pound of the Lubricator will do the work of at least Four Pounds of Plain Tallow.
The Oil will give complete satisfaction both on the lightest as well as on the heaviest machinery. As

SPINDLE OIL

it is unequaled. IT WILL NOT GUM, and is the most economical in use.

It will surely prevent a Hot Journal.

ALFRED W. LADD,

5 AND 7 DEY ST., N. Y.,
DEALER IN

LOCOMOTIVES

OF EVERY DESCRIPTION.

Palace, Pullman, Passenger, Box, Platform and Gondolas, and all kinds of Dumping and Construction

Northern Pacific Railroad.

HOW THE ENTERPRISE IS REGARDED IN GREAT BRITAIN.

The people of Great Britain find in the Northern Pacific Railway a powerful agency for the consolidation and development of their colonial possessions extending from Halifax to the Pacific Ocean, and for the maintenance of their trade with the far East. Below we give an extract from the *London Morning Post* on this subject:

"The whole area of England and Scotland is about 57,000,000 acres, and that of England, Scotland and Ireland is about 75,000,000; so that the territory given by the American Government to the Northern Pacific Railway company exceeds that of Great Britain by 3,000,000 of acres, and is only 15,000,000 of acres less than the whole area of the United Kingdom. * * * Our interest in this particular American enterprise arises from the circumstance that it appears to open up to us a portion of our own dominions which have hitherto been almost inaccessible. * * * In short, from the eastern to the western terminus of the line the route of this road traverses a region most desirable for settlement and rich in resources, whose development will be almost as profitable to British as to American interests."

ON THEIR OWN MERITS.

The 7.30 Gold Bonds

OF THE

NORTHERN PACIFIC RAILROAD

Have sold to the extent of many millions, and they have now taken their place among the solid and favorite securities of the country.

This is because the Bonds are based upon the amplest security, being a FIRST AND ONLY Mortgage upon the Railroad, and in addition upon 23,000 Acres of Land to EVERY MILE of ROAD.

At $2.50 Per Acre the valuation of this Land Grant is over $125,000,000, while its value, taking the average at which other Railroad Companies have sold their lands, is OVER THREE HUNDRED MILLIONS.

The Bonds are issued in the following denominations:

$100	Coupon.	$100
500		500
1,000		1,000
		5,000
		10,000

Registered.

And are at all times interchangeable at the office of the Company or through the Fiscal Agents, without charge.

They have THIRTY YEARS to run, are offered at par and interest in currency, and will permanently yield a large income in gold.

Full particulars furnished by

JAY COOKE & CO.,

New York, Philadelphia & Washington.

Advancement of the Work on the Chesapeake and Ohio.

Regular trains were run across the great embankment at "Jerry's Run," on the Chesapeake and Ohio road, on Saturday last, for the first time. This embankment is believed to be the heaviest on this continent, if not in the world. It is 185 feet deep at centre, and over 200 feet deep on lower sides, and contains about 1,100,000 cubic yards. The stream passes through a tunnel cut in the solid rock forming the western sides of the ravine. The contractors completed this work three months after contract time. Work at other points on the road is progressing well. The headings between east portal and shaft No. 1, and between shaft No. 2 and west portal at Great Bend tunnel are through; only 850 feet remained in the heading between shaft No. 1 and No. 2 on Feb. 1. The contractor is confident he will complete the tunnel (6,500 feet) by July 1. The contractors for Stretcher's Neck tunnel, drove 400 feet in the month of February in two headings they have only 150 feet yet to drive. The tunnel is 1,900 feet long.

Rosendale Viaduct.

The magnificent new Iron Bridge at Rosendale, New York, which has been in process of erection since the middle of September last, has been completed.

The design of this extensive structure is to carry the Wallkill Valley Railroad across the valley of the Rondout Creek, and over the Delaware and Hudson Canal which runs through it. To effect this, owing to the mountainous nature of the country, it was necessary to construct the bridge at a very great height above the level of the valley. This and other seemingly insurmountable obstacles were, however, promptly overcome, and to-day we have a structure, not only substantial in character, but also affording, suspended as it is high above the valley below, an appearance equally picturesque and pleasing.

The superstructure is undergrade or "deck," and is composed of seven Wrought Iron spans of the well known Patent Diagonal Truss Plan invented by the eminent Engineer Mr. S. S. POST; and two short spans of wood at the South approach of the bridge. These spans consist of 4 equal

ones of 150 feet in length, 2 of 100 feet, one of 76: and the 2 wooden ones of 50 feet each—forming a total length of 976 feet.

The Trusses of each span are 22 feet in height and 14 feet apart.

The calculations of strains, and the proportion of parts, were based upon a moving load of 3,000 pounds per lineal foot of bridge, under which load, and the weight of the structure itself, no part is strained to more than one-sixth of its ultimate capacity.

The different spans rest upon Piers composed of 6 Rectangular Wrought Iron Pillars, trussed with a system of diagonal bracing, so arranged as to obtain the greatest stiffness and rigidity. These Iron Piers, in their turn, rest upon foundations of solid masonry, to which they are securely attached.

The height of the structure, between the grade line and the water surface of the creek—at the highest point—is 142 feet; while the height of the Piers are respectively 14, 80, 100, 115, 80, 65 and 35 feet from the ground to the underside of the trusses.

The total weight of Iron in the whole structure is about 585 tons—of which 385 tons is distributed among the different spans, and the remaining 200 tons among the Piers. The cost of the iron structure of the bridge will be in the neighborhood of $175,000, and the masonry about $50,000.

The work was contracted for by the WATSON MANUFACTURING COMPANY, of Paterson, New Jersey; and the plans and designs were made by their Engineer, ANDREW J. POST.

Great credit is due the company for the substantial and successful manner in which the work has been performed.

Union Pacific Railroad.

The annual meeting of the stockholders of this company was held in Boston on the 6th inst. Hon. B. F. Wade was elected chairman, and E. W. Rollins, secretary. The election of Seth Turner, John Duff and Oliver Ames as inspectors of election was approved. The report of the president was then read by the secretary, as follows:

OFFICE OF THE UNION PACIFIC R. R. Co.,
BOSTON, March, 4 1872.

To the Shareholders of the Union Pacific R. R. Co.:

Your directors take pleasure in submitting the results of the operation of your railway for the year 1871, as follows:

EARNINGS.

Passenger earnings	$3,123,510 68
Freight earnings	3,276,552 50
Company freight	352,635 44
Express earnings	307,731 32
Mail earnings	288,748 80
Car service	57,459 13
Rent of buildings	15,809 51
Miscellaneous	103,934 38
	$7,521,682 16

EXPENSES.

Conducting transp.	$667,815 91	
Motive power	1,251,975 77	
Maintenance of cars	312,874 06	
Maintenance of way	964,100 75	
General expenses, including taxes	403,800, 37	
		3,600,566 86
Net earnings, (52.13 per cent)		$3,921,115 30

The total amount of revenues as compared with last year is as follows:

1870	$7,625,277 11
1871	7,521 682 16
Showing a decrease of	$103,594 95

The expenses compare as follows:

1870	$4,677,414 84
1871	3,600,566 86
Showing a decrease of	$1,076,847 98

And an increase in net earnings as follows:

Net earnings, 1871	$3,921,115 30
" " 1870	2,947,862 27
Increase	$973,253 03

The revenues of the company for the year have fallen considerably below the estimate, owing mainly to the detention caused by the storms which have prevailed throughout the entire Winter. The weather has been unprecedentedly severe, and precautions which according to the experience of previous years were ample, proved insufficient. Everything, however, that in the opinion of the chief engineer or general superintendant would expedite the traffic upon the line, and secure the comfort of those who were delayed, was provided, and it is believed that no actual suffering resulted from the detention.

By judicious management in the operation of the line the net earnings, it will be seen, show a handsome increase over those of last year, and approximate the estimate made in the report submitted at your last meeting.

The bridge over the Missouri river at Omaha has been pressed to completion, and will be open in a few days for the passage of trains. Much credit is due to the chief engineer and those specially in charge of the work for the energy shown in its construction.

The operations of the land department during the year have been justly satisfactory. The number of acres sold from March 1 to December 31, 1871, to 1,182 purchasers, has been 192.275 82-100, yielding in cash and notes $733,571 85, an average of $3 81 5-10 per acre.

The cash receipts of the land department from March 1, 1871, to December 31, 1871, have been $319,689 49, and out of these $229,000 of land grant bonds were canceled by that department, and over $80,000 remitted to the trustees under the mortgage securing the same.

Up to the close of the year 1871, 500,000, acres have been sold in all, yielding $2,102,128 96, an average of $4 20 9-10 per acre; and the amount of land grants canceled has been:

By the department	$935,000
By trustees	251,000

And for the balance the company hold land notes, maturing in one, two and three years, with interest. The receipts have thus far been more than sufficient to take care of the interest upon the outstanding land bonds.

Your road with proper management, can always promptly provide for the interest on the first mortgages, land grant and income bonds; and by a judicious development of its through and local business should within a few years be able to make yearly provision for the Government liens and also become remunerative to its stockholders.

The accompanying reports of the several departments will furnish in detail the results accomplished during the year.

All of which is respectfully submitted.

THOMAS A. SCOTT, President.

On motion of Mr. Oliver Ames the report was accepted.

The reading of the Superintendent's report was omitted, and a resolution offered by Mr. Bushnell was adopted, fixing the stockholders' next meeting at the company's office in Boston March 3, 1873.

The meeting then proceeded to the election of a board of directors for the ensuing year, which resulted in the choice of the following gentlemen—the first three and the last named of which are new members: Horace F. Clark, Augustus Schell, James H. Banker, Oliver Ames, John Duff, Elisha Atkins, Oakes Ames, L. P. Morton, R. E. Robbins, James Brooks, G. M. Dodge, Sidney Dillon, C. S. Bushnell, George M. Pullman, F. Gordon Dexter.

At a meeting of the new board of directors, held subsequently, the following officers were elected: Horace F. Clark, of New York, President; John Duff, of Boston, Vice President; E. H. Rollins, Treasurer and Secretary; H. B. Wilbur, Auditor.

The new board of directors also appointed the following committees:

Executive Committee—Horace F. Clark, Sidney Dillon, John Duff, Oakes Ames, Augustus Schell, George M. Pullman. Government Director, James F. Wilson.

Finance Committee—James H. Banker, Oliver Ames, Elisha Atkins, N. A. Baldwin, Levi P. Morton, Augustus Schell. Government Director, J. C. L. Harrison.

Land Grant Committee—John Duff, James H. Banker, Oakes Ames, C. S. Bushnell, F. Gordon Dexter, E. H. Baker. Government Director, Hiram Price.

Bridge Committee—John Duff, C. S. Bushnell, James H. Banker, N. M. Dodge. Government Director, B. F. Wade.

Special Committee to confer with connecting railroads—Horace F. Clark, Geo. M. Pullman, G. M. Dodge. Government Director, James F. Wilson.

Rutland Railroad.

(Continued from page 301.)

CONDITION OF THE CORPORATION.

I now ask your attention to the present condition of the company, and give my views as prepared for the annual meeting so far as is now necessary in view of the action of that meeting. I shall correct the mistakes of the President *pro tempore*, which he was led into in consequence of his own lack of knowledge of the affairs of the company. His connection with the corporation was of quite recent date. While there is no doubt that he intended to give an accurate statement, it was, to say the least, unfortunate that any attempt at a report was made.

The treasurer's balance sheet on the eighth page of this report exhibits, as I believe, a correct transcript of the books on the 30th December, 1871.

It appears from this statement that the company has outstanding

LIABILITIES OF THE CORPORATION.

For bills payable	$1,561,088 82
Rents due and unpaid	14 466 77
Total	$1,575,555 56

RESOURCES.

Seven per cent. bonds unsold	$10.000 00
Burlington Steamboat Company	143.000 00
Due from Montreal and Plattsburg Railroad	14,486 89
Due from wood contracts	10 000 00
Bonds and balances due on account	8,300 00
Notes and account in treasurer's hand	17,000 00
Real estate, Bartonsville	1 500 00
" Bellows Falls	2,000 00
" Middlebury	1 545 62
" Burlington with the rent due	15 000 00
" Burlington water front.	30 000 00
Addison Railroad Company	181,000 00
Claims, which counsel advise as valid and collectable	110,000 00
Cash	1,817 12
Preferred stock not sold	952,400 00
Rent from Jan. 1 to Feb. 1, less interest on bonds	18,500 00
	$1,430,738 54
Balance	$144,722 14
To which must be added the dividend due preferred stockholders Feb. 1, 1872	145,166 00

Also such sums as may be paid for outstanding first bonds. It is believed very few of them will ever be presented. There are a few unsettled contingent claims against the company, but it is believed that they cannot exceed $15,000.

The indebtedness is accounted for as follows, viz.:

The amount found due the trustees on the auditing and settlement of their accounts	$234,805 03
(This sum includes the costs of the disasters of the flood of 1869.)	
Cost in the litigation with the first trustees (not including the second trustees' cost of $93,134 70 paid and charged in their accounts as allowed)	106,525 59
Interest on moneys paid Cheever & Hart to 1st Feb., 1871, under the "Stipulation" for more time than given in the "madate for decree,"	88,412 53
Dividends paid on preferred stock by vote of directors	440,943 00
(the funds for this purpose were raised on acceptances of the treasurer, indorsed by directors.)	
Burlington Steamboat Company	220,196 51
Wharfs and basin, built at Burlington (charged under real estate on balance sheet, deducting $13,500 for real estate received from trustees' second bonds)	113,075 87
Addison Railroad debt	181,183 91
Interest account from July, 1868, to December 31, 1871	159,956 59
First coupon on 7 per cent. bonds, due Nov. 1, 1870	17,500 00
Included in the resources, and not before given in this statement, for reduction of the liabilities	173,149 51
Damages paid and expenses of accident claims	28,415 50
Internal revenue tax on dividend, &c.	10,555 63
	$1,774,609 67

ANALYSIS OF CONSTRUCTION ACCOUNT.

The account is charged with the 7 per cent. bonds of May, 1870, for. (These bonds were given *as a bonus* to subscribers for stock at par).	$500,000 00
Also with what is known as the "Smalley contract" covering lands and right of way at Burlington, in settlement of which common stock was issued at par	315,000 00

ANALYSIS OF SALARIES AND MISCELLANEOUS EXPENSES.

The charges in this account cover the period from the organization of the company in 1867 to 30th December, 1871.

Expenses of Boston office	$14,080 40
Allowances on contract to procure conversion of first bonds	67,000 00
Champlain Transportation Company contract	49,440 77
Legal sevices paid	18,925 59
Cheever & Hart, under "stipulation"	186,733 33
Salaries of president, treasurer and other officers, including incidental expenses	30,021 44
	$366,201 53

ANALYSIS OF INTEREST ACCOUNT.

This covers all interest on loans from payment of first dividend in 1868 to 30th December, 1871	$159,846 59
Coupons paid on 7 per cent. bonds	52,500 00
" 8 "	20,000 00
	$282,346 59

Nearly two hundred thousand dollars of the increased liabilities of the company is owing to the carrying out of the provisions of the contract with the Vermont Central Managers in regard to the Addison Railroad, which contract had been ratified and confirmed by the stockholders, as appears from the votes heretofore given. The Addison Railroad and its connections with the Whitehall and Plattsburgh Railroad will cost five hundred thousand dollars. A contract to gravel up this road, not yet completed, is its only known liability, except that to the Rutland Railroad Company, and one for a portion of the iron, for which payment is to be made in freight earnings, on the freight sent over the roads to Boston by the party furnishing the iron. The roads to whom these earnings may be due have agreed to take Addison Railroad stock at par in payment.

The equipment account is made up of the balance transferred from second trustees as due them on settlement, and the sums paid for new equipment under the following and other votes. At a meeting of the directors on the 25th of May, 1870, present, the president, with Messrs. Barnard, Butler, Chase and Birchard.

Voted, "That the President be authorized to make a contract for not exceeding three hundred freight cars, and report to the next meeting."

Under this vote, and others, the corporation purchased three locomotives, three passenger, and three hundred and eighty-nine freight cars, all of which were turned over to the Lessees, with all the other equipment except one car, which is valued at $50,000.

In payment for this equipment the 8 per cent. bonds of 1870 were authorized and issued, being secured on the equipment of the road.

The authority for the issue of preferred stock is found in the charter, under the authority there given the stockholders.

At the annual meeting in 1867, it was voted by the stockholders as follows, viz.:

"*Resolved*, That for the purpose of satisfying, paying, purchasing or exchanging the prior claims or encumbrances or interests in the Rutland and Burlington Railroad Company, that this company issue to the holders of such claims, certificates of preferred stock of this company, in shares of one hundred dollars each, equal in amount to the principal and interest on such claims, encumbrances or interests up to Aug. 1, 1867, agreeably to the act of the Legislature incorporating this company, securing to the holders of such stock, dividends upon the par value thereof, of three and one-half per cent., free of United States tax, payable semi-annually, on the first days of February and August in each year, commencing on the 1st day of February, A. D. 1868."

And at the annual meeting in December, 1869, on motion, the stockholders voted "that the President, with the approval of a majority of the directors, be authorized to settle and pay any claim existing against the corporation, on such terms of settlement and price for stock, as he may deem for the interest of the corporation."

In addition to the votes in regard to the issue of preferred stock heretofore given, at a meeting of the directors held on the 21st of June, 1870, all the board being present, it was voted, "That the president with Mr. Chase and Mr. Barnard, be a committee authorized to negotiate a sufficient amount of preferred stock of this corporation to cancel the amount due William T. Hart for first mortgage bonds of the Rutland and Burlington Railroad, and that the same committee be authorized to settle with Mr. Nickerson for fifteen thousand dollars of bonds, supposed to be lost."

Under those votes, the officers of the company certainly had the right to consider as assets preferred stock that it was authorized to issue to discharge prior claims or incumbrances upon the road and property.

To confirm my own opinion on this point, formed upon careful examination, I asked last October the written opinion of the counsel of the corporation (which will be found on page fifty-nine of the appendix). I think it must be apparent, on examination of the charter, that the opinion is well founded.

The following is a list of the prior claims and incumbrances upon the property:

1st. The liabilities of the second trustees on settlement of account	$234,905 02
2d. The first bonds, the principal and interest of same, under decision of court	4,278,420 00
3d. Costs paid Cheever & Hart in the settlement of first bonds	87,000 00
4th. Interest on the deferred payments under the "stipulation" to 1st February, 1871	88,412 53
5th. Interest or dividends, paid in cash, on the preferred stock and bonds and for which the company obligations are outstanding	440,493 00
Aggregate of stock that may be issued	$5,130,280 56

On the 14th of October last, at a meeting of the directors, all being present but Mr. Williams, the condition of the corporation was discussed, and detailed statements of the assets and liabilities at that time were laid before the board, as fully as they are presented in this report. To set at rest any doubts, the board, confirming former votes, authorized the issue of preferred stock to the amount of five millions of dollars, a sum less than it was believed they were authorized to issue to cancel prior claims, and at the same time it was determined to keep the common stock at two millions and five hundred thousand dollars.

It will be seen by reference to article fifth of contract that the rents to be paid are:

First, one payment annually of $376,000; the first year having been paid, there remains nineteen years; the aggregate is	$7,144,000
Second, one payment on 1st Jan., 1873.	40,500
" " Jan., 1874.	54,000
" " July, 1874.	40,000
" " Jan., 1875.	40,500
" " July, 1875.	67,500
" " Jan., 1876.	67,500
" " July, 1876.	81,000
" " Jan., 1877.	81,000
" " July, 1877.	81,000
" " Jan., 1878.	81,000
" " July, 1878.	81,000
" " Jan., 1879.	81,000
And thereafter at the rate of 594,500 semi-annually for twelve years, the aggregate is	2,268,000
Third, on the 14th page of appendix further provision is made in the contracts for the payment of $10,000 annually for the use of steamer "Oakes Ames;" aggregate	180 000
	$10,398,500
Deduct for payment:	
First, dividends on $5 000,000 preferred stock, 7 per cent. per annum is	$350,000
Second, coupons on $500,000, 7 per cent. bonds is	35,000
Third, coupons on $500,000, 8 per cent. bonds	40.000
Aggregate for nineteen years	$8,075,000
Leaving the sum of	$2,323,500

Two million three hundred and twenty-three thousand five hundred dollars for payment of any existing liabilities and dividends on the common stock. In the worst light in which the affairs of the corporation can be placed, there must be left a large sum to be appropriated to dividends upon the common stock. The rent or income of the road is not appropriated by the terms of the leases to the payment of dividends, to either preferred or common stock. Its application is governed by the charter.

In view of this condition of affairs my policy was to continue the payment of dividends in cash, on the preferred stock of the company, and to adopt a plan to this end. With the sanction of the stockholders it could have been carried out,

thereby maintaining and improving the credit of the company, not by a sort of forced loan from the preferred stockholders, but by raising the means upon the capital stock of the corporation as contemplated by the charter, much of its property not being represented by its stock. I believe that upon a full understanding of and looking at the case as a matter of business, all would have been convinced that it would be for their interest to accomplish this end. As the case now stands the bonds that have been authorized cannot be sold at par, while the present seven per cent. bonds, amply secured by mortgage, sell for eighty-one or thereabouts. Your treasury will be depleted by high rates of interest and commissions. In a financial revulsion, such as has occurred within a few years, there is danger that the company may lose control of its bonds at prevailing low rates, and there may yet remain a floating debt. Now that we have got at our condition let us take such a course as will make the future sure. Then, ere long, your preferred stock will sell in the market at its value, as a seven per cent. investment. To prove my confidence in this policy, provided it could have been carried out, I wrote last October to one of the directors, that I would take one thousand shares of the preferred stock towards retiring the paper of the company from State street or elsewhere. It would manifestly have been for my interest to have taken this stock at par. The loss to me, in the recent decline of stock which I own of the company, has more than used up the margin between the price at par and the present price in the market.

We are told we should learn wisdom by the past. Let me illustrate by one of the incidents in the history of your company. In the fall of 1868, a settlement was attempted of all the pending litigation, and was so far consummated as to be reduced to writing. This paper I have included in the appendix on page sixty. When the parties to that contract separated it was supposed that peace was at last declared; that large expenses would be stopped, and all the energies of the managers given to the development of your property. It was necessary to secure the cordial co operation of the directors in order to carry out this agreement. This was found impossible, owing to the influence of interested parties, and I was obliged to notify Mr. Farlow, chairman of the first bondholders' committee, to that effect. In reply I received the following letter:

BOSTON, December 17, 1868.

Hon, John B. Page, Rutland, Vermont:

DEAR SIR—Your favor dated at Rutland 12th, but mailed at Boston the 16th inst., reached me last evening. I take due notice of what you say that "after due consideration by the parties act, ing with you, and under the advice of counsel, you now withdraw from further negotiation for a settlement of the pending litigation between the bondholders of the Rutland and Burlington Railroad."

I quite agree with you in the belief you express that an early equitable settlement would promote the interests of all parties, and I think it will be cause for regret that you were unable to secure the sanction and necessary vote of your directors to the equitable terms arranged between yourself, Judge Prout and Mr. Edmunds, and accepted by me in behalf of those I represent.

Regretting individually that we have had so much labor, negotiating in vain, I remain,

Very truly yours,

J. S. FARLOW.

Upon examination of the arrangement above referred to, it will be seen that the first bonds were to be paid for at the of rate one hundred eighty-nine dollars and twenty-five cents for each one hundred dollars of principal of bonds, as of October 31, 1868. Adding the interest to first February, 1870, on the same basis, would give one hundred ninety-eight dollars for each one hundred dollars of principal of bonds; the maximum amount to be paid for being four hundred and fifty thousand dollars of principal of the bonds. Under the "mandate for decree" there was paid two hundred and thirty-seven dollars and sixty-nine cents, as of first day of February, 1870, and the amount of bonds then was six hundred and forty-five thousand nine hundred dollars, represented by Cheever & Hart. It will be noticed by the vote already given (see page 37) that, on account of the additional allowance under the opinion of the court for interest upon interest semi-annually, additional preferred stock was issued to all who had converted their bonds, to an amount equal to the sum due on each bond under the "mandate for decree."

The result was, that the preferred capital stock was increased over what it would have been under the said agreement in the sum of	$714,400 00
To raise the money upon the preferred stock at par to discharge the "decree of court," the subscribers for that stock were given 7 per cents. bonds as a bonus. There are outstanding	500,000 00
The divinenu and interest accounts have been increased by payment on this stock and bonds to first February, 1872.....	170,016 00
Additional costs, including amount paid Cheever & Hart, under the third provision of the "stipulation" on page 33, with interest to February 1, 1872.....	146,000 00
	$1,530,416 00

Here we have an increase of capital and debt of one million five hundred thirty thousand four hundred and sixteen dollars. Well might Mr. Farlow say, "I think it will be cause for regret that you were unable to secure the sanction and necessary vote of your directors to the equitable terms arranged between yourself, Judge Prout and Mr. Edmunds, and accepted by me in behalf of those I represent." Further comment is unnecessary.

There is one other subject and the last to which I shall direct your attention, and that is to the pamphlet entitled,

"RUTLAND RAILROAD SECURITIES"

issued under date of March 1, 1871, and signed "for the Board of Directors," by Mr. Chase and myself.

At a meeting of the Board of Directors held at Rutland on the 29th day of January, 1871; present, all the Board, Mr. Chase drafted the following resolution, and on his request it was presented by Mr. Williams, and it was voted, "That the President and Mr. Chase be a committee to draw up a report of this company for the past year, and to embrace in said report, as far as practicable, a history of the rise and progress of the same and its leased connections, up to the period of its lease to the managers of the Vermont Central and Vermont and Canada Railroads. The report to contain full tables of the rolling stock of the company, and in appendix, copy of the leases and other documents connected therewith."

It has been impossible until the present time to present the report contemplated in the preceding vote. Soon after the adjournment of that meeting Mr. Chase was furnished with an extract from the lease, which was correct as to the amount of rent to be paid, but the "memorandum" explaining "Article V" is no part of the lease, and it was an error of the printer to include that in quotation marks. It will be seen from what has been set forth in this report in regard to the duties devolving upon your president during all the early months of the year, that it was an impossibility for him to give any time to the preparation of a report, and I was averse to making any statement until a full and accurate report could be prepared. I found when I was in Boston, after the directors' meeting referred to, that Mr. Chase had prepared the statement entitled "Rutland Railroad securities," which he submitted to me. The language is all his own, with the exception of a few corrections made by me when I authorized my name to be affixed. After the statements were in print I observed several expressions that I should have modified if I had noticed them when I read the statement before it was printed. But as to the clause in regard to the assets and liabilities of the company upon which comment is made quite freely since the last annual meeting, because I was not on hand to explain, it has nearly unmanned Mr. Chase and caused him to put himself in a false position to myself and the company, greatly to the injury of both. If that statement was believed to be true when it was made, we should be absolved from all intention of misrepresentation. Neither of us had any motive to misrepresent the condition of the company, our interest being in its common stock, upon which we could not receive any income until all liabilities and dividends upon the preferred stock were paid. But what was the then condition of the company? Full statements, not only of the condition of the corporation, but also of the trustees' accounts in the running of the road, had been prepared and presented to the stockholder's meeting, held on the 26th of January, preceding. Upon these statement I formed my opinion, and I have not to this day seen any reason why that opinion was not correct, according to the knowledge then in my possession. Let us now review the ground of that conviction.

We were under the belief at the time, as has been heretofore expressed, that the assets in the trustees' possession would take care of the trustees' liabilities. We therefore estimated the assets and liabilities of the corporation. The balance sheet used for this purpose may be found on page thirty-one of this report.

It will be seen that the bills payable less cash on hand are.....	$415,535 55
There was due Cheever & Hart under the "Stipulation," and payable Jan. 1st with interest.....	421,000 00
Also due them on 1st April, 1871, but paid in advance on the 23d January, 1871.....	317,586 88
To provide for first bonds outstanding, other than those held by Cheever & Hart.....	150,000 00
Dividends 1st February, 1871, less the rent for month of January....	117,258 00
	$1,421,380 43

It was understood in March, 1871, that the directors might under the vote, to be found on page 36 of this report, "to issue one million dollars preferred capital stock at par for the purpose of raising means to pay first mortgage claims upon the property of this corporation," especially in view of the vote on page 50, "that the president, with Mr. Chase and Mr. Barnard, be a committee authorized to negotiate a sufficient amount of preferred stock of the corporation to cancel the amount due Wm. T. Hart for first mortgage bonds," &c. This last vote was passed after the payment was made under the fourth article (see page 33) in the "stipulation." The funds for that payment had been raised under the vote first referred to above. It was therefore supposed if we should find it necessary we had the authority to issue preferred stock to pay the principal, interest and costs agreed upon under the "stipulation." Including the principal, interest and costs paid first trustees, and the stock issued for bonds converted and to be converted:

The preferred stock would am't to..	$4,500,000 00
There was outstanding.....	3,585,700 00
Balance on hand to be sold.....	$914,800 00
The issue of 8 per cent. bond for new equipments not sold when the balance sheet was made up; on hand	500,000 00
The balance of the common stock on hand was.....	268,700 00
	$1,683,000 00

Now, in view of this showing, and bearing in mind that the common stock was at the time in demand at forty-five, with a very reasonable prospect of appreciating in price, I confidently submit the question if we are not justified in the

opinion that "the proceeds of the supplies on hand Jan. 1, 1871, which are taken by the lessees at their appraised value, and other assets, will be more than sufficient to meet all liabilities of the company." It is very reasonable to inquire why there was so different a result in closing up the affairs of the company? We found, both in the trust and corporation, that in closing up and making a final settlement there was presented a large number of claims of which in March, 1871, we had not the least conception. Our position was like an estate, where the testator had left a list of certain law suits pending against him, with a note at the foot of the list to the purport that five hundred dollars would pay all he owed his lawyers. In the settlement of that class of claims presented against the estate it required nearly ten thousand dollars.

The road had been in litigation for years, and all connected with the management felt the importance of freeing it from all disputable questions, though the board all felt when they voted to allow and settle certain claims, that they were unreasonable and ought not to be paid. But we were threatened with more litigation, which it was deemed good policy to avoid and to make the best terms of settlement possible.

On the settlement of the trust accounts we have seen that they left a debt of.	$234,805 03
There has been allowed and settled since March 1, 1871, of the class of claims indicated, including interest account, over.....	400,000 00
	$634,805 03

If, under these circumstances, Mr. Chase and myself are to be cast out as unclean, we must try and be as happy as possible outside the walls of the city.

The common stock being held at $2,500,000, the other assets being converted and applied in payment of liabilities, and provision being made for realizing from the preferred stock, already authorized to be issued up to five millions of dollars, the future dividends upon the preferred stock would have been placed beyond contingency. It is possible it may be preferred to provide for the amount required to meet the liabilities by an issue of bonds. In either event the stockholders must govern, and their decision cannot be other than to promote the best interest of the corporation.

The trustees state that the total value of road and property in 1862 did not exceed one million and five hundred thousand dollars, and the then market value of securities of the road was eight hundred and thirty-four thousand dollars. The road was taken by the trustees, as appears by the evidence produced, in a worn-out condition in all its departments. After seven years of efforts, amid many discouragements, it was turned over to the present lessees; in good order, with additions to its shops, engine houses, wharves and station accomodations, and with a large increase in its rolling stock; at a rental that after a few years will pay an income on all its stock and bonds, and to an amount of at least $8,000,000 In the Spring of 1871 these stocks and securities of your road were selling in the market at a price that upon the whole would realize over six million dollars. One who has been in a position to understand what has been done, has asserted "That no such financial success had been wrought out of such financial ruin in all New England."

Desiring to do justice to all parties, and at the request of the president *pro tempore*, I add that he had been connected with the corporation as a director but a short time comparatively, and was not acquainted with its past history; and especially that he would not have made the allusions he did in his report, as to the legacy of the trustees, if he had not relied upon a mere abstract of the treasurer's report.

I have thus given a plain, unexaggerated statement of the management of the company and its results, as shown in its present condition; and have also indicated the policy I thought it wise to adopt with reference to its outstanding liabilities. I may be pardoned for saying here, in conclusion, in view of what has been said and done, that throughout and from the time I became connected with the road, either as trustee or director, I have faithfully discharged my duty and done as I thought your interests demanded—with what success this report shows; and I submit, in view of the fact that annual reports were regularly made and of the foregoing votes of directors and stockholders; that it is not true that there has been any concealment of the debt or its amount; that it is not true that its amount over and above assets has been misrepresented; nor is it true that the second trustees have turned over to the corporation a debt exceeding the amount above stated. This report has been submitted to the directors and also the advisory committee, and with their approval is now laid before the stockholders.

JOHN B. PAGE, President.

February 22, 1875.

Journal of Railroad Law.

RAILROAD COMPANIES TICKETS OVER SEPARATE ROADS—RIGHTS OF PASSENGERS.

The facts in the late case of Brooke *vs.* The Grand Trunk Railway Company, (15 Mich., 332,) are fully and clearly stated in the following opinion by—

CAMPBELL, J.—Plaintiff sued defendants for ejecting him from one of their cars. He purchased in Buffalo in June, 1866, tickets from Buffalo to Detroit, consisting of two tickets on one piece of paper, one from Buffalo to Stratford by the Buffalo and Lake Huron Railway, and one from Stratford to Detroit by the Grand Trunk Railway. Upon the first ticket he rode to Branford in Canada, and remained there about two months. Then he went from Branford to Stratford on the same ticket. Thence he went to Port Huron, in Michigan, on the second ticket, which was punched by the conductor and handed back. Between Port Huron and Detroit the conductor of the train on which he was riding between those places, ejected him from the cars on his refusal to pay his fare, and would not receive the ticket as valid.

Defendants, among other things, introduced testimony to prove that fare for through tickets from Buffalo to Detroit was, at the time those tickets were sold, cheaper than was charged from some intermediate points to Detroit, and that the defendants had an arrangement with the Buffalo and Lake Huron Railway, whereby they were enabled to carry passengers and freight through from Buffalo to Detroit. Also, that, by the regulations of the company, persons having a through ticket from one point to another upon the line, could not stop at intermediate stations.

The court below held that the plaintiff was only entitled to a continuous passage, and, after leaving Buffalo, was bound to proceed to Detroit on the same train or lose the right, after once stopping, to proceed further on his ticket.

The court also instructed the jury that, if the plaintiff had a right to treat the second ticket as valid from Stratford to Detroit, yet he had abandoned the train on which he started at Port Huron and the ticket was unavailable upon any other train. This latter charge appears by the bill of exceptions to have been based upon an assumption of facts, which it belonged to the jury to determine, inasmuch as the evidence conflicted. Accordingly it becomes necessary to consider the former ruling, which treated the whole journey from Buffalo to Detroit as single, and which therefore, if correct, obviated the error caused by taking the facts on the last charge from the jury.

The circumstances of the present case, render it unnecessary to consider whether a simple contract, made to transport a passenger in a single journey beyond the line of the road with which he contracts for passage, renders the contracting company liable as a carrier for what occurs upon another railway. In the case before us, the tickets purport to provide expressly for passage over the lines of two separate companies, and neither ticket extends beyond one line. Each is the voucher for a journey between two specified points. Neither refers to the other in terms, and neither contains any words of restriction.

It was claimed that these tickets are not contracts, and cannot, therefore, be of any force in determining the rights of the plaintiff, but that he must be considered as having purchased what was equivalent to a single through passage. Whether a through ticket over the roads of two separate companies would entail all the same consequences as if they were owned by one, need not now be considered. But we cannot regard these tickets in any such light. Although they are very informal documents, yet they are easily recognizable as vouchers for separate journeys over distinct roads, one issued by a company on its own behalf, and one issued by the same company in behalf of another. The purchaser must necessarily infer from their face that one of them was issued under some claim of agency; and he had a right to treat them according to their purport. They are the usual evidences of a contract of passage; and whatever may be their imperfections, as substitutes for more formal agreements, they must be treated as valid for all which they purport to express. They are no more dependant merely because printed together, than they would be if each were precisely like the other.

We think that it was not incumbent upon the plaintiff to use these tickets for one continous journey, but that, having used one of them, to reach the terminus denoted by it, he was at liberty to begin his second journey when he pleased. The general rules requiring each separate journey to be completed without needless interruptions, was conceded on the argument and there are no facts calling upon us to decide whether there are any circumstances of convenience or necessity which can vary it. The plaintiff had a right to use his ticket from Stratford to Detroit notwithstanding the time which had elapsed after its issue. He had a right to have the jury determine whether he lay over between Stratford and Detroit. The rulings disposed of his entire cause of action and took away the facts from the jury, touching the continuity of the last journey.

The court erred in holding the two tickets to be valid for a single continuous passage from Buffalo to Detroit and also in directing the jury that the second journey had been interrupted.

The judgment must be reversed with costs and a new trial granted.

☞ The value of Iron and Steel, and manufactures of the same, imported into the United States for the fiscal year ending June, 30, 1871, amounted to $48,001,419, among which were: rails, $14,657,961; steel rails, $1,852,496; pig iron, $3,257,634; bar iron, $3,694,103; old scrap iron, $3,858,306.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday March, 16, 1872.

Stock Exchange and Money Market.

Money has been offered with much less freedom since our last, and rates have been generally against borrowers. The banks have not been in a position to make liberal advances beyond meeting the more urgent requirements of their regular customers; and private lenders have been more reserved in extending aid, particularly to speculative borrowers. The pressure for help was most severely felt on Monday and Tuesday of the current week, when call loans ranged from 7 per cent. in currency to the more prominent of the Government houses, up to 7 per cent. in gold, and, in many instances, a commission of $\frac{1}{32}$@$\frac{1}{16}$ of one per cent. per day, to the Stock Exchange firms. Toward the close, there was a partial relaxation in the market from the extreme stringency of Tuesday, but the demand continued quite brisk at the ruling figures. The discount movement was on a moderate scale, and the nominal range at the close was from 7@10 per cent. per annum, on strictly choice to fair marketable grades of business paper, the offerings of which were not remarkably heavy. The import trade of the week was on a less extensive scale, full 50 per cent. higher than that of the preceding week; while the export movement in produce was comparatively moderate. The city banks reduced their loan and discount average nearly a million during the week while contracting their outstanding circulation a trifle. The U. S. Sub-Treasury added to its currency balance 4⅜ millions. It made a reduction of nearly half a million in its coin reserve. Its currency balance at the close of business on Tuesday was $7,992,632 and its coin reserve, $73,304,220.

The city banks, in their latest return, show an increase of $790,500 of legal tender notes, and of $852,600 of specie, with a decrease of $79,800 of deposits; also a decrease of $937,700 in their loan and discount averages, and of $43,400 in their item of circulation. The city bank exchanges, last week, averaged $109,476,016 and thus far, this week, about 127 millions daily. The banks now hold $4,058,350 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The specie reserve of the city banks according to the latest return is $19,186,200, against $28,769,176 same time last year. The city bank deposits are now $210,393,000, against $229,924,584 week ending March 11, 1871. The legal tender reserve amounts to $44,560,900, against $57,015,884 same time last year. The circulation now stands at $28,122,000 against $31,666,071 same time last year. The loans are now $281,342,400 against $289,353,394 at this date last year.

The coin reserve of the city banks is now to about 19⅛ millions as against about 28⅞ millions on the 6th of January; the legal tender reserve is about 44½ millions against $46,616,000 on the statement of February 10th.

The U. S. Sub-Treasury enlarged its currency balance $4,396,139 and reduced its coin reserve $444,569 as the result of the week's business. The receipts of the office were $3,180,028 in coin, and $6,655,839 in currency; payments, $8,624,592 in coin, and $2,259,699 in currency. The office received $2,720,000 in coin or its equivalent, from customs; and disbursed $666,031 of coin interest.

The cash balance at the Treasury Department at the opening of business on Monday were: Coin, $112,413,411; currency, $11,183,251. Coin certificates were outstanding for $31,454,000.

Government revenues have been up to a fair average during the week. The excises yielded about 2¾ millions, and thus far since July 1, 1871, about $90,216,668. The customs at the port of New York, last week were $2,636,799; at the outports, equal to about $900,000 more, all in coin, or coin certificates.

The Gold movement of the week has been of minor interest. The speculative dealings have shown less confident temper. The customs call has been lighter, and the export drain limited. The Treasury coin disbursements in redemption of the called bonds of the issue of 1862, and in payment of the March interest on the public debt have added handsomely to the available supply. The range of the price during the week has been from 110@110⅜ and the closing quotation on Wednesday was 110@110⅛ against 110⅛@110¼ the preceding Wednesday. The specie outflow, last week, was $396,752 The Gold Ex-

change Bank clearances have averages about 30¼ millions per day during the week.

The customs demand for Gold last week, averaged $458,334 a day; thus far, this week, it has averaged $648,000 a day or equal to a weekly aggregate of $3,888,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $3,511, and since Jan. 1, 1872, $278,115 against $2,710,973 same time in 1871. The total customs revenue of the Government, in coin, at this port, from July 1, 1871, has been $110,010,286 against $101,597,970 same time in the preceding fiscal year 1870-'71.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from July 1, 1871, to March 9, 1872, $61,455,934, against $65,647,905 same time in 1870-'71.

The export drain of specie was $396,752 last week, against $954,584, same week preceding year. The shipments since July 1, 1871, have been $25,563,414 against $51,482,185 same time in 1870-'71.

Foreign Exchange has been offered less freely and has shown more firmness, though the demand has been on a moderate scale. Bankers' sixty day bills on London closed on Wednesday at 109⅜@109⅝; sight bills on London, 110⅛@110⅜.

The produce exports from this port, week ending with March, 12th were to the currency value of $3,845,903.

Government securities have been quoted stronger as to price, on a moderate offering of most issues, and a fair investment demand.

U. S. sixes of 1881 closed here on Wednesday of the current week at 115⅜@115⅝; U. S. Five-Twenties of 1862, (other than the bonds called in) 111½@111⅝; U. S. Five-Twenties of 1864 at 111½@111⅝; U. S. Five-Twenties of 1865, 112⅛@112⅜; U. S. Five-Twenties of 1865 consolidated. 110¾@110⅞; U. S. Five Twenties of 1867, 111⅞@112; U. S. Five-Twenties of 1868, 112¼ 112½; U. S. Ten-forties at (ex March coupon) 107¾@108; U. S. Fives of 1881 (Funding Loan) 109@109⅛. Six per cent. currency bonds, 114½@114¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 28.	March 6.	March 13.
Consols.....	92⅛	93	92⅝@92¾
U. S. 5-20's of 1862..	91¾	92¼	92⅛
U. S. 5-20s, 1865....	92	93⅝	93¼
" 1867	92	92¾	92⅝
" 10-40s	*88¼	*88¾	89

* Ex March coupon.

State bonds have been in very moderate demand, as a rule, and unsettled in price. South-Carolina, Virginia, and other Southern State bonds were quoted firmer.

A more active call has been noted for Railway bonds, for investment purposes, and all the more popular issues have been quoted firm in price on reduced offerings. Central Pacific Sixes have been in quick request at 102⅛@102¼. Chesapeake and Ohio Sixes have been in good demand at 94 per cent. and accrued interest.

Railway and miscellaneous share property has been fairly active, and despite the unusual stringency in Money, values have been generally buoyant, in the instances of the more prominent of the speculative favorites. A noteworthy feature of the week, as affecting railway property, has been the extraordinarily sudden and sweeping change in the executive direction and management of the Erie Railway Company.

General business has been on a moderate scale, with the leading kinds of domestic produce, quoted weaker as to price, Flour, Wheat, Corn, Pork, Lard, and Naval Stores closing heavily Middling upland cotton closed on Wednesday at 22⅜@22½cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,813,175 bales, against 3,101,170 bales same time in the preceding year; exports 1,366,303 bales against 1,956,037 bales in the previous year; stock at the ports at latest dates, 505,192 bales against 702,344 bales same date 1871.

At the Live Stock Markets, Beeves have been in fair demand at 9@13¼ cts.; Veals at 5@ 11½ cts.; Sheep at 7¼@10⅜ cts. Swine, at 5¼@5½ cts. per lb., all live weight. The week's receipts were 7,386 Beeves, 1,028 Veal Calves, 18,785 Sheep and Lambs; and 26,265 Swine.

Foreign goods, have been moving with less freedom on the basis of former figures. The week's imports of foreign goods reached the amount of $7,170,217 including $3,387,577 of dry goods.

Ocean freights have been rather more active, and generally quoted stronger as to rates.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

BANKING HOUSE OF FISK & HATCH,

5 Nassau Street, New York, March 1, 1872.

We are selling the Chesapeake and Ohio Railroad First Mortgage Six per Cent. Gold Bonds at the rate of 94 and accrued interest. They are in denominations of $1,000, $500, and $100, registered, or with coupons attached; interest payable May and November in United States gold coin; principal payable in 1899, also in gold coin.

Descriptive pamphlets, with full information, furnished on application.

We buy and sell Government and Central Pacific Bonds, and receive them in exchange for Chesapeake and Ohio Bonds at their current prices.

We receive deposits and allow interest at the rate of four per cent. on balances; make collections in all parts of the country; issue certificates of deposit, and do a general banking business.

FISK & HATCH.

Harvey Fisk,
A. S. Hatch.

North Shore (Canada) Railway.

At a recent meeting of the directors of this company held in Quebec, the following resolution was adopted

Resolved, That this Company having taken into consideration the letter of Messrs. P. H. Smith, and Samuel S. Keith, written under their own signatures, as well as those of their associates, and addressed to the Hon. J. Cauchon, President, at New York, under date 13th Feb. 1872, accepts their proposition to construct the North Shore and the Piles Railway, according to the conditions mentioned therein, and authorizes the President to sign a contract based on the said proposition.

The tender is for $7,000,000—of which one million is of bonds of the Quebec Corporation and six millions of land and road bonds. The contract to cover both the North Shore and Piles road. The road to be a first class one, both in regard to construction and rolling stock, &c., &c., and to begin early this spring. The gauge to be 4 feet 8 inches.

Illinois Central Railroad.

The statement of this Company for the month of February, 1872, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	1,936.09 for	$15,907 76
Acres Inter't Fund Lands Sold	40.00 for	480 00
Acres Free Lands Sold	280.00 for	2,644 00
Total sales during the m'th of February, 1872	3,256.09 for	$19,031 76
To which add Town Lot Sales	for	
Total of all	2,256.09 for	$19,031 76

Cash collected in February, 1872.... $73,087 62

Atlantic and Great Western Railway.

Messrs. Bischoffsheim and Goldschmidt notify that the first general mortgage bonds of this company are ready for delivery in exchange for their representative certificates lodged with them for conversion. They are also prepared to receive their certificates representing the second mortgage bonds and the coupons due prior to 17th January 1867, for conversion into second general mortgage bonds, in accordance with the official scheme of reorganization. Messrs. Bischoffsheim and Goldschmidt will also receive their certificates representing the debentures of 1864, and against these will issue first general mortgage bonds for 25 per cent, and second general mortgage bonds for 25 per cent., making 50 per cent. of the par value of said certificates, and, after enfacing this amount, will return the certificates to await the issue of the third general mortgage bonds and the common stock into which the remaining 50 per cent. is convertible. Holders of reorganization stock have the option of conversion into first general mortgage bonds until 11th June next, being six months from the date of the registration of the reorganised company, each 100*l.* of the reorganization stock being taken at $500, and convertible into $625 of first mortgage bonds with coupons due on 1st July, entitled to four months' interest and stamped accordingly.—*London Railway Times, Feb.* 24.

☞ The Mobile *Register* states that track has been laid on the upper end of the Alabama and Cincinnati Railroad from Gadsden southeastward five miles, and that the road bed is ready for the iron for five or six miles further. Six miles from Gadsden, to a connection with the Alabama and Chattanooga at Atalla, has been in operation for sometime, as well as 22 miles on the lower end, from Opelika northward.

☞ THE 8 PER CENT. FIRST MORTGAGE SINKING FUND

LAND GRANT BONDS OF THE

ST. JOSEPH AND DENVER CITY RAILROAD COMPANY,

in denominations of $1,000, $500 and $100, Coupon or Registered, can now be obtained to a limited amount only from the undersigned, or through the principal Banks and Bankers throughout the United States.

The safety and reliability of these Bonds is evidenced in the continued and increasing demand for them by prudent and careful investors, who have invested in them after a most thorough and rigid examination of the security pledged for their payment, both interest and principal.

They are secured by a *first* and *only mortgage* on the Company's *railroad* (*which will soon connect the Union Pacific Road at Fort Kearney with the City of St. Joseph, Mo., already an important railroad centre*)—upon the *Franchises* of the same—upon the *Equipment* and *personal property* of every description—upon the *Land Grant* of the Company granted by Special Act of Congress, approved July 23d, 1866, *amounting to* 1,700,000 *acres, which has been officially Certified to the Company by the Commissioner of the General Land Office in his official report to Congress, transmitted through the Secretary of the Interior on January 10th*, 1872.

The Bonds are issued only as they represent a completed and equipped Road; all proceeds of Bonds beyond this are held by the Trustees in trust until the necessary completion entitle the Company to these proceeds.

The Road is built first-class in every particular, and has been so received and accepted by the Department of the Interior.

The Mortgage Deed of Trust prohibits the sale of any of the Company's Lands at less than four ($4) dollars per acre, payable to the Trustees and applied to the payment of the Bonds, through the operation of the Sinking Fund. The payment of the Bonds before maturity is not compulsory upon the holders.

The Bonds are therefore secured by two classes of property *combined in one mortgage*, the value of either largely exceeding the amount of bonds which can be issued under the mortgage.

Trustees—Farmers' Loan and Trust Company of New York.

The Bonds have thirty years to run, with both principal and interest payable in Gold. The principal payable in New York, the interest at eight (8 p.c.) per cent., payable in February and August either in New York, London or Frankfort on-the-Main, free of tax.

Price 97½ and accrued interest in Currency. The Bonds are receivable at par and accrued interest in payment for the Company's Land Sales. Maps, circulars, documents and full information furnished on application.

The Bonds of this Company have always been received with favor by investors and capitalists, have always commanded a ready market, and we unhesitatingly recommend them—believing this loan will rank equally with that of the Eastern Division issues, which are now selling at a premium above par.

TANNER & CO.,
Bankers, No. 11 Wall Street,

Vermont and Massachusetts Railroad.

The earnings of this road for the ten months ending September 30, 1870, and the twelve months ending September 30, 1871, were as follows:

	1870.	1871.
From passengers	$160,040 83	$195,917 35
From freight	228,820 74	254,614 65
From rent of Rutland Railroad Company	.....	35,000 00

Net earnings		$162,865 69
Balance of interest account		56,978 94
Net income		$105,886 75

Of this sum there has been divided to the stock holders a dividend of two per cent. amounting, with the tax, to $58,666 67, and the balance of earnings has been appropriated to the reduction of the floating debt. The report says:

Our earnings fall far short of a fair remuneration for the use of the capital invested, and this will continue till the Hoosac Tunnel shall be completed, and a through line is established. Although business at present is not sufficient to make an adequate return for the expenses incurred, we do not feel at liberty to diminish these expenses by taking away any of the accommodations which our various and long-established trains have afforded to passengers and freighters, or by avoiding any outlay that safety and public convenience may require. Since the close of the financial year we have even made a large reduction in our through and local passenger tariff. Our rates have been unaltered for many years, and this reduction seemed to be in accordance with the spirit of the times. The amount of reduction in a passenger business equal to that of last year would be about $25,000. We do not expect that proportion of actual loss in the future, as business will be likely to be increased by the reduction.

Our road-bed, iron, bridges, and equipment are in good order, and ample for all present requirements. We have had our bridges carefully examined, the past year, by Hon. Daniel L. Harris, and others, and they report them to be in good condition. Mr. Harris, whose experience and knowledge of such structures is well known, says, "The truss bridge superstructures are in remarkably good order. Although most of them are twenty-two years old, yet little repairs have been so promptly done, and the timber has been so thoroughly protected from the weather that no decay of any consequence has taken place; and I see no reason to doubt that with like care in the future, and occasional slight renewals at the most exposed points (such as the contact of wall plates and stone work), the same structures will be in serviceable condition at the end of fifty years."

We have a telegraph line on our road, and offices for dispatches at every regular station except Turner's Falls.

The business of the Turner's Falls Branch is increasing, and at an early day an extension of the branch to Grout's Corner will be required, either abandoning the old track between the Branch and Grout's, or using both roads in place of a double track. This plan has been considered by the Directors, and sooner or later will be absolutely necessary. The cost will not be very large, and in making it, two expensive bridges, east of Grout's, can be dispensed with. But we have thought it best to postpone this expenditure, awaiting an increase of business and the maturing of the general plans for through business.

During the year, the Athol and Enfield Railroad, the Ware River Railroad, the Boston, Barre and Gardner Railroad and the Ashburnham Branch have been under construction, and most of them have already formed connections with our road. Some of our business may be diverted thereby, but we cannot fail to receive from these sources new business in place thereof.

The Directors have had under consideration and discussion at various times, the subject of our through line, and the rapid approach of the Tunnel to completion makes this of great and immediate importance to us. If all interests are joined, and one line is authorized and established from Boston to Troy, and the existing corporations are consolidated, our Company will probably be relieved from any separate action in preparation for the great increase of business which is anticipated. Not knowing, however, what the Legislature will determine upon, we have decided to petition for the extension of the time for making improvements along our line, authorized by former acts, and for authority to create new stock, or issue bonds to the extent of $1,500,000, that our Company may have authority and be prepared with the means of meeting all the demands of any reasonable increase of business from any source.

It has been a long and expensive struggle to build parts at least of this through line, including the Troy and Greenfield Railroad and Hoosac Tunnel. But the corporations in the line have steadfastly persisted in their efforts, and they now have a certain prospect of early success in opening a new and valuable route through the northern part of the State. Whatever schemes may be got up to take from Massachusetts or her citizens the control, management and benefit of this line, will, without doubt, meet with little encouragement from our Commonwealth, which, at all times and against all opposition, has always been a fearless friend of the enterprise, and has from time to time taken such wise steps in relation to it, that all obstacles, however formidable, have quietly dissappeared.

The earnings of the Vermont and Massachusetts Railroad were $493,137 66; of the Troy and Greenfield Railroad, $51,576 33; and of the Turner's Falls Branch, $17,524 09—total, as above, $562,238 08.

The indebtedness of the company, as will appear by reference to the annexed statement, on the 30th of September, 1871, was $963,766 80; and the assets, (not including fuel, oil, waste, and stock materals on hand) $192,779 32—showing a balance of indebtedness of $770,987 48. The balance of indebtedness on the 30th of September, 1870, was $761,648 71—an increase during the year of $9,338 76.

President.—DANIEL S. RICHARDSON.

Directors.—Daniel S. Richardson, William H. Hill, James A. Dupee, Francis Goodhue, George F. Gay.

Treasurer.—FRANKLIN N. POOR.

Superintendent.—OTIS T. RUGGLES.

☞ Grading operations within the city of Lynchburg, Va., for the Lynchburg and Danville Railroad are in progress. The contractors are pushing all the work as rapidly as possible.

☞ The Governor of Virginia has approved the bill to amend the charter of the Atlantic, Mississippi and Ohio Railroad Company, providing for the condemnation and purchase by that company of the outstanding stock in the Norfolk and

Petersburg, Southside and Virginia and Tennessee Railroad Companies. This completes the act of consolidation.

Coal Trade of the United States.

As has been our custom for the last forty years, we again present our readers with the official returns of the quantity of Anthracite coal mined and sent to market from the commencement of the Trade in 1820, together with an estimate of the home consumption in the different regions, and also the official returns of that portion of the Bituminous Coal moved towards the seaboard. The balance of the Bituminous trade we are compelled to estimate; but from the data in our possession we can arrive at a pretty fair estimate of the balance of the production.

We had supposed that the census returns for 1870 would have been sufficiently tabulated to have obtained reports of the quantity of Bituminous Coal mined in the different States of the Union in time for our publication—but we learn from Washington that they will not be ready for several months yet, and therefore we cannot furnish them in official shape, but we do not believe that our estimates will vary materially from the official returns when obtained.

Last year in estimating the quantity of coal consumed in the coal regions at the collieries, in factories, and for household purposes, we made the estimate a little too high in some of the districts. From the best information we can glean, the quantity consumed in the different regions, independent of the official quantity sent to market, was as follows in 1871:

	Sent to market. Official.	Home consumption. Estimated.	Total product'n.
Schuylkill and Columbia	5,124,780	900,000	6,024,780
Northumberland	*628,866	170,000	798,866
Lehigh Region	2,249,356	400,000	2,649,356
Wyoming "	6,481,171	1,200,000	7,681,171
Lykens Valley	481,328	50,000	531,328
	14,965,501	2,720,000	17,685,501

* Only a portion of the trade for Northumberland County. The balance is reported elsewhere.

The total quantity of Anthracite and semi Anthracite sent to market sums up as follows in 1870 and 1871:

	Tons.
In 1871	14,965,501
In 1870	15,274,029
Decrease in 1871	308,528

The whole quantity of Bituminous coal sent towards the seaboard, embraced in our tables, including imported coal, in 1870 and 1871, was as follows:

	Tons.
In 1871	4,895,914
In 1870	4,340,272
Increase in 1871	555,642

Showing an increase of 555,642 tons Bituminous, and a decrease of 308,528 tons of Anthracite, making the increase of all kinds 247,114 tons in 1871.

We give the whole supply of all kinds produced and consumed in the United States in 1871, part of which is official and balance estimated:

	Tons.
Anthracite sent to market (official)	14,965,501
Consumed in the Coal Regions (estim.)	2,720,000
Bituminous sent towards sea-board, including 443,955 tons imported (official)	4,895,914
Bituminous mined and consumed in the United States, not embraced in our tables (estimated)	11,500,000
	34,081,415
Exported	269,751
Total supply for United States	33,811,664

		19,614,301
Total increase in 1871		247,114

* The whole coal tonnage of the Reading Railroad in 1871 on the main lines, was 4,584,450 tons. The balance was received from other regions, and reported in the tonnage of other companies, including 558,234 tons of Bituminous coal received at Harrisburg. There is also included in the tonnage 251,291 tons consumed by the company. Including the tonnage of the laterals for shipment by Canal and via Northern Central Railroad, and quantity consumed on the laterals, the total coal tonnage of main, branches and laterals, was 6,002 573 tons for the fiscal year ending November 30, 1871.

† The total tonnage of the Lehigh Valley Railroad in 1871, was 2,889,074 tons Anthracite, and 355,096 tons of Bituminous coal, making the total tonnage 3,244,170 of all kinds. The balance is reported by other companies.

‡ The total tonnage of the Lehigh and Susquehanna Railroad in 1871 was 1,033 587 tons. The balance is reported elsewhere.

¶ Of this quantity 967,656 tons were sent by Canal and 398,515 by Rail.

§ The whole product of Northumberland County in 1871 was 1,213,093 tons. The balance is reported elsewhere.

¶ ¶ Reported in Northumberland Coal Trade via Philadelphia and Reading Railroad. The tonnage in 1871 was only 80,616 tons, as they only worked about three months.

The supply of Anthracite sent to market in 1870 and 1871 was furnished as follows:

	1870. Tons.	1871. Tons.
Schuylkill, Columbia, &c.	3,720,403	5,124,780
Northumberland	486,174	628,866
Wyoming Region	7,554,909	6,481,171
Lehigh	2,990,878	2,249,356
Lykens Valley Semi-Anth.	521,665	481,328
	15,274,029	14,965,501
	14,965,501	
Decrease in 1871	308,528	

Since 1860 we give below the quantities of coal sent to market from the three principal Regions—the Schuykil, the Wyoming, and the Lehigh:

Year.	Schuylkill.	Wyoming.	Lehigh.
1860	3,270,516	2,941,817	1,821,774
1861	2,607,489	3,055,140	1,738,377
1862	2,890,598	3,145,770	1,351,054
1863	3,448,265	3,759,610	1,984,718
1864	3,642 218	3 960,836	2 054,669
1865	3,735,802	3,256 658	1,822,585
1866	4,633,487	3 736,616	2,128 807
1867	4,331,820	5,328 322	2,062,446
1868	4,414,356	5,990,813	2,507,582
1869	4,748,960	6,068,395	1 929 583
1870	3,720,403	7,599,902	3,040,803
1871	5,124,780	6,481,171	2 249,356

It will be observed that the Schuylkill Region recovered last year what she lost the previous year, and it is believed that she will hereafter hold her proportion of the trade. With present facilities all the different Coal Regions can increase their product beyond the wants of the markets this year, and therefore we presume the increase this year, which may run up as high as 3,500,000 tons, will be divided among all, as we do not apprehend much, if any, difficulty this year, the basis system having been adopted in all the Regions, and provision having also been made for arbitration and conciliation to adjust any that are likely to occur, without resorting to a strike when the parties themselves cannot adjust them, —*Pottsville Miner's Journal.*

The First Railroad Cars.

A correspondent of the *New York Times* recently fell into an error in saying that Messrs. Gilbert & Bush, distinguished car builders of Troy, made, at their shops on Green Island, the first cars drawn by steam in the United States. The six cars, photographs of which are in the Rooms of the Historical Society at Hartford, Conn., were built at Albany, in 1831, by JAMES GOOLD, who was then, and for many years previously, engaged in the business of carriage making. As Mr. Goold was making the heavy post coaches used at that time for passenger and mail transportation, as

well for the south and west, as for this section of country, it was natural that he should be entrusted with the construction of the first cars, as of course there were no car shops in a country where cars had never before been used. The cars were ordered by Asa Whitney, Esq., the then Superintendent of the Mohawk and Hudson Railroad. This statement is made by the builder "to vindicate the truth of history," rather than as a matter of special interest to the public.—*Albany Journal.*

The Advance in the Prices of Iron.

There has been, within the past few weeks, an important and somewhat remarkable advance, in the price of pig, railroad, and other leading descriptions of iron, which demands more than a passing notice. The extent of this advance is exhibited in the annexed statement, which has been compiled from reliable authorities:

Prices per ton of Leading Descriptions of Iron in the New York Market, at dates given.

	Jan. 5, 1872.	Mar. 8, 1872.
American Pig Iron, No. 2	$34@$35	$44@$45
American Pig Iron, No. 1	35@ 36	45@ 46
Scotch Pig, Eglinton	33@ 34	43@ 44
Scotch Pig, Glengarnoch	34@ 35	46@ 47
Wrought Scrap	41@ 42	42@ 44
Rails, American	70@ 71	75@ 80
Rails, English, (gold prices)	60@ 62	66@ 68

Here is an advance in pig iron, of about 30 per cent., while rails show an average advance of about 10 per cent. It is seldom that in any staple article so great an appreciation of values has taken place in so brief a period of time. Of course speculation has had a great deal to do with it, but speculation must have some basis, and it is natural to inquire upon what grounds the higher prices rest. It is clear to all, that a prodigious increase has been made in the past few years, in the use to which iron has been applied. Great ocean steamships are now built almost exclusively of iron. The construction of vessels for the navies of the world, other than iron-clads, has nearly ceased. The use of iron in buildings has made great progress. And in all the various departments of mechanics, iron is constantly being applied to new uses. But above and beyond all, is the use of iron for the building of railroads. The work of railroad extension has made rapid progress in all parts of the civilized world; and in building and operating a comparatively short line of railroad, more iron is used than in building many steamships, and many iron clads, and many public buildings. The following is an exhibit of the progress of railroad building in the United States in ten years:

Miles of Railroad in the United States at the end of two decades.

	1861.	1871.
Six New England States	3,699	3,758
Five Middle States	6,599	10,601
Ten Western States	11,322	18,545
Thirteen Southern States	8,707	12,844
Pacific States and the Territories	26	2,904
Total miles	30,351	48,652

Here we have a statement showing that in the ten years ending 1871, during a portion of which period an exhaustive civil war raged, there were put in operation no less than 18,301 miles of railroad, within the boundaries of the United States. We built in the same time, an extensive iron-clad navy, and Great Britain replaced nearly all her wooden sea going steamers, with those constructed of iron. The consumption of iron in the United States has for a number of years increased at the rate of 10 to 15 per cent. per annum; and latterly the demand from the Continent, to make good the deficient importation during the late Franco-German war, has been excessive, and prices have there advanced more than with us.

The next question which arises is, how far has the production of iron kept pace with its increased consumption? In answer thereto, we have compiled a few statistics.

Production of Pig Iron in the United States for a series of years.

Year.	Tons.
1865	931,382
1866	1,350,943
1867	1,461,626
1868	1,603,000
1869	1,916,641

This is as late as official figures come down to; but for 1870 and 1871, an estimate by a reliable authority places the production at little if any increase over that of 1869. The "strike" of the coal miners in 1870-'71 no doubt reduced the production of pig iron for those years at least 200,000 tons, and, with other causes, prevented many furnaces being set up, which are now needed to maintain the supply of iron. There is also no doubt that difficulties with miners at the English mines have curtailed the production of pig iron in the last few months, and threaten to effect a still greater reduction in the early future. With reference to the production and importation of railroad iron, we have the following statistics:

Export of Railroad Iron from Great Britain for a series of years.

Years.	Total export. Tons of 2,000 lbs.	Of which to U.S. Tons of 2,000 lbs.
1865	486,427	Not stated.
1866	557,783	"
1867	650,239	"
1868	653,507	"
1869	1,003,350	336,500
1870	1,187,330	472,403

Production of Railroad Iron in the United States for a series of years.

Year.	Tons.
1865	356,892
1866	430,738
1867	462,108
1868	506,714
1869	593,420
1870	620,000

We find by these figures that the United States produced and imported during the years 1869 and 1870, more than two millions tons of railroad iron, or nearly double the quantity imported and produced in 1865 and 1866. It were hardly possible that the consumption of iron should continue to increase in this ratio. It may be safely assumed, therefore, that by the late advance in prices, a serious check has been imposed upon the increase in the consumption of iron. The production will no doubt be greatly stimulated, but other materials for ship-building and house-building will again come into successful competition with it.

The late advance in iron is unfortunate to projected railroads. It will greatly enhance their cost, and cause many to be postponed for indefinite periods. But the development of our railroad system must go on, at whatever cost, and we can only hope that in the course of a short time the various interests involved will so adjust themselves to each other, that the increased cost will cease to be felt as a serious obstacle to the work.

Important Railway Legal Proceedings.

The case of Owston & Sowers vs. Allegheny Valley Railroad Company, decided in the court below of Pittsburgh district, a few days ago, has excited unusual interest, in legal and civil circles, and more especially among railroad men. The plaintiffs were an oil firm, who during the "bulling" business of 1869 failed to get to the Pittsburgh market all the oil which they assumed they had sold. They failed because the defendants could not supply them with transportation, and alleging that they had a contract with defendants which bound them to carry all the oil the plaintiffs might offer they brought suit in damages, claiming $50,000 as the amount they had suffered from not being supplied the transportation which they demanded of defendants.

The facts and the evidence and the charge of the Court showed, that the only contract existing between the parties was, that the railroad company agreed to carry the oil of these parties at a certain price, provided they would give it to the road to haul in a certain amount or quantity. The road did not bind itself to haul the oil at all, or any portion of it, or to furnish facilities for having it done, but simply to carry it at a certain price if at all. The rate was a favorable one for the shippers, and could have been taken advantage of at any time, but when by means of the operations of a ring movement a great amount of oil was demanded in Pittsburgh within a few days, the plaintiffs, together with many other parties, crowded their product upon the road much faster than the road could move it, and hence many of them failed to deliver what they claimed they had sold, and for this reason the claim of damages in this case.

The figure at which they had placed their damages was excessive, and no one supposed that, though they might obtain a favorable verdict, they would be awarded more than enough to about pay the costs of suit. They did not themselves, it seems, expect much more. Nor was it presumed that an imaginary cause could be set up upon which a jury would pronounce favorable, when contrary to the facts, the evidence and the charge of the Court. Yet it was done in this case.

The defendants do not propose to submit to this decision without having given it a test in a higher court. They feel as though the case was an important one, which, if taken as a precedent in law upon such points, would prevent railroad companies from making special contracts with shippers; for in every such case any amount of imaginary business could be trumped up and damages collected on it whether it had ever been offered for transportation or not. And besides, if railroad companies are legally bound to accomplish all they want or expect to, suit, by this verdict, can be brought against them every time a train is a minute behind time, and their time schedule can be offered in evidence as sufficient proof of their failure to comply with their contract.

It is well, we think, the Allegheny Valley road proposes to resist the decision of this jury. It—when it comes to this—will be cheaper to make or buy a jury to have this decision reversed, than to allow other people to employ one to decide against them.—*Am. Manuf., Feb.* 29.

Upper Hudson River Railroad.

Articles of association of the above named company have been filed with the Secretary of State. The length of the proposed road is from some convenient point in Schuylerville, Saratoga county, to some point in Fort Edward, Washington county, a distance of about twelve miles, of which one and a half miles are in the county of Saratoga and ten and a half in the county of Washington. Nelson Davenport, John M. Landon, George H. Taylor, David C. Brisban, Alex. G. Patton, E. F. Bullard and Lewis E. Smith, of Mechanicville, are named as first executors. The capital stock is $130,000.

☞ The Rondout and Oswego Railroad property seized the other day has been released by the collector, the company giving security to produce the same on the day of sale. Trains are running as usual.

TALLOW LUBRICATOR.

MACHINERY OIL.

TALLOW PACKING FOR CAR JOURNALS.

We can furnish the best evidence of the success of this Packing.
The Packing dispenses with the use of Oil and Waste, and prevents all heating of Journals, requires less time and attention than any other now manufactured, and causes a saving of, at least, Twenty-Five per Cent.
The Tallow Lubricator can be used on machinery wherever Tallow is used. One pound of the Lubricator will do the work of at least Four Pounds of Plain Tallow.
The Oil will give complete satisfaction both on the lightest as well as on the heaviest machinery. As

SPINDLE OIL

it is unequaled. IT WILL NOT GUM, and is the most economical in use.

It will surely prevent a Hot Journal.

THE VALLEY ROUTE.

NORTHERN PACIFIC
Gold Bonds.

BANKING HOUSE

JAY COOKE & CO.

We are offering the NORTHERN PACIFIC 7-30 GOLD BONDS at Par and interest in currency. They are issued in denominations of from $100 to $1,000 COUPON, and $100, to $10,000 REGISTERED, and are at all times interchangeable at the pleasure of the holder without charge.

They are secured by a FIRST AND ONLY MORTGAGE on the Road, its Equipments, Earnings and Franchises and also on a Land Grant which, on the completion of the Road, will exceed 23,000 Acres to each mile of track, or 500 Acres of Land to secure each $1,000 bond.

These bonds are at all times receivable by the Trustees at TEN PER CENT. PREMIUM, in payment for any lands purchased from the Company.

In view of the ample security upon which the bonds are based, and the rate of interest they bear, we believe there is no first-class investment more safe or profitable.

Holders of United States 5-20 bonds can now convert them into

Northern Pacific 7-30s

Realizing an immediate handsome profit and an INCREASE OF ABOUT ONE-THIRD IN THEIR ANNUAL INCOME.

All marketable securities received in exchange, without expense to the investor, at their highest current value.

JAY COOKE & CO.,

New York, Philadelphia & Washington.

FOR SALE BY BANKS AND BANKERS GENERALLY THROUGHOUT THE UNITED STATES AND CANADA.

Sodus Point and Southern Railroad.

The full development of the immense trade that seeks intercourse between Canada, the North West and the Atlantic States has been seriously impeded by the want of sufficient harbor accommodations on Lake Ontario, and direct routes of railroads reaching to it shores. The fact is well known that the existing harbors are far from meeting the demands made on them, by the shipping interest for anchorage or wharf accommodations. Nothing could more strikingly illustrate the necessity for an additional port on the South Shore of Lake Ontario than the following extract from the report of the Chief of Engineers, U. S. Army for 1871, (page 228). In the report on Oswego harbor he remarks: "this is the point from which four of the most important products of the country are distributed—grain, lumber, coal and salt; and the trade in the last three of these is seriously embarassed by the want of sufficient wharf room for their accommodation. Lumber especially suffers from this cause, and I have been informed that during the last season 60,000,000 feet, board measure, of lumber from one point alone, was diverted from this port for that reason"—to say nothing of the other imports from the British provinces, and the constantly increasing trade of the North West. As indicated in the foregoing report, the shipments of coal via Lake Ontario have hitherto been circumscribed, the existing harbors offering but few inducements to shippers. These disadvantages are, however, entirely overcome in opening up Sodus Bay, which is unquestionably the finest harbor on the South shore of the lake. Is is entirely land locked, except at the entrance—four miles wide at its greatest measurement, five miles long, with an average depth of forty feet. It is at all times easily accessible to vessels, larger than any employed on the lakes, even in the worst of weather, and at times when other harbors cannot be safely entered.

This splendid harbor is the terminal point of the Sodus Point and Southern Railroad. The company is building an extensive system of wharves, piers, pockets, shutes, &c., to accommodate the heavy coal business and general shipping which must naturally be drawn here from its advantage

of distance and approach from the coal and iron regions of Pennsylvania, and its great superiority as a point of distribution. The Sodus Point and Southern Railroad which is now rapidly approaching completion, connects with the Northern Central Railway of Pennsylvania, at Stanleys Corners New York, and runs thence almost due North, reaching its terminus on Sodus Bay, traversing in its course one of the most populous and highly cultivated sections of the state. This route will form the shortest outlet to the lakes from the principal coal fields of Pennsylvania, and be an additional distributing line for the agricultural productions of Western New York, the products of Canada, and the trade of the North West. Connection will also be made with the Philadelphia and Reading Railroad by the line now in progress from the Southern terminus of the Sodus Point and Southern to the Blossburg coal fields, thence to Williamsport, there reaching the Catawissa road, while the Lehigh Valley connection will be made by the Pennsylvania and Sodus Bay railroad now being built from Waverly north to a point onthe S. P. &. S. R. R. At Newark, the road crosses the Erie Canal, which is an important feature in the enterprise. As this point the company will also provide facilities for the shipment of coal and other freights to be distributed on the line of the canal.

Laurens Railway.

The Laurensville (S. C.) *Herald* of a late date states that Mr. H. T. Peake, Superintendent of the South Carolina Railroad, accompanied by Mr. J. O. Meredith, recently made an inspection of the line of the Laurens Railway, and that the first named gentleman spoke favorably as to the prospects of the early rebuilding and completion of it, with a probability of its being in operation as early as July. It was understood that Superintendent Peake would make a report to this effect to the president, Mr. Magrath. As Mr. Peake is himself a practical machinist and engineer, as well as a very successful superintendent, his opinion and report will doubtless have great weight.

Laurens is only about twenty-five miles south of Greenville, S. C, through which the Atlanta and Richmond Air-Line will pass, presenting a surface favorable to the building of a railway; hence, we doubt not, this contemplated re construction originates in a determination to extend the Laurens Railway to Greenville, and form a junction with the Air-Line. The Laurens Railway is an extension of the Columbia branch of the South Carolina Railroad.

Lehigh Valley Railroad.

The directors of the Lehigh Valley Railroad Company have determined to increase its capital stock 33⅓ per cent., by permitting all who were stockholders in the company on the 15th inst. to subscribe at par for one share of new stock for every three then held—those entitled to a fraction of a share being permitted to subscribe to a full share. The payments for the new stock are called in twelve quarterly payments of $3 75 per share, payable between the 1st and 30th days of April next, and in the same limit of time quarterly thereafter, the said twelve payments aggregating $45, after which the thirteenth and last payment will be $5 per share, thus completing in April, 1875, the full sum of $50, the par price of the stock. The instalments will be received only on the dates specified, and they will be entitled to a proportionate share of the dividends subsequently divided; or, if desired, the new stock may be paid for in full at the time of subscription, and will be entitled to dividends as full paid stock. The privilege of taking new stock can be sold by any stockholder, as "allotments" are now selling by stockholders of the Pennsylvania Railroad Company, and blank forms for that purpose can be procured at the Lehigh Valley Railroad Office. The present capital of the company is a little rising $18,000,000. consequently the proposed increase of one-third will swell it to over $24,000,000. The instalments of $3 75 per share, as called, it will be seen, is just equal to the usual quarterly dividends of the company of 2½ per cent., or $1 25 per share. Any stockholder can, therefore, take the new stock and pay for it entirely from dividends.

Cleveland, Columbus, Cincinnati and Indianapolis Railway.

Surplus December 31, 1871..... ...		$270,763 82

Compared with the previous year the gross earnings of 1871 show an increase of $590,503; with an increase in working expenses of $302,157 16—making an increase in net earnings of $288,345 84. Deducting interest and taxes, the net income shows an increase of $320 767 29. The President in his report says:

During the early part of the year the Board of Directors ordered the sale of 8,400 shares of the capital stock owned and held by this company, which was sold at the rate of 88 41-100 cents on the dollar; and by circular dated Sept. 30th, 1871, the capital stock was increased by offering to each stockholder of this company the privilege of subscribing for new stock, in the proportion of one share for every five, and one share for every fraction of five shares greater than one-half, as registered in their name October 20th, 1871, to be paid for at the rate of seventy-five cents on the dollar. Stockholders responded by subscribing for 21,180 shares, from which the company will realize $1,588 500. At the time of subscription there was paid in $1,180,075, and the remainder will be due and payable February 1st, 1872, at which time certificates of stock will be issued. Stock not subscribed for under the provisions of the notice has not been sold.

By reference to the reports of the General Superintendent and Chief Engineer, you will find much valuable information, and the details of the large increase of equipment and permanent improvements, showing a judicious expenditure of $1,150,466 10 charged to cost of road and equipment.

The advantages of the additional equipment will be more apparent in 1872 than during the year past.

Contracts have been made for five hundred coal cars and seven locomotives for this company, to be delivered early in the spring of 1872; also for equipment of the Cincinnati and Springfield Railway, in compliance with the contract for lease of that railway published in the annual report for 1870. The equipment for the Cincinnati and Springfield Railway is now being delivered, and will be in readiness for the opening of the through route between Cleveland and Cincinnati, by way of Dayton, which we now expect will occur in May next.

That part of your railway between Delaware and Springfield, and hitherto known as the "Springfield Branch," will come into use as trunk road on the completion of the Cincinnati and Springfield Railway. To prepare it thoroughly for the large traffic to be turned upon it, has involved considerable expenditure, a part of which has already been made, and the remainder will be as early in the spring as the weather will permit, and in time for the opening of the through route.

The Lake Shore and Tuscarawas Valley Railway, from Elyria, Ohio, to the Pan Handle Railroad in Tuscarawas county, Ohio, and thence to Wheeling, West Virginia, was located during the year to connect with your railway at Grafton Station, and its construction has been pushed with much vigor—forty miles being already completed, and its completion to the Pan Handle Railroad during the coming summer is now assured.

It will pass through the best coal fields of Ohio, and will command an immense traffic. To secure its business over twenty-five miles of your railway between Grafton and Cleveland was considered of very great importance, and to promote its early construction a contract was entered into between the Lake Shore and Tuscarawas Valley Railway Company, the Cleveland, Columbus, Cincinnati and Indianapolis Railway Company, and the Lake Shore and Michigan Southern Railway Company, which it is believed will be of mutual benefit to all the parties. The contract is appended to this report, and your attention is called to its provisions.

The Indianapolis and St. Louis Railroad Company (of which this company owns one-half the capital stock) has passed through a very prosperous year for a new road with strong competition, having earned over $9,000 per mile, and not only proves self-sustaining, but carries a handsome surplus forward to 1872.

The policy of using steel rails in renewals of track is already showing results in reducing the expense of maintenance on such parts of your railway as are now laid with steel. There is over seventy miles of steel rail now in the track, and the renewals with steel already contracted for will exceed fifty miles in 1872. In addition it may be stated that the Cincinnati and Springfield Railway is being laid with solid steel rail.

The freight tonnage has been very heavy during the year, and compares with the three previous years as follows;

Increase over 1870, 25 8-10 per cent.
Increase over 1869, 42 7-10 per cent.
Increase over 1868, 87 4 10 per cent.

The tonnage and freight earnings for 1871 and 1870 compare as follows:

EASTWARD.

Tons.		Earnings.	
1870.....	603,729	1870.....	$1,347,583 95
1871.....	815,516	1871.....	$1,983,731 33

Increase in tonnage, 35 1-10 per cent; increase in earnings, 47 2-10 per cent.

WESTWARD.

Tons.		Earnings.	
1870.....	332,111	1870.....	$921,454 41
1871.....	362,141	1871.....	$889,904 51

Increase in tonnage, 9 per cent; decrease in earnings, 3 4-10 per cent.

Total increase freight tonnage 25 8 10 per cent. or 241,817 tons. Increase freight earnings 26 6-10 per cent. or $604,497 38.

Thirty per cent of the above increase in freight earnings was derived from local business, while the local tariff has not been advanced, and in many instances has been reduced.

The tonnage handled at Cleveland has greatly increased, owing to the growth of manufacturing interests in the city, which, together with the large amount of through freight has rendered the grounds of the Company inadequate for the proper transaction of its business. To provide additional room already demanded, and soon to be needed for the handling of coal from the Tuscarawas Valley, your Board have purchased a large piece of land, (about 36 acres) in "Central Tract," located within half a mile of the business center of the city, and having a frontage of two thousand feet on the Cuyahoga River. It is believed that the grounds thus obtained will afford ample room in the future, at least for many years.

The purchase has just been completed for five hundred thousand dollars, and a payment of sixty-five thousand dollars made thereon. The remainder is payable, thirty-five thousand dollars, in January, 1872, and the balance in eight annual payments with interest at six per cent per annum.

The Board of Directors are confident from present and prospective earnings that your property will produce regular dividends for the future and look for a greater degree of prosperity than in years past.

The business relations between the officers of your railway and connecting railway companies are entirely harmonious and pleasant.

The officers and agents in charge of the various departments have been faithful and efficient in the discharge of their respective duties.

The company have 98 locomotives, 42 first class passenger, 5 sleeping, 1 directors', 14 baggage and express, 6 U. S. postal, 1 U .S. mail, 1 paymaster's, 1,690 box, 248 stock, 377 flat, and 80 coal cars.

Five locomotives were built in the shops of the company and six purchased. One engine was destroyed by explosion, and one old one broken up in shops, leaving the number in service at the close of year as above stated. The number of coal burning engines was increased from eight at the commencement to 39 at the close of the year, and have worked satisfactorily. The change from wood burning to coal is being made as fast as the engines can be spared from service. The amount paid for new engines was $131,980 48.

The total mileage made was as follows: passenger trains, 650,191; freight trains, 2,401,940; gravel and repair trains, 107,964; fuel trains, 110,232—total, 3,270,327, against 2,609,033 in 1870, an increase of 661,294, or 25 per cent. Cost per mile run for repairs, 5.47 cents. The demand on the locomotive power was constant during the year, and the power not sufficient for the satisfactory movement of business offered, or good economy in maintaining repairs. As immediate increase in the number of freight engines is imperative.

The entire passenger equipment including locomotives, was supplied with the "Westinghouse Air Brake," and has worked with satisfaction and economy. The general repairs to passenger cars (except running gear) was not fully maintained, owing to the constant service required. An increase in the number should at once be provided. Cost for Air Brake, Miller Platform and new car work, $37,553 06.

The company built during the year, in their shops, 203 house cars, 60 stock cars, 25 flat cars, 26 coal cars, and built by contract, 600 house cars; total 914; broken up in the year 95; increase for the year 819, of all kinds. Cost for new equipment, $661,825 91.

The large increase of cars failed to meet the requirements of business. The increase reduced the amount paid for foreign car service from $80,736 79 in 1870 to $57,358 54 in 1871, being $23,377 79 decrease, or nearly 30 per cent. This service will be more nearly equalized the coming year, as the benefits of the increased equipment was not fully realized until the last half of 1871.

The total tonnage moved in 1871 was 1,177,657 tons, against 935,841 tons in 1870—an increase in 1871 of 241,816 tons, or 25.8 per cent.

The freight train mileage was increased over 1870, 626,611 miles, and the passenger train lessened 127 258 miles, being an increase of mileage in transportation for the year of 599,353 miles, or 25 per cent. over the year 1870.

The renewals of track embrace the following. 4,739.77 gross tons of Bessemer steel; 1,009.42 gross tons new iron rail; 1,923.92 gross tons of re-rolled iron rail; 330,182 pounds railroad spikes; 77,690 pounds railroad chairs; 397,348 pounds iron joint splices; 187,156 pounds track bolts and nuts; 14,411 repaired rails; 176,829 cross ties; frogs and switches $14,500; ballasting forty miles; labor and incidentals. There were eighty-one miles of track relaid with new rail 51¼ miles of Bessemer steel and 30¾ miles of new and re-rolled rail, forty miles were thoroughly ballasted and 176,829 cross ties renewed.

The increase in traffic (which was about 25 per cent. larger than in 1870) has required an increased expense for labor and rail; this will fully account for the increased cost in this item of repairs. There will be needed for the coming year to keep up the improvement of the road at least ten thousand tons of rails in 1872, and about one hundred and seventy-five thousand cross ties.

Construction account is charged with $319,106 65, and is made up as follows: cost of steel rail over and above that of iron, $153,446 95; for improvement of track, ballasting, &c., on Springfield branch, $46,015 17; new water works and materials for engine house and shop at Delaware $6,748 76; for enlargement of engine house and new boiler shop at Galion, and new pump house at Pendleton, $3,876 76; for additional sidings and other permanent improvements, $98,926 95; and for real estate for enlarging grounds at Indianapolis, for pump house at Delaware and gravel pit at Anderson, $10,092 06.

The year passed without accident to passenger trains, and with entire freedom from injury to passengers.

The assets and liabilities of the company as shown on the books are as follows:

ASSETS.

Cost of road, depots, shops and equipment		$13,774,883 07
Materials on hand:		
For repairs of track	$78,108 90	
For repairs of locomotives and cars	180,770 10	
Fuel, oil and waste	144,537 90	
		403,416 90

Security of Railroad Bridges.

LEXINGTON, KY., March, 4,1872.

TO THE EDITOR OF THE RAILROAD JOURNAL:

In this most fruitful season of railroad accidents and attendant loss of life, the following letter from the late John A Roebling may not prove uninteresting to your readers. The letter is addressed to Mr. John McMurtry, of this place, who claims to have presented a railroad chair that obviates all jolting usually produced by cars in passing imperfect joints of the rails.

All observing persons travelling on railroads are fully impressed with the importance of obviating the nuisance of jolt and noise caused by the wheels of the cars passing over the imperfect joints, often going down from one to two inches, with the noise of a tilt-hammer in an iron forge. Added to this is the wear and tear of machinery consequent upon this continual "bumping" at the joints of the rails. It is claimed that the introduction of the rolled steel chair spoken of by Mr. Roebling obviates all these difficulties and makes the rails as strong at the joints as at any other point, and supersedes the necessity of steel rails. It is thought by many persons that the late bridge disaster on the Short-line Railroad was caused by imperfectly connected rails. Mr. Roebling, it will be remembered, was the engineer who erected the suspension bridge between Cincinnati and Covington:

[From John A. Roebling, the celebrated Engineer and Builder of Suspension Bridges.]

TRENTON, N. J., February 8, 1868.

Dear Sir—That the catalogue of railroad disasters is on the increase, rather than on the decrease, is no wonder, when we consider the increased speed and weight of rolling stock, while the track itself remains in the same imperfect condition in which it always was. With the exception of an addition to the weight of rail, nothing essential has been done toward perfecting the track itself. And while no part of the system requires more care than the track, this part is still in a most primitive condition. Every railroad man knows full well that the great source of wear and tear is to be found in the defective manner in which the ends of rails are jointed. The track of to day, the world over, is composed of a number of rails, connected by loose and open joints, like an articulated animal. Every joint, is a weak and yielding joint, not only inviting, but causing the concussions, produced by the ponderous weights which pass over it at high speed. In the name of common sense, how can railroad men expect to maintain a track in good order with such glaring defects?

If the problem was to devise a plan the most destructive in its operation, no system can be invented which will rival with the one in actual use. The diagram, which represents a vertical profile of the motion of a fast moving train, exhibits an undulating line, uniformly and abruptly depressed at every point. These sudden depressions are so many charges against common sense, as well as upon the purse of the railroad company. But these vertical motions are also productive of horizontal oscillations, and thus propelled the train moves on like a maddened snake, writhing and pitching in all directions.

If railroad managers could be convinced that more than one-half of all the wear and tear, and of the daily disasters, is owing to the imperfect condition of the track, and principally in consequence of its articulated features, would they not be found willing to expend a little more upon this most essential, but sorely neglected part of the system?

All the numberless devices of chairs and modes of jointing which so far have been attempted have proved failures, because they lack the most essential principles of success. "Fishing" is an acknowledged failure all over Europe, as well as here. The conditions on which success depends are—

1. Continuous and unbroken bearing.

2. More, or at least as much vertical and lateral stiffness and strength at the joint as at any other point.

So far as I know, the only successful attempt of a perfect splice, which ever was made, was made by myself, in the construction of the Niagara Bridge.

The original splicing plates, with their projecting steel lips which form the continuous bearing, after thirteen years of service, are still in use, while all the rails have been renewed once. It was there and then that I first conceived the very simple idea of the chair, which is the subject of the patent now in your exclusive possession. The opinions which I express here are not speculative or experimental, but the result of long experience and observation.

Before closing, I will add another remark. The cast-iron block which forms the chair in question, must have sufficient mass and weight to resist the great impact of locomotive drivers, with their four to five tons weight upon a single point. The perfect fit of the block to the rail, in connection with the opposite wrought iron splicing plate, must also produce a degree of vertical stiffness superior to any other point of the rail. To accomplish this a sufficient quantity of good material must be expended.

Railroad managers may object to this chair on account of its cost. But let them consider on the other side the rail saving in wear and tear generally, and the greater insurance against fearful and costly disasters. The introduction of this chair will do more for the safety of railroad travel than has been done by all the late improvements combined.

Wishing you success for your own sake, as well as on account of the intrinsic merit of the chair, I remain yours, truly,

JOHN A. ROEBLING.

To Mr. John McMurtry, Lexington, Kentucky.

Re-Organization of the Erie Railway Company.

When the last issue of the JOURNAL went to press, the re-organization of the Erie Railway Company was in progress. It has since been completed; and the following are the new officers and directors:

President.—John A. Dix.

Vice President.—O. H. P. Archer.

Treasurer.—W. W. Sherman.

Assistant Treasurer.—Justin D. White.

Superintendent.—Lewis D. Rucker.

Directors.—John A. Dix, O. H. P. Archer, W. W. Sherman, George B. McClellan, George C. Hall, F. N. Drake, H. G. Stebbins, W. R. Travers, S. L. M. Barlow, Charles Day, Homer Ramsdell, Dr. Edwin Eldridge, A. S. Diven, H. L. Lansing, John Ganson, Henry Sherwood, and one vacancy occasioned by the resignation of Jay Gould.

Counsellor.—S. L. M. Barlow.

Associate Counsel.—M. W. W. Macfarland.

General Superintendent.—L. D. Rucker.

Assistant Gen'l Superintendent.—J. W. Guppy.

General Freight Agent.—B. W. Blanchard.

Assistant Gen'l Freight Agent.—J. H. Rutter.

General Passenger Agent.—W. R. Barr.

Assistant Gen'l Passenger Agent.—J. N. Abbott.

Auditor.—G P. Morosini.

Engineer.—John Hilton.

These officers are men of such character, that they ought to be able to secure the confidence of all who desire the prosperity of the road. They have a difficult work before them, and have powerful and reputable rivals to compete with for the future control of the affairs of the company. We can only hope that they will succeed in meeting just expectations, and that whatever scandal that great work has, justly or unjustly, been to the management of American railways, has been brought to a close. At a time when so much depends upon the manner in which the finances of our public corporations are regarded in Europe, the appearance of evil, even, is to be carefully avoided. The Erie Company operates 845 miles of railway, and the importance of its traffic, and connections present and prospective, can hardly be over-estimated. Very properly, following the re-organization of its management, a statement of its financial condition has been put forth.

Common capital		$78,000,000
General mortgage	$30,000,000	
Preferred stock	8,500,000	
Leases, if capitalized	15,500,000	
		54,000,000
Grand total		$132,000,000

The floating debt amounts to $5 693,674, against which the company holds collaterals valued at $6,174,100. It is also semi-officially announced that the earnings of the road in the past six months, have been at the rate of 22 million dollars per annum. The direct or preference liens of the company aggregate 54 million dollars, upon which the interest at 7 per cent. is $3,780,000 per annum. If the railway can be operated at 70 per cent. of its earnings, and they should aggregate 22 millions per annum, there would be a balance of $2,820,000 applicable to a dividend on the common stock, or equal to nearly 3⅝ per cent. on the total amount of 78 millions. But it is thought that the cost of operating the road may be so far reduced as to permit the resumption of a five per cent. dividend on the common stock. Much, however, depends upon contingencies beyond the control of any board of directors. For example, it does not seem probable that the quantity of grain to come forward from the West, will be as great for the coming six months as in the corresponding periods of the two previous years. The future does not, therefore, seem quite secure. There are, however, so many reasons for congratulation, that it may appear ungracious to suggest difficulties and dangers which, after all, may not be incurred.

The "Erie Classification Bill" was the subject of final action on Saturday last, in the popular branch of the State Legislature. A correspondent states that when the bill came up for a third reading, a motion was made, "in obedience to the promptings of counsel acting in behalf of the foreign stockholders, to recommit the bill, with instructions to strike out the provision declaring the directors of the Atlantic and Great Western Railroad ineligible to the position of directors of the Erie Railway. This motion was lost."

A scene of much excitement ensued, and a very active effort was made to effect a reconsideration of the vote on this motion; but it failed, and the bill passed as it came from the Senate. If it receive the approval of Gov. Hoffman, as is highly probable, it will become a law. The bill as it passed, is known as the "Southmayd Bill," and provides for the repeal of the law under which the directors of the Erie Railway were divided into three classes, and that a new election shall be

held for a full board of directors at an early day. The adoption of the proviso making the directors of the Atlantic and Great Western Railway ineligible to election as directors of the Erie Railway, is understood to be adverse to the new direction of the latter company. Such is the position and such the prospects of the Erie Railway Company. The struggles to control its management during the past few years have been such as even those engaged in them must have deprecated. Physical violence, evasion and defiance of the mandates of courts, and tampering with legislatures, are expedients which honorable men would gladly avoid. Let us hope that they are now at an end; that a spirit of justice and fair dealing will prevail; that a broad mantle of charity will be thrown over past errors; and that the future will redeem the past.

Chesapeake and Ohio Railroad.—Prosperity of Richmond.

A correspondent of the Louisville *Journal*, writing from Richmond under date March 2, speaks as follows of this enterprise:

This road is now in rapid process of completion, and ere many months the whistle of the iron horse will resound along the banks of the Ohio. The road from this city to the White Sulphur Springs has been put in thorough order; new ties, rails, and all the modern improvements in the railroad line. The company have just issued proposals for the building of a large depot at Huntington, the western terminus of the line, and a large and magnificent hotel is in course of construction at the same point.

Huntington is destined to be a large city, and ere many years the smoke arising from its many manufactories may rival that of far famed Pittsburgh itself. It is situated in a region abounding in iron, copper and coal, that only requires the blast of the miner and the hammer of the artisan to turn it to wealth and prosperity. The railroad company at this end of the line have already commenced the process of tunneling under a portion of this city, in order to reach the James river. The tunnel will underrun that part of the city known as Church Hill, and, with the exception of the Big Bend Tunnel (on the same road), which leads through the Blue Ridge mountains, will be the biggest hole in the State. The object of the tunnel is to place the terminus of the road immediately on the river bank. Real estate in the immediate vicinity of this terminus has recently gone up from $5 to $400 per acre. Sea-going steamers will be able to take freight immediately from the road, and Western produce will have an opening to the markets of the world over a line that is never obstructed by the rigors of winter. The rolling stock of the road is being constantly increased, many of the cars being made in our own workshops—the Tredegar Company of this city. The cars are made after the most approved modern improvements, and in beauty and construction vie with any in the world.

Our city has begun to look up from the late stagnation which she fell into after the war and is beginning to reach a level with her more prosperous sisters. Real estate has increased in value, new and magnificent buildings are being put up in the business and resident part of the city, and everything assumes an air of prosperity and determination on the part of her citizens to retrieve their broken fortunes, and turn their attention once more to a full development of her natural resources. She has a water power sufficient to turn the spindles of the world. Her granite quarries, the best in the world, are inexhaustible, and are now being worked by Col. Albert Ordway & Co., who have the contract for supplying the granite for the building of the new public edifices of Washington. This contract involves the sum of $10,000,000, and will take several years to fill. Her coal mines are prolific and prosperous and are worked to great advantage. All that is wanted to make her one of the largest manufacturing cities of the world is a little time.

Patent Office Statistics.

The following is a statement of the business of the Patent Office for thirty-four years, from 1837 to 1871, inclusive.

Years.	Applications filed.	Caveats filed.	Patents issued.	Cash received.
1837	....	....	435	$29,289 08
1838	....	....	520	42 123 54
1839	....	....	425	37,260 00
1840	765	228	473	38,056 51
1841	847	312	495	40 413 01

Value of the Air Brake.

The great value of the air brake on railroad trains was demonstrated on the occasion of the late accident near Springfield. The engineer perceived that something was wrong on striking the broken rail, and at once put on the brake. The locomotive and tender and one car went over the broken rail safely, four cars rolled down the embankment, breaking off the connection with four sleeping cars in the rear, but the latter was checked and saved from wreck, probably saving many lives. Many persons suppose that when the connection between parts of a train is broken the air brake loses its efficiency. This is not so. Attached to the cylinder which conveys the air are valves between each car, which shut down and hold the air, continuing the pressure of the brake whether the connection is broken or not. This is one of the chief merits of the invention. Many lives, as well as a vast amount of property, would be saved annually if the air brake should be adopted universally on railroads.—*Pittsburg Chronicle.*

☞ At a meeting of the Directors of the Michigan Central Railroad Company, held on the 13th inst., the subject of providing funds to defray the cost of a double track was considered, and it was decided not to increase the capital stock, but to issue sufficient bonds for that purpose, which, it is believed, can be negotiated in Europe on very favorable terms.

☞ The Kellogg Bridge Company of Buffalo has been awarded a contract, amounting to nearly one hundred and sixty thousand dollars, for building a viaduct bridge for the Wisconsin Central Railroad, near Lake Superior. The length of the bridge is 2,105 feet.

Statistics of Commerce.

The following exhibit of our exports and imports for the calendar year 1871 is furnished by the Bureau of Statistics. The values are all expressed in specie:

Imports of Merchandise		$572,509,314
Imports of specie and bullion		17,399,415
Total imports		$589,908,729
Exports domestic merchandise	$445,542,607	
Exports foreign merchandise	14,789,007	
Exports domestic bullion and specie	65,632,342	
Exports foreign bullion and specie	12,009,128	
		537,973,084
Excess of imports		$51 935.645

If we leave out of view our imports and exports of foreign specie and bullion, and regard our exports of domestic specie and bullion as we would grain, cotton or any other product of our domestic industry, the account will stand as follows:

Total imports of merchandise		$572,509,314
Total exports of merchandise	$460,331,614	
Exports domestic specie and bullion	65,632.342	
		525,963,956
Adverse balance		$46,545,358

The foreign specie and bullion accounts stand as follows:

Imports	$17,399 415
Exports	12,009,128
Excess of imports	$5,390,287

Baltimore and Ohio Railroad Extension.

Articles of association of the Baltimore, Pittsburg and Chicago Railway Company, Indiana division, were filed on the 18th instant in the office of the Secretary of State, Indianapolis; capital stock $2,000,000. Wm. Keyser, Walter C. Quincy, George R. Dennis, John Gardiner, T. Harrison Garrett, Wm. W. Taylor and John R. Cowen constitute the present board of directors. It is proposed to extend the line from a point on the eastern boundary of Indiana, opposite Defiance county, Ohio, through the counties of De Kalb, Noble, Kosciusko, Elkhart, Marshall, St. Joseph, Laporte, Porter and Lake, to a point in the northwest corner of Lake county a distance of about 145 miles. Most of the corporators are residents of Baltimore. This is the Chicago extension of the Baltimore and Ohio road.

☞ The Madison *Advertiser* of 8th inst., says that Col. Boynton, acting President of the Griffin, Monticello and Madison Railroad, is actively pushing his road through, as the grading for twenty miles will be completed within two weeks, and the cross-ties are laid along the entire route, and everything is now ready for the iron, and that the Colonel will leave within the next ten days to visit New York, where he proposes to purchase the iron.

☞ The Port Deposit and Columbia (Md.,) Railroad is now graded and ready for the rails as far as the State line.

☞ The railroad between Gloversville and Northville, in Fulton Co., N. Y., will shortly be commenced.

RAILROAD EARNINGS—MONTHLY.

Consolidation of the Central Railroad of New Jersey with the Delaware, Lackawanna and Western.

The consolidation of the Central Railroad Company of New Jersey with the Delaware, Lackawanna and Western Railroad Company is estimated to bring under one control property of an aggregate value of about $120,000,000. The Delaware, Lackawanna and Western Railroad is a double-tracked road, running from The Junction, near Washington, N. J., through Scranton, Pa., to Binghamton, N. Y., and includes the roads formerly known as the Warren Railroad andthe Valley road. Its length is 145 miles; its capital, $20,000,000; its outstanding bonds, $11,000,000. It owns the newly built Boonton branch, 32 miles in length; the Syracuse and Binghamton Railroad, 80 miles long, and the Lackawanna and Bloomsburg Railroad, also 80 miles in length. It controls, by lease, the Morris and Essex Railroad, from Hoboken to Easton, Pa., 84 miles, 71 of which is double-tracked with the Newark and Bloomfield and Chester Railroad. The Utica division—leased and purchased lines—extends from Binghamton to Utica, 98 miles; the Oswego and Syracuse Railroad, 35 miles, and the Cayuga and Susquehanna road, from Owego to Ithaca, 33 miles, are also operated by the Delaware, Lackawanna and Western Company. The cost of these several roads is represented as follows:

	miles.	
Delaware, Lacka. and Western	145	$31,000 000
Morris and Essex and branches	131	26.000.000
Syracuse and Binghamton	80	4,000.000
Lackawanna and Bloomsburg	80	4,000.000
Oswego and Syracuse	35	1 500,000
Utica Division	98	4 000.000
Cayuga and Susquehanna	33	1,500,000
Total	602	$72,000,000

The Delaware, Lackawanna and Western Railroad Company also owns about 25,000 acres of valuable coal lands, from the products of which a large amount of the business of the road is derived.

The Central Railroad of New Jersey is double-tracked, and extends from Communipaw to Phillipsburg, N. J., branching out to Flemington on the south and Newark on the north, and connected at its western terminus with the Lehigh and Susquehanna Railroad. The latter road, which was leased last year by the Central Railroad Company, is 105 miles in length, extending from Phillipsburg through the Lehigh Valley and across the mountains into the Great Wyoming Valley coal region.

The two companies have joined their fortunes together upon equal terms—the capital stock of each being the same, $20,000,000; each shares alike in the profits. By carrying through passengers over one line instead of two, by avoiding as far as possible the delays incident to passing the Bergen Tunnel, and by uniformity of tariffs, the companies hope to save largely. The roads will be under the direction, as before, of their presidents. Mr. Samuel Sloan and Mr. John Taylor Johnston, while a joint board, to be composed of these gentlemen with five directors from each company, with General John Brisbin as chairman, will control the general policy of the companies.

☞ Articles of association were filed in the office of the Secretary of State, at Albany, on the 16th inst., providing for the construction of a railroad from Whitehall to Rouse's Point, a distance of 128 miles, and to run along the west shore of Lake Champlain. The road is to cost four million dollars. The directors are John A. Griswold of Troy, C. F. Norton and Andrew Williams of Plattsburgh, I. V. Baker of Comstock's Landing, Samuel Ames of Keeseville, W. W. Cooke of Whitehall, Abiel A. Lord and L. G. B. Cannon of New York, George B. Warren, G. H. Cramer and W. A. Shepard of Troy, Thomas Dixon of Scranton, Pa., and Geo. Talbot Olyphant of New York.

Erie Railway.

OFFICES ERIE RAILWAY COMPANY,
NEW YORK, March 15, 1872.

To the Stockholders of the Erie Railway Company:

The Undersigned, the Executive Committee of this company, to whom was referred by the Board of Directors the report of J. D. WHITE, Assistant Treasurer, have to report that the following appears from the books of said company to be a correct statement of the financial condition of this company at this date.

(signed) JOHN A. DIX,
HOMER RAMSDELL,
O. H. P. ARCHER,
W. R. TRAVERS,
SAMUEL S. M. BARLOW,
Executive Committee.

Avon and Genesee Valley Railroad	30,700
Monticello and Port Jervis Railroad	10,000
National Stock Yard Company	50,000
Erie preferred	5,000
Suspension Bridge and Erie Junction Railroad	61,500
Rochester and Genesee Valley Railroad.	149 400
Union Steam-boat Company	778,800
Total	$7,594,400

—estimated worth $6.174,100.

The company owns also the following bonds and stocks, the market value of which the committee have been unable to ascertain:

Glenwood Coal Company bonds	875,000
Towanda Coal Company bonds	208,000
Towanda Coal Company stock	446.000
Erie and Atlantic Sleeping Coach Co.	109.000
Union Dry Dock Company	75,000
Total assets	$8,806,400

Grindstones.

BY J. E. MITCHELL, PHILA.

Probably the oldest grindstone establishment in the United States is located in Philadelphia where this business is followed as a specality, and consequently the greatest attention is paid to the selection of grists suited to the various purposes of the machine shop and factory, and it is only of late years that this tool has been considered of any importance, whereas without it, our Machinists and Manufacturers would be compelled to stop. The use of the grindstone is not now merely confined to the sharpening of edge tools of various kinds, but is extensively used for finishing of wrought and cast iron work of all kinds, especially in the manufacture of locomotives, thereby saving the heavy expense of files, and leaving the surface in a better condition for receiving the finishing touches of paint, varnish, &c. They are also used for grinding off the faces of cast iron pulleys, and shafting, and doing the work better and cheaper than with the turning tool—in fact there is no limit to the uses of this valuable article, and the following hints may be of use in guiding those who make use of them, to do so in the best and most economical manner.

1st. Don't waste the stone by running it in water, but if so, don't allow it to stand in water when not in use, as this will cause a soft place.

2nd. Wet the stone by dropping water on it from a pot suspended above the stone, and stop off the water when not in use.

3rd. Don't allow the stone to get out of order, but keep it perfectly round by the use of a piece of gas pipe, or a hacker.

4th. Clean off all greasy tools before sharpening, as grease or oil destroys the grit.

5th. OBSERVE—When you get a stone that suits your purpose, send a sample of the grit to the dealer to select by, a half ounce sample is enough, and can be sent in a letter by mail.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."
